BABBITT METALS.—SIX IMPORTANT FORMULAS. SCIENTIFIC AMERICAN SUPPLEMENT 1123. Price 10 cents. For sale by Munn & Co., Inc., and all newsdealers. Send for catalogue.

A CLEAN, COOL, SWEET SMOKE WITHOUT INJURY

Tobacco not touched by the nicotine tar, which falls to bottom of bowl, nor saliva, which is trapped in bottom of smoke passage. Smoke leaves the stem at top of lip, hence does not draw against tongue. Our invention also makes cleaning easy and ensures a cool, clean and healthful smoke.

The Sanitary Pipe
eliminates the objectionable features of pipe smoking without sacrificing appearance or utility. Best quality briar bowls, solid rubber stem, nickel-trimmed. Sent by mail, postpaid, for a dollar bill. Moneyback if you prefer it to the pipe.
SANITARY PIPE CO.,
147 Cutler Bldg., Rochester, N. Y.

Concrete Reinforced Concrete —AND— Concrete Building Blocks

Scientific American Supplement 1543 contains an article on Concrete, by Brysson Cunningham. The article clearly describes the proper composition and mixture of concrete and gives results of elaborate tests.

Scientific American Supplement 1538 gives the proportion of gravel and sand to be used in concrete.

Scientific American Supplements 1567, 1568, 1569, 1570, and 1571 contain an elaborate discussion by Lieut. Henry J. Jones of the various systems of reinforcing concrete, concrete construction, and their applications. These articles constitute a splendid text book on the subject of reinforced concrete. Nothing better has been published.

Scientific American Supplement 997 contains an article by Spencer Newberry in which practical notes on the proper preparation of concrete are given.

Scientific American Supplements 1568 and 1569 present a helpful account of the making of concrete blocks by Spencer Newberry.

Scientific American Supplement 1534 gives a critical review of the engineering value of reinforced concrete.

Scientific American Supplements 1547 and 1548 give a resume in which the various systems of reinforced concrete construction are discussed and illustrated.

Scientific American Supplement 1564 contains an article by Lewis A. Hicks, in which the merits and defects of reinforced concrete are analyzed.

Scientific American Supplement 1551 contains the principles of reinforced concrete with some practical illustrations by Walter Loring Webb.

Scientific American Supplement 1573 contains an article by Louis H. Gibson on the principles of success in concrete block manufacture, illustrated.

Scientific American Supplement 1574 discusses steel for reinforced concrete.

Scientific American Supplements 1575, 1576, and 1577 contain a paper by Philip L. Wormley, Jr., on cement mortar and concrete, their preparation and use for farm purposes. The paper exhaustively discusses the making of mortar and concrete, depositing of concrete, facing concrete, wood forms, concrete sidewalks, details of construction of reinforced concrete posts.

Each number of the Supplement costs 10 cents.
A set of papers containing all the articles above mentioned will be mailed for \$1.80.

Legal Notices

PATENTS

INVENTORS are invited to communicate with **Munn & Co., 361 Broadway, New York, or 625 F Street, Washington, D. C.,** in regard to securing valid patent protection for their inventions. Trade-Marks and Copyrights registered. Design Patents and Foreign Patents secured.

A **Free Opinion** as to the probable patentability of an invention will be readily given to any inventor furnishing us with a model or sketch and a brief description of the device in question. All communications are strictly confidential. Our **Hand-Book** on Patents will be sent free on request.

Ours is the **Oldest** agency for securing patents; it was established over sixty years ago.

MUNN & CO., 361 Broadway, New York
Branch Office, 625 F St., Washington, D. C.

INDEX OF INVENTIONS

For which Letters Patent of the

United States were Issued

for the Week Ending

September 7, 1909,

AND EACH BEARING THAT DATE

[See note at end of list about copies of these patents.]

