

[OFFICIAL.]

INDEX OF INVENTIONS

FOR WHICH

Letters Patent of the United States were Granted in the Week Ending

December 9, 1879,

AND EACH BEARING THAT DATE.

[Those marked (r) are reissued patents.]

A complete copy of any patent in the annexed list, including both the specifications and drawings, or any patent issued since 1867, will be furnished from this office for one dollar. In ordering please state the number and date of the patent desired, and remit to Munn & Co., 37 Park Row, New York city.

Table listing various inventions such as Air heater, Air heating attachment, Animal trap, Antiseptic and deodorizing compound, Bag, A. Smith, Bedstead, folding, S. S. Burr, Beer cooler, F. Heller, Beer, manufacture of, E. Kokosinski, Belt, L. Aarons, Belt fastener, C. W. Sager, Belting, machine for making rubber, J. Murphy, Bicycle, S. Sawyer, Blacksmith's tool, L. C. Derry, Blind fastener, window, W. H. B. Allen, Book, copy, J. W. C. Gilman, Bridge, B. Houts, Bridge and turn-table, turn, D. Blanchard, Buggy top, J. H. & E. M. Keller, Burglar alarm, A. J. Ridgeway, Button card, G. P. Farmer, Button or stud, separable, F. P. Barney, Button, separable, A. R. Lendner, Canops, etc., die for cutting, J. W. Farrell, Car coupling, J. M. Van Why, Car jack, J. J. Hamilton, Car window, W. W. Mackall, Jr., Carpet lining and stair pad, M. Townsend, Carriage brake, baby, W. F. Wallberg, Carriage brake lock, G. E. Clarke, Carriage top prop, H. K. Porter, Cart, dumping, G. B. Wiestling, Caster, furniture, J. H. Schlott, Churn, J. Wolf, Clock, calendar, W. L. Bundy, Clock, electro-magnetic, C. Shepherd, Coal as fuel, utilization of the dust or culm of anthracite, L. L. Crouse, Coal hod, W. Easterbrook, Cook, gauge, H. C. Montgomery, Coffee preparation, H. H. Snow, Collar, horse, B. Palmer, Corset steel fastening, L. Hill, Cotton gin, H. N. Reid, Cotton opener, R. Kitson, Cotton scraper, J. M. Richards, Crib and bedstead, interconvertible, S. S. Burr, Cuffs, box for displaying, S. W. Wilson, Culinary apparatus, R. J. Gatling, Cultivator, H. Blooded, Cultivator, J. M. Elder, Cultivator, D. Unthank, Cultivator, cotton, R. W. Spencer, Cutter head, F. Krein, Damper, automatic hot and cold air, J. W. Crary, Damper regulator for steam boilers, V. H. Hallock, Dish drainer, folding, C. E. Stearns, Disinfectant and deodorizer, R. M. Canfall, Disinfecting apparatus for waterclosets, etc., E. J. Mallett, Jr., Drawing frame, J. Smith, Dredged material, transporting and delivering, A. E. Hall, Dredging machine, E. Chaquette, Embalming fluid, J. H. & H. B. McCarty, End gate, wa on, W. Alcorn, Envelope, sample, T. J. Gorman, Fan, extensible, Havell & Williams, Fare register, J. W. Meaker, Feed water regulator, T. E. Button, Feneces, barred top for, W. Osmond, Ferro-cyanides, process of and apparatus for making, Tochemiac & Gunzburg, Fertilizer distributor, S. H. Everett, Firearm magazine, J. M. Marlin, Folding machine, turn sheet, Mendham & Chambers, Jr., Friction device, C. C. Klein, Furnace grate, H. E. Woods, Furnaces, device for feeding air to, Bartlett & Wilson, Gas burner, P. Faltoni, Gas lighter, electrical, W. H. H. Whiting, Gas motor engine, G. W. Daimler, Gas retort, charger, A. Q. Ross, Gas retort discharging apparatus, A. Q. Ross, Gas retort discharging machinery, A. Q. Ross, Gate, F. M. Nixon, Grain binder, S. D. Locke, Grain binder, L. J. McCormick, Grain separator, C. E. Merrifield, Grater, nutmeg, C. F. Chase, Grinding machine, L. Seiffert, Hame dressing machine, F. Krein, Harness, M. A. Frost, Harrow, sulky, C. La Dow, Harvester, J. L. Owens, Hats or caps, peak or brim for, O. G. Brady, Hay gathering and cocking machine, Smith & Davis, Hay rake, horse, W. P. & C. E. Clark, Heel burnishing machine, T. L. Keif, Hoe tooth, horse or hand, D. W. Hughes, Hoop, J. Naylor, Jr., Horn cutting machine, G. M. Cruickshank, Horseshoe nails, manufacture of, W. W. Miner, Hydraulic press, J. Watson, Inflatable form for displaying articles, T. J. & H. J. Braun, Injector for steam boilers, L. E. Hogue, Insecticide compound, Lyons & Ziegler, Iron, fluxing compound for making, J. Tate, Ironware, manufacture of enameled cast, E. C. Quinby, Knitting machine, M. Hithcock, Lacing hook, J. Briggs

