All the above presents will be awarded in a fair and impartial manner. Presents will be sent to any part of the United States or Canada. Every person sending us 50 cents for a 6-months' trial subscription to our paper is also privileged to apply for a loan, to be made out of advertising profits, the amount borrowed being permitted to remain unpaid as long as the borrower remains a subscriber and keeps their credit good. On the basis of 250,000 circulation (which will probably be doubled) the business and profits will approximate as follows: Receipts: 250,000 yearly subscribers, \$250,000; 1,000 inches advertising, \$2.50 per line, \$15 per cent, 24 issues, \$360,000; total, \$610,000. Expenses: For paper and press work, 250,000 copies, 24 issues, \$200,000; editorial work, office, repairs, etc., \$25,000; 100,000 presents, \$40,000; total, \$265,000, leaving a net profit of \$345,000. For this enormous profit for sale of advertising space the Chicago Post and Courier depends on its 250,000 subscribers, for advertisers pay for space in proportion to circulation. With but 25,000 circulation the profits would be but a tenth of the amount. Therefore as subscribers are doing us a favor when they send us their names, we desire to return favor for favor. Any subscriber who desires to borrow from \$100 to \$500 at 4 per cent, the principal to stand if desired, as long as the borrower remains a subscriber, should so state when he sends us 50 cents for a 6-months' trial subscription to our paper. CONDITIONS: Loans made pro rata, not less than \$100 nor more than \$500. First year's interest at 4 per cent, to be deducted from amount loaned. Your individual note is all the security asked, provided you will send the names of several of your neighbors to whom we can refer—not as to the amount of property you are worth but as to your good character. Every subscriber who possibly agrees to show the paper and present to his friends and neighbors. When a loan is made, the adjoining form of note will be sent with the money to the subscriber's nearest bank or express office, and no note need be signed until the money is paid over. Send the names of several references, and immediate inquiry will be made. If no loans desired, no references need be sent.

FOREIGN PATENTS. Their Cost Reduced.

The expenses attending the procuring of patents in most foreign countries having been considerably reduced the obstacle of cost is no longer in the way of a large proportion of our inventors patenting their inventions abroad.

CANADA.—The cost of a patent in Canada is even less than the cost of a United States patent, and the former includes the Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, British Columbia, and Manitoba.

The number of our patentees who avail themselves of the cheap and easy method now offered for obtaining patents in Canada is very large, and is steadily increasing.

ENGLAND.—The new English law, which went into force on Jan. 1st, enables parties to secure patents in Great Britain on very moderate terms. A British patent includes England, Scotland, Wales, Ireland and the Channel Islands. Great Britain is the acknowledged financial and commercial center of the world, and her goods are sent to every quarter of the globe. A good invention is likely to realize as much for the patentee in England as his United States patent produces for him at home, and the small cost now renders it possible for almost every patentee in this country to secure a patent in Great Britain, where his rights are as well protected as in the United States.

OTHER COUNTRIES.—Patents are also obtained on very reasonable terms in France, Belgium, Germany, Austria, Russia, Italy, Spain (the latter includes Cuba and all the other Spanish Colonies), Brazil, British India, Australia, and the other British Colonies.

An experience of FORTY years has enabled the publishers of THE SCIENTIFIC AMERICAN to establish competent and trustworthy agencies in all the principal foreign countries, and it has always been their aim to have the business of their clients promptly and properly done and their interests faithfully guarded.

A pamphlet containing a synopsis of the patent laws of all countries, including the cost for each, and other information useful to persons contemplating the procuring of patents abroad, may be had on application to this office.

MUNN & CO., Editors and Proprietors of THE SCIENTIFIC AMERICAN, cordially invite all persons desiring any information relative to patents, or the registry of trade-marks, in this country or abroad, to call at their offices, 361 Broadway Examination of inventions, consultation, and advice free. Inquiries by mail promptly answered.

Address, MUNN & CO., Publishers and Patent Solicitors, 361 Broadway, New York. Branch Office, cor. F and 7th Streets, opposite Patent Office Washington, D. C.