Acetone, manufacture of, Pages & Duchemin	933,107
Adding and number-listing machine, B. Hoskins	933,453
Adjustable frame, A. Perriere	933,328
Adjustable pattern, M. Bogushofsky	933,523
Advertising machine, J. W. Silver	933,272
Aeromotor, S. H. Gilson	933,548
Agricultural implement, E. M. Newell	933,573
Air, apparatus for separating oxygen from, J. E. Johnson, Jr.	933,462
Air propeller, H. Otto	933,199
Alarm signal, electric, H. J. Hovey	933,369
Alloy, antifriction, E. A. Touceda	933,139
Amusement and advertising device, combined, P. Smith	933,495
Amusement device, B. Hess	933,445
Amusement device, centrifugal, H. N. Ridgway	933,585
Ash handling apparatus, Smalley & Hatton	933,129
Axle, vehicle, C. T. Cullison	933,293
Bag, J. G. Noren	933,332
Bag punching machine, coin controlled, A. L. Nevels	933,330
Banana shipping case, P. J. Schmitz	933,206
Bank, registering, A. Rittelman	933,205
Barrel, C. N. Johnson	933,307
Basin alarm, catch, M. F. Deinger	933,237
Bean separator, C. A. Croel	933,629
Bearing, roller, O. E. Michaud	933,320
Bearing, thrust, F. H. Courtney	933,627
Beater, B. Hunkler	933,646
Bed, invalid, F. W. Mitchell	933,323
Bed joint, metal, J. M. Adams	933,355
Bed spring, A. M. Beymer	933,615
Beehive, Weaver	933,606
Beet puller, E. A. Smith	933,352
Beet topper, H. E. Arthur	933,687
Beit, abdominal, E. Nickum	933,101
Beveling machine, V. Royle	933,343
Bin, See Grain bin	
Blinder post attachment means, R. Krumming	933,714
Bit, M. R. Sibbitt	933,396
Bit stock, C. R. Frink	933,639
Blue-print washer, H. C. Gawler	933,640
Boat, A. Niedringhaus	933,331
Boat, C. S. Frost	933,426
Boats, driving gear for submarine, F. M. Leavitt	933,083
Boiler stand, range, C. R. Schmidt	933,119
Boiler tube cleaner, J. Zilliox	933,519
Boiler water gage, steam, D. Dahlstedt	933,236
Book, manifold order or sales, L. G. Whitney	933,513
Boring machine, W. T. Sears	933,124
Bottle capping machine, H. S. Bravington	933,057
Bottle case of crate, Krause & Doran	933,184
Bottle case or crate, Rice & Adams	933,206
Bottle filling machines, bottle guide for, A. F. Zeller	933,518
Bottle, non-refillable, J. Burnstein	933,530
Bottle rest for filling machines, J. H. Champ	933,362
Bottle top, milk, C. F. Edlund	933,636
Bottles and the like, detachable handle for, Leh & Helick	933,085
Bottles, machine for manufacturing glass, T. W. Simpson	933,590
Bottling machine, J. H. Champ	933,361
Bottling machine, milk, Strandt & Niemann	933,678
Box, L. J. Merrigan	933,259
Box opener, E. J. Collette	933,364
Box opener, H. F. Wittig	933,410
Box press, fruit, N. T. Nelson	933,660
Boxes for nailing, machine for holding fruit, Woodruff & Macy	933,282
Braiding machine, R. C. Rahm	933,339
Braiding machine, sectional, R. C. Rahm	933,340
Bread box, R. W. Jorres	933,711
Brick burning apparatus, W. B. Chapman	933,419
Brick, mechanism for cutting wire cut, F. B. Dunn	933,536
Broom holder, H. W. Merrill	933,260
Brush and comb, combination, Kohler & Bleiker	933,567
Brush, fountain, A. A. Long	933,477
Bucket, clam shell, H. E. Huntsberry	933,455
Bucket, collapsible bait, W. L. Wilson	933,216
Building construction, L. K. Davis	933,163
Bundle carrier for binders, I. F. Cole	933,160
Bunion guard, W. H. De Ford	933,423
Butter and lard cutter, C. H. Carlson	933,621
Butter and milk merging apparatus, B. N. Hawes	933,528
Calculating machine, C. L. Nelson	933,486
Camera attachment, Korinko & Asp	933,312
Camera back, R. Kroedel	933,470
Can cover, B. J. Hartwell	933,302
Can top, tin, E. Norton	933,103
Cans, manufacturing sheet metal, E. Norton	933,104
Car and heating appliance, freight, W. E. Eastman	933,241
Car buffer plate, railway, H. Pearson	933,721
Car buffer, railway, P. Reconi	933,204
Car, convertible, M. Rounds	933,268
Car coupling, C. A. Tower	933,602
Car door and step operating means combined, railway, M. O'Brien	933,574
Car draft and buffing gearing, railway, E. I. Philipp	933,201
Car roof, Warren & Herbert	933,143
Car, wrecking, J. W. Dasher	933,631
Cars, connecting hose for railway, E. Witzzenmann	933,516
Carbureted air apparatus, F. B. Dennie	933,064
Cards and the like, mounting pocket for, W. Schanke	933,117

JOSH BILLINGS said that "the only thing some underwear is good for is to make a fallow scratch and forget his other troubles."

