## NEW BOOKS AND PUBLICATIONS

Ueberdas Technische Schul und Vereins Wes Nordinkeichs．Win Pest Leiplig A．Hartleben．1881． 54 pp ．（Technica Schools and Societies in France．）
The author gives a brief description of the origin and growth of the several institutions for teclinical educa
tion in France，their average attendance，course o study，and the several societies of the former scholar of these institutions．Among the schools and colleges
mentioned are：the Ecole poly technique，Ecole des mentioned are：the Ecole poly technique，Ecole des
Mines，Ecole des Ponts et Chaussees，Ecole des Arts ot Metiers，Ecole des Arts et Manufactures，an
several others．From this work it will be seen tha there are 13 technical societies，with 17,000 members，
in France． Paris Universal Exposition of 1878．Re ports of the United States Commission． Washington：U．S．Government Printing
Office． 5 vols．8vo．Illustrated． 1880.
The several volumes of these reports comprise：（1）
Report of Commissioner－General R．C．McCormick Revort of Commissioner－General R．C．McCormick
with accompanying papers，including lists of exhibitors with accompanying papers，including lists of exhibitors Story（Fine Arts）；Joshua L．Chamberlain（Education）； Andrew D．White（Political Education）：Elliot
Jewett（Manual Training Schools）；John T．Norto （Wood Carving）；Henry Howard（Testile Fabrics）．（3） Daniel J．Morrell（Iron and Steel）；William P．Blake
（Ceramics and Glass and Glassware）；F．P．Baker （Ceramics and Glass and Glassware）；F．P．Baker
（Forestry）；P．M．B．Young（Cotton Cultivation）．（4） Thos．E．Jenkins（Chemical Processes）：James D Gas Engines）；William T．Porter Macbines and Ma chine Tools）；Edward H．Knight（Clocks and Watches）；William J．Anderson（Railway Appara－
tus）．（5）Edward H．Knight（Agricultural Imple－ tus）．（5）Edward H．Knight（Agricultural Imple－
ments）；John J．Woodman（Agricultural Products）： Samuel Dysart（Live Stock）；George W．Campbel） （Horticulture）：Thomas B．Ferguson（Pisciculture）
The several reports are illustrated with engraving and charts，some of them profusely，and the several volume are well indexed．That they contain a vast store of practical information and suggestion goes without tell－
ing．To a great exteut the information here given was ing．To a great exteut the information here given was
set before the public in our newspapers and technical set before the public in our newspapers and technica well worth preserving in this more compact and acces－ sible form．For the set of reports on our table our thanks are due to Commissioner E H．Knight．
Hygiene and Treatment of Catarrh．
By Thos．F．Rumbold，M．D．Part II．
L．Louis：George O．Rumbold \＆Co．
Our favorable opinion of the first part of Dr．Rum－ bold＇s work，treating of the hygiene of catarrh，was expressed some months ago．The second part is
devoted to therapentic and operative measures chronic catarrhal inflammation of the nose，throat，and ears．The work is plainly written，and illustrated by
forty engravings of anatomical structures，apparatus， operations，etc．Thoughont the author insists on the paramount importance of hygienic measures and the
advantage of non－irritating remędies and mild methods advantage of
of treatment．
Hand－Book of Useful Tables for the Lumberman，Farmer，and Mechanic．
Ithaca，N．Y．：Finch \＆Apgar． 25 cents． A handy little book．especially for the lumberman The numerous tables are the work of a graduate

