

The Scientific American EXPORT EDITION.

PUBLISHED MONTHLY.

THE SCIENTIFIC AMERICAN Export Edition is a large and SPLENDID PERIODICAL, issued once a month, forming a complete and interesting Monthly Record of all Progress in Science and the Useful Arts throughout the World.

(1.) Most of the plates and pages of the four preceding weekly issues of the SCIENTIFIC AMERICAN, with its SPLENDID ENGRAVINGS and VALUABLE INFORMATION.

(2.) Prices Current, Commercial, Trade, and Manufacturing Announcements of Leading Houses. In connection with these Announcements many of the Principal Articles of American Manufacture are exhibited to the eye of the reader by means of SPLENDID ENGRAVINGS.

This is by far the most satisfactory and superior Export Journal ever brought before the public.

Terms for Export Edition, FIVE DOLLARS A YEAR, sent prepaid to any part of the world. Single copies, 50 cents. For sale at this office. To be had at all News and Book Stores throughout the country.

NOW READY.

THE SCIENTIFIC AMERICAN EXPORT EDITION FOR FEBRUARY, 1880, ILLUSTRATED WITH SEVENTY-NINE ENGRAVINGS.

GENERAL TABLE OF CONTENTS

Of the SCIENTIFIC AMERICAN Export Edition for February, 1880.

I.—INVENTIONS, DISCOVERIES, AND PATENTS.

Interesting to Patentees. Improved Portable Engines. 2 engravings. Recent Inventions. Agricultural Inventions. Mechanical Inventions. Engineering Inventions. Miscellaneous Inventions. New Inventions. New Egg Traps. 1 engraving. Improved Medicine Bottle. 1 engraving. Improved Animal Trap. 2 engravings. Improvement in Jugs. 1 engraving. Novel Pumping Engines. 1 engraving. Patent Bills before Congress. New System of Ventilation. 4 engravings. Recent Decisions Relating to Patents, Assignments, etc.

II.—MECHANICS AND ENGINEERING.

Floating Derricks of the New York Harbor. 1 eng. Manganese Bronze Torpedo Boats. Accident on board the Greece. Hints to the Young Steam Fitter. 2 engravings. Notes on Belting. Why the Thunderer's Gun Burst. Test Trials of Steam Engines. Fire Engine for H. M. S. Sultan. The Steam Velocipede. 1 engraving. Rotary vs. Reciprocating Motion. The Steam Fire Engine.

III.—MINING AND METALLURGY.

Compressed Air in Coal Mining. The Cornum Mines of North Carolina.

IV.—CHEMISTRY AND PHYSICS.

Long Distance Telephoning. On the Crystallization of Canada Balsam. 2 engs. MacTear's Artificial Diamonds. Phosphorescence in the Caribbean Sea. Astronomical Notes. The Indian and the Telephone. Curiosities of the Telephone. Fluid for Preserving Organic Substances. The Viscosimeter. Progress of Long Range Telephoning. Aluminum Telegraph Wires. How steel Hardens. Approximate Economy of Gas and Electric Lighting. Artificial Ice Skating Rink, New York. Melting Street Snow by Steam. A New Use for the Telephone. Telegraphic Communication with South Africa. On the So-called Crystallization of Canada Balsam, and how to make Ornamental Picture Frames. Fire from Steam Heating Pipes. Captive Light. Professor Tyndall's Christmas Holiday Lectures. The Electric Sun. Meteors. Grenet Battery. Leclanche Battery. Crystallized Chlorophyll. A Supposed Unseen Outer Planet. Oxalic Acid and its Salts. Artificial Vanillin. Cements. Rapid Photos. Spectroscopic Notes. Still Another Chemical Photometer. An Unexpected Comet.

DESIGNS.

Carpet, T. J. Stearns. 11,619. Medallions, H. Knubel, Jr. 11,617. Torches, J. M. Adams. 11,616. Woven fabrics, E. Maertens. 11,618.

TRADE MARKS.

Cigars, J. R. Smith. 7,801. Flour, H. Kolb. 7,803. Turpentine in cans, cases, or barrels, spirits of, Blossom, Hayne & Co. 7,802. Whisky, D. F. Clemmer. 7,800.

English Patents Issued to Americans.

From January 23 to January 27, inclusive. Coloring fibrous materials, H. W. Vaughan, Providence R. I. Electric light, E. J. Houston et al., Philadelphia, Pa. Grain binder and gatherer, M. A. Keller, Brockport, N. Y. Ice, manufacture of, A. J. Rossi, New York city. Lamp, C. S. Westland, Providence, R. I. Propelling vehicles, C. L. French, Brooklyn, N. Y. Spinning machinery, Wm. Clark et al., Newark, N. J. Telegraph, electric, W. C. Barney, New York city. Telephone signal apparatus, G. H. Bliss, Pittsfield, Mass. Valve, slide, E. Robinson, Columbus, Ohio.

V.—NATURAL HISTORY, NATURE, MAN, ETC.

