Industrial Opportunities.

There are thousands of legitimate industrial opportunities and locations that are lying unemployed and undeveloped for want of the proper means of introduction to manufacturers; and many towns and other organizations are ready to welcome, with substantial inducements, additions to their wealth and prosperity in the shape of legitimate manufacturing enterprises.

In the other hand, numbers of manufacturers, investors, and business men would gladly remove their business to some location where convenience to raw material, comparative freedom from competition, and a ready market for their products are offered them. Many an idle building and plant can be profitably utilized on advantageous terms both to the owner and the manufacturer. If the right party can be found to decupy it. To bring these diversified interests properly tagether is the province of our Industrial Department. The extensive system of correspondents connected with our business enables us to collect reliable information about such properties, and we are in a position to furnish every necessary detail to those who desire to avail themselves of these opportunities. Address, Industrial Department,