## 

hinTs＇TO CORRESPONDENTS． No attention will be paid to communications unless
accompanied with the full name and address of the writer．
Names and addresses of correspondents will not be given to inquirers．
We renew our request that correspondents，in referring
to former answers or articles，will be kind enourh to to former answers or articles，will be kind enough to
name tive date of the paper and the page，or the number of the question．
Correspondents whose inquiries do not appear after a reasonable time sloond repeat them．If not then pub－ lished，they may conclude that，for good reasons，the Editor declines mem．
Persons desiring special information which is purely
of a personal character，and not of genera inter a personal character，and not of general interest，
shou kl remit from $\$ 1$ to $\$ 5$ ，according to the subject， shou $k l$ remit from $\$ 1$ to $\$ 5$ ，according to the subject，
as we cannol be expected to spend time and lahor to obtain such information without remuneration． Any numbers of the Scientific Amenican Supple－ MENT referred to in these columns may be had at this office．Price 10 cents each．
（1）H．M．G．asks：1．Where can I obtain lead foil for making a secondary battery？A．Any
maker of tin foil can roll it for you． 2 Who frst in vented the link motion of the locomotive $\theta$ A．Robert Stephenson is generally credited with it，as he intro duced it in 1843；but a Mr．Howe，one of his employes，
is said to have invented it in 1842．
（2）H．E．K．writes：My cistern wate does not smell pure，owing undoubtedly，to the top
being tightly closed and the only air reaching the water tighty closed and the only air reaching the
water being through the filling and overflow pipes．I ave ralsed the lid now so that it can have air．Is there purify itself by contart with what air reaches it throug an opening at the lid 1 foot by 3 feet？A．Put into the water a few busbels of freshly burned charcoal in granular powder（free from fine dust）．Stir up the
water and let it settle．If this does not remedy the water and let it settle．If this does not remedy the
evil it is better to clean out the cistern．Surface con vil it is better to clean out the
（3）M．W．C．asks：1．Are the black rub ber combs so much in use injurious to the hair or
beard？I have somewhere readso．A．We think not Does the decomposition of white rubber corks by Does the decomposition of white acid render the latter unfit for ure as a caustic A．Yes；nitric acid should always be kept in glass stop perd bottles．
（4）C．W．W．asks：Can you furnish me with any information in regard to cleaning stone work
（cut）in front of buildings？Is there any process，and where and how can it be obtained？A．Use short，stif wire scratch brushes，and a dressing hammer，if neces－ ary，with plenty of water．If the stone is granite traprock，or sandstone，dilute muriatic or sulphuric
acid may prove useful；but it is better to do without acia may prove u
（5）N．R．B．asks：Are there any nicke mines now worked in the United States？How
it tahen from the ore：by smelting or by chemicals I send you a specimen of mineral，marked as above found here in large quantities．Please inform me what it is through your columns．A．There are several nicke
mines in the United States．The metal $\mathrm{i}_{8}$ usually
俍 btained from the ore by solution and precipitation and is finally reduced in a furnace．Consult Percy＇ Metallurgy．The minerals are noticed under appropr
（6）W．K．P．asks for a plain and not ex pensive mode of bleaching wax；but the bees feed nearly exclusively here on vine and fruit，which，ac ording to my experience，makes a difference in th
process．A．One of the best methods of bleath proeswax is that of exposure to sunlight under glass． The wax is cut in very fine shavings，and spread out so that all parts of it are acted upon alike．Anothergood metholl is to melt the wax and stir it about for come ime with a mixture of tine granular charcoal free from dust）and bisulphite of lime－ 1 of sulphite， 3 of charcoal
and 30 of wax．The charcoal and salt are separated straining．
（7）H．C．asks：What is best for making a waterproof joint on a flagstrne sidewalk？Stones are al Pack the lower part of the joint with oakum．
（8）D．W．O．asks：What materials are sed in the preparation of cement or asphaltum for
walks？What should be their condition，their propor tikns and the best manner of laying ？A．See Foot
tion， walk Pavements，Suppiement，No．83，and Stree avements and Sidewalks，Supplement，No．33．
（9）E．S．writes：I wish to separate the pulp of cooked apples from the rinds and cores．It can Please let me know which you think would be best：a perpendicular or horizontal motion．Would not there be less danger of it clogging if the motion was irregu－ lar？How many revolutions ought it have per minute A．You might use with advantage for this purpose a centrifugal machine．The horizontal is preferable to the
jerpendicular motion．The motion should be as regu－ lar as possible．Such machines are usually rim at from 500 to 1,000 revolutions per minute．
（10）H．P．H．asks：1．Is the dirt or any forcign substance in water taken up in the steam to any appreciable extent 9 A．Yes，if dirty water be used，containing much vegetable matter．3．Can you
give me the ratio of speed to power required $\%$ For instance，if $I$ run an emery wheel， $18 \times 3,500$ revolutions per minute，how much more power will it take to run
it 1,000 revolutions？A．It depends upon the kind of work you wish to do on the wheel．It could not be de－ ined except by direct experimen
（11）W．L．D．and W．T．T．，who ask about a process for producing a large number of copies
of manuscripts，etc．，by the gelatin process，are re ferred to article on Stencil Copying Process，page 65，
（12）I．M．asks how to render wood water－ proof．A composition not containing alum would b preterable．A．Dry and saturate the wood as far
possible with hot paraffine oil or melted paraffine．
Mineralis，etc．－Specimens have been
ceived from the following correspondents，and examined．with the results stated
S．A－The clay contains too much iron and sand for porcelain or white ware．It might make good bricks． pyrite－sulphide of iron；the white crystals crylcite－lime carbonate－F．E．C ，Jr－The red stone is jasper；the white is quartz．The ore marked B would require an assay to determine its value．－E．W．W．－The lime－
stone contains a small quantity of galena－lead sulphide stone contains a small quantity of galena－lead sulphide
－hardly rich enough to work profitably．The lead pro bably carries a trace of silver．－B．B．P．－－The supposed small quantity of lignite－not black lead．It is of little practical value 2．Fossiliferous limestone．3．Argilla． ceous limestone．4．Missing．－G．M．M．－1．Arsenical sulphide of iron．2．Mica schist．3．A micaceous
sand containing a little sulphide of iron．4．The rock contains a small quantity of chalcopyrite．－E．P．－The pebble is a fragment of ciear quartz，with a little free gold adhering to it－rich ore．－H．J．C．－A piece of
coal shale．－J．S．R．-1 ．Sulphide of iron with a little galena－lead sulphide．Probably argentiferous． Copper and iron sulphides．3．Quartz and pyrrhotine magnetic iron pyrites－probably contains traces of
nickel．S．Altered ferruginous feldspathic quartz－pos－
sibly slightly auriperty ．4．Chalcopyrite－copper Iron
sulphide．6．Chiehy sulphide and phosphate of copper sulphide 6．Chiehy sulphide and phosphate of copper
nd sulphide of iron．－J．W．M．－Quartz and feldspa and sulphide of iron．－J．W．M．－Quartz and feldspar containing much graphite．If the sample correctly re
presents a large body of rock the property is valuable． A．B．B．－No．1．Gypsum－used for making plas：er－ ate．3．A ferruginous clay－could be used for makin bricks and cheap pottery．－－J．C．-1 ．Silicious and fer ginous limestone．2．Limestone containing traces of opper and iron sulphides．－N．G．\＆Co．－Galena－sur phide of lead－a valuable lead ore．It probably con
tains a trace of silver．
