${\bf FOREIGN_{_{{\bf AND}}}}{\bf PATENTS}$ THE CENTENNIAL.

There is no doubt that our Centennial Exposition will attract to our shores multitudes of representative people from all parts of the world, and they will take home with them many of our best improvements to introduce into their own manu-

An unusual opportunity will be offered for selling to these people such foreign patents as have been secured on good American inventions in the respective countries from which these visitors come.

At the reduced prices for which patents are obtained abroad, our people will lose a chance not likely to occur again, if they do not avail themselves of the opportunity of securing their inventions in foreign countries at once, so as to have their patents ready to negotiate the coming summer.

For cost of patents in the different countries and the conditions on which they are granted, send for pamphlet containing full information.
