

TO INVENTORS.

An experience of more than thirty years, and the preparation of not less than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. In addition to our facilities for preparing drawings and specifications quickly, the applicant can rest assured that his case will be filed in the Patent Office without delay. Every application, in which the fees have been paid, is sent complete—including the model—to the Patent Office the same day the papers are signed at our office, or received by mail, so there is no delay in filing the case, a complaint we often hear from other sources. Another advantage to the inventor in securing his patent through the Scientific American Patent Agency, it insures a special notice of the invention in the SCIENTIFIC AMERICAN, which publication often opens negotiations for the sale of the patent or manufacture of the article. A synopsis of the patent laws in foreign countries may be found on another page, and persons contemplating the securing of patents abroad are invited to write to this office for prices, which have been reduced in accordance with the times, and our perfected facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN.

1857-1879.

OFFICE OF

R. J. Chard, Manufacturer of Oils, &c., 134 MAIDEN LANE, NEW YORK.

Dear Sir:—The premises occupied by us for so many years having become too limited for our business, we have removed to No. 6 Burling Slip (within a block of the old stand), where we shall be pleased to meet our old customers. Thanking you for past favors, and trusting, with increased facilities, to merit a continuance of the same, we remain,

Your obedient servant, R. J. CHARD.

Business and Personal.

The Charge for Insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

The best results are obtained by the Imp. Eureka Turbine Wheel and Barber's Pat. Pulverizing Mills. Send for descriptive pamphlets to Barber & Son, Allentown, Pa.

Valves and Hydrants, warranted to give perfect satisfaction. Chapman Valve Manuf. Co., Boston, Mass.

For Punches, Patent Bending-Rolls, Radial Drills, and Angle Iron Shears, Hillis & Jones, Wilmington, Del.

The Asbestos Roofing is the only reliable substitute for tin, it costs only one-half as much, is fully as durable, and can be easily applied by any one. H. W. Johns Mfg. Company are the sole manufacturers.

Catechism of the Locomotive, 625 pages, 250 engravings. The most accurate, complete, and easily understood book on the Locomotive. Price \$2.50. The Railroad Gazette, 73 Broadway, New York.

Magnets, Insulated Wire, etc., for experiments. Catalogue free. Goodnow & Wightman, 176 Washington St., Boston, Mass.

For Second-hand Engine Lathes, apply to Witherby, Rugg & Richardson, Worcester, Mass.

The Improved Hydraulic Jacks, Punches, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York.

A. H. Downer's Improved Boiler Liquid removes scale without injury, thereby saving fuel and increasing power. 17 Peck Slip, New York.

Acme Lathes.—Swing, 7 in.; turn, 19 in. long; back geared; screw cutting. Send 3 cent stamp for circular and price, to W. Donaldson, southwest corner Smith and Augusta, Cincinnati, Ohio.

Shaw's Mercury Gauges, 5 to 50,000 lbs.; accurate, reliable, and durable. T. Shaw, 915 Ridge Ave., Phila., Pa.

The Twiss Automatic Engine; Also Vertical and Yacht Engines. N. W. Twiss, New Haven, Conn.

Wanted.—An energetic party with capital, to publish and introduce a small book (copyrighted), which will sell in every town in the country. Address, with reference, J. W. S., Lock Box 1973, Phila., Pa., P. O.

New Pamphlet of "Burnham's Standard Turbine Wheel" sent free by N. F. Burnham, York, Pa.

17 and 20 in. Gibed Rest Screw Lathes. Geo. S. Lincoln & Co., Hartford, Conn.

Sheet Metal Presses, Ferracute Co., Bridgeton, N. J.

Diamond Engineer, J. Dickinson, 64 Nassau St., N. Y.

Eagle Anvils, 9 cents per pound. Fully warranted.

Clipper Injector. J. D. Lynde, Philadelphia, Pa.

A Cupola works best with forced blast from a Baker Blower. Wilbraham Bros., 2318 Frankford Ave., Phila.

For Solid Wrought Iron Beams, etc., see advertisement. Address Union Iron Mills, Pittsburgh, Pa., for lithograph, etc.

Split Pulleys at low prices, and of same strength and appearance as Whole Pulleys. Yocom & Son's Shafting Works, Drinker St., Philadelphia, Pa.

The Ornamental Penman's, Engraver's, Sign Writer's, and Stonecutter's Pocketbook of Alphabets; 32 plates; 20 cts; mail free. E. & F. N. Spon, 446 Broome St., N. Y.

Linen Hose.—Sizes: 1 1/2 in., 20c.; 2 in., 25c.; 2 1/2 in., 30c. per foot, subject to large discount. For price lists of all sizes, also rubber lined linen hose, address Eureka Fire Hose Company, No. 13 Barclay St., New York.

Dead Stroke Power Hammers; cheapest and best for general forging and die work; 500 in use. P. S. Justice, of Philadelphia.

Forsyth & Co., Manchester, N. H., and 213 Centre St., New York. Specialties.—Bolt Forging Machines, Power Hammers, Combined Hand Fire Engines and Hose Carriages, new and 2nd hand machinery. Send stamp for illustrated catalogues, stating just what you want.

