

give a receipt for painting plaster casts, so as to render them impervious to the action of the weather? A. They are warmed and saturated with melted stearine or paraffine wax. The former is preferable. Soluble glass is also used.

MINERALS, ETC.—Specimens have been received from the following correspondents, and examined, with the results stated:

F. W. D., Jr.—No. 1. Bornite—composed of sulphur 25, copper 63, and iron 12 per cent. No. 2. Epidote—silica 37, aluminum 23, iron oxide 14, magnesia 23, and water 3 per cent.—M. T. F.—It is not tin ore. The quartz contains augite and epidote.—S. H. M.—The ore contains a large amount of manganese oxide. Its value can only be ascertained by assay. It is worth assaying.—J. K. M.—No. 1. Marcasite—iron 46, sulphur 54 per cent. Not an iron ore. No. 2. A ferruginous clay slate of little value. No. 3. An impure steatite or soapstone. No. 4. This other, if properly ground and calcined, may have some market value. No. 5. An impure limonite iron ore.—F. and M.—It contains gold, of the variety known in works on mineralogy as "fool's gold" or iron pyrites—composed of iron and sulphur. E. B. S.—It is not sulphur as suggested, but iron sulphate, arising from the decomposition of pyrites. It is soluble in water, from which it crystallizes upon evaporating the solution slowly. It is used extensively in the arts.—J. C. U.—The crystals are quartz; when small and perfect they are sometimes employed as cheap imitation diamonds.—J. A. W.—It is zinc blende, of good quality, containing small amounts of cadmium.—Z. Y. X.—The small button consists chiefly of metallic iron.—W. J. B.—It is quartz.—L. H.—The quartz contains a notable amount of silver, copper, and traces of gold. An assay would be requisite to determine the precise value of the ore.—Poughkeepsie—No. 1. Gray limestone. No. 2. An impure pipe clay—suitable for drain pipes, cheap pottery, tiles, etc.—J. B.—It consists chiefly of iron sesquioxide, organic matters and clay, of little value.—J. B.—It contains no silver. The crystals are iron sulphide pyrites.

Any numbers of the SCIENTIFIC AMERICAN SUPPLEMENT referred to in these columns may be had at this office. Price 10 cents each.

COMMUNICATIONS RECEIVED.

The Editor of the SCIENTIFIC AMERICAN acknowledges with much pleasure the receipt of original papers and contributions on the following subjects:

- On Watch Making. By D. B. F.
On the Work of Rats. By H. J. M.
Manufacture of Watches. By D. B. R.
Aerial Navigation. By C. M.
On the Captive Balloon. By A. C. M.
On Writing Mediums. By M. L. B.

[OFFICIAL.]

INDEX OF INVENTIONS

FOR WHICH Letters Patent of the United States were Granted in the Week Ending January 21, 1879, AND EACH BEARING THAT DATE. [Those marked (r) are reissued patents.]

A complete copy of any patent in the annexed list, including both the specifications and drawings, will be furnished from this office for one dollar. In ordering, please state the number and date of the patent desired, and remit to Munn & Co., 37 Park Row, New York city.

Table listing various inventions with their respective patent numbers, such as Air compressor, Amalgamator, Anchor, Axle box lid, etc.

Table listing various inventions with their respective patent numbers, such as Faucets, Feed water heater, Fence, Fence gate, etc.

TRADE MARKS.

Table listing trade marks with their respective owners, such as Boots and shoes, Cigars, Guano, Leaf tobacco, etc.

DESIGNS.

Table listing designs with their respective patent numbers, such as Carpets, Stoves, Pencil cases, etc.

English Patents Issued to Americans.

From January 24 to January 28, inclusive. Axle box bearings.—J. R. Baker, Jersey City, N. J. Baths.—W. Wasson et al., Carson City, Nevada.

Table listing various inventions with their respective patent numbers, such as Electric light, Gas lighting apparatus, Knitting machines, etc.