One of Nature's Gluttons, Bullfrog Disgorging a Mouse. 1 engraving. The Action of Light on Plants. The Industrial Uses of Fish Skins. The Quineal River Salmon. Olives in California. The Owner of the Cape of Good Hope and his Ostrich Farm. Petroleum in Hanover. The Honorable Marshall Jewell. The Moholi Galago. 1 engraving. Spider Crab. 1 engraving. Natural History Notes. Hybrid Geese. Buried Oak Timber. Peach Tree Borer Infesting Almonds. Saccharomyces Exiguus. The Germs Floating in the Atmosphere. Petroleum in Colorado. Influence of Watering on the Germination of Seed. Marine and Land Hermit Crabs. 4 engravings. Cape of Good Hope Whales. In the Clutch of an Octopus. The Hyrax. 1 engraving. The Pickered Frog. 1 engraving. Distribution of Plants. Cinchona Culture for the Pacific Coast. Non-Inflammable Wood. George Wharton Simpson. Captain Minie. General Arthur J. Morin. The Largest Land Animals. A Fish Story.

VI.—MEDICINE AND HYGIENE.

The Benzoate of Sodium in Consumption and Diphtheria. Sewer Gas and Disease. A Wonderful Surgical Operation. Remedy for Corns. Warmth and Energy. Woman as Physicians. Death from an Electric Shock. Chastant's Observations on Yellow Fever.

VII.—SCIENTIFIC MEETINGS, EXHIBITIONS, ETC.

The Proposed World's Fair in 1889. The Miller's International Exhibition. The Brussels Exhibition.

VIII.—INDUSTRY AND COMMERCE.

Iron Light House for Mexico. Prosperous France. Work and Wages. Cotton Size and Cotton Sizing. Making Knit Cotton Goods to Imitate Wool. American Innovations. Engineers.—Their Value. The Delaware Ship Canal. Railroad Reduced to a Science. The Avoidance of Fire Risk in Factories. The Antiquity of the Spoon. The Hudson River Tunnel. What the New York Fair Should Be. The Mississippi River Survey. Scientific Gymnastics. Chinese Porcelain Vase. 1 eng. Yankee Inquisitiveness. The Metric System. American Industries, No. 30. The Manufacture of Leather Belting. P. Jewell & Sons' Leather Belting Factory, Hartford, Conn. 5 engs. Large Farming. Cost and Results of some Recent English Strikes. The First American Rolling Mill. The Fire Laws of Japan. New York City Fire Department. One Year's Production of Petroleum. Milk a Forbidden Food in China. Ancient Egyptian Glassware. 8 engs. Railroad Construction in 1879. Recent Explorations in Afghanistan. Speaking Dictionary. The Crops of 1879. American Industries, No. 31. The Manufacture of Solid Emery Wheels. Works of the Tanite Company, Stroudsburg, Pa. 5 engs. The Belgian Prize. The Science of War. Liability from Sparks. Tea Taster's Occupation. The Manufacture of Porpoise Oil. Wooden Pavements. Gold and Silver in Malne. American Industries, No. 32. The Manufacture of Rotary Pressure Blowers. Shops of P. H. & F. M. Roots, Commerceville, Ind. 4 engs. American Losses by Fire. How to get Rid of Rats in Mills and Granaries. Collection of Ornaments. The American Missionaries in Turkey. Flour vs. Bran. A New Government Bureau Proposed. The Prevention of Fires. Railroad Crossings.

IX.—PRACTICAL RECIPES AND MISCELLANEOUS.

Email Ink. To Clean Blue Vitriol. Silver Plating on Steel. Tracing Cloth. The Logic of Government Control. Macassar Oil. Kind Words from Chicago. Cheap Inedible Ink. Court Plaster. Introduction to a Biographical Sketch. Rubber Hand Stamps. Blacking. How to Make Tight Tarred Paper Roofs. Magnesium Steel. To Stop Boiler Leaks. Effect of Brake. To Cut Carbon. Position of engineer. To Work Horn. Insulator for Wire. Melted Iron. Irrigation. Danger from Kerosene. Condensed Milk. Ciston Rings. Cracking in Radiators. Dose Salicylic Acid. Short Hand. Books for Steam Engineering.

Answers to Correspondents, embodying a large quantity of valuable information, practical recipes, and instructions in various arts. Single numbers of the Scientific American Export Edition, 50 cents. To be had at this office and at all news stores. Subscriptions, Five Dollars a Year; sent postpaid to all parts of the world.

MUNN & CO., PUBLISHERS, 37 PARK ROW, NEW YORK.

To Advertisers: Manufacturers and others who desire to secure foreign trade may have large and handsomely displayed announcements published in this edition at a very moderate cost.

The Scientific American Export Edition has a large guaranteed circulation in all commercial places throughout the world. Regular Files of the Export Edition are also carried on ALL STEAMSHIPS, foreign and coastwise, leaving the port of New York. Address MUNN & CO., 37 Park Row, New York.

Advertisements.

Inside Page, each insertion --- 75 cents a line. Back Page, each insertion --- \$1.00 a line. (About eight words to a line.) Engravings may have advertisements at the same rate per line, by measurement, as the letter press. Advertisements must be received at publication office as early as Thursday morning to appear in next issue. The publishers of this paper guarantee to advertisers a circulation of not less than 50,000 copies every weekly issue.

