# Value of Patents and How to Obtain Them.

PRACTICAL HINTS TO INVENTORS.

PATENTS, CAVEATS, ORNAMENTAL DESIGNS, TRADE MARKS, LABELS, COPYRIGHTS.

# ATENTS THE WEALTH OF NATIONS.

Mesers. Munn & Co. For more than thirty years in connection with the publication of the Scientific American, they have conducted the business of procuring Patents in this country and Europe. As in the past, they now have unequalted facilities for the preparation of Patent Drawings, Specifications, and the prosecution of Applications for Patents in the United States, Canada, and Foreign Countries. Messrs. Munn & Co. also attend to the preparation of Caveats, Trade Mark Registrations, Copyrights for ooks, Labels, Reissues, Assignments, and Reports on Infringements of Patents. All business intrusted to them is done with special care and promptness, on very reasonable terms.

The first inquiry that naturally occurs to every discoverer of a new idea or improvement is, "Can I obtain a Patent, and whom shall I consult?" The quickest and best way to obtain a satisfactory answer without expense, is to write to Munn & Co., describing the invention, with a small sketch, or send a model by express pre-paid. All they need is to get the idea. They will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. For this advise they make no charge.

A patent is granted for 17 years, during which time the patentee enjoys the full and exclusive right to make, use, and sell the invention, and grant rights, licenses, or privileges. There are no taxes to pay on a patent after it is granted in the United States. The owner is not obliged to work the patent within a specified period. The patent remains good and valid, whether it is worked or not.

Preliminary Examination.—Another way to learn more definitely if an invention is able is to heave a constitution.

or not.

Preliminary Examination.—Another way to learn more definitely if an invention is patentable, is to have an examination made of the drawings and models in the Patent Office.

In order to have such search, make out a written description of the invention, in your own words, and a pencil, or pen and ink, sketch. Send these, with the fee of \$5, by mail, addressed to Munn & Co., 37 Park Row, and in due time you will receive a written report in regard to the patentability of your improvement. This special search is made with care, at Washington.

Caveats.—Persons desiring to file a caveat can have the papers prepared in the shortest time, by sending a sketch and description of the invention. The Government fee for a caveat is \$10. A pamphlet of advice regarding applications for patents and caveats is furnished gratis, on application by mail.

To Make an Application for a Patent.—The applicant for a patent must furnish a model

by mail.

To Make an Application for a Patent.—The applicant for a patent must furnish a model of his invention if susceptible of one, or, if the invention be a chemical production, he must furnish samples of the ingredients of which his composition consists. These should be securely packed, the inventor's name marked on them, and sent by express, prepaid. Small models, from a distance, can often be sent cheaper by mail.

Reissues.—A reissue is granted to the original patentee, his heirs, or the assignees of the entire interest, when, by reason of an insufficient or defective specification, the original patent is invalid, provided the error has arisen from inadvertence, accident, or mistake, without any fraudulent or deceptive intention. Address Munn & Co., 37 Park Row, New York, for full p rticulars.

Design Patents.—Foreign designers and manufacturers, who send goods to this country, may secure patents here upon the r new patterns, and thus prevent others from fabricating or selling the same goods in this market.

same goods in this market.

secure patents here upon the r new patterns, and thus prevent others from fabricating or selling the same goods in this market.

A patent for a design may be granted to any person, whether citizen or alien, for any new and original design for a manufacture, bust, statue, alto relievo, or bas rel ef; any new and original design for the printing of woolen, silk, cotton, or other fabrics; any new and original impression, ornament, pattern, print, or picture, to be printed, painted, cast, or otherwise placed on or worked into any stricks of manufacture.

Design patents are equally as important to citizens as to foreigners. For full particulars send for pamphlet to Munn & Co., 37 Park Row, New York.

Trademarks.—Any person or firm domiciled in the United States, or any firmor corporation residing in any foreign country where similar privilegos are extented to citizens of the United States, may register their trademarks and obtain protection. Security for trade marks can be secured by citizens of the United States in the following countries, at the prices a nexed, which includes both the Government and agency fees: Canada, \$40; Great Britain, \$50; Belgium, \$75; France, \$75; Germany, \$75; Austria, \$75. This is very important to manufacturers in this country, and equally so to foreigners. For full particulars address Munn & Co., 37 Park Row, New York.

Foreign Patents and Symopsis of Cost.—The population of Great Britain is \$1,000,000; of France, \$7,000,000; Belgium, \$5,000,000; Patents may be secured by American citizens in all of these countries. Mechanical improvements of all kinds are always in demand in Europe. There will never be a better time than the present to take patents abroad. We have reliable business connections with the principal capitals of Europe. Address Munn & Co., 37 Park Row, New York. Circulars, with full information on foreign patents, furnished free.