Partner Wanted.—A party with limited capital.—Address Des Moines Linseed Oil Works, Des Moines, Iowa.

American Watch Tool Co., Waltham, Mass. Lathes for Optical Instrument Makers.

Presses, Dies, and Tools for working Sheet Metal, etc. Fruit & other can tools. Bliss & Williams, B'klyn, N. Y.

Nickel Plating.—A white deposit guaranteed by using our material. Condit, Hanson & Van Winkle, Newark, N. J.

Needle Pointed Iron, Brass, and Steel Wire for all purposes. W. Crabb, Newark, N. J.

The Lathes, Planers, Drills, and other Tools, new and second-hand, of the Wood & Light Machine Company, Worcester, are being sold out very low by the George Place Machinery Agency, 121 Chambers St., New York.

Twenty-five per cent saved by use of H. W. Johns' Asbestos Palm. 87 Maiden Lane, New York.

Hydraulic Presses and Jacks, new and second hand. Lathes and Machinery for Polishing and Buffing Metals. E. Lyon & Co., 470 Grand St., N. Y.

Solid Emery Vulcanite Wheels—The Solid Original Emery Wheel—other kinds imitations and inferior. Caution.—Our name is stamped in full on all our best Standard Belting, Packing, and Hose. Buy that only. The best is the cheapest. New York Belting and Packing Company, 37 and 38 Park Row, N. Y.

Portland Cement—Roman & Keene's, for walks, cisterns, foundations, stables, cellars, bridges, reservoirs, breweries, etc. Remit 25 cents postage stamps for Practical Treatise on Cements. S. L. Merchant & Co., 53 Broadway, New York.

For Sale.—7 foot bed Putnam Planer, \$350. A. A. Pool & Co., Newark, N. J.

Manufacturers of Improved Goods who desire to build up a lucrative foreign trade, will do well to insert a well displayed advertisement in the SCIENTIFIC AMERICAN Export Edition. This paper has a very large foreign circulation.

C. M. Flint, Fitchburg, Mass., Mfr. of Saw Mills and Dogs, Shingle and Clapboard Machines. Circulars.

The best Friction Clutch Pulley and Friction Hoisting Machinery in the world, to be seen with power applied, 85 and 97 Liberty St., New York. D. Frisbie & Co., New Haven, Conn.

Wanted.—A Machine for Cutting a Hide into a Continuous Strip preparatory to running it through the tubes for sewing machine belts. Address Edmund Hill, 531 Jefferson St., Philadelphia, Pa.

The 1879 Pennsylvania Lawn Mower.—Light draught and easily adjusted. Machines warranted. See illustrated editorial, Sci. Am., No. 14. Lloyd, Supplee & Walton, Philadelphia, Pa.

Renshaw's Ratchet (short spindle) uses taper and square shank drills. Pratt & Whitney Co., Hartford, Ct.

Wheels and Pinions, heavy and light, remarkably strong and durable. Especially suited for sugar mills and similar work. Pittsburgh Steel Casting Company, Pittsburgh, Pa.

Wood-working Machinery, Waymouth Lathes. Specialty, Warwell Patent Saw Bench; it has no equal. Improved Patent Planers; Elevators; Dowel Machines. Rollstone Machine Company, Fitchburg, Mass.

The new "Otto" Silent Gas Engine is simple in construction, easy of management, and the cheapest motor known for intermittent work. Schleicher, Schumm & Co., Philadelphia, Pa.

Dead Pulleys that stop the running of loose pulleys and their belts, controlled from any point. Send for catalogue. Taper Sleeve Pulley Works, Erie, Pa.

Pulverizing Mills for all hard substances and grinding purposes. Walker Bros. & Co., 234 & Wood St., Phila., Pa.

The new fragrant Vanity Fair Cigarettes. New combinations of rare Old Perique and Virginia.

The SCIENTIFIC AMERICAN Export Edition is published monthly, about the 15th of each month. Every number comprises most of the plates of the four preceding weekly numbers of the SCIENTIFIC AMERICAN, with other appropriate contents, business announcements, etc. It forms a large and splendid periodical of nearly one hundred quarto pages, each number illustrated with about one hundred engravings. It is a complete record of American progress in the arts.

HINTS TO CORRESPONDENTS.

No attention will be paid to communications unless accompanied with the full name and address of the writer.

Names and addresses of correspondents will not be given to inquirers.

We renew our request that correspondents, in referring to former answers or articles, will be kind enough to name the date of the paper and the page, or the number of the question.

Correspondents whose inquiries do not appear after a reasonable time should repeat them.

Persons desiring special information which is purely of a personal character, and not of general interest, should remit from \$1 to \$5, according to the subject, as we cannot be expected to spend time and labor to obtain such information without remuneration.

Any numbers of the SCIENTIFIC AMERICAN SUPPLEMENT referred to in these columns may be had at this office. Price 10 cents each.

