# \$5 A YEAR BY MAIL, POST-PAID, SINGLE COPIES 10 CENTS. Can I Obtain a Patent? This is the first in-Can I Obtain a Patent? This is the first in-quiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the inven-tion, with a small sketch. All we need is to get the idea. Do not use pale ink. Be brief. Send st mps for postage. We will immediately answer and inform you whether or not your improvement is probably patent-able; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make no charge. All persons who desire to concult us in regard to ob-taining patents we cordially invite to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all caree they may expect from us a

For How Long is the Patent Granted? The patent is granted for 17 years, during which time the patent ecripys the full and exclusive right to make, use, and sell the invention, and grant rights, licenses, or privileges. There are no taxes to pay on a patent after it is granted in the United States. The owner is not obliged to work the pitent within a specified period. The patent remains good and valid, whether it is worked or not.

The Average Time required to procure a patent The Average Time required to procure a patent is six weeks. We frequently get them through in less time, but in other cares, owing to delay on the part of the officials, the period is cometimes extended. We make a special point to forware our cases as rapidly as possible. We have an extensive branch house in Washington (cor. F and 7th sts.), employing a corps of skulled assistants, and we make it our special duty to watch over the cases of our clients while they are be-fore the Patent Office. If the examining officer objects to the grant of a claim, needs personal explanations, or requires amendments, if we deem them proper, so as to secure the allowance of our client's patent as soon as possible. as possible. In addition to the above Service, our patron receives, gratis, a notice in The SCENTIFIC AMERICAN, descriptive of the merits of the new patent, giving also his name and address. We estimate that this notice goes before half a million of readers, without a penny of cost to our client. This publication is of immense value to the patentee in advertising his new invention, and assisting to bring it promptly to the attention of purchasers. Were ho to do this printing himself, it would cost him. by the most economical method, seve-ral hundred dollars. Advertisements.

# **NERAL W O O**

This Fireproof and indestructible material success fully prevents loss of heat by radiation, keeps frost from water opes, deadens sound, checks spread of fire in wall partitions, floors of dwellings. 25 cts, per cubic foot. U.S. MINERAL WOOL CO., 16 Cortlandt St., N.Y.

PRODUCTION OF SOUND BY RADIANT **PRODUCTION OF SOUND BY KADIANT** Evergy.—An important contribution to Physical Science by Alexander Graham Bell, wherein the author describes in detail the most recent researches of himself and Mr. Sumner Tainter on the action of radiant energy upon various solids, liquids and gases; and also their experi-ments upon substitutes for selenium in electrical re-ceivers, upon the measurement of the sonorous effects produced by different substances, and upon the nature of the rays that produce sonorous effects. Accompanied by H figures illustrative of apparatus used. Contained in SCINTIFIC AMERICAN SUPPLEMENT, No. 281. Price 10 cents. To be had at this office and from all newsdealers.