The Scientific American EXPORT EDITION.

PUBLISHED MONTHLY.

THE SCIENTIFIC AMERICAN Export Edition is a large and SPLENDID PERIODICAL, issued once a month, forming a complete and interesting Monthly Record of all Progress in Science and the Useful Arts throughout the World.

(1) Most of the plates and pages of the four preceding weekly issues of the SCIENTIFIC AMERICAN, with its SPLENDID ENGRAVINGS AND VALUABLE INFORMATION.

(2) Prices Current, Commercial, Trade, and Manufacturing Announcements of Leading Houses. In connection with these Announcements many of the Principal Articles of American Manufacture are exhibited to the eye of the reader by means of SPLENDID ENGRAVINGS.

This is by far the most satisfactory and superior Export Journal ever brought before the public. Terms for Export Edition, FIVE DOLLARS A YEAR, sent prepaid to any part of the world. Single copies, 50 cents. For sale at this office. To be had at all News and Book Stores throughout the country.

NOW READY.

THE SCIENTIFIC AMERICAN EXPORT EDITION FOR FEBRUARY, 1879, WITH EIGHTY-SIX ENGRAVINGS AND FIGURES.

GENERAL TABLE OF CONTENTS

Of the SCIENTIFIC AMERICAN Export Edition for February, 1879.

I.—INVENTIONS, DISCOVERIES, AND PATENTS.

Table listing various inventions and patents, such as The Voltaic Pencil, New Switch Pedal, A Chance for Inventors, etc.

II.—MECHANICS AND ENGINEERING.

Table listing various mechanical and engineering inventions, such as Engine of the Torpedo Vessel Destroyer, Telegraph Messages Through Metallic Tubes, etc.

III.—MINING AND METALLURGY.

Table listing various mining and metallurgy inventions, such as Mining Notes, The Separation of Silver from Lead, etc.

IV.—CHEMISTRY AND PHYSICS.

Table listing various chemistry and physics inventions, such as Astronomical Notes, Giving the Positions, Rising and Setting of the Planets for February, etc.

Table listing various scientific topics, such as Spectroscopic Temperatures, Life Without Air, A Floating Electric Light, etc.

V.—NATURAL HISTORY, NATURE, MAN, ETC.

Table listing various natural history topics, such as Haeckel on Evolution, Ancient Letters in Modern Tattooing, etc.

VI.—MEDICINE AND HYGIENE.

Table listing various medicine and hygiene topics, such as How Diphtheria was Spread, Chinese Dentistry, etc.

VII.—THE PARIS EXHIBITION, SCIENTIFIC MEETINGS, ETC.

Table listing various Paris Exhibition and scientific meetings topics, such as The Social Science Convention, The International Fishery Exhibition, etc.

VIII.—INDUSTRY AND COMMERCE.

Table listing various industry and commerce topics, such as Glucose Honey, The Laundries of New York, A Vegetable Green for Confectioners, etc.

IX.—PRACTICAL RECIPES AND MISCELLANEOUS.

Table listing various practical recipes and miscellaneous topics, such as Erratum, Accuracy a Path to Wealth, Perverting Ingenuity, etc.

Answers to Correspondents, embodying a large quantity of valuable information, practical recipes, and instructions in various arts.

Single numbers of the Scientific American Export Edition, 50 cents. To be had at this office, and at all news stores. Subscriptions, Five Dollars a year; sent postpaid to all parts of the world.

MUNN & CO., PUBLISHERS, 37 PARK ROW, NEW YORK.

To Advertisers: Manufacturers and others who desire to secure foreign trade may have large and handsomely displayed announcements published in this edition at a very moderate cost.

The Scientific American Export Edition has a large guaranteed circulation in all commercial places throughout the world. Regular Files of the Export Edition are also carried on ALL STEAMSHIPS, foreign and coastwise, leaving the port of New York. Address MUNN & CO., 37 Park Row, New York.