(1) G. E. M. asks: Can you tell me how the fine lines of a micrometer, used in measuring microscopic objects, are ruled? A. By means of a very accurate and expensive machine called a dividing engine.

(2) P. J. W. asks: 1. What size battery will produce an electro-magnet of 50 lbs. lifting power? A. Use four or six cells of Bunsen. 2. Is there any means of estimating the attractive power of an electro-magnet at any given distance from its poles, the power at the pole being known? A. Magnetic attractions and repulsions are inversely as the squares of the distances.

(3) W. A. B. asks: 1. How can I procure the powered silver you mention in your issue of March 22, used in the Right telephone? Will very fine silver filings do? A. We do not know that it is in the market; you can make it by grinding silver leaf with honey on a marble slab, afterward carefully removing the honey by repeated washings. 2. Are the wires connected the same in this telephone as in the carbon telephone? A. One wire is connected with the spring; the other to the metal plunger attached to the diaphragm.

(4) L. O. B. asks: 1. Does it make any difference which binding post of a Bell telephone is connected to the zinc pole of a battery? If it does how must it be connected? I want to experiment with a microphone. A. No. 2. Will one cell of a Watson battery be sufficient to operate a call bell, on a line 1 mile long? A. No; use four.

(5) G. R. D. asks: 1. What kind of paper is used to produce the stencil with the mechanical pen? A. Any thin paper, of smooth, firm texture. 2. How are copies taken after the stencil is made? A. By stretching the stencil in a frame, placing it in contact with the paper to receive the copy, and passing over it a roller charged with stencil ink.

(6) A. B. & B. ask: 1. How big a wire rope will it require, stretched over a span of forty feet, to sustain a load of one ton or 2,000 lbs.? A. 7/8 to 1 inch diameter. 2. How much will such a rope deflect in center, when stretched moderately tight, and what means are employed to get such a rope stretched tight enough? A. 3/4 feet. Consult Stahl's "Power by Wire Ropes."

(7) A. B. P. asks: 1. In making small magnets must I use fine or coarse wire? Tell why telegraph sounders are made with very fine wire, and magnets made to break the currents in shocking machines are coarse. A. The size of wire required for a magnet will depend altogether on the purpose for which the magnet is intended. The resistance of the wire is proportional to its size. If the magnet is used on a line of small resistance, the wire may be larger than when the resistance is great. Consult a good work on electricity. 2. How to make carbon for batteries. A. See SCIENTIFIC AMERICAN SUPPLEMENTS, Nos. 157, 158, and 159.

(8) P. J. asks: 1. In constructing an induction coil would hard wood or bone answer instead of vulcanite for the cylinder for commutator? Also for the tray in the "Simple Electric Light," described in SUPPLEMENT No. 182? A. Yes, in either case; but it should be filled with paraffine. 2. Will silver answer in place of platinum for point of screw and contact piece on the spring of the vibrating armature? If not, why? A. No; it will burn out too easily. 3. What is "tea paper," and where can I get it? A. The thin white paper used by grocers.

(9) S. W. writes: I am trying to plate steel knives and forks with tin. Please tell me what will cause the tin to flow smooth and appear white when finished. A. Clean the metal by scouring with moist pumice stone powder, and rinse in clean hot water, which will cause it to dry quickly. Then dip it in the melted tin covered with rosin, removing it frequently to rub with a brush of clean hemp. Then transfer for a short time to a pot of very hot tallow, free from salt, on removal from which tap smartly to remove list; cool, and clean with sawdust.

(10) D. B. B.—Please give a recipe for acid bath and process for sharpening old files in such a bath. A. The files must be thoroughly cleansed in warm water containing a small quantity of potash, which readily removes all the grease and dirt. After they are thus cleansed they must be washed with warm water and dried by artificial heat. Next place 1 pint of warm water in a wooden vessel and put in as many files as the water will cover, then add 2 oz. blue vitriol (sulphate of copper), finely pulverized, and 2 oz. borax, well mixed, taking care to turn the files over so that each may come in contact with the mixture. To the above mixture now add 7 oz. sulphuric acid and 1/4 oz. cider vinegar, which will cause the files to assume a red appearance at first, but they will in a short time resume their natural color. Then remove them, wash in cold water, and dry by artificial heat. When dry, sponge with olive oil, wrap in porous paper, and lay aside for use.

MINERALS, ETC.—Specimens have been received from the following correspondents, and examined, with the results stated:

C. M. M.—It is chiefly composed of iron pyrites (fool's gold)—of no value.—S. P.—The bead contains iron and copper—no silver.—H. B. It is an impure potter's clay. Properly washed it might be worth about a dollar per ton at the pottery.—E. F. A.—It is clay slate. It does not contain an appreciable quantity of gold or silver.—W. R. C.—It is a brown hematite (iron ore) of some value.

INDEX OF INVENTIONS

FOR WHICH

Letters Patent of the United States were Granted in the Week Ending April 1, 1879, AND EACH BEARING THAT DATE. [Those marked (r) are reissued patents.]

