PROPOSALS FOR STEAM BOILERS.

Nashville, Tenn., Feb. 12, 1885.

Nashville, Tenn., Feb. 12, 1885.

Sealed proposals will be received by the Board of Public Works and Affairs, Nashville, Tenn., until 2 P. M., March 19th, for furnishing and errecting at the present pumping station of the Nashville Water Works a battery of Steam Boilers, complying with the following conditions and specifications:

The bollers are to have an easy capacity to evaporate eighteen thousand pounds of water per hour from feed water at 125 F., to dry steam at eighty pounds pressure, using bituminous slack coal. They are to be, in every particular, first class in design, material, and construction, and will be held rigidly to fulfill the specified conditions, tests, and inspections. Each boiler is to be capable of separation from all the others, so as to be fired or cooled without interfering with the working of the others. The stack is now standing (brick); height above grate level, 160 ft. Area of fue, 20 square ft.

The city will furnish the raw materials for foundations, setting, and furnace, except iror; all other[materials, confections, safety valves, ston valves, blewoff valves, feed check valves, steam and watergares and cocks, wrenches, and furnace tools, as well as all labor and appliances and furnace tools, as well as all labor and appliances necessary to construct, deliver, erect, and connect the beilers in complete working order, are to be supplied by the contractor. No proposal will be considered which deep not specifically state the evaporative rate which the bidder will guarantee, with security, if awarded the contract such evaporative rate shall be construed as the number of pounds water evaporate of from and at 212° F, per pound of combustible. The fuffilment of the guaranteewill be determined by a three days working test, using screened Hecla Lump Coal, with feed water at 122° F, steam at c'intropounds, and the results will be reduced to weight of combustible, and evaporation from and at 212° F.

Builders will state the *teast* interval after award of contract in which they will complete the work. Forms on which proposals must be submitted, details, specifications, and comparative values of Hecla and other coals, will be furnished on application.

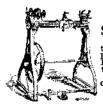

By order of the Board of Public Work and Affairs.

R. EWING, Chairman.

GAS CONSUMERS.

The use of our Impoved Moderator will save you 15 to free cont. No learner, cubber, or mercury. It is the esc. Sample, reliable, aggrante, metallic. Works where 45 per cent. Straple, reliable, accurate, metallic. Works where others but. Howard BROS. & CO. 164 West Brandway, N. Y.

IMPRÓVED \$60 Screw Cuting Lathe.

MODERN PALEONTOLOGY, ITS PREsent Condition and Future Task.—By Prof. Carl Vogt.
An interesting paper, in which the author passes in
review the beings that lived in earlier times, and points
out the proper method of studying them at the present
say, and that, too, in a manner essentially different from
the one usually followed, inasmuch as he tries to prove
the relation between the extinct types and the modern
representatives of the organic world, which he claims
can be proved by generation and descent without calling
in the intervention of a special power of creation existing separate from the organisms. A powerful arximent
in favor of the doctrine of evolution. Contained in
SCIENTIFIC AMERICAN SUPPLEMENT, Nos. 249 and
250. Price 10 cents each. To be had at this office and
from all newsdealers. MODERN PALEONTOLOGY, ITS PRE-

ICE-HOUSE AND COLD ROOM.-BY R. G. Hatfield. With directions for construction. Four engravings. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, 59. Price 10 cents. To be had at this office and of all newsdealers.

FOREIGN PATENTS. Their Cost Reduced.

expenses attending the procuring of patents in most foreign countries having been considerably reduced the obstacle of cost is no longer in the way of a large proportion of our inventors patenting their inven-

CANADA.-The cost of a patent in Canada is even less than the cost of a United States patent, and the former includes the Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, British Columbia, and Mani-

The number of our patentees who avail themselves of the cheap and easy method now offered for obtaining patents in Canada is very large, and is steadily increas-

ENGLAND.—The new English law, which went into torce on Jan. 1st. enables parties to secure patents in Great Britain on very moderate terms. A British patent includes England, Scotland, Wales, Ireland and the Channel Islands. Great Britain is the acknowledged financial and commercial center of the world, and her goods are sent to every quarter of the globe. A good invention is likely to realize as much for the patentee in England as his United States patent produces for him at house, and the small cost now renders it possible for almost every patentee in this country to secure a patent in Great Britain, where his rights are as well protected as in the United States.

OTHER COUNTRIES.—Patents are also obtained on very reasonable terms in France, Belgium, Germany, Anstria Presia Italy Spain (the letter and all the other Spanish Colonies), Brazil, British India, Australia, and the other British Colonies.

An experience of FORTY years has enabled the publishers of THE SCIENTIFIC AMERICAN to establish competent and trustworthy agencies in all the principal have the business of their clients promptly and properly done and their interests faithfully guarded.

A pamphlet containing a synopsis of the patent laws of all countries, including the cost for each, and othe information useful to persons contemplating the procuring of patents abroad, may be had on application to

MUNN & CO., Editors and Proprietors of THE SCI-ENTIFIC AMERICAN, cordially invite all persons desiring any information relative to patents, or the registry of trade-marks, in this country or abroad, to call at their offices, Sci Broadway. Examination of inventions, consultation, and advice free. Inquiries by mail promptly answered.