THAT WAS BEFORE THE DAY OF

Wright's Health Underwear

It is the fleece of comfort, and can't scratch

Keeping out the cold and keeping in the bodily heat is only the beginning of the good work of Wright's Health Underwear. It stands guard over the sensitive skin, preventing that sudden closing of the pores which causes colds, coughs, and congestion in various parts of the body.

Wright's Health Underwear, made by a recent process, of selected high-grade wool, is the best on the market. Yet it is in reach of people of moderate means. Not a fad, just a sensible "loop-knit" woolen garment, lined with the fleece of comfort.

Wright's SPRING NEEDLE Ribbed Underwear

Is a product based upon the need of an underwear with an unusually wide range of elasticity. It is knit on patented improved Spring Needle Knitting Machines, which produce a fabric of wonderful elastic properties. It is so constructed that it yields to fit perfectly any form, and when taken off the body resumes its normal shape and size. Made in beautiful fabrics of cotton, also wool.

Inquire at your dealer's for WRIGHT'S Underwear and always look for the woven label trade-mark.

"Dressing for Health," a valuable booklet free.

WRIGHT'S HEALTH UNDERWEAR CO., 86 Franklin St., N. Y.

Wizard Mono-Rail Jumping Top

Travels 100 Feet on Inclined Wire, Revolves 10,000 Times a minute with One Pull of the Cord. Any Child can do it.

This Marvelous Top apparently defies the fixed laws of gravity and equilibrium. It will spin in any position with its center line at any angle to its line of gravity. Spins on the tip of finger, end of nose, edge of tumbler, etc.

SEE IT JUMP FROM THE SHELL?

Perfect demonstration of the railroad of the future. String the wire tight, start the top spinning in carriage on inclined wire and it will travel entire length. Illustrates motion of earth through its orbit. Baffles Science, delights children, astounds adults. The more you spin it the more it will puzzle you. Ask Your Dealer.

Style A, Complete Outfit, 50c, or by mail 6c. extra.
Style B, Superior Quality, \$1.00 postpaid.

Wizard Top, accurately made of cold rolled steel, with turned steel bearings and heavy cast leaguered wheel; wood pedestal, winding cord, brass ring, nickleed mono-rail, two-wheeled carriage, steel wire track, wooden egg, with illustrated directions.

WIZARD PATENT DEVELOPING CO., Dept. 5, 125-T, West 51st St., New York

MEN WANTED

1200 men \$6.92 profit average per day

Selling "WEAR-EVER" Aluminum Specialties

Half of these men had no previous experience. Work made pleasant by our 176 page instruction Book. No door-to-door canvassing. Let us show you what others have done. Address **The Aluminum Cooking Utensil Co., Desk 25, Pittsburg, Pa.** Opportunity knocks, but don't expect the door to be kicked in.

ASHMEAD STAY ON SILVER BROOM HANGER

Experienced broom users should use the most practical Broom Hanger, best up-to-date on the market. Hardware or grocery stores. Different sizes, 2 prices.

J. H. ASHMEAD, Lake George, N. Y.

South America

and the STRAITS OF MAGELLAN, BRAZIL, ARGENTINE, URUGUAY and CHILI

First Grand Cruise by Twin Screw S.S. BLUECHER

Leaving New York January 22, 1910. Duration 81 days.

COST \$350

including all necessary expenses aboard steamer.

This high class cruise permits of no overcrowding and assures absolute comfort and safety.

HAMBURG-AMERICAN LINE
45 BROADWAY, NEW YORK
Boston, Philadelphia, St. Louis, Chicago, San Francisco

Cruises de Luxe

TO West Indies and Spanish Main

By R. M. S. P. "AVON," 11500 tons TWIN SCREW

From New York Jan'y 15th, Feb'y 19th and March 25th

18 Days, \$85 31 Days, \$150

Visiting Bermuda, Porto Rico, Jamaica, Isthmus of Panama, Venezuela, Trinidad, Barbados, Martinique, Cuba and Nassau.