Table listing various inventions such as Lamp, electric, R. A. Kipling, Lamp globe base, E. Blackman, Lamp, street, E. Boesch, Lantern, signal, T. S. Easterbrook, Last and standard, W. H. Lounsbury, Leathercreasing machine, C. J. Cooper, Loom for weaving pile fabrics, J. C. Ellison, Macaroni, preparing and canning, J. H. Irwin, Millstone dressing machine, T. P. Benton, Millstone driver, W. Johnson, Mines, machine for raising tailings in, E. Chaquette, Mower, lawn, Hartmann & Braun, Nut lock, J. Lee, Oatmeal machine, L. G. Thorp, Ore separator, J. L. Peyton, Oven shelf, automatic, D. G. Littlefield, Packing, metallic, R. Doty, Paper bag machine, W. C. Cross, Paper bag machine, E. B. Stocking, Paper machinery, felt for, E. B. Hayden, Paper, manufacturing, C. T. Tomkins, Pessary, D. Diller, Petroleum oils, refining, E. C. Kattell, Pipe wrench, D. P. Foster, Pitcher, H. Berry, Planter and roller, corn and seed, A. Sutton, Planter, corn, G. W. Bevis, Planter, corn, B. M. Pulliam, Planter, cotton and seed, E. B. Loyless, Plaster's mould, C. Kleinschmidt, Plow, wheel, T. L. Riney, Printing and folding machine, Chambers, Jr. & Mendham, Pruning implement, J. W. Cogswell, Puddling furnace, revolving, T. R. Crampton, Pump, W. S. Blunt, Pumps, operating, Moore & Dickie, Rail, compound, W. J. Holman, Railway signal, W. E. Badger, Railway signal, electric, J. I. Conklin, Jr., Refrigerating liquids, apparatus for, Young & Neilson, Refrigerator, W. Dreuske, Rein, elastic driving, B. A. Davis, Rein holder, S. J. Woolfey, Rein loops, swivel for bridle, J. B. Hampton, Roads and tracks, machine for leveling and sweeping, A. H. Mooers, Rooker for furniture, platform, A. Hentshel, Rolling mill, R. M. Bassett, Roofing compound, U. Baker, Rotary engine and pump, S. D. & J. Barrow, Rubbergoods, apparatus for and method of seaming, W. B. Carr, Sad iron, C. P. T. La Roche, Saddletree, E. B. Light, Safe, E. Stockwell, Saw guide, circular, E. M. Guernsey, Saw sharpening machine, W. L. Covel, Scoop, hop, N. E. Hinds, Seat or bench, R. W. How, Sewing machine button hole attachment, R. H. St. John, Share and point, combined, J. Killefer, Sheep