ENGINEERING INVENTIONS.

An electric attachment for locomotives has been patented by Mr. Norman F. Chase, of Mont rose, N. Y. The invention covers a novel combination and arrangement of parts whereby a person at the side of a track or at a station may cause certain devices mon the locomotives to be operated for signaling the engineer, and so that danger signals, etc., may be

A railway rail bracket has been patented by Messrs. John Waterman and Nelson A. Gray. of Villisca, Iowa. It is formed with a head having bolt holes near its opposite ends and having the shank united at one end with the head centrally between the ends of the latter, and with a longitudinal rib, being intended especially for use in connection with guard

A boiler has been patented by Mr. James A. Cauldwell, of Owego, N. Y. It is a sectional boiler formed of a series of hollow rings resting one upon another with their apertures in alignment, the space within the rings forming the fire and combustion chamber, the bolts by which the several sections are held together being so formed and placed that the sections and the bolts will expand about equally.

A railroad tie has been patented by Mr. Charles W. Yost, of Middletown, Pa. It consists of a bed plate having at each end an upturned tongue and slots, in combination with chain plates with a slot, a tongue, and pendent locking tongues, with device for locking the chains to the bed plate, so that the rails cannot spread and the chains give strength to the tie and relieve the bed plate of direct wear of the rails.

AGRICULTURAL INVENTIONS.

A seeder and cultivator has been pais adapted more particularly for dropping seed grain between rows of corn stalks left standing after harvesting the corn crop and immediately harrowing in the dropped seed by cultivator clows to assure proper growth of the grain.

A harrow attachment has been patented by Mr. Calvin Kessler, of Pendleton, Oregon, The harrow is made with U-shaped perforated bars adapted to be raised and lowered upon the tooth bars, by means of which the teeth can be cleaned without stopping, or by lowering the bars so that the teeth will not project, they are made to serve as runners to permit the harrow to be readily transported from place to place.

MISCELLANEOUS INVENTIONS.

A biographical photograph card has been patented by Mr. George W. Fountain, of Cameron Mo. Combined with a photograph card having a recess anda slot or opening is a blank having ears and a finger tab, whereby a short biographical record may be preserved in conection with a photograph.

A device for adjusting clothes lines has been patented by Mr. August W. R. Liebau, of New York City. It is a novel device by which the length of traveling clothes lines is adjusted, whereby they may easily be stretched or eased, and securely held in such adjustment, with provision also for carrying a large surplus line.

A cotton-seed press has been patented by Mr. William C. McBride, of Brooklyn, N. Y. Two hydraulic presses are located one above another, with a fixed plunger between them, the lower press raising a truck with perforated pipes leading into apertures, and there are various other novel details of construction and arrangement of parts.

A slope grader and ditching machine has been patented by Mr. John C. Sage, of Gainesville, Ga. Combined with a truck are outer and inner rollers. adjustable shovels, and other novel features of an improved ditching machine, the invention being an improvement on a former patented invention of the same

A windmill has been patented by Mr. Hiram Watkins, of Pueblo, Col. Combined with a vertical main shaft is a horizontal drum wind wheel have ing pivoted blades, which may be adjusted by an attendant at the base of the tower, there being a vertically reciprocating cross head on the shaft connected with and operating a gear wheel, with other novel features.

A reciprocating printing machine has been patented by Mr. Thomas H. Cole, of East Albany, N. Y. It has a revolving bed adapted to serve as an inking pad upon one face and platen upon the other face, the type carrier being operated up and down by a crank and pitman, and motion being communicated to the bed therefrom

A book holder and cover has been natented by Messrs. Frank X. Cline and Alexander Cornstadt, of Portland, Oregon. It is a device which may be used for filing pamphlets, letters, and bills, and also as a cover or case for protecting books, or a number of books or pamphlets, and for carrying them from place to place

A boot jack has been patented by Mr. James H. Kennedy, of Eola, La. It has a V-shaped notch for receiving the heel of the boot, and a loop formed of a metallic rod passing around the front of the boot jack and clamped to its sides, grooved edges of the boot jack forming guides for the looped rod. which engages the front part of the boot.

Improvements in accordions form the subject of two patents issued to Mr. John F. Stratton. of Brooklyn, N. Y. The inventions cover various novel details, including an extra set of keys, key valves reeds and reed valves, added to the regular set of melody keys, and tuned to permit the player to perform, in connection with the regular set, all the notes in the scale, the same note to be sounded both by pushing and drawing the bellows, whereby the performer can execute in the melody all the notes and chords in the scale with a corresponding harmonious bass in the accompaniment.

NEW BOOKS AND PUBLICATIONS.

FOOD ADULTERATION AND ITS DETEC TION. By Jesse P. Battershall, Ph.D., F.C.S., Chemist United States Laboratory. New York; E. & F. N. Spon. 1887. Pp. 328.

