Barnes' Patent Foot-Power Machinery.

Cabinet Makers.

We call attention of Furniture Dealers and Cabinet Makers to the fact that they can—with an outfit of our hand and foot-power machinery—manufacture furniture, and save themselves a greater profit than they can make on ready-made goods that they buy and sell; that they can, with less capital invested, serve their customers better and secure and held a desirable class of trade that they now fall to handle.

Every dealer in furniture keeping any considerable stock of goods, of necessity employs cabinet makers for repairing and finishing work. With a he can, in addition to the repairing and and manufacture styles that he may find and manufacture styles that he may find and manufacture at the same goods will be revery dealer is aware that he has free found in the regular stocks produced by for original and artistic designs in furniture that is pieces all of the same pattern. Very nature what everybody has, and something possessing an individuality, and suited to the house and grown in which it is to be placed.

Cabinet makers and furniture dealers can, with an outfit of these machines, compete with steam power in the manufacture of furniture, both as regards cost of production and style of finish.

Rend the following letter from a cabinet maker.

A. A. Prail, designer and carver, and artistic cabinet work, 513 Elm Street, St. Louis, Mo., says:

"I have been using your Combina alon Scroll and Circular Saw, and find it worthless and and unfit for use. That is, after six or seven years of hard usage, and earning several thousand dollars with it. I think it can still be made to do good service if you will send me a new ratchet wheel. Please forward as soon as possible, as the machine is indisponsable."

If desired, these machines will be sold on Trial. The purchaser can have ample time to test them in his own shop and on the work he wishes them to do.

Three hundred pages bound in beautiful French muslin, embossed covers, full gilt guaranteed to be a finer work in every sense—mechanical, literary, and yor 2.550, or the money of the more remained, literary, and yor 2.550, or the money of the property of \$2.50, or the money of the more remained in every instance, rice only \$1.00 by mail, postpaid. Illustrative author by the National Medical Association, to the officers of which he refers.

Address the Peabody Medical Institute, or Dr. W. H. Parker, No. 4 Buifinch Street, Beston, Mass., who may be consulted on all diseases requiring skill and experience. A GREAT MEDICAL WORK ON MANHOOD

FOREIGN PATENTS. Their Cost Reduced.

The expenses attending the procuring of patents in most foreign countries having been considerably reduced the obstacle of cost is no longer in the way of a large proportion of our inventors patenting their inven-

CANADA .- The cost of a patent in Canada is even less than the cost of a United States patent, and the former includes the Provinces of Ontario, Quebec, New Brunswick, Pova Scotia, British Columbia, and Mani-The number of our patentees who avail themselves of

the cheap and easy method now offered for obtaining patents in Canada is very large, and is steadily increas-

ENGLAND.—The new English law, which went into torce on Jan. 1st. enables parties to secure patents in Great Britain on very moderate terms. A British patent includes England, Scotland, Wales, Ireland and the Channel Islands. Great Britain is the acknowledged financial and commercial center of the world, and her goods are sent to every quarter of the globe. A good invention is likely to realize as much for the patentee in England as his United States patent produces for him at home, and the small cost now renders it possible for almost every patentee in this country to secure a patent in Great Britain, where his rights are as well protected as in the United States.

O'l'HER COUNT'RIES.—Patents are also obtained

on very reasonable terms in France, Belgium, Germany, Austria, Russia, Italy, Spain (the latter include and all the other Spanish Colonies), Brazil, British India, Australia, and the other British Colonies.

An experience of FORTY years has enabled the publishers of The Scientific American to establish competent and trustworthy agencies in all the principal foreign countries, and it has always been their aim to have the business of their clients promptly and properly done and their interests faithfully guarded.

A pamphlet containing a synopsis of the patent $la_{\boldsymbol{W}}\boldsymbol{s}$ of all countries, including the cost for each, and othe information useful to persons contemplating the pro-curing of patents abroad, may be had on application to this office

MUNN & ('(). Editors and Proprietors of THE SCI-ENTIFIC AMERICAN, cordially invite all persons desiring any information relative to patents, or the registry of trade-marks, in this country or abroad, to call at their offices, 361 Broadway. Examination of inventions, consultation, and advice free. Inquiries by mail promptly answered.
