Buziness and Personal.

The C'arge for Insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue,

TO THE CONSTANT CURRENT CURE COMPANY,

207 Main St., Buffalo, N. Y. SIRS: Your Constant Current Electric Generator, which I have used for several weeks, has entirely cured me of rheumatism, and has proved extremely beneficia in other ways. With it I have counteracted the debilitating effects of overwork and warm weather, and have been invigorated and imbued with fresh vitality. Three of my friends, to whom I loaned my generator, have each ordered one from you. W. R. WARREN,
45.47, and 49 William St., N. Y.

For Sale.-A complete set of Patterns, Flasks, and Core Arbors, for making Cast Iron Flanged lipe, Elbows, Tees, and Greenhouse Fittings. Will be sold low to clean out a branch of a business. Address B, Box 23 3, New York.

For Sale .- 9 in. x 9 in. Propeller Engine and Boiler, Shaft, Wheel, Pipes, etc. W.J. Sanderson, Syracuse, N.Y. Cheap Angines, Boilers, Pipe, etc., for sale. See adv. of Logan Machine Works on page 268 this issue

pair of 15 x 24 Engines, good as new, for sale cheap, astheymustbe removed. J. C. Todd. 10 Barclay St., N.Y.

Pays well on small investment. - Stereopticons, Magic Lanterns, and Viewsillus rating every subject for public exhibitions. Lanterns for colleges, sunday schools, and home amusement, 116 page illustrated catalogue free McAllister, Manufacturing Optician, 49 Nassau St., N. Y.

Superintendent vanted .-- A man competent to super in end a works employing about 300 hands in building machinery and tools, and in manufacturing goods for a regular trade. None but a first-class man in all respects need apply. Address B, Box 2333, New York.

Constant Current Electric Generator, Price, \$3. Constant · urrent Cure Company, 207 Main st.. Buffalo, N. Y. Send for circular. See advertisement, p. 253.

HINTS TO CORRESPONDENTS.

No attention will be paid to communications unless accompanied with the full name and address of the

Names and addresses of correspondents will not b

We renew our request that correspondents, in referring to former answers or articles, will be kind enough to name the date of the paper and the page, or the number

Correspondents whose inquiries do not appear after reasonable time should repeat them. If not then published, they may conclude that, for good reasons, 'the Editor declines them.

Persons desiring special information which is purely of a personal character, and not of general interest, should remit from \$1 to \$5, according to the subject, as we cannot be expected to spend time and labor to obtain such information without remuneration.

Any numbers of the Scientific American Supple-MENT referred to in these columns may be had at this office. Price 10 cents each.

- (1) G. E. M. asks: Can you give me a recipe for making black ink that will flow freely, be durable, and brilliant jet black at time of writing ? There are plenty of inks that turn black. I want an ink that writes black and stays black. A. Try the following: add to a pint good iron gall ink from len to fifteen drops of nitric acid, and heat over the water bath until reduced about one-fifth in volume, then add six drachms of pyrogallic acid and half an ounce of neutralized indigo-sulphate (paste). See other receipts for black inks in Supplement, No. 157.
- (2) A. W. asks: What are the expansive properties of air compared with steam? Suppose a vessel filled with air, say at 30 lb. pressure, we reduce the space occupied by the air to one-half, would the pressure be just doubled, or what would the pressure then be per square inch? A. Air follows the same law as steam. Reducing the volume one-half doubles the pressure within a small fraction, if the temperature remains unchanged. 2. How are air guns made? A. Clasp. See Book clasp. You will find a description of air guns in "Appletons' Claw bar, A. A. Strom... Dictionary of Machines, etc.," also in "Appletons' Closet. See Water clo Dictionary of Applied Mechanics."
- (3) O. R. M. asks: What kind of paper is used in making paper canoes, and how is it cemented together? A. Sheets of stout manila passed through a hot bath of aqueous solution of zinc chloride (at 75° B), pressed strongly together and then soaked in dilute aqueous soda solution containing a small amount of glycerin, cohere to form a strong, stiff, waterproof board admirably adapted to the construction of small Presses, Dies, Tools for working Sheet Metals, etc. | boats. Single sheets of paper passed quickly through Fruitand other can Tools. E. W B.iss. Brooklyn, N. Y. the zinc chloride bath, pressed and washed and dried, C. B. Rogers & Co., Norwich, Conn., Wood Working are waterproof, and may be otherwise joined to form waterproof boards by any suitable cement.
 - (4) J. M. B. asks: How can I make indelible ink of good quality for marking on linen? A. (1) Add caustic alkali to a saturated aqueous solution of cuprous chloride until no further precipitate forms; allow the precipitate to settle, draw off the supernatant liquid with a siphon, and dissolve the hydrated copper oxide in the smallest possible quantity of ammonia. It may be mixed with about six per cent of gum dextrine for use. Before washing pass a hot iron over the writing. (2) Asphaltum, 1 part; oil of turpentine, 4 parts; dissolve and temper with printer's ink. Best used with a stamp. See other recipes on this page.
- (5) G. A. H. inquires how to make a durable whitewash for ontbuildings. A. Slake half a bushel good lime in boiling water in a covered vessel, and strain it through a fine sieve; add a peck of salt dissolved in a small quantity of hot water, three pounds of rice boiled with water to a thin paste, one pound of Elevator. See I'neumatic elevator. Tobacco ele-Spanish whiting, one pound of glue softened by soaking in water and then dissolved over a water bath, and five gallons of hot water. Agitate. cover from dust, and son's Hand Book of Saws (free). Over 100 illustrations allow to stand several days. Apply hot. Slaked lime or hydraulic cement mixed with skimmed milk makes a cheap and durable paint for outdoor work.