Send for "Avon" booklet; also particulars of Yachting Tours through the West Indies and Bermuda service.

SANDERSON & SON, Agents, 22 State Street, New York

Blame the Strop!

How about the strop behind your razor? How about your ability to use it? Is every shave a pleasure now?

The NEVER FAIL sharpens any razor—does it better and in less time than a hand expert can, and gives the keenest, smoothest cutting edge you ever saw.

A Western bank president (name on application) writes: "Have used one... blade over six weeks, and I shave daily. One box of blades with your stropper should last a lifetime. Wouldn't part with mine for \$50."

WILL YOU TRY IT FOR 15 DAYS?

Money back if you want it—ask any bank in this city as to our responsibility.

Put on the market only four months ago, after years' of experimenting, thousands of NEVER FAIL STROPPERS sent out on trial have triumphantly proved their worth in every state in the Union. The combination of a perfect strop with an infallible, automatic action is a real necessity for every man who shaves—or should shave. Every consideration of economy and personal comfort urges you to supply yourself today.

Every user of safety razors knows that mighty few—if any—of his blades are actually fit to use until they are stropped. The NEVER FAIL will make every one of them good for from 50 to 150 perfect shaves, so it pays for itself in money as well as time saved.

Order by number, with the coupon below.

No. 1—for every style of safety

No. 2—for the old style razor

"The Thurman"

A Portable Electric Vacuum Cleaner that CLEANS

NOT A TOY BUT IN EVERY SENSE OF THE WORD A MACHINE

Built by the originator and the oldest and largest manufacturer of vacuum cleaning machinery in the world, and used by the most particular people. Guaranteed to do thorough and efficient work. Write for booklet giving full particulars and prices.

GEN'L COMPRESSED AIR & VACUUM MACHINERY CO.
Dept. S. A., 519 No. Taylor Ave., St. Louis, Mo., U. S. A.
(Representatives wanted in every community)

Made in the largest and most up-to-date plant in the world devoted exclusively to the manufacture of two-cycle marine motors.

Wire your order and have motor shipped same day
This is only possible because of our enormous output.

Write for our beautiful three-color catalog—it's an education in marine motors.

Stocks of Gray Motors carried in Boston, New York, Philadelphia, Baltimore, Norfolk, New Orleans, St. Louis, Chicago, Los Angeles, San Francisco, Seattle, Toronto and St. Johns.

GRAY MOTOR CO., 11 Leib Street, Detroit, Mich.

THE INTERNAL WORK OF THE WIND. By S. P. LANGLEY. A painstaking discussion of the leading authority on Aerodynamics, of a subject of value to all interested in airships. **SCIENTIFIC AMERICAN SUPPLEMENTS 946 and 947.** Price 10 cents each, by mail. Munn & Co., Inc., 361 Broadway, New York City, and all newsdealers.

HANDY IN EVERY HOME

Everybody who sees this useful and pretty little novelty wants one of the **Excelsior Combination Tweezers and Magnifying Glass**

No toy, but a practically useful article that is indispensable in every household. A powerful magnifying glass enlarges the object; the tweezers are to work on, rendering it easy to extract splinters or hairs. Nickel plated and highly polished. Also useful for mill workers, jewelers, botanists, physicians, etc.

By mail 15, 35 and 50c., 3 sizes
A. Kleinman, Sole Mfr., 250 8th Ave., N. Y.

The New High Class Watch
Ingersoll-Trenton

A high-grade watch manufactured by the money-saving systems of the Ingersoll Dollar Watch. Has every feature of the most expensive watches. Closest timekeeper anyone hand-maker made; will wear 20 years. Buy it from any responsible jeweler right in your own locality or prepaid by us. Write for Booklet C.

Four Beautiful Out-of-Doors Pictures FREE!

To every reader of this periodical who loves nature and animals and out-door life we will send, without charge, four beautiful pictures. They are printed on heavy art paper, without lettering, and are wonderful examples of the art of color photography. Framed at moderate cost, they will make excellent decorations for your home; or they can be used just as they are. Size 10 1/2 x 7 1/2 inches.

