See "The Lathe and its Uses," and Knight's "Mechanism and Construction."

(32) N. N. B. asks: Does the north pole rise and the south pole sink from December 21 to June 21 (thus giving us the seasons), and vice versa from June21 to December 21? Cannot it be properly said that the earth has three motions namely, its diurnal rotation, its annual revolution, and its polar inclination? A. The earth's equator is always inclined 23° 17' to the plane of its path round the sun. To illustrate this, make two balls of wood or cork representing earth and sun. Put a wire axis through the earth at an angle of 23½° into the pivot of a hanging weight, fastened to a stick which turns in a vertical plane around the sun. The action of gravity will then keep the cork earth's axis continually pointing in the same direction.

(33) F. G. S. asks: How can I make a white paint that cannot be softened by sicohol? A. Mix any powdered white pigment with water glass.

Is there an optical instrument in use by which I can measure distances at a glance? A. Take a spy glass, a wooden rod, and a fat spider. Toss the spider from hand to hand to make him spin. Wind the thread spirally on a forked stick or wire. Gum two parallel spider lines on a ring of metal or card board, and place this ring in the focus of the tercestrial eyepiece. Mark the space included between the spider lines on the rod, 100 feet distant. Then as the space on rod included between the spider lines at 100 feet is to the space included at an unknown distance, so is 100 feet to the distance required. Simpler methods are described in Wingate's "Manual of Rifle Practice."

(34) A. F.—The sun's amplitude at summer solstice depends upon the obliquity of the ecliptic, and not upon his distance, as you suppose.

(35) A. S. asks: Is there any means by which I can render canvas or heavy muslin airtight, so as to make a pair of bellows? A. Yes. See p. 379, vol. 30. In the end, leather would be much the cheapest.

(36) J. F. and others ask, in reference to S. E. S.'s query as to where he would arrive if he took a northeasterly course: Will you please explain how a man would arrive at the pole by traveling this course? It is our opinion that he would not, but would travel in a spiral direction, approaching nearer and nearer, but never reaching the pole. A. S. E. S. would come nearer to the polethan any of the north pole expeditions, because if he kept sailing he would be nearer than any conceivable distance; and unless we suppose his ship to be an inconceivably small one, some part of it would eventually reach the pole.

(37) P. M. C.—The moon's axis, during the eclipse, was very much inclined to the horizon, the latter being inclined to the equator, besides the inclination caused by the obliquity of the ecliptic and the inclination of the moon's orbit. These three causes, with the moon's motion from west to east, account for all correct observations.

(33) F. A. W. says, in reply to S. C. H., who saks as to the philosophical reason that a circular saw cuts better at a certain speed than it does if run faster: Circular saws of over 40 or 50 inches in diameter are or should be hammered to run at a certain speed. This is more important when the speed is as high as from 700 or 900 revolutions per minute. If a saw is so hammered as to do good work at 300 or 400 revolutions per minute, it will not do as good work at 900, for the reason that the high speed expands the outside or rim, causing it to dish, or "flop a wund," as sawyers sometimes express it. In such cases, and when it is inconvenient to reduce the speed, it will be necessary to guide the saw out of the log so as to cause the central part to rub against the log enough to heat it slightly, thus expanding the portion that needs hammering. An expert sawyer can in this way manage indifferently well, though at an expense of considerably more power. A largesaw, to run well at high speed, should be hammered in the center part until it is slightly dishing, or, as it is variously expressed, "loose at the eye," or "rim-bound." It may be loose at the eye when It is the reverse of rim-bound, namely, too open at the rim, which is the most frequent trouble with suchsaws, and they all become so eventually from use, and then they should be re-hammered. I would not advise any one that has not had previous experience to undertake to hammer one, for the operation is a very delicate one, and requires considerable skill. A We have known of several cases in which large saws seemed to do equally well under considerable changes of velocity, and we imagine that saws are quite as often run at different speeds as at those recommended by the makers. Within limits, however, our correspondent's views are quite correct.