[OFFICIAL.]

INDEX OF INVENTIONS

FOR WHICH

Letters Patent of the United States were Granted in the Week Ending September 20, 1881. AND EACH BEARING THAT DATE.

['Those marked (r) are reissued patents.]

A printed copy of the specification and drawing of any patent in the annexed list, also of any patent issued since 1866. will be furnished from this office for 25 cents In ordering please state the number and date of the patent desired and remit to Munn & Co., 37 Park Row. New York city. We also furnish copies of patents granted prior to 1866; but at increased cost as the succ!fications not being printed, must be copied by hand.

A VERITABLE BARGAIN. ATTENTION ALL!

A GENUINE IMPORTED BREECH-LOADING SHOT GUN FOR \$5. THE RANCER.

A Breech-Loader for Everybedy.

This is an Unusual Opportunity. The RANGER is in 100 sense a cheap made gun, or unaffe or inaccurate. They cost to make over \$8 aniece. Their inlevery is manufacture by the hundred thousand over \$8 aniece. Their inlevery is manufacture by the hundred thousand over \$8 aniece. Their inlevery is manufacture by the hundred thousand over \$8 aniece. Their inlevery is manufacture by the hundred thousand over \$8 aniece. The strong activities, and large quan ity of these refresence into a shot gun manufacturer's hands, in Leige, Belgium, who altered them into snot guns and shot lened the forestock. The action is te femous "Snyder" swivel breech inmilar to the Phoenix Riffe, the breech block tippingto one side to insert the cartidge, one of the STRONGEST, MOST CERTAIN, and SAFEST actions in the world. These guns are all ID bore, using either brass or paper centre-fire shells. WE CHOKE BORE EVERY ONE OF THESE SHOT GUNS AT OU : OWN FACTORY, and war in every one a extra long ranged safe, accurate, and reliable gun. This is just the gun for farm use; can be loaded light tenough for squirrels, and HEAVY ENOUGH FOR DUCK AND DEER. It can be fired five times intwenty seconds, at d is betier than a double muzzle loader in ; any cases where a muzzle loader is almost useless, on account of the time necessary to loadit. Where Gephers are Rabbits are a p st that the shot gun will exterminate, it is worth many times its cost. For duck and deer it is as good as many high-priced guns, for it possesses the sability in cessary features of SAFETY, RAPIDITY OF ACTION, AND ACCURACY. To those who do not care to barcless at high-priced breech-loader, or that have not sufficient use for one warmain, we offer a BLI BARCAIN. The barcless at high-priced breech-loader, or that have not sufficient use for one warmain, we offer a BLI BARCAIN. The barcless at high-priced guns, for it possesses the same production of the sufficient use for one of warmain, we offer a BLI BARCAIN. The barcless at high-priced guns, for it p