A complete copy of any patent in the annexed list, including both the specifications and drawings, will be furnished from this office for one dollar. In ordering, please state the number and date of the patent desired and remit to Munn & Co., 37 Park Row, New York city.

- Adjustable bracket, Redman & Conklin 213,775
Advertiser, street lamp, S. Smith 213,785
Albumen for the production of moulded articles, treatment of, J. Bliss 213,733
Annunciator, bell, C. Plout 213,334
Axle box, car, J. R. Baker 213,731
Axle box, car, F. W. Schroeder 213,842
Band cutter, W. J. Kellar 213,758
Basin, catch, J. B. H. Nolte 213,832
Bed bottom, spring, H. Baer 213,803
Boot and shoe screw wire, E. F. Richardson 213,338
Bow, N. R. Streeter 213,851
Box pile, E. Wheeler 213,855
Brick kilns, fireproof arch for, J. R. Bowers 213,805
Brush block borer, C. A. Mahle (r) 5,647
Buckle, C. Hersome (r) 8,655
Building, fireproof, J. J. Schillingner 213,845
Burglar alarm, J. A. Reese 213,936
Burial case, Leach & Hiser 213,782
Car brake, railway, G. Marshall 213,915

- Car coupling, W. J. Orr 213,928
Car coupling, Shafer & Ewart 213,946
Car drawbar, railway, J. H. Coxe 213,510
Car starter, A. Christian 213,872
Car starter, S. Graham 213,895
Car starter, W. A. Warriner 213,959
Car, street, W. P. Hansell 213,889
Carbureter, air and gas, E. A. C. Pew 213,931
Card clothing, H. E. Cunningham 213,876
Carriage door, ash frame, W. Ruby 213,778
Carriage top, F. A. Presko 213,933
Carriage, J. E. Tyler 213,858
Carriage loader, C. A. R. Dimon 213,877
Caster, sewing machine, J. O. Sloan 213,844
Chain, log or bull, R. J. Millen 213,768
Cheese vats, milk agitator for, M. P. Jackson 213,755
Chests, construction of, G. V. Luce 213,913
Cigar stand, J. Grzybowski 213,747
Cistern, drain, T. Houston 213,886
Clock pendulum clutch, E. Davies 213,811
Clothes line support, W. W. Glehill 213,746
Clothes pounder, C. F. K. Wilson 213,962
Cock, water and steam, W. H. Hoyt 213,903
Coin counter, H. Clark 213,738
Coin wrapper, G. Rettig (r) 8,649
Column, F. H. Smith 213,786
Cooker and steamer, T. Lee 213,763
Corn dropper and marker, J. A. & J. J. Stephenson 213,788
Crane, mail bag, H. M. Hall 213,750
Cultivator fender, A. & M. Simmons 213,948
Cultivator, wheel, A. Sanders 213,943
Curtain fixture, G. C. Mathers 213,917
Dam, D. Tufts 213,957
Dental engine, H. Laurence 213,809
Dental plate, W. D. Holbrook 213,820
Desk and work table, writing, E. Emanuel 213,814
Direct acting engine, W. F. Garrison 213,880
Discharge pipe plug, wash basin, etc., J. S. Gilbert 213,881
Dish heater and holder, S. R. Jarvis 213,904
Ditching machine, Grant & McClelland 213,897
Dyeing aniline black, H. Kinsbourg 213,907
Egg carrier, J. L. Stevens 213,848, 213,849, 213,850
Egg lifter, B. W. Nelson 213,772
Feed water heater, Goodwin & Joyce 213,892
Fence, J. R. Elliott 213,882
Fence, A. G. Powell 213,832
Fence, D. Wright 213,799
Fence, iron, I. L. Sherman 213,947
Fiber, animal, J. A. Southmayd 213,949
Fiber separator, J. A. Southmayd 213,850
File, letter, J. F. Tapley 213,852
Filter, J. Grant 213,896
Firearm, breech-loading, C. A. King 213,760
Firearm, magazine, A. Burgess 213,866 to 213,869
Fire kindler, J. McShane 213,768
Fireproof box for papers, etc., N. Fowler (r) 8,654
Forging hammers, D. Mayole 213,766
Fur articles, S. D. Castle 213,736
Furs, treating, S. D. Castle 213,735
Furnace, E. W. & C. W. Blair 213,861
Gas burner, M. B. & C. G. Dyott 213,795
Gas lighter, electric, W. H. H. Whiting 213,795
Gas meter, wet, G. Lizars 213,911
Gas regulator, S. F. Leach 213,910
Glass furnace, D. Agnew 213,858
Gold beater, J. H. Cooper 213,874
Grain, apparatus for removing germs and fuzz from, Potts & Parson 213,774
Grain binder, F. W. Randall 213,835
Grain separator, W. S. Reeder 213,934
Grain separators, straw carrier for, W. S. Reeder 213,835
Grate bar, J. Ashcroft 213,730
Grave or tomb, J. H. Thorp 213,790
Grinding mill, millings, J. Mills 213,922
Guano and seed distributor, J. Scoggin 213,843
Gun, magazine, A. Burgess 213,865
Harness, gag runner for, W. M. Blain 213,862
Harvester grinder, R. P. Clarke 213,873
Hat, wire brim, L. T. Smith 213,846
Hay rake, horse, A. W. Mathis 213,839
Heating pot, H. J. Nelson 213,926
Heel shave, H. A. Lothrop 213,827
Heel trimmer, J. H. Busell 213,806
Horse binder, I. R. Armstrong 213,800
Horse power, P. K. Decker 213,742
Horseshoe weight, J. Robinson 213,938
Hot air engine, H. W. Sherrill 213,783
Hot air furnace, W. J. Towne 213,791
Hydraulic engine, L. K. Fuller 213,745
Hydraulic engine, J. Talley, Jr. 213,852
Infusions, making, R. U. Etzenberger 213,815
Inlaying metallic scroll ornaments in hard rubber and allied gums, M. Smith 213,784
Joint for solid and tubular connections, C. H. Jackson 213,754
Knit vest or jacket for female wear, J. Cave 213,808
Knitting machine, E. Tiffany 213,856
Ladders, portable platform for fire and other, M. Cronin 213,741
Lamp, C. F. Spencer 213,951
Lantern, railway signal, D. W. F. De Grange 213,812
Lasting machine, device for applying power from a rotating shaft to, Woodward & Brock 213,857
Latch, closet, W. E. Sparks (r) 8,644, 8,645
Levees, protecting, J. Johnson 213,822
Liminet, S. C. Buchanan 213,863
Log roller, E. Tarrant 213,953
Loom temple, Porter & Clark (r) 8,656
Lounge, folding, O. Stechhan 213,847
Machinery motor, J. Williams et al. 213,797
Meat, preserving raw, A. A. Libby 213,824, 213,825, 213,826
Mechanical motor, A. G. Kiler 213,759
Metals, working cast malleable, E. Wheeler 213,856
Millstone pick, R. J. Wheatly 213,961
Millstones, ventilating, G. Heffert 213,900
Naphtha burner, U. P. Smith 213,845
Nozzle, noise-quieting steam, T. Shaw (r) 8,643
Odor destroyer, B. J. Tayanman 213,853
Ore separating jigger, W. H. Plumb (r) 8,653
Ores in their natural situation, process and apparatus for melting, C. M. T. Du Motay 213,789
Ore reducer, J. Seanor 213,782
Packing, piston, E. B. Colby 213,739
Packing spring, piston, J. Sadler 213,942
Pailock, W. C. McGill 213,818
Pailock, Wirth & Wichert 213,788
Paper bags, making, Nugent & Burns 213,773
Paper perforator, W. Koch 213,908
Pedal mechanism, W. R. McDonald 213,767
Peg rasper, W. B. Arnold 213,729
Pelts, finishing, S. D. Castle 213,737
Pencil, L. De Faber 213,884
Pianoforte action, G. O. V. Roedern 213,940
Pitman connection, A. D. Love 213,812
Planters, check rower for corn, L. B. Berrien 213,732
Plow, C. V. Dyer 213,878
Plow gang, L. M. Kelly 213,946
Printing press perforator, J. A. Carruth (r) 8,646
Printing press sheet deliverer, S. D. Tucker 213,793
Pump, double-acting, W. Rodda 213,776
Pump, force, W. H. Kaey 213,767
Pump, hydraulic, W. Foster 213,817