MINERALS, ETC.—Specimens have been received from the following correspondents, and examined, with the results stated:

A. J. R.—It is impossible to say whether a stone is lithographic, or suitable for printing from, from a small fragment.—H. C. T.—We have examined your queer specimen, but must request, before answering your questions, to know whether it is a manufactured or a natural product. How and where was it found? Is it genuine? If natural, has anything been done to alter it?—J. H. A.—The specimens contain iron pyrites in quartz.—We bave received two specimens in an envelope, without any letter. No. 1 is magnetic pyrites or pyrrhotine, containing 40 per cent of sulphur and 60 per cent of iron. No. 2 is a mixture of small scales of black mica, carbonate of lime, and a rock composed of silex, iron, and magnesia.

J. C. C. asks: If it is high water at the Battery, New York city, at noon, how high will the tide be at Albany?—A. B. asks: What is the source of the disagreeable odor of corduroy, when that fabric becomes wet from any cause?—J. H. M. asks: How is the cili finishput upon melodeons and sewing machines, and what kind of oil is used?

Clothes washer, E. Croweli. 158,039

Costin handle, D. Leonard. 158,035

Codin handle, D. Leonard. 158,035

Seeders, teet for, C. P. Hewett. 159,081

Separator, grain, W. F. Pumphrey. 158,122

Separator, grain, W. F. Pumphrey. 158,122

Compounds, anti-corrosive, A. K. Lee. 157,965

Separator, oat, H. Moore. 157,122

Sewing machine treadle, E. Pairo. 158,111

Sewing machine treadle, E. Pairo. 158,112

Source of the disagreeable odor of corduroy, when that could be at Albany (Compounds, anti-corrosive, A. K. Lee. 158,095

Separator, grain, W. F. Pumphrey. 158,112

Separator, oat, H. Moore. 157,122

Sewing machine treadle, E. Pairo. 158,111

COMMUNICATIONS RECEIVED.

The Editor of the SCIENTIFIC AMERICAN acknowledges, with much pleasure, the receipt of original papers and contributions upon the following subjects:

On the Crystallization of Carbon. Ay C. T. On Hydrophobia. By C. R. On a Suicidal Scorpion. By J. B. T. On the National Currency. By —. On Fruits and Electricity. By N. B. On a Withdrawn Charge. By C. G. F. On Gas Machines, By W. H. E. On Smoke Consumption. By O. F. M.

Also enquiries and answers from the following: S.-L. W.-J. B.-M.-H. V. M.-T. A. J.-A. J. N.-W. H. N.-H. T.-J. T. N.

HINTS TO CORRESPONDENTS.

Correspondents whose inquiries fall to appear should repeat them. If not then published, they may conclude that, for good reasons, the Editor decines them. The address of the writer should always be given.

Enquiries relating to patents, or to the patentability of inventions, assignments, etc., will not be published here. All such questions, when initials only are given, are thrown into the wastebasket, as it would fill half of our paper to print them all; but we generally take pleasure in answering briefly by mall, if the writer's address is given.

Hundreds of enquiries analogous to the following are sent: "Who sells the best gardeuseeds? Where can tobacco paper for fumigating greenhouses be obtained? Are there any agencies for imported raw silk in New York city? Who publishes the best work on electroplating? Whese book on mechanical drawing is considered the best?" All such personal enquiries are printed, as will be observed, in the column of "Business and Personal," which is specially set apart for that purpose, subject to the charge mentioned at the head of that column. Almost any desired information can in this way be expeditiously obtained.

[OFFICIAL.]

INDEX OF INVENTIONS

FOR WRICH

Letters Patent of the United States were

Granted in the Week ending December 22, 1874,

AND EACH BEARING THAT DATE.

[Those marked (r) are reissued patents.]