protector, J. R. Speer, Ship hatches, fastening for, A. Johnson, Slop jar, E. B. Jewett, Snap hook, J. B. Hampton, Soldering sheet metal cans, machine for, J. W. Farrell, Sower, seed, B. T. Genthner, Spoon, medicine, B. T. Trueblood, Square and bevel, combined, J. D. Hobbs, Stamp mill, H. Ahlborn, Starch clearing, etc., woven fabrics, process and machinery for, I. E. Palmer, Steam and other boilers, S. Thacker, Steam boiler, Brown & Seymour, Steam boiler covering, T. Merriam, Steamer, feed, G. R. & M. M. Loomis, Steering apparatus, vessel, A. Johnson, Stirrup pad, saddle, R. E. Whitman, Stone, artificial, Raedler & Marazzi, Stove grate, W. Phipps, Street sweeping apparatus, E. C. Bowne, Stud for boots and shoes, lacing, A. Dawes, Sugar, coloring, O. H. Krause, Sulky, trotting, Williams & Brown, Telephone, A. K. Eaton, Telephone, carbon, T. A. Edison, Telephone exchange, automatic, Connolly & McTigue, Telephonic circuit, A. K. Eaton, Thermometer, L. Peroni, Thill coupling, J. O. Flower, Thrashing machine, flax, J. W. Crooks, Tile gate, P. M. Earle, Tire shrinker, Stroud & Shuman, Tire upsetting device, E. Dupue, Tobacco, treating, C. S. Phillips, Toggle presses, driving gear for, F. W. & W. J. Crossley, Truck, E. J. Leyburn, Trunk lock, G. V. Luce, Urn, coffee, E. H. Hawley, Uterine support, galvanic, O. E. Herriock, Valve for steam engines, expansion, A. Bretonneau, Valve gear, steam engine, C. W. Copeland, Vehicle bows and shafts, cover for, B. J. Warden, Vehicle shifting rail, T. H. Graves, Velocipede, A. Kneip, Wagon, dumping, W. Evans, Wagon rack, J. McCallum, Wagon, steam road, O. C. Harris, Wagon tail board catch, H. Havens, Washboard, J. T. Sargent, Wash boiler fountain, W. Barton, Washing and beating skeins or hanks, machine for, G. Morlot, Washing and wringing machine, combined, T. J. Baldwin, Washing machine, D. B. Dorsey, Watches, dial attachment for stem winding, C. P. Corless, Waterwheel, current, J. J. Collins, Wind engine, S. Lane, Windwheel, Longyear & Clark, Wire twisting machine, J. Gobbels, Wires, machine for beveling and truing, I. N. Forrester, Wool washing machines, roll for, F. G. Sargent