The Scientific American EXPORT EDITION.

PUBLISHED MONTHLY.

THE SCIENTIFIC AMERICAN Export Edition is a large and SPLENDID PERIODICAL, issued once a month, forming a complete and interesting Monthly Record of all Progress in Science and the Useful Arts throughout the World. Each number contains about ONE HUNDRED LARGE QUARTO PAGES, profusely illustrated, embracing: (1.) Most of the plates and pages of the four preceding weekly issues of the SCIENTIFIC AMERICAN, with its SPLENDID ENGRAVINGS AND VALUABLE INFORMATION. (2.) Prices Current, Commercial, Trade, and Manufacturing Announcements of Leading Houses in connection with these Announcements many of the Principal Articles of American Manufacture are exhibited to the eye of the reader by means of SPLENDID ENGRAVINGS. This is by far the most satisfactory and superior Export Journal ever brought before the public. Terms for Export Edition, FIVE DOLLARS A YEAR, sent prepaid to any part of the world. Single copies, 50 cents. For sale at this office. To be had at all News and Book Stores throughout the country.

NOW READY.

THE SCIENTIFIC AMERICAN EXPORT EDITION FOR APRIL, 1879, ILLUSTRATED BY NEARLY ONE HUNDRED ENGRAVINGS.

GENERAL TABLE OF CONTENTS

Of the SCIENTIFIC AMERICAN Export Edition for April, 1879.

I.—INVENTIONS, DISCOVERIES, AND PATENTS.

