Congress.

upon thorough trial tests, actually contribute to the comfort, security, and safety of persons being transported as passengers," and tend to prevent delays in the transmission The argument on behalf of the Post Office is that telephones for giving it place: of mails, etc., may be taken as a natural and inevitable result of the attempt on the part of the associated railways to refer all action with reference to improvements to an outside and irresponsible organization. And as the people of the any possible association of railway officials, it is the reverse of politic on the part of the latter to provoke a conflict which can only result in their overwhelming defeat.

*****----***** THE WESTERN RAILWAY ASSOCIATION AND THE PATENT LAWS.

Speaking of the failure of their efforts to secure the passage of the bill to effect a general amendment of the patent laws last winter, the executive committee of the Western Railroad Association say, in their report for the year just closed:

"For many reasons, but principally on account of the success which has of late attended the work of the association in contesting unjust claims, and in settling just ones equitably, your committee has made no special efforts in this direction during the present Congress."

American inventors will be pleased to see this frank admission by the association that for all legitimate purposes the patent laws are adequate as they stand. No fuller justification could be asked for the position taken by the friends of inventors during the contest in the last Congress, namely, that the general invasion of the constitutional rights of inventors proposed in the Association's bill (S. 300), was as unnecessary as its object was unjust. Now, having admitted that the present laws are sufficient to enable them to contest such is master had a long pole with a fork at the end of it, and cessfully unjust claims, and to settle just ones equitablycertainly all that any association can reasonably ask-it is to fork. The ostrich was excessively enraged, but soon had be hoped that the Western Railway Association will have to give in. the grace to cease to whine about the alleged oppressions of patentees, and refrain from further attempts to have the The only thing to do when attacked without means of depatent system recast so as to place inventors at the mercy of any who might choose to infringe their rights.

-----THE PROPOSED WORLD'S FAIR IN 1883.

One decided advance has been made toward securing a World's Fair in this city three years hence. The two rival organizations which had the project in hand have given ing the birds in. They are driven into it and held fast. place to a single committee madeup of citizens of accredited It is found better to pluck the feathers out than to cut them social and financial standing. There has also been introduced in Congress a bill creating for the management of the proposed Fair a United States International Commission, horny plates at the tips of their feathers, like those in the composed of sixty honorably known citizens of New York, two commissioners from each State, one from each Territory, and one from the District of Columbia. It is further provided in the bill that the Exhibition be held under the direction of the Commission as one body; that the Board of Finance be elected by the subscribers to the stock, and that Hope itself is a mass of rock, terminating in perpendicular those elected thereby become, if not already so, a part of the cliffs toward the sea, but with ledges here and there, on in front of the observer. Commission-thus avoiding any troubles that might arise from a dual organization; that the capital stock be placed H. N. Moseley, Challenger Notes. at twelve millions of dollars, in shares of ten dollars each; and that foreign nations be invited by the general government to participate in its exhibition.

OSTRICH FARM.

Mr. McKellar, who was most kindly hospitable, has an time of our visit, he having had bad luck at first in breeding. He owns the actual Cape of Good Hope and a long stretch old hen ostrich was a pet about the house, but used to do sad tions." damage in the farm yard eating the young goslings, swallowlowing them like oysters.

It was amusing to go with Mr. McKellar into one of his breeding paddocks; here a pair of ostriches were brooding on a nest of eggs, dividing, as usual, the labor between them. The cock was very savage and attacked all intruders, so when the ostrich ran at the party he caught its neck in the

A kick from an ostrich is well known as very dangerous. fense, Mr. McKellar said, is to lie flat down and let the bird walk on you till he is tired. I was astonished at the brightness of the red coloring developed on the front of the legs of the cock bird during the breeding season. The ornamental appearance of the bird is greatly enhanced by it.

A narrow but strong and high pen is provided for pluckoff. The stumps, if left in, are apt to cause trouble.

Young ostriches, when first from the egg, have curious feathers of one of the Indian jungle fowls, and some other birds not in the least related to one another.

The trial of the trations of new inventions, machinery, workshops, and sketches in natural history are all in entire keeping with the active spirit of this progressive age, and there are, indeed, THE OWNER OF THE CAPE OF GOOD HOPE AND HIS ... | few publications more deserving of a place in the homes of our land. The SUPPLEMENT-which is a distinct paper from the SCIENTIFIC AMERICAN—contains sixteen octavo pages, ostrich farm, but his flock of birds was not very large at the with handsome cover, uniform in size with the SCIENTIFIC AMERICAN. This is really a royal issue, and while the price of the SCIENTIFIC AMERICAN is placed at \$3.20 per year, or of the moorland adjoining, and has thrown a wire fence right \$1.60 for six months, the SUPPLEMENT is placed at \$5.00 per across the peninsula, so as to give his ostriches the run of a year, postage paid, to subscribers. Money could not be more large tract, stretching right down to the cape itself. One judiciously expended than by subscribing for these publica-

The Indian and the Telephone.

An amusing application of the wonders of the telephone as an assistant detective of crime comes to us from Julian. Several horses were recently stolen in that neighborhood, and suspicion fell upon a certain Indian as the thief. Some one having introduced a telephone up there, the same was being exhibited, when it occurred to the owner of the stolen horses to get the Indian to come in and hear the "Great Spirit" talk. The Indian took one of the cups and was thrilled with astonishment at being apparently so near the Great Keeper of the happy hunting grounds. After some little time spent in wonderment, the Indian was solemnly commanded by the Great Spirit to "give up those stolen horses!" Dropping the cup as if he had been shot, the Indian immediately confessed to having stolen the horses, and tremblingly promised if his life was spared he would restore the "caballos" at once, and he did so.-San Diego (Cal.) Union.

..... Curiosities of the Telephone.

With a single telephone held, say, to the right ear, the transmitted voice appears to come from a distance to the right; while with a telephone held to the left ear, it seems to arrive from the left of the listener.

With a telephone to each ear, if one ear be less sensitive than the other, or if the telephone be held further from that nation, and ends in two capes, Cape Point, on which is the ear, the voice apparently shifts to the side of the other ear; and if both ears hear alike and both instruments are equally near their respective ears, the voice apparently proceeds from

Cheap Indelible Ink.

Braconnot recommends the following: 20 parts of potassa are dissolved in boiling water, 10 parts of fine cut leather chips and 5 parts of flowers of sulphur are added, and the whole heated in an iron kettle until it is evaporated to dryness. Then the heat is continued until the mass becomes soft, care being taken that it does not ignite. The pot is now removed from the fire (allowed to cool), water is added, the solution strained, and preserved in bottles. This ink flows easily from the pen. -Pol. Notizbl.

+ ***** >-Large Farming.

It is reported that Mr. Oliver Dalrymple, the great Minnesota farmer, intends to cultivate 30,000 acres of wheat this year. He will have 20 steam thrashers in operation with 135 reaping machines. Last year he employed 600 laborers. and this year will increase the number to 700.

THE woolen trade in France has been making rapid progress. In 1851 there were only 850,000 woolen spindles in that country, but now they number 2,270,000, thus distributed among the departments: Nord has 1,350 000: Marne, 160,000; Somme, 125,000; Ardennes, 120,000; Aisne, 140,000; others, 375,000. The value of the woolen yarns exported amounted to 32,200,000 francs; of manufactured goods, to 464,200,000 francs; of combed wool, to 30,900,000 francs; of woolen waste, to 36,700,000 francs; making a grand total of 564,000,000 francs. About 147,632,000 francs were paid for wages annually.