DESIGNS.

Table listing various designs such as Organ case, J. H. White, Printing types, Pettit & Russ, Toyholder for fireworks, E. R. Ives, English Patents Issued to Americans, December 5 to December 9, 1879, inclusive, Button hole machine, T. S. L. Howard, United States.

Table listing various inventions such as Carpet sweeper, H. L. Judd, New York city, Electric signal for railroads, J. I. Conklin, Jr., N. Y. city, Electromagnet, J. F. Bailey, New York city, Food, farinaceous, M. B. Loyd et al., New York city, Harvester, F. Wood, Albany, N. Y., Journals and bearings, J. H. McLean, St. Louis, Mo., Measures, liquid, J. M. Thayer, Randolph, Mass., Paper for checks, etc., and ink therefor, H. M. Walker et al., New York city, Paper folding machine, R. M. Hoe et al., N. Y. city, Sewing machines, G. Juengst, New York city, Shovel for hop kilns, N. E. Hinds, Cooperstown, N. Y., Stench trap, T. G. Knight, New York city, Telephones, J. F. Bailey, New York city, Telephonic communications, R. G. Brom et al., N. Y. city.

Advertisements.

Inside Page, each insertion --- 75 cents a line. Back Page, each insertion --- \$1.00 a line. (About eight words to a line.) Engravings may head advertisements at the same rate per line, by measurement, as the letter press. Advertisements must be received at publication office as early as Thursday morning to appear in next issue. The publishers of this paper guarantee to advertisers a circulation of not less than 50,000 copies every weekly issue.

PETROLEUM AND ITS EXAMINATION. —By A. Bourgougnan. A description, read before the American Chemical Society, of the methods adopted by the author in his examinations of crude petroleum, refined petroleum, naphtha, and residuum; preceded by an interesting account of the geographical distribution of oil-bearing strata, and the processes of obtaining the crude product; with valuable tables showing the hydrocarbons that have been eliminated from petroleum, and comparisons of the oils obtained from various parts of the world, as regards their volatile products, specific gravities, etc. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 184. Price 10 cents. To be had at this office and from all newsdealers.

ICE-HOUSE AND REFRIGERATOR. —Directions and Dimensions for construction, with one illustration of cold-house for preserving fruit from season to season. The air is kept dry and pure throughout the year at a temperature of 34° to 36°. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 116. Price 10 cents. To be had at this office and of all newsdealers.

GELATINE PHOTO PROCESS. —A practical demonstration of the mode of working the gelatine-bromide process. By D. Van Monckhoven. Treating of the organization of the dark-room, the nature of the emulsion, the preparation of the gelatinobromide emulsion, application of the emulsion to glass, the preservation of the prepared plates, exposure in the camera, development of the image, pyro development, fixation, and the use of the various dyes for coloring and varnishing. Illustrated with two cuts. Dr. Van Monckhoven, the author is one of the most eminent chemists and photographers. The above paper is a most valuable contribution to the art of dry-plate photography. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 205. Price 10 cents. To be had at this office and from all newsdealers.

THE SUTRO TUNNEL BY ADOLPH SUTRO. —An interesting address, giving the history of this celebrated mining tunnel, from its inception up to the present time, and the reasons that led to the undertaking; describing the methods that have been used in construction, the difficulties that have been encountered, and the obstacles to progress that have been met with; and prefaced by a valuable account of the discovery of the Comstock lode, and of the geological formations of the gold and silver deposits of California. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 205. Price 10 cents. To be had at this office and from all newsdealers.

ICE AND ICE HOUSES—HOW TO MAKE ice ponds; amount of ice required, etc., and full directions for building ice-house, with illustrated plan. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 55. Price 10 cents. To be had at this office and of all newsdealers.

PRINCIPLES OF HORSE SHOEOING.—By Geo. Fleming, V.S. A paper describing the proper method of shoeing horses so that their animal's feet may be kept always healthy and sound. How much the walls of the hoof should be reduced, and how the operation should be performed; the kind of shoes that should be selected; how they should be fitted; the number and size of nails that should be used, and how the face of the hoof should be treated. Followed by a description of a modified form of the Charnier method as successfully followed by the author for many years. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 205. Price 10 cents. To be had at this office and from all newsdealers.

MACHINERY FROM AN INSURANCE Point of View. By H. J. Waters. An able paper pointing out the various factors which combine to cause a rapid depreciation in the value of all kinds of machinery. Depreciation and fire risks through friction, incompetent workmen, the tension of belting, and dust and dirt. Careful estimates of the amount of depreciation in planing mills, on shafting, hangers, pulleys, and belting; on the various kinds of millings, presses, and separators, elevators, cups, and belt's stave and heading factories, and on the heavy machinery used by iron workers. General conclusions of the author as a result of the foregoing study. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, Nos 204 and 205. Price 10 cents each. To be had at this office and from all newsdealers.

ICE-HOUSE AND COLD ROOM.—BY R. G. Hatfield. With directions for construction. Four engravings. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 59. Price 10 cents. To be had at this office and of all newsdealers.