- Barnum calls for a New Invention. Supreme Court Decision. Miscellaneous Inventions. Improved Lawn Mower. One engraving. Recent American Patents. Some Recent American Patents. Fourteen engravings. Phonograph. An Improved Press. Two engravings. Filling for Safes. New Automatic Siphon. One figure. New Shipping Tag. One engraving. Herreshoff Torpedo Launch. Three engravings. Improved Washing Machine. Two engravings. Novel Bird Box. One engraving. New Attachment for Boilers. One engraving. Applications of Celluloid. Self-Luminous Clock Dials. Machine for Stretching and Softening Textile Fabrics. One engraving. New Fender for Vessels. One engraving. Refined Patent Flour Case. American Mechanical Inventions. Agricultural Inventions. Recent Mechanical Inventions. Defect of the Patent Bill. Johnson's Watering Trough for Cattle. One engraving. New Alleged Preserving Agent. Loading Apparatus for Oranance. One engraving. Novel Baggage Fastener and Shawl Carrier. One engraving. Brick Making by Machinery. One engraving. New Dough Kneader. One engraving. New Great Gun. Edison's Induction Balance. Five figures. Prof. Hughes' Induction Balance. Two engravings, seven figures. A New Pedometer. Two engravings. Dean Brothers' Steam Pump. One engraving. Improvement in Sugar Making. A Convenient Box for Artists. One engraving. Improved Barrel for Breech Loading Shot Guns. Three engravings. A New Carbureter. One engraving. Novel Rotary Engine. One engraving. Engineering Inventions. A Telephone 25 Years Ago. One engraving. Edison's Electro-Chemical Telephone. Two engravings, two figures. New Explosive. The Fast Ice Boat. Steamboat smaller than "Nina."

II.—MECHANICS AND ENGINEERING.

- Speed of Belting. Security of East River Bridge. Niagara Bridge. Small Stationary Engine. Prices for Yacht Engines. Miss Hosmer's Motor. Locomotive Air Pumps. Amateur Mechanics (Chasing and Knurling). Twenty-eight engravings. Emery Belts and Wheels. Heslop Steam Engine. Engines of the Yacht Isa. Two engravings. Blasting by Compressed Air.

III.—MINING AND METALLURGY.

- Ohio Coal Field. Western Iowa Coal Fields. Refined Copper. Mining District of Leadville. Ornamenting Steel Surfaces. Valuable Mineral Collection, etc. Silver Reduction in Colorado. The Utilization of Sulphides as Fuel in Metallurgy. A Collection of Meteoric Specimens. Nevada Paint Mine.

IV.—CHEMISTRY AND PHYSICS.

- A New Acoustic Apparatus. Two engravings. Astronomical Notes. Giving the Positions, Rising, and Setting of the Planets for April. Dynamo-Electric Machine. Ice Explosion. Heinrich Geissler. Gary's Alleged Neutral Line. Note from Mr. Gary in regard to Neutral Line. Parabola. One figure. Magnetized Steel. Telephones. Vibrations of the Plate of a Bell Telephone. Static Electricity. Legal Standard of Kerosene. Home of the Meteors. Morning Mirage. Paintings Reproduced by Photography. Photographs at Midnight. Photography by Electric Light. Photography in Banking. Polaroscope for Testing Sugar. A Singular Storm. Gary's Nail Experiment. Three figures. Gary's Neutral Line. Heinrich Wilhelm Dove. Spontaneous Combustion. Spectrum of Brorsen's Comet.

V.—NATURAL HISTORY, NATURE, MAN, ETC.

- The Bobac. One engraving. Domestication of the Buffalo. Mute Cattle. Chloride of Lime as an Insecticide. Wisconsin Cranberry Marsh. The Lawn. Working Monkeys. Poison of Serpents. Aleutian Islands Shell Heaps.

- The Ailanthus as Timber. Alligators taught by Experience. Useful Bacteria. Forceps Crab. One engraving. A plea for the Crow. A Fern Valley. Origin of Existing Floras. Hotbeds. A Canine Mind Reader. Argan Tree. Snapping Giant Turtle. Cape Buffalo. One engraving. A Shower of Pollen. Texas Cattle Drive for 1879. Australian Insects in California. Coniferine and Vanilline. Capture of a Devil Fish. Fenec or Sahara Fox. One engraving. Flying Frog. One engraving. Natural History Notes. One that would not Starve (Snail). Utility of Toads. Trimming Tigers' Toes. Borers in Apple Trees. What became of One Hive of Bees. Trade in Birds. Fate of a Herd of Buffalo. Cabbage Worm. The Great Crab Spider. One engraving. Diphtheria in Fowls. Soda Fences. Flowers in Winter. The Peanut Crop. Snakes as Pets. Swine in the United States.

VI.—MEDICINE AND HYGIENE.

- Dangers of Lead Poisoning from the Use of Tinned Ware. Effect of Vitriol on the Skin. Why so Depressing? Tape Worm in Cucumbers. Grafting Eyes upon the Blind. Jaded Heads. Condition of Idiocy. Anointing in Infantile Disorders. Effect of Boiling on Milk. Scarlet Fever. Preventing Sea-sickness. Gases of the Stomach. Beer Drinking in the United States. Toxicological Notes. Remedies for Biliousness. Curiosities of Bismarck's Brains. Frost and the Yellow Fever. Neglect of Rest.