[Those marked (r) are reissued patents.]	
Atkalies, putting up caustic, A. K. Lee	
Alkalies, restoring spent, A. S. Lyman	
Auger, earth, A. S. Ballard (r)	
Auger hoist, earth, W. H. Beach	
Bagüiler, J. Cline	
Bale tie, cotton, R. M. Taylor	158,145
Bath apparatus, medicated, J. J. L. & P. A. Brémond	
Bee hive, M. Davis	158,045 157 006
Bellows, M. Doyle	157,910
Belting, making rubber, T. J. Mayali	157,921
Beverage or summer drluk, C. Nenmann	
Bird cage, J. Maxheimer	157,998
Blacking, harness liquid, J. A. Sefton	157,936
Blindstop, F. G. Boggs	157,983
Boilergusset connection, J. T. Connelly	158,097
Boiler watergage, C. C. Redmond	158.002
Boltor rod cutter, A. W. Gray	157,990
Bolts, machine for heading, A. Alexander Bookcloth, cutting, J. W. Jones	157,911 157 oca
Books with metal, stitching, E. D. Averen	
Boot and shoe, J. Lanham	158,093
Boot heel, L. W. Buxton	157,985
Bottle cleaner, J. R. Smith	
Bran duster, J. T. McNally (r)	6,183
Brush, tooth, M. A. R. Lowd	
Burner, Argandgas, S. G. Dare	
Burnishing machine, N. F. Mathewson	
Butterworker, J., A. J., & J. E. Lindbeck	153,097
Butterworker, A. Whitaker	158,159
Can seaming machine, J. H. Perkins	158,119
Caraxles, cooling, W. E. Tinney	158,151
Car coupling, N. H. Beal.	
Car coupling, L. C. Eaton	
Car coupling, W. H. Gruver	
Car coupling, H. Luther	158,100
Carcoupling, C. E. McCormick	
Car coupling, C. Surplice	
Car coupling, J. H. Wlehl	157,960
Car gear, railway, O. McC. Chamberlain	
Car ventilator, F. N. Clark	
Car wheel off box, Callahan & Gallagher	
Cars, lifting railroad, B. F. Phelps	
Carding machine teeth, L. M. Pichard	
Cartridge case, B. B. Hotchkiss	187,916
Caster stand, H. Schade	157.985
Casting, pattern for, S. Reynolds	158,127
Chair, reclining, E. Colins (r)	
Chuck, W. F. Toothaker	158,007
Churn dasher, R. M. Case	
Cigar box, C. A. Siecke	158,021
Clasp orbuckle, belt, B. F. Pike	157,946
Clevis, G. Sbelton	157,976
Clevis, L. E. Smith	
Cloth measure, H. Carlon	
Clothes washer, E. Croweli	158,039
Cosimining machine, G. M. Read	
Coilar, fur, A. D. Levy	
Column, iron, J. M. Cornell	157,906
Compounds, anti-corrosive, A. K. Lee	
Corp busics, D. Rabbit	157,969

Cultivator and seeder, M. Green	158,155 158,062
Curry comb, M. Sweet	157,991
Dress elevator, A. B. Smith (r)	6,184 158,060
Drill, portable rock, T. E. Mendenhall	157,969 158,009
Drill, well, Morgan & Kelly Electrotype mold, S. P. Knight Engine, automatic pumping, H. S. Maxim	158,113 157,965 158,105
Engine, rotary, A. C. Gallahue	158,058
Engine silde valve, steam, R. Goss Engine sparkextinguisher, Smith & Helmkee	158,061 158,006
Fabrics, creasing, J. Shepard Feathers, shaving, G. M. Richmond Fence, iron, Devoe & Walker	158,128
Filter, Hanck & Voegele	158,076
Fire escape, J. B. Gathright	157,912 157,978
Gaseller, drop light, F. C. Hamilton	158,109
Gearing, sbifting, M. Kolp	158,019
Glove, E. B. Whitney	158,008
Hame tug, J. W. Denton	158,046
Hammer, bush, H. H. Harvey	157,936
Harrow, D. T. Gillis	157,960
Harvester fingerbar, R. Dutton	157,918
Harvesting machine, J. F. Seiberling	158,079
Hay loader, C. W. Willams	157,954 158,136
Heating apparatus, G. H. Perkins	158,117
Hoop dressing machine, P. Flanders	157,959
Horse power, J. G. Taylor	158.078
Ironbars, etc., straightening, J. S. Seaman Key fastener, S. T. Proudman,	158,133
Kiln, progressive, F. E. Hoffman Knife sharpener, J. B. Bolinger	158,085 158,020
Knife, shoe, M. A. Tyler	158.069
Knife, table, J. O. Ely (r). Lamp, R. Marsh. Lamp lighter, head, S. M. Davies (r).	6,182
Lamp wicking, E. Waite	157,949
Lantern, street, J. M. Bruce	157,906
Leadinto bars, forming molten, W. A. L. Kirk Lead, cutting and slitting, W. A. L. Kirk	157,994 157,998
Leather dressing machine, O. C. Smith	158,132
Lime and cement, hardening, F. W. Colby Links, forming and welding, A. Alexander Lock for furniture, etc., H. Willard	158,010
Locomotive and car, H. Handyside	158,070