COMPRESSED AIR MOTORS, BY GEN. H. HAUPT, C.E. Being a Report to the Pneumatic Tramway Engine Co., of New York, concerning the use of Compressed Air as a Motor for propelling Street Railway Cars. Exhibiting the feasibility of the system and the Practical Success obtained as evinced by trials of the Pneumatic Cars and Compressors on the Second Avenue Railway, New York City. With a general description of the Air Compressors, the percentages of Power Required out of the Power Consumed in pressing the air; the extent of the air compression and how used in connection with heat in the car; the cost per mile; the distance traveled by the Pneumatic Motor; increase of power by using the cylinders as air pumps; heat and cold by compression and expansion; what grades the Pneumatic Motor can overcome and what load it can carry; theoretical test of compressors; capacity of the Second Avenue compressors; effects of using a compression of fifty atmospheres; advantages and objections to use of pneumatic motors; moral and sanitary influences; estimates of the cost of power by the use of the pneumatic system as compared with horses; cost of operating the pneumatic motors on the Second Avenue railway; tables showing the quantities of air consumed on each trip of the car, the reductions of pressure, etc., with many other interesting and valuable particulars, theoretical and practical. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, Nos. 176, 177, and 182. Price 10 cents. To be had at this office and of newsdealers in all parts of the country.

CEMENTS.—FORTY VALUABLE RECEIPTS for a great variety of cements, applicable to all of the purposes of the Household and Shop, including Rubber Cement, Waterproof Cements, Acid-proof Cements, Fireproof Cements, Aquarium Cements, Hydraulic Cements, Cements for paper boats, for metals, for china and glassware, for leather, rubber, and for cementing leather and rubber to metals, glass, etc. Cements for wood, stone, iron, etc. Recipe for Colored Sealing Wax, for Postage Stamp Mucilage, for Crockery Ware, Cement to resist Petroleum. Japanese Cement. Colored Beton Cement. Recipe for Fireproof Paper and Linings. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 158. Price 10 cents. To be had at this office and of all newsdealers.

A SHORT BIOGRAPHY OF THE MEN-HADEN. By Prof. G. BROWN GOODE, U. S. Fish Commissioner. A paper read before the American Association for the Advancement of Science, August, 1879. An essay full of interest not only to the scientist but to the general reader. The fish here treated of is known under at least 30 popular names in this country, and is of great industrial importance, not only for the oil which it yields, but also as a food, being used as such in either a fresh or salted state, or in oil under the name of "shadines." The habits of the fish are somewhat anomalous, and very little has hitherto been known or written about them. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 194. Price 10 cents. To be had at this office, and from all newsdealers.

SILVERING GLASS.—THE LATEST AND Best Method of Silvering Mirrors and other articles of Glass by Chawman's, Siemens', Petitjean's, Draper's, and Lavat's Processes. SUPPLEMENT 105. Price 10 cents.

BRIEF HISTORY OF BESSEMER STEEL. By Henry Bessemer. An exceedingly interesting sketch of the history of Bessemer steel, from the period of the great invention down to the present time, as given by Mr. Bessemer himself at a meeting of the Iron and Steel Institute, and wherein the celebrated inventor recalls some of the incidents connected with his first presentation of the discovery to the scientific world; such as the incredulity of those to whom he suggested the use of his steel for rails, etc. Concluding with a sketch of the history of the Bessemer steel as applied to ship-building. Illustrated with 6 engravings of the specimens that were exhibited by the author to illustrate his paper. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 183. To be had at this office, and of all newsdealers.