We send these pictures to advertise our *Standard Library of Natural History*, which has just been completed after years of labor and at enormous expense. It contains over 2,000 illustrations from actual photographs. In many cases these photographs were secured by special expeditions sent to foreign lands for that purpose.

Your application for the pictures will impose no obligation to purchase the Library. Neither will you be bothered by agents or canvassers.

As an evidence of good faith, enclose 10 cents (silver or stamps) for wrapping and postage. This will be refunded if you request it after examining the pictures. When writing, mention this periodical.

Morton R. Edwin Panatelas

\$2.40 per hundred instead of \$5.00

By all standards of comparison this is a 10c. cigar. It will satisfy the most cranky smoker of imported brands. It is fully 5 1/2 in. long, strictly hand made, of choicest Havana tobacco—genuine Sumatra wrapper. It smokes freely and evenly—never charrs down the side, but keeps burning coolly and fragrantly to the last tooth-hold.

The reason this cigar is sold at \$2.40 instead of \$5.00 per hundred is because I buy and sell for cash. I ask no credit, neither do I give it. I personally buy my tobacco direct from the grower in Cuba and pay him at least five weeks before the tobacco reaches the U. S. Custom House. I buy for less and sell for less. I believe in what Elbert Hubbard said in April, 1907, issue of the *Philistine*:

"A Credit Account is the most insidious form of borrowing money. When you don't pay the merchant at once for the goods you buy from him, you are borrowing money from him, and disguised in the price is much more than the legal rate of interest. Better to borrow the actual cash and know how much you have to pay for the accommodations; but it is better still to practice self-denial and go without the thing you want till you have the cash to pay for it."

"All the losses of the merchants who give credit are made good by the people who pay."

"The merchant who gives credit is not in business for his health any more than the pawnbroker is."

Among my 35 different brands I have an "in between" smoke called "Old Fashioned Havana Smokers." I want you to be on smoking terms with them, because they are just the thing you want when you don't want a big cigar. They are Havana filled—4 inches long—blunt at both ends—made the way the Cuban planter rolls tobacco for his own use—without a binder.

I'm so eager to have you try this smoke that I'll send you a sample box of 12 free along with an order for my Panatelas, because you will buy them again.

Send me \$2.40 for 100 Morton R. Edwin Panatelas. Smoke as many as you like—smoke them all if you want to, and if you then tell me that you didn't receive more than you expected, I'll return your money and we'll remain friends.

If you want to know who I am and whether or not I run my business on the square, if you have any doubts as to my making good if my cigars don't, just inquire from any bank or commercial agency about me. If you don't like the report you get, keep your cash at home.

Illustrated price-list sent on request.

BLACKSTONE A BIG PENCIL FOR BIG MEN

Most pencils are made to sharpen, this one is made to write. Blackstones are for men too busy to fuss. You don't care that we mellow the graphite six months, test every lead, case the lead in Florida cedar. This is a pencil that works all day without tiring your hand. Newspaper men use it. Lawyers use it. Ministers swear by it. Business men and business women owe themselves a trial of it. Sample sent for 10c. Stationers sell them.

To be published about October 20th

Three New Interesting Books

The Scientific American Boy at School

By A. RUSSELL BOND

12mo. 320 Pages. 300 Illustrations. Price \$2.00 postpaid.

THIS book is a sequel to "The Scientific American Boy," many thousand copies of which have been sold, and has proven very popular with the boys. The main object of the book is to instruct how to build various devices and apparatus, particularly for outdoor use. The construction of the apparatus is fully described and the instructions are interwoven in a story, a feature which has assisted in making the "Scientific American Boy" so popular and interesting to the boy.

It takes up the story of "Bill" and several of his companions at boarding school. They form a mysterious Egyptian society, whose object is to emulate the resourcefulness of the ancients. Their Chief Astrologer and Priest of the Sacred Scarab is gifted with unusual powers, but his magic is explained so that others can copy it. Under the directions of the Chief Engineer, dams, bridges and canal locks are constructed. The Chief Admiral and Naval Constructor builds many types of boats, some of which are entirely new. The Chief Craftsman and the Chief Artist also have their parts in the work done by the Society, over which Pharaoh and his Grand Vizier have charge. Following is a list of the chapters:

- Chapter I, Initiation; Chapter II, Building a Dam; Chapter III, The Skiff; Chapter IV, The Lake House; Chapter V, A Midnight Surprise; Chapter VI, The Modern Order of Ancient Engineers; Chapter VII, A "Pedal Paddle-Boat"; Chapter VIII, Surveying; Chapter IX, Sounding the Lake; Chapter X, Signaling Systems; Chapter XI, The Howe Truss Bridge; Chapter XII, The Seismograph; Chapter XIII, The Canal Lock; Chapter XIV, Hunting with a Camera; Chapter XV, The Gilding Machine; Chapter XVI, Camping Ideas; Chapter XVII, The Heated House; Chapter XVIII, Sun Dials and Clocks; Chapter XIX, The Fish-Tail Boat; Chapter XX, Type Photography; Chapter XXI, Water Tights and Current Sailing; Chapter XXII, The Wooden Canoe; Chapter XXIII, The Bicycle Sleigh; Chapter XXIV, Magic; Chapter XXV, The Sailboat; Chapter XXVI, Water Sports, and Chapter XXVII, A Geyser Fountain.

Handy Man's Workshop and Laboratory

Compiled and Edited by A. RUSSELL BOND

12mo. 400 Pages. 350 Illustrations. Price \$1.50 postpaid.

EVERY practical mechanic, whether amateur or professional, has been confronted many times with unexpected situations calling for the exercise of considerable ingenuity. The resourceful man who has met an issue of this sort successfully seldom, if ever, is adverse to making public his methods of procedure. After all he has little to gain by keeping the matter to himself and, appreciating the advice of other practical men in the same line of work, he is only too glad to contribute his own suggestions to the general fund of information.

About a year ago it was decided to open a department in the Scientific American devoted to the interests of the handy man. There was an almost immediate response. Hundreds of valuable suggestions poured in from every part of this country and from abroad as well. Not only amateur mechanics, but professional men as well were eager to recount their experiences in emergencies and offer useful bits of information, ingenious ideas, "kinks" or "kinks," as they are called. Aside from these, many valuable contributions came from men in other walks of life—resourceful men, who showed their aptness at doing things about the house, in the garden, on the farm. The electrician and the man in the physics and chemical laboratory furnished another tributary to the flood of ideas. Automobiles, motor cycles, motor boats and the like frequently call for a display of ingenuity among a class of men who otherwise would never touch a tool. These also contributed a large share of suggestions that poured in upon us. It was apparent from the outset that the Handy Man's Workshop Department in the Scientific American would be utterly inadequate for so large a volume of material; but rather than reject any really useful ideas for lack of space, we have collected the worthier suggestions, which we present in the present volume. They have all been classified and arranged in eight chapters, under the following headings:

- I, Fitting up a Workshop; II, Shop Kinks; III, Soldering of Metals; IV, The Handy Man in the Factory; V, The Handy Man's Experimental Laboratory; VI, The Handy Man's Electrical Laboratory; VII, The Handy Man About the House; VIII, The Handy Sportsman.

Concrete Pottery and Garden Furniture

By RALPH C. DAVISON

Assistant Secretary Concrete Association of America

12mo. 200 Pages. 150 Illustrations. Price \$1.50 postpaid.

THIS work should appeal strongly to all those interested in ornamental concrete, as the author has taken up and explained in detail in a most practical manner the various methods of casting concrete in ornamental shapes. The titles of the thirteen chapters which this book contains will give a general idea of the broad character of the work. They are entitled:

- I, Making Wire Forms and Frames; II, Covering the Wire Forms and Modeling the Cement Mortar into Form; III, Plaster Molds for Simple Forms; IV, Plaster Molds for Objects Having Curved Outlines; V, Combination of Casting and Modeling—An Egyptian Vase; VI, Glue Molds; VII, Colored Cements and Methods Used for Producing Designs with Same; VIII, Selection of Aggregates; IX, Wooden Molds—Ornamental Flower Pots Modeled by Hand and Inlaid With Colored Tile; X, Concrete Pedestals; XI, Concrete Benches; XII, Concrete Fences; XIII, Miscellaneous, Including Tools, Waterproofing and Reinforcing.