VII.—SCIENTIFIC MEETINGS, EXHIBITIONS, ETC.

- New York Academy of Sciences. Free Institute of Science. Industrial Cincinnati Exposition. World's Fair of 1883 at New York. Site of the United States Exhibition. Reports on the Paris Exhibition. The Australian Exhibitions.

VIII.—INDUSTRY AND COMMERCE.

- The Netherlands open to American Tools. American and English Artisans. Labor and the Cost of Living. Canning Meat by Machinery. Victory for Millers. Colored Pencils for Glass. Refined Petroleum. Dangers to Railroad Brakemen. Large Ocean Steamship. National Surveys. Canadian Canal Project. Faience and its Manufacture. No. 1. Two engravings. Reproduction of Ancient Glass. Ground Honey. Immigration in 1878. Seaboard Pipe Line. Collecting Postage Stamps. Woman the Primitive Pottery Maker and Decorator. Calamity at Szegedin. Fine Cast Iron Table. One engraving. Oldest and Coldest Town. Wire in Wheat. Wood Pavements in London. Architects, Trials and Tribulations. Art as an aid to Industry. Japanese Bronzes. The Suez Canal. The Coliseum Drained. Good Times for American Farmers. A Warning to Western Farmers. American Iron for China. Isinglass from Sea Weeds. Pinto's Journey across Africa. Baltimore Water Works. Coal at its Lowest. Long Lived Brewery. Engraved Silver Water Bottle. One engraving. Around the World in Thirty Days. Balloon Expedition to the Moon. Profits on Beer and Milk. The Bicycle as a Road Vehicle. African Cable. American vs. English Castings. Aniline Colors. Faience and its Manufacture. No. 2. Seven engravings. Possible Cause of Fires. American Flour in Turkey. Old Homes Made New. Three engravings. Iron in New Zealand. Leadville, the Place. Mildew in Cotton Goods. American Petroleum in Europe. German Gray Pottery. One engraving. A Thriving State. Textile Industries of Finland. Unconsidered Uses of Wood. The Sizes of Ferments.

IX.—PRACTICAL RECIPES AND MISCELLANEOUS.

- Rare Old Books at Auction. Cement to Stick Rubber to Iron. Browning Gun Barrels. Aniline Black Ink. To Clean Lace. Notes and Queries. Advantages of Silence. To Polish Shellac Varnish. Alcoholic Shellac Shell. Cheap Black Varnish. Back Numbers. Executive Ability. Have we too Many Colleges? Common Sense. SCIENTIFIC AMERICAN Better than Dime Novels. Waterproofing Cotton and Linen Fabrics. Cement for Metal and Glass. An Example for Young Inventors. The Circle Squared. One figure. Important Appointments. The Moon, Is it Inhabited? Interest Bearing Notes. Premium for Boys. The Tables Turned.

Answers to Correspondents, embodying a large quantity of valuable information, practical recipes, and instructions in various arts. Single numbers of the Scientific American Export Edition, 50 cents. To be had at this office, and at all news stores. Subscriptions, Five Dollars a year; sent postpaid to all parts of the world.

MUNN & CO., PUBLISHERS, 37 PARK ROW, NEW YORK.

To Advertisers: Manufacturers and others who desire to secure foreign trade may have large and handsomely displayed announcements published in this edition at a very moderate cost. The Scientific American Export Edition has a large guaranteed circulation in all commercial places throughout the world. Regular Files of the Export Edition are also carried on ALL STEAMSHIPS, foreign and coastwise, leaving the port of New York. Address MUNN & CO., 37 Park Row, New York.

Advertisements.

Inside Page, each insertion --- 75 cents a line. Back Page, each insertion --- \$1.00 a line. (About eight words to a line.) Engravings may be had advertisements at the same rate per line, by measurement, as the letter press. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

FIRST-CLASS BOOKS

Moulding, Founding, Alloys, &c.

