Notes & Queries

HINTS TO CORRESPONDENTS.

No attention will be paid to communications unless accompanied with the full name and address of the writer.

Names and addresses of correspondents will not be given to inquirers.

We renew our request that correspondents, in referring to former answers or articles, will be kind enough to name the date of the paper and the page, or the number of the question.

Correspondents whose inquiries do not appear after a reasonable time should repeat them. If not then published, they may conclude that, for good reasons, the Editor declines them.

Persons desiring special information which is purely of a personal character, and not of general interest, should remit from \$1 to \$5, according to the subject, as we cannot be expected to spend time and labor to obtain such information without remuneration.

Any numbers of the SCIENTIFIC AMERICAN SUPPLEMENT referred to in these columns may be had at this office. Price 10 cents each.

Correspondents sending samples of minerals, etc., for examination, should be careful to distinctly mark or label their specimens so as to avoid error in their identification.

(1) D. A. O. asks: 1. What will be the disadvantage, if any, in using a 15 horse power engine with a 10 horse power boiler, provided not more than 6 or 8 horse power is required? A. There will be a greater loss from radiation and condensation in the larger engine than in one exactly adapted to its work.

(2) H. M. F. writes: What do you think of the following receipt as a gray hair restorer? Take a quantity of black tea and boil down strong, and then, placing a large tennenny nail within the tea fluid, cork all in a bottle, and use once a week. This remedy is said to supply the "iron" to the hair which is lost and return it to its original color, dark. Do you think this remedy will in time destroy the hair? I am afraid it might cause baldness. A. Tea contains tannin, and this in connection with iron salts produces ink. Ink dyes gray hair black (temporarily), but possesses no value as an invigorator or restorer of gray hair. See "Hygiene of the Hair," by Dr. Erasmus Wilson, in SUPPLEMENT, No. 102.