CANADIAN PATENTS.

LIST OF PATENTS GRANTED IN CANADA,

DECEMBER 11 to DECEMBER 23, 1874.

4,187...W. M. Conger ,Newark, Essex county, N. J., U.S. Improvements in metallic shields and supports for use under stoves and analogous articles of metal, and in machines for producing such metal work by spinning, called "Improvements in Metallic Shields and Supports for Use under Stoves and Analogous Articles of Metal, and in Machines for Producing such Metal Work by Spinning." Dec. 17, 1874.

by Spinning." Dec. 17, 1874. 4,188.—S. G. Smith, Hollis, York county, Me., U.S. Improvements in machines for removing snow from railroads, called "Smith" Improved Machinefor Removing Snow from Railroads." Dec. 18, 1874.

Snow from Ranfoads." Dec. 18, 1874.

4,189.—A. Webber, Detroit, Micb., U. S., and A. McCormick, London, Ont. Improvement in carriage springs, called "Michell's Carriage Spring." Dec. 18,1874.

4,190.—W. Irvine,Rochester, Monroe county, N.Y., U.S.,

and S. Trees, Toronto, Ont. Improvements on horsecollars, called "Irvine's Adjustable Horse Collar." Dec. 18, 1814.

191.—G. D. Chisholm and S. Dougiass, East Flamboro,

Wentworth county, Ont. Issefuldevice for preventing

horses from jumping, kicking, or running away, called Chisholm's Device for Preventing Horses from Jump

ing, Kicking, and Running Away." Dec. 1874. 4,192.—H. S. Cole, Milwaukee, Wis., U. S. Improve ments on a machine for regulating the supply of water to steam boilers, and for sounding an alarm whistle when the watertherein becomes dangerously low, called 'Cole's Water Reg later and Alarm for Steam Boller." Dec. 18, 1874.

4.193.—J. F. Gordon, Rochester, Monroe county, N. Y., U. S. Improvements on self-binding grain harvesters, called "Gordon's Self-Bluding Harvester." Dec. 19,

4,194.—D. Bissell, Detroit, Wayne county, Mich., U. S. Improvements on leg splints, called "Bissell's Leg Splint," Dec. 19, 1874.

1.193.—J. F. Gordon, Hochester, Monroe sounty, N. Y., U. S.—Improvements on seif binding grain harvesters, called "Gordon's Self Bluding Grain Harvester." Dec.

4,194.—D. Bissell, Detroit, Wayne county, Mich., U. S. Improvements on leg splints, called "Blssell's Leg Splint." Dcc. 19, 1874.

Splint." Dec. 19, 1874.
4.195.—G. C. Surls, Rochester, Beaver county, Pa., U. S. Improvements in furnaces for burning kilns, called "Surls' Parent Kiln." Dec. 22, 1874.
4.196.—J. J. Fitzpatrick, Philadelphia, Pa., U. S. Improvements in drawers for men and bays' use, called

'Pitzpatrick's PatentImproved Crotch Draw 18," Dec.
