

on a railroad. If the barrel is placed on the track too far to the right, that part of the barrel where it touches the right rail is larger than the part where it touches the left rail, which causes the right hand end to roll faster than the left hand: and if it should roll too far over to the left, the same thing will take place on that side. And so it is constantly adjusting itself on the track, with no cause for either end to slip, even in turning a curve. Just so with the car wheels (which are conically shaped from the flange outward), provided a proper amount of lateral play is allowed by laying the track a little wider than the flanges on the wheels would indicate.

T. P. H. asks: How do dentists harden and polish their vulcanized rubber plates?—A. R. asks: What will give a white porcelain finish, with glassy surface, to wood? It must be impervious to dampness.—S. Bros. ask: Is there a successful way of treating the material for pianoforte soundboards in order to increase the volume and duration of sound?

HINTS TO CORRESPONDENTS.

Correspondents whose inquiries fail to appear should repeat them. If not then published, they may conclude that, for good reasons, the Editor declines them. The address of the writer should always be given.

Inquiries relating to patents, or to the patentability of inventions, assignments, etc., will not be published here. All such questions, when initials only are given, are thrown into the waste basket, as it would fill half of our paper to print them all; but we generally take pleasure in answering briefly by mail, if the writer's address is given.

Hundreds of inquiries analogous to the following are sent: "Who buys ores of antimony? Who makes spiral springs? Who makes electric engines? Who makes flexible shafting?" All such personal inquiries are printed, as will be observed, in the column of "Business and Personal," which is specially set apart for that purpose, subject to the charge mentioned at the head of that column. Almost any desired information can in this way be expeditiously obtained.

THE VALIDITY OF PATENTS.

We recommend to every person who is about to purchase a patent, or about to commence the manufacture of any article under a license, to have the patent carefully examined by a competent party, and to have a research made in the Patent Office to see what the condition of the art was when the patent was issued. He should also see that the claims are so worded as to cover all the inventor was entitled to when his patent was issued; and it is still more essential that he be informed whether it is an infringement on some other existing patent. Parties desiring to have such searches made can have them done through the Scientific American Patent Agency, by giving the date of the patent and stating the nature of the information desired. For further information, address

MUNN & CO.,
37 PARK ROW, New York.

THE INDEPENDENT FOR 1877.

In addition to all its former excellences, heretofore surpassed by no other religious weekly newspaper in the world, will offer several

ENTIRELY NEW FEATURES, of great importance and value.

FIRST.—We shall print through the year SERMONS by the most eminent clergymen of the country, of all denominations, from Maine to California. Our readers will, therefore, have the pleasure of hearing the most famous ministers of New York, Brooklyn, Boston, Philadelphia, Cincinnati, Chicago, St. Louis, San Francisco, etc.

SECOND.—We shall publish a series of articles on CHRISTIAN WORK, by Rev. STEPHEN H. TRIM, D. D., which will be invaluable to clergymen, Sunday-school teachers, and every Christian man and woman.

THIRD.—A new Serial Story of American life will be begun about the middle of December. Its title will be

A PAPER CITY, by D. R. Locke (Rev. Petroleum V. Nash). It vividly illustrates the present era of speculation, of living without work, of making money without capital; and will be one of the most sparkling and attractive serials ever published.

FOURTH.—We shall publish a series of articles from the pen of EDGAR BURGESS, JR., of Brewster, Mass., on men and things, religion and politics, and every "topical" as it comes up.

FIFTH.—Our great premium for the year we believe to be the best ever offered—viz:

The WORKS OF CHARLES DICKENS in the famous and unsurpassed Household Edition of Messrs. Lee & Shepard, the well-known publishers of Boston. Look at our offer! To each and every person, whether already a subscriber or not, who sends us \$3, we will forward THE INDEPENDENT one year, postage paid, together with any other volume from the following list:

1. The Pickwick Papers. 500 pages.
2. Our Mutual Friend. 516 pages.
3. David Copperfield. 520 pages.
4. Nicholas Nickleby. 516 pages.
5. Martin Chuzzlewit. 530 pages.
6. Dombey and Son. 534 pages.

INVALIDITY OF STATE LAWS CONCERNING THE SALE OF PATENTS. All laws of State legislatures that in any manner interfere with the free sale of Patent rights, such as the requiring of the agent or patentee to file copies of patent, take licenses, procure certificates, comply with forms, or which release the payee of ordinary notes of hand given for patent, have been declared unconstitutional and void by the United States Courts. All State judges, sheriffs, or other State officials, who undertake to interfere with patentees or their agents in the free sale of patents, make themselves liable in damages and other punishment. The decisions of the United States Courts on these points are given in SCIENTIFIC AMERICAN SUPPLEMENT No. 25. Price 10 cents. To be had at this office and of all newsdealers.