Canada.—The expense to apply for a Canadian Patent is fifty dol ars (\$50), which includes

Address Munn & Co., 37 Park Row, New York. Circulars, with full information on foreign patents, furnished free.

Canada. The expense to apply for a Canadian Patent is fifty dol ars (\$50), which includes Government tax, agency, and all charges for fiveyears, after which two additional terms of five years each may be obtained on payment of fifty dollars each in all, fifteen years. The patent covers Nova Scotia, Frince Edward's Island and both the Canadas.

Caveats may be filed in Canada for \$25, which includes all expenses.

For further particulars address Munn & Co., 37 Park Row, New York.

Great Britain.—The British Patent extends over England, Wales, Scotland, Ireland and the Channel Islands, but not the Colonies; the latter make their own patent laws.

The expense to apply for an English patent is seventy-five dollars (\$75), which includes Government taxes, agency, and all charges for the provisional patent. No sworn papers are required; no models. The patent issues to the first applicant, whether he be the inventor, or merely the introducer. For additional particulars as to cost for completing the English patent and future taxes, address Munn & Co., 37 Park Row, New York.

France.—The cost to apply for a French patent is \$100, which covers all expenses for agency and Government taxes for the first year. No official examination is made; no model. The longest term of the patent is fifteen years, subject to a small annual tax. Address Munn & Co., 37 Park Row, New York.

This binders with its perpetation of fire millions is industrially one of the process.

New York.

Belgium.—This kingdom, with its population of five millions, is, industrially, one of the most active and progressive rations in Europe.

Belgium is the manufacturing centre for a large portion of the Continent, and Belgian patents rank among the most desirable of those that are taken out by American citizens.

The expense to apply for a Belgian patent is \$100. Inventions that have already been patented in the United States may be patented in Belgium. The law and proceedings are substantially the same as in Fra ce. For full particulars send for pamphlet. Address Munn & Co., 37 Park Row, New York

New York

German Empire.—The new Patent law, covering Prussia and all the German States, was put in operation July 1st, 1877. It was formerly necessary to take some twenty-one separate Patents, costing several hundred dollars, to cover the same territory which is now protected by a single Patent. The expense for a Patent and first year's tax for a s mple invention is \$100.

Patents can not be obtained in Germany for inventions that have been previously patented in the United States. Therefore the application for the German patent should be made before the United States patent is actually issued.

Austria.—A Patent is granted for fifteen years, subject to a small annual tax. The expense to apply for a patent in Austria is \$100, which includes both agency and government fees. The invention must be worked with n one year. Inventions that have already been patented in the United States, if not introduced in Austria, may be patented there. The Austrian patent covers also Hungary, and includes a total population of forty millions.

Russia.—Duration of patent three, five or ten years. The terms can not be extended. The invention must be worked in the empire durn ng the first quarter of the period for which the patent has been granted. No annual taxes. Full particulars may be had by addressing Munn & Co., 37 Park

vention must be worked in the empire during the first quarter of the period for which the patent has been granted. No annual taxes. Full particulars may be had by addressing Munn & Co., 37 Park Row, New York.

Italy.—The expense to apply for an Italian patent is \$150, which includes all fees for the first year. The patent is granted for fifteen years, subject to a small annual tax. This country is making rapid progress in industrial enterprise, and has a population of twenty-seven million.

Spain and Cuba.—By the terms of the new Spanish Law, the patentee now covers Spain, Cuba, and all the Spanish Colonies. Duration of the patent, 20 years. The law is substantially similar to the French and Relgian laws. Cost of the patent, including first annuity, \$100. This is a new and good field for inventors.

good field for inventors.

Write for further information to Munn & Co., 37 Park Row, New York.

Other Foreign Countries.—In the following countries the cost of applying for a patent varies with the period of the grant, which may generally be from five to fifteen years, at the option of the applicant. Norway, Sweden, Denmark, Portugal, British India, Australia, Victoria, Queensland, Tasmania, New South Wales, South Australia, New Zealand, Ceylon, Maur tius, Cape of Good Hope, Jamaica, Guiana.

The guiana.

The expense to apply for patents in the above countries varies, but full information may be had by addressing Munn & Co., 37 Park Row, New York.

All business, and all consultations, are kept secret and strictly confidential.

In all matters pertaining to patents, such as conducting interferences, drawing assignments, examinations into the validity of patents, etc., special care and attention is given. For information, and for pamphlets of instruction and advice