SPARE THE CROTON AND SAVE THE COST. Driven or Tube Wells

Furnished to large consumers of Croton and Ridgewood Water, W. M. D. ANDREWS & BRO., 335 Broadway, N. Y., who control the patent for Green's American Driven Well.

SKIN DISEASES, AND SOME IMPORTANT Topical Remedies used in their Treatment. By JOHN V. SHOEMAKER, M.D. An important contribution to medical literature, pointing out the proper use of soaps in treating skin diseases, and what kinds and how they should be used; treating of numerous practical facts in regard to certain new preparations embraced under the name of "creoles" and urging the great importance of mechanical remedies, such as friction, compression, etc., in the external treatment of skin diseases, and showing how and when they should be applied. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 210. Price 10 cents. To be had at this office and from all newsdealers.

SCIENCE, AND THE IMPROVEMENTS WHICH IT CAN EFFECT IN OUR TRADES AND IN THE CONDITIONS OF OUR WORKMEN.—A very suggestive address delivered by Prof. W. E. Ayerton, at the City and Guilds of the London Institute, and in which the author points out to the British workmen why most of the valuable inventions are of American origin, and how necessary it is that English Artisans should look to their studies as a means of making themselves educated workmen and not mere copying machines. The realm of education shown to be the mental training which it insures, and not accumulation of facts; and the proof of this seen in the numerous inventions emanating from educated men who have a small knowledge of the details of the science to which the invention belongs. The importance of a general knowledge of principles pointed out. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 211. Price 10 cents. To be had at this office and from all newsdealers.

LONGEVITY, OR THE NATURAL DURATION OF LIFE. An able and interesting paper by Dr. B. W. Richardson, pointing out the fact that man by his organization was designed by his Creator to live, engaged with the sensibilities of life and intelligence, for a period of 100 years; and showing by means of a description of an ideal people, how civilized man should live in order that this, his natural term of days, may be reached. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 211. Price 10 cents. To be had at this office and from all newsdealers.

THE HORSE BOT-FLY. A COMPLETE life history of this dreaded horses' pest, from the egg stage up to the perfect fly; followed by a short life history of another allied foe of the horse—the Hemorrhoidal Bot-fly. Illustrated with 24 figures of the flies as seen at different periods of their transformations. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 212. Price 10 cents. To be had at this office and from all newsdealers.

CAVEATS, COPYRIGHTS, LABEL REGISTRATION, ETC.

Messrs. Munn & Co., in connection with the publication of the SCIENTIFIC AMERICAN, continue to examine Improvements, and to act as Solicitors of Patents for Inventors.

In this line of business they have had OVER THIRTY YEARS' EXPERIENCE, and now have unequalled facilities for the Preparation of Patent Drawings, Specifications, and the Prosecution of Applications for Patents in the United States, Canada, and Foreign Countries. Messrs. Munn & Co. also attend to the preparation of Caveats, Registration of Labels, Copyrights for Books, Labels, Reissues, Assignments, and Reports on Infringements of Patents. All business entrusted to them is done with special care and promptness, on very moderate terms.

We send free of charge, on application, a pamphlet containing further information about Patents and how to procure them; directions concerning Labels, Copyrights, Designs, Patents, Appeals, Reissues, Infringements, Assignments, Rejected Cases, Hints on the Sale of Patents, etc.

Foreign Patents.—We also send, free of charge, a Synopsis of Foreign Patent Laws, showing the cost and method of securing patents in all the principal countries of the world. American inventors should bear in mind that, as a general rule, any invention that is valuable to the patentee in this country is worth equally as much in England and some other foreign countries. Five patents—embracing Canadian, English, German, French, and Belgian—will secure to an inventor the exclusive monopoly to his discovery among about ONE HUNDRED AND FIFTY MILLIONS of the most intelligent people in the world. The facilities of business and steam communication are such that patents can be obtained abroad by our citizens almost as easily as at home. The expense to apply for an English patent is \$75; German, \$100; French, \$100; Belgian, \$100; Canadian, \$50.

Copies of Patents.—Persons desiring any patent issued from 1836 to November 26, 1867, can be supplied with official copies at reasonable cost, the price depending upon the extent of drawings and length of specifications.

Any patent issued since November 27, 1867, at which time the Patent Office commenced printing the drawings and specifications, may be had by remitting to this office \$1.

A copy of the claims of any patent issued since 1836 will be furnished for \$1. When ordering copies, please to remit for the same as above, and state name of patentee, title of invention, and date of patent.

A pamphlet, containing full directions for obtaining United States patents sent free. A handsomely bound Reference Book, gilt edges, contains 140 pages and many engravings and tables important to every patentee and mechanic, and is a useful hand book of reference for everybody. Price 25 cents, mailed free.

Address MUNN & CO., Publishers SCIENTIFIC AMERICAN, 37 Park Row, New York. BRANCH OFFICE—Corner of F and 7th Streets, Washington, D. C.
