Correspondence invited. Old roofs [all kinds] promptly repaired; new roofs laid by contract. Send for estimate. [Agents Wanted.]

ROOFS.

Why not make your Roofs last a lifetime, and save the expense of a new roof every 10 or 15 years. It can be done: if you use Slate Paint, it will not only resist the effects of water and wind, but shield you from Fire.

OLD ROOFS.

Protect your Buildings by using Slate Paint, which neither cracks in winter nor runs in summer. Old shingle roofs can be painted, looking much better, and lasting longer than new shingles without the paint, for one-fourth the cost of re-shingling. On decayed shingles it fills up the holes and pores, and gives a new substantial roof that lasts for years. Curled or warped shingles it brings to their places and keeps them there. This paint requires no heating, is applied with a brush and very ornamental. It is chocolate color, when first applied, but changes to a uniform slate color, and is to all intents and purposes slate.

ON TIN OR IRON ROOFS.

The red color is the best paint in the world for durability. It has a heavy body, is easily applied, expands by heat, contracts by cold, dries slow, and never cracks nor scales. One coat equals 4 of any other.

FIRE-PROOF NEW ROOFS.

Mills, foundries, factories, and dwellings a specialty. Materials complete for a new steep or flat roof of Rubber Roofing cost but about half the price of re-shingling. For Private houses, barns, and buildings of all descriptions, it is far superior to any other roofing in the world for convenience in laying, and combines the ornamental appearance, durability, and fire-proof qualities of tin, at one third the cost. No Tar or Gravel Used. How to save re-shingling—stop leaks effectually and cheaply in roofs of all kinds—a 100 page book free. Write to-day, and mention SCIENTIFIC AMERICAN.

Munn & Co.'s Patent Offices.

The Oldest Agency for Soliciting Patents in the United States.

THIRTY YEARS' EXPERIENCE.

MORE PATENTS have been secured through this agency, at home and abroad, than through any other in the world.

They employ as their assistants a corps of the most experienced men as examiners, specification writers, and draftsmen that can be found, many of whom have been selected from the ranks of the Patent Office.

SIXTY THOUSAND inventors have availed themselves of Munn & Co.'s services in examining their inventions and procuring their patents.

MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN, continue to examine inventions, confer with inventors, prepare drawings, specifications, and assignments, attend to filing applications in the Patent Office, paying the government fees, and watch each case step by step while pending before the examiner. This is done through their branch office, corner F and 7th streets, Washington. They also prepare and file caveats, procure design patents, trademarks, and reissues, attend to rejected cases (prepared by the inventor or other attorneys), procure copyrights, attend to interferences, give written opinions on matters of infringement, furnish copies of patents, and, in fact, attend to every branch of patent business both in this and in foreign countries.

A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this agency, with the name and residence of the patentee. Patents are often sold, in part or whole, to persons attracted to the invention by such notice.

Patents obtained in Canada, England, France, Belgium, Germany, Russia, Prussia, Spain, Portugal, the British Colonies, and all other countries where patents are granted, at prices greatly reduced from former rates. Send for pamphlet pertaining specially to foreign patents, which states the cost, time granted, and the requirements on each country.

Copies of Patents.

Persons desiring any patent issued from 1836 to November 26, 1867, can be supplied with official copies at reasonable cost, the price depending upon the extent of drawings and length of specifications.

Any patent issued since November 27, 1867, at which time the Patent Office commenced printing the drawings and specifications, may be had by remitting to this office \$1.

A copy of the claims of any patent issued since 1836 will be furnished for \$1. When ordering copies, please remit for the same as above, and state name of patentee, title of invention, and date of patent.

A pamphlet, containing full directions for obtaining United States patents sent free. A handsomely bound Reference Book, gilt edges, contains 140 pages and many engravings and tables important to every patentee and mechanic, and is a useful handbook of reference for everybody. Price 25 cents, mailed free.