GALVANIC BATTERIES.—A NEW AND valuable paper. By George M. Hopkins. Contains full instructions and working drawings for the construction of nearly every known form of Battery, and its maintenance. This paper includes all of the principal batteries used for Experiment, Telegraphy, Photography, Electro-metallurgy, Electric Light, running Induction coils, and other purposes. Also, Earth-batteries, Dry and Moist Piles, Simple Batteries, costing only a few cents. Sulphate of Copper, Nitric, Chromic Acid, Quick-silver, Gas, Secondary, and Thermo-electric Batteries are included. It is the most comprehensive paper yet published on the subject. Illustrated with nearly 50 Engravings. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, Nos. 157, 158, 159. Price 10 cents each. To be had at this office and of all newsdealers.

ICE-BOAT WHIFF.—FULL WORKING drawings and description, with dimensions of the model ice-yacht whiff, the fastest yacht in the world. Exhibited at the Centennial by Irving Grinnell. With 14 illustrations. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 63. Price 10 cents. To be had at this office and at all news stores. Any intelligent person, with the aid of the drawings and directions given in the above numbers of the SUPPLEMENT, may readily construct a first-class ice-boat, of any desired size, at a small cost.

ICE-BOATS — THEIR CONSTRUCTION and management. With working drawings, details, and directions in full. Four engravings, showing mode of construction. Views of the two fastest ice-sailing boats used on the Hudson river in winter. By H. A. Horsa, M.E. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 1. The same number also contains the rules and regulations for the formation of ice-boat clubs, the sailing and management of ice-boats. Price 10 cents.

CAVEATS, COPYRIGHTS, LABEL REGISTRATION, ETC.

Messrs. Munn & Co., in connection with the publication of the SCIENTIFIC AMERICAN, continue to examine Improvements, and to act as Solicitors of Patents for Inventors.

In this line of business they have had OVER THIRTY YEARS' EXPERIENCE, and now have unequalled facilities for the Preparation of Patent Drawings, Specifications, and the Prosecution of Applications for Patents in the United States, Canada, and Foreign Countries. Messrs. Munn & Co. also attend to the preparation of Caveats, Registration of Labels, Copyrights for Books, Labels, Reissues, Assignments, and Reports on Infringements of Patents. All business intrusted to them is done with special care and promptness, on very moderate terms.

We send free of charge, on application, a pamphlet containing further information about Patents and how to procure them; directions concerning Labels, Copyrights, Designs, Patents, Appeals, Reissues, Infringements, Assignments, Rejected Cases, Hits on the Sale of Patents, etc.

Foreign Patents.—We also send, free of charge, a Synopsis of Foreign Patent Laws, showing the cost and method of securing patents in all the principal countries of the world. American inventors should bear in mind that, as a general rule, any invention that is valuable to the patentee in this country is worth equally as much in England and some other foreign countries. Five patents—embracing Canadian, English, German, French, and Belgian—will secure an inventor the exclusive monopoly to his discovery among about ONE HUNDRED AND FIFTY MILLIONS of the most intelligent people in the world. The facilities of business and steam communication are such that patents can be obtained abroad by our citizens almost as easily as at home. The expense to apply for an English patent is \$75; German, \$100; French, \$100; Belgian, \$100; Canadian, \$50.

Copies of Patents.—Persons desiring any patent issued from 1836 to November 26, 1867, can be supplied with official copies at reasonable cost, the price depending upon the extent of drawings and length of specifications.

Any patent issued since November 27, 1867, at which time the Patent Office commenced printing the drawings and specifications, may be had by remitting to this office \$1.

A copy of the claims of any patent issued since 1836 will be furnished for \$1.

When ordering copies, please remit for the same as above, and state name of patentee, title of invention, and date of patent.

A pamphlet, containing full directions for obtaining United States patents sent free. A handsomely bound Reference Book, gilt edges, contains 140 pages and many engravings and tables important to every patentee and mechanic, and is a useful hand book of reference for everybody. Price 25 cents, mailed free.

Address MUNN & CO., Publishers SCIENTIFIC AMERICAN, 37 Park Row, New York. BRANCH OFFICE—Corner of F and 7th Streets, Washington, D. C.
