NEW BOOKS AND PUBLICATIONS

Synopsis of the Fresh Water Rhizopods. Compiled by Romeyn Hitchcock. Published by the author, 53 Maiden Lane.

A condensed account of the genera and species of American fresh water rhizopods, founded on the large work of Professor Leidy and intended as a sort of introduction to it. In view of the comparatively little that is known of the life histories of this class of organisms. Mr. Hitchcock sees in their study a broad field for original investigation, and hopes by means of his convenient handbook to awaken a livelier interest among microscopists in this interesting pursuit.

THE PETTIBONE NAME, by Margaret Sidney; AFTER THE FRESHET, by E. A. Rand; ROCKY FORK, by Mary Hartwell Catherwood. Boston: D. Lothrop & Co.

Three cleverly told stories of American life dealing chiefly with young people, and well calculated to interest girls and the gentler sort of readers generally. Without rising to the level of permanent literature they are first-rate of their class, bright, clean, and entertain-

Tokio Daigaku (Tokio University), Tokio, Japan. Quarto, paper.

These memoirs bear witness of commendable activity in the science department of Tokio University. No. 6 (pp. 73, plates xix.) is an elaborate study of the chemistryof saki brewing, by R. W. Atkinson, Professor of Analytical and Applied Chemistry. No. 7 (pp. 81, charts 26) is a report on the meteorology of Tokio, for 1880, by T. C. Mendenhall, Professor of Experimental Physics, with a chapter on fires in Tokio, by Professor K. Yamagawa. No. 8 (pp. 27) embodies a reinvestigation of the avoid the evaporation of water? You would oblig wave lengths of some of the principal Fraunhofer lines of the solar spectrum, also by Professor Mendenhall.

THE LORD'S PURSE BEARER. By Hesba Stretton. Boston: D. Lothrop & Co.

London. Why such books should be reproduced and This sealing is not absolutely necessary, however. read here is unaccountable.

THE MOTHER'S RECORD, Boston: D. Lothrop & Co. \$1.

A record book with spaces for entering year by year the more important or interesting facts of a child's history. The items of entry are largely of sentimental or domestic interest, yet others of a strictly scientific nature are provided, with blank space for such additional entries as the parent may wish to make. Properly kept, a record of a child's physical and intellectual nurture, growth, and development could not fail to be interesting and valuable. The studies of infancy made by Darwin and Taine already prove that. It is doubt-The Berryman Feed Water Heater and Purifier and ful, however, whether many parents will follow their

Scientific Publishing Company.

These useful annuals have now reached respectively their sixth, fourth, and second issue. They all show a Pure Water furnished Cities, Paper Mills, Laundries, | creditable advance in the fullness of their statistics and other information of use to all interested in or having dealings with water and gas works and their manage-

> A. Wright, Architects. New York: William T. Comstock.

Contains twenty colored lithographic plates exhibiting the use of color in exterior and interior house painting, with letterpress describing the preparation, use, and application of color. The arrangements of color will be found very suggestive, even when they may not be deemed suitable for imitation.

HIN'TS TO CORRESPONDENTS

No attention will be paid to communications unless accompanied with the full name and address of the writer. Names and addresses of correspondents will not be

(2) C. E. P. asks: Please inform me of a the design. AMERICAN SUPPLEMENT sent to them free. good inexpensive material-which is a non-conductor The Supplement contains lengthy articles embracing of sound—to be used between the inner and outer

(3) Miss M. C. G. asks: What shall I use to cleanse some old engravings and lithographs, neglected and dirty, but apparently uninjured otherwise? A. To clean engravings, prints, or plain uncolored lithographs: Free the paper from traces of dust, and float it, face downward, for half an hour or more on the surface of a clear solution of six ounces of fresh chloride of lime (calcium hypochlorite) in a pint of soft cold water contained in a shallow porcelain dish. Float on the surface of water containing about three drachms of sulphuric acid to the pint. If not then white enough repeat the operations, and finally rinse thoroughly in a spray of clear cold water, and dry between clean blotting pads under pressure. Colored lithographs cannot be safely cleansed by this or other chemical treatment.

(4) F. A. R. asks: What will prevent moisture gathering on a water pipe that runs through my cellar, overhead? A. Cover the pipe with a nonconductor of heat.

(5) J. B. writes: Reading your correspondence with reference to defective sheets in steam boilers, caused by flat surfaces at the end of sheets after bend-I am a practical boiler maker, and I have always used the following plan when bending sheets, which has saved me the trouble of having to draw in the ends of sheet iron betwixt the end of sheet and the lower roll the whole width of plate when passing through th rolls. [This is a very good way of overcoming the diffi culty.-EDs.]

(6) A. W. R. writes: Please inform me whether it is necessary that a Leclanche battery mus be hermetically closed or sealed; or is it just done to me very much by answering in the Notes and Querie column of the Scientific American, of which am subscriber. A. The cups are sealed mainly with a view to prevent evaporation of the solution and the disagreeable creeping of the salt dissolved, which in An English story; life among the vicious poor of some cases materially affects the insulation of the cells

> (7) D. A. O.—Our answer to this corre spondent, about injectors, published July 8, needs to be rendered more full. The Korting Double Tube Injector will elevate water from wells 60 feet deep, by placing the injector within 20 feet of the water and elevating 40 feet to boiler, also feeding the boiler. One handle operates the injector, and by attaching a wooden lever any one can start and stop injector from top of well very readily.

(8) H. B. J. asks: 1. Is a large building covered with a tin roof lightning proof? A. No. But a metallic roof has the advantage that it may diffuse the electricity and assist it in taking to the ground by veral different routes, with less destructive effect than if it went on one route. 2. Is there a case known of a building being seriously damaged by lightning when so TORY, 1882; GAS WORKS STATISTICS, 1882; building being seriously damaged by lightning when so WATER WORKS STATISTICS, 1882. Edited by Charles W. Hastings. London: The that were damaged that had metallic roofs, but no rods, in help volumes of Screwning America. in back volumes of Scientific American.

(9) H. H. F. asks: Will you please inform me in the Notes and Queries in the Scientific American how what is called "burnt finish" is produced on tool handles. etc.? It produces a clouded surface of various shades of brown which is very fine after polishing. This may be done by running a red hot iron over the MODERN HOUSE PAINTING. By E. K. Rossi- surface quickly; producing a variety of effect by touching or not touching the surface or by varying the shapes of the irons. Similar effects may also be produced by using a blow pipe with a sharp hot blast. It should be attached to the lamp and also to a blower with a small rubber hose, so that it can be quickly moved over the work. Rings or bands are made as of old by friction against hard wood while running in the lathe. Polish with a mixture of alcoholic snellac varnish, two parts, boiled linseed oil one part, shaken well together, and applied with a cloth while the work is in motion.

(10) M. L. S. writes: 1. If the heat of the sun is seventy degrees on each square foot of surface, what will be the heat if the rays, naturally falling on three square feet of surface, be reflected by mirrors on to one square foot of surface? A Other things being equal, the heat will be multiplied by the number of reflectors. The Adams solar boilers (Madras) are operated by batteries of plane reflectors set so as to converge the solar rays upon the boiler. 2. Is there anything for removing ink (writing ink) stains We renew our request that correspondents, in referring from hands? A. Yes; different inks require different Circuits, testing and breaking. W. R. Nutting. . . . 260.043
