SPEAKING TELEPHONES. THE AMERICAN BELL TELEPHONE COMPANY, W. H. FORBES, President. W. R. DRIVER, Treasurer. THOS. N. VAIL, Gen. Manager. Alexander Graham Bell's patent of March 7, 1876, owned by this company, covers every form of apparatus, including Microphones or Carbon Telephones, in which the voice of the speaker causes electric undulations corresponding to the words spoken, and which articulations produce similar articulate sounds at the receiver. The Commissioner of Patents and the U. S. Circuit Court have decided this to be the true meaning of his claim; the validity of the patent has been sustained in the Circuit on final hearing in a contested case, and many injunctions and final decrees have been obtained on them. This company also owns and controls all the other telephonic inventions of Bell, Edison, Berliner, Gray, Blake, Phelps, Watson, and others. (Descriptive catalogues forwarded on application.) Telephones for Private Line, Club, and Social systems can be procured directly or through the authorized agents of the company. All telephones obtained except from this company, or its authorized licensees, are infringements, and the makers, sellers, and users will be proceeded against. Information furnished upon application. Address all communications to the AMERICAN BELL TELEPHONE COMPANY, 95 Milk Street, Boston, Mass.