Overman, The Moulder and Founder's Pocket Guide. A Treatise on Moulding and Founding in Green Sand, Dry Sand, Loam, and Cement; the Moulding of Machine Frames, Mill Gear, Hollow Ware, Ornaments, Trinkets, Bells, and Statues; Description of Moulds for Iron, Bronze, Brass, and other Metals; Plaster of Paris, Sulphur, Wax, and other articles commonly used in Casting; the Construction of Melting Furnaces, the Melting and Founding of Metals; the Composition of Alloys and their Nature. With Receipts for Alloys, Bronze, Varnishes, and Colors for Castings; Tables on the Strength and other qualities of Cast Metals, etc. By F. Overman. 42 illustrations. 12mo. \$1.50. Larkin, The Practical Brass and Iron Founders' Guide. A concise treatise on Brass Founding, Moulding the Metals and their Alloys, etc. By James Larkin. Fifth Edition. Revised, with Additions. 12mo. \$2.25. Guettier-Fesquet, A Practical Guide for the Manufacture of Metallic Alloys. Comprising their Chemical and Physical Properties, with their Preparation, Composition and Uses. From the French of A. Guettier by A. A. Fesquet, Chemist and Engineer. 12mo. \$3.00. Byrne, The Practical Metal Worker's Assistant. Comprising Metallurgical Chemistry; the Arts of Working all Metals and Alloys; Forging of Iron and Steel; Hardening and Tempering; Melting and Mixing; Casting and Founding; Works in Sheet Metal; the Processes Dependent on the Utility of the Metals; Soldeering; and the most Improved Processes and Tools employed by Metal Workers. With the Application of the Art of Electro-Metallurgy to Manufacturing Processes. By Oliver Byrne. A new revised, and improved edition, to which is added an Appendix, containing The Manufacture of Russian Sheet Iron. By John Perry, M.D., F.R.S. The Manufacture of Malleable Iron Castings, and Improvements in Bessemer Steel. By A. A. Fesquet. With over 600 Engrs. \$7.00. Spretson, A Practical Treatise on Casting and Founding. Including Descriptions of the Modern Machinery Employed in the Art. By N. E. Spretson. Illustrated by 82 Plates. 8vo. \$7.00. Kirk, The Founding of Metals. By Edward Kirk. 8vo. \$2.50. Roseleur-Fesquet, Galvanoplastic Manipulations. A Practical Guide for the Gold and Silver Electro-Plater and the Galvanoplastic Operator. From the French of Alfred Roseleur, by A. A. Fesquet. With 120 illustrations. 8vo. \$6.00. The above or any of our books sent by mail, free of postage, at the publication price. Catalogue of Practical and Scientific Books, 96 pages. 8vo; a Catalogue of Books on Dyeing, Calico Printing, Weaving, Cotton and Woolen Manufacture, 4to; a Catalogue of a choice collection of Practical, Scientific, and Economic Books, 4to; List of Books on Steam and the Steam Engine, Mechanics, Machinery, and Engineering, 4to; List of important works on Metallurgy, Metals, Strength of Materials, Chemical Analysis, Assaying, etc. 4to; two Catalogues of Books and Pamphlets on Social Science, Political Economy, Banks, Population, Pauperism, and kindred subjects sent free to any one who will forward his address. HENRY CARBY BIRD & CO., Industrial Publishers, Booksellers, and Importers, No. 810 Walnut Street, Philadelphia.

CAVEATS, COPYRIGHTS, TRADE MARKS, ETC.

Messrs. Munn & Co., in connection with the publication of the SCIENTIFIC AMERICAN, continue to examine Improvements, and to act as Solicitors of Patents for Inventors. In this line of business they have had OVER THIRTY YEARS' EXPERIENCE, and now have unequalled facilities for the preparation of Patent Drawings, Specifications, and the Prosecution of Applications for Patents in the United States, Canada, and Foreign Countries. Messrs. Munn & Co. also attend to the preparation of Caveats, Trade Mark Regulations, Copyrights for Books, Labels, Reissues, Assignments, and Reports on Infringements of Patents. All business intrusted to them is done with special care and promptness, on very moderate terms.

We send free of charge, on application, a pamphlet containing further information about Patents and how to procure them; directions concerning Trade Marks, Copyrights, Designs, Patents, Appeals, Reissues, Infringements, Assignments, Rejected Cases, Hints on the Sale of Patents, etc.

Foreign Patents.—We also send, free of charge, a Synopsis of Foreign Patent Laws, showing the cost and method of securing patents in all the principal countries of the world. American inventors should bear in mind that, as a general rule, any invention that is valuable to the patentee in this country is worth equally as much in England and some other foreign countries. Five patents—embracing Canadian, English, German, French, and Belgian—will secure to an inventor the exclusive monopoly to his discovery among about ONE HUNDRED AND FIFTY MILLIONS of the most intelligent people in the world. The facilities of business and steam communication are such that patents can be obtained abroad by our citizens almost as easily as at home. The expense to apply for an English patent is \$75; German, \$100; French, \$100; Belgian, \$100; Canadian, \$50.

Copies of Patents.—Persons desiring any patent issued from 1836 to November 26, 1867, can be supplied with official copies at reasonable cost, the price depending upon the extent of drawings and length of specifications.

Any patent issued since November 27, 1867, at which time the Patent Office commenced printing the drawings and specifications, may be had by remitting to this office \$1.

A copy of the claims of any patent issued since 1836 will be furnished for \$1. When ordering copies, please to remit for the same as above, and state name of patentee, title of invention, and date of patent.

A pamphlet, containing full directions for obtaining United States patents sent free. A handsomely bound Reference Book, gilt edges, contains 140 pages and many engravings and tables important to every patentee and mechanic, and is a useful hand-book of reference for everybody. Price 25 cents, mailed free.

Address MUNN & CO., Publishers SCIENTIFIC AMERICAN, 37 Park Row, New York. BRANCH OFFICE—Corner of F and 17th Streets, Washington, D. C.