The first two chapters explain a most unique and original method of working pottery which has been developed by the author. The chapter on color work alone is worth many times the cost of the book inasmuch as there is little known on this subject, and there is a large and growing demand for this class of work. The author has taken for granted that the reader knows nothing whatever about the material and has explained each progressive step in the various operations throughout in detail. These directions have been supplemented with half-tones and line illustrations which are so clear that no one can misunderstand them. The amateur craftsman who has been working in clay will especially appreciate the adaptability of concrete for pottery work, inasmuch as it is a cold process throughout, thus doing away with the necessity of kiln firing, which is necessary with the former material. The book is well gotten up, and is printed on heavy glazed paper and abounds in handsome illustrations throughout, which clearly show the unlimited possibilities of ornamentation in concrete.

Send your orders now, and a copy of the book desired will be mailed on the day of publication.

MUNN & CO., Inc., Publishers, 361 Broadway, New York

A Failure at Fifty

Out of a job at fifty—is the fate of the untrained man. Business requires not only natural ability but special training.

The Trained Man Can Defy Old Age

The American School of Correspondence can fit you for congenial, well-paid positions in your early years, and make your services valuable in your old age. Training only can compensate for the energy of youth.

For thirteen years the School's Engineering Courses have set the standard for thoroughness and practicalness in correspondence instruction. The School has trained thousands of men for the technical professions, or has advanced them to higher positions. To-day these courses represent the highest development of correspondence teaching.

The Courses in Commerce, Accountancy and Business Administration

set the same high standard in the commercial world. They prepare for the best-paid business positions; they are prepared by practical business men who have "made good" by practicing what they teach; they are planned to meet the needs of both the young man who is just starting in, and the older man who has almost "arrived."

Get your training now, while you have the time and energy for study. Mail the coupon to-day.

THE BEST LIGHT. EVERY one is a self-contained miniature light works. 100 to 2000 candle power. Costs less than kerosene. Absolutely safe Very brilliant Powerful and Steady. Every lamp warranted. Over 200 styles. Agents wanted. Catalog free. Write to-day. The Best Light Co. 87 E. 5th St. Canton, O. MAKES AND BURNS ITS OWN GAS.

Government Homesteads

Over one and one half million acres of land open for settlement in Cheyenne River and Standing Rock Indian Reservations, October 4th to 23rd.

Registration at Pierre and Aberdeen, S. D.

Direct route to registration points is the Chicago & North Western Ry. Special low homeseekers' round trip rates.

This land is well watered by the Cannon Ball, Grand, Moreau and Cheyenne Rivers and their tributaries. The soil is a light loam, fertile and makes a good grain producing land. The land must be lived on and improved. A low valuation of from 50 cents to \$6.00 per acre has been placed on the land by the Government, arranged in easy annual payments covering a period of five years.

THE NORTH WESTERN LINE. The C. & N. W. Ry. prints a descriptive pamphlet, telling how to secure a homestead of 160 acres from the Government. Free copies on application. W. B. KNISKERN Passenger Traffic Mgr., C. & N. W. Ry., Chicago, Ill.

A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print issued since 1863, will be furnished from this office for 10 cents, provided the name and number of the patent desired and the date be given. Address Munn & Co., Inc., 361 Broadway, New York. Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., Inc., 361 Broadway, New York.

The Making of Men

The reasons given by most men for desiring to enter the Navy are: "To see something of the world"; "to learn a trade"; "to save money"; and—"To make a man of myself."

It is becoming more generally known that the Navy offers a steady, ambitious young man as good opportunities for a future career as he can obtain anywhere. When bluejackets are questioned regarding their opinion of the Navy after a few years' service, their most frequent answer is, "It made a man of me."

Navy training develops character. Under the Navy system of advancement, the worthy young man's progress is assured. He is given greater responsibility, with higher pay, as his capabilities increase. Inevitably he develops self-reliance; becomes quick and alert, resourceful and confident, with a military bearing and a clear brain—the natural accompaniment of a healthy life and a clean body. If the young man does not develop under Naval influences he lacks the qualities to "make good" anywhere.

But Navy training alone would not produce this result. The young man must come into the Navy with good principles, industrious, of temperate habits, a common school education, and a serious intention to stick to his job, whether he likes it at first or not. This is the type of youth the Navy appeals to, and shiftless characters need not apply.

Look for the address of the Navy Recruiting Office in the want columns of your Sunday papers. If you don't find it, write for illustrated Booklet describing duties, pay, privileges, etc., and for instructions how and where to apply. Address
