Government Railways of New South Wales. CONTRACT FOR THE MANUFACTURE AND SUPPLY OF 150,000 TONS OF STEEL RAILS.

To Ironmasters, Manufacturers, and Others. The Government of New South Wales, being desirous of encouraging the development of the local Iron Mining and Steel Manufacturing Industries, are prepared to receive Tenders for the supply of 150,000 tons of Steel Rails, to be manufactured in the Colony. Sealed Tenders marked outside "Tenders for the Manufacture and Supply of 150,000 Tons of Steel Rails" will be received at the office of the Agent-General of New South Wales, Westminster Chambers, Victoria Street, London, S. W., not later than the 30th November, 1884, and at the Public Works Office, Sydney, not later than the 10th February, 1885, at which latter place the whole of the Tenders will be opened at 11 o'clock, A.M., on the day last named.

Each Tender must be accompanied by a Bank Deposit Receipt to the credit of the Colonial Treasurer in the sum of (£1,000) one thousand pounds sterling as a guarantee of good faith. Such deposit will be returned to the unsuccessful Tenderers as soon as the Tenders have been declared, but the deposit of the successful Tenderer will be retained as security for the due performance of the Contract. Tenders not accompanied by such deposit will be absolutely rejected as informal. Printed copies of preliminary Specifications and Conditions of Contract may be obtained on application at the office of the Commissioner for Railways, Sydney, and also from Messrs. K. W. Cameron & Co., of New York.

Delivery of the rails is to commence not later than 1st December, 1886, and to be at the rate of not less than 15,000 tons per annum. Contractors must give full information and particulars in their Tender as to the process of manufacture they intend to adopt, and also whether they will be prepared to manufacture and supply, at rates to be afterward agreed upon, such points, crossings, fishplates, and fastenings, etc., as may be required from time to time for the rails under this Contract. Contractors must state in their Tender whether they intend to manufacture the rails from native materials only, or whether, and to what extent, they intend to use imported material, giving a separate price per ton in each case.

As it is unlikely that intending Contractors will enter into an engagement of the above nature, without first satisfying themselves by personal inspection as to the position and extent of the raw material in New South Wales required for the manufacture of iron, every facility and information on this subject will be afforded on application to the Under Secretary of the Mines Department, Sydney, or to Messrs. R. W. Cameron & Co., of New York, and free passes will be allowed on the Government Railways of New South Wales to representatives of Tenderers wishing to ascertain the resources of the Colony.

For the information of persons desiring to Tender, it may be stated that the official returns show that there were imported into New South Wales and Victoria (the two Colonies join each other, and are connected by Railway) within the last 10 years 1,350,000 tons of iron and steel inclusive of the permanent way material required for Government and other Railways constructed during the period mentioned. CHAS. A. GOODCHAP, Commissioner for Railways.

Department of Public Works, Railway Branch, Sydney, 1st October, 1883.