This work, on account of the competence of its author and of the elegant style of its production, is to be welcomed as a valuable addition to the chemical literature of this country. Dr. Battershall, for many years chemist in charge of the United States Laboratory in the appraiser's department of the Custom House, has had . many very difficult problems in proximate analysis pre sented to him for solution. In these years many food products and similar substances have been examined by him to ascertain their purity and nature. In the work before us this experience is applied to one of the most difficult subjects of analytical work, the detection and determination of impurities and adulterations in food. The range of the work is extensive. The general headings into which the subject is divided are too numerous to give here in full. Tea. coffee, and other bases for beverages and beverages themselves are treated of at length with their adulterations. Milk and its products, flour, bakers' chemicals, sugar, pickles, olive oil, spices, and miscellaneous products, are included. The book closes with two chapters of peculiar value. One gives the bibliography of the subject, a laborious compilation of periodicals, official reports, and books on food adulteration. The last chapter is devoted to legislation. It gives the various United States laws and statutes of individual States on the subject of adulteration. The book is beautifully illustrated with colored plates illustrative of tea leaves and the spurious leaves mixed with them, and with a number of photomicrographic plates of butter and milk slides. Too much credit cannot be given to author, publisher, and engraver for the conscientious way in which they have tented by Mr. James Montgomery, of Munster, Ill. It all done their work. Although largely devoted to American practice, the book will undoubtedly have a good circulation abroad, and we hope it is the pre cursor of many future editions.

SCIENTIFIC AMERICAN

BUILDING EDITION

OCTOBER NUMBER.

TABLE OF CONTENTS.

- Elegant Plate in Colors of a Residence of mode-rate cost, with floor plans, specifications, sheet of details, etc.
- Plate in colors of a Country Store and Flat, with specifications, floor plans, sheet of de-tails, etc.
- 3. Design of a one-story Southern Residence, with floor plan. Cost, Five Thousand Dollars.
- 4. Perspective and floor plans for Dwelling for a narrow lot. Cost, hirty-five Hundred Dollars.
- Illustration of a two-story and attic Dwelling erected at Arlington, N. J., with floor plans, Cost, Two Thousand Eight Hundred Dollars.
- Drawing in perspec ive, with floor plans, of a Double House of moderate cost. A pleasing design.
- 7. A Twelve Hundred and Fifty Dollar two-story attic House. Perspective and floor plans.
- Perspective drawing, with a floor plan, of a House at Flushing, N. Y. A comfortable and substantial dwelling, costing about Eight Thousand Dollars.
- View of the new United States Court House and Post Office at San Antonio, Texas.
- Handsome design of a new Dry Goods Store erected at Winona, Minn.
- Illustrations of small sea-side Cottages at Lion-Sur-Mer, Department of Calvados, France.
- 12. Page engraving showing Main Entrance Gate, Chateau at Bougival. M. Pasquier, Architect.
- Views of a Church at La Capelle, France. M. Charles Garnier, Architect.
- 14. New Church at Stratton, in Hampshire, England.
- Design of a Sideboard in Walnut.
- New Exhibition Building of glass and iron, at Madrid. Half page engraving.
- Villa St. George's, at Saint Lo. Half page en-
- A City Residence in Mannheim. Werle & Hartmann, Architects.
- mann, Architects,

 Miscellaneous Contents: Cost of Brick and
 Brickwork.—United States Mail Chutes for
 Interiors of Buildings, illustrated.—An Improved Saw Filing Machine, illustrated.—Improved Device for Working Window Shutters,
 illustrated.—Drawing and Engineering Instruments.—Tests of Portland Cement.—Painting
 Brick and Stone Buildings.—Frosted Glass.—
 Action of Frost on Cements.—Oil of Bay for
 Files.—Decorative Novelties.—Colored Morta
 for Brickwork.—How to Clean and Polish Top Flies.—Decorative Novelties.—Colored Morta for Brickwork.—How to Clean and Polish Top Leather Screens.—Blinds.—To Transfer Prints to Wood.—Rules for Gas Fitting.—Bichloridg of Mercury as a Disinfectant.—Chinese Brickmaking.—The Long Leaf Pine.—New Galvanizing Process.—Earthquake Foundations.—Care in respect to Fire.—Healthy Habitations and Defective House Construction.—The Effect of Sea Water on Concrete.—Vassar College Sewerage.—Preservation of Stone.—Improved Surface Planing Machine, illustrated.—The Woodcock Patent Shaking Grate, with illustrations.—Ebonizing.—Designin Architecture.

The Scientific American Architects and Bnilders Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in colors and with line engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.

The Fullness, Richness, Chempass, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural publication in the wold. Sold by all newsdealers.

MUNN & CO., PUBLISHERS,

Special.

MIGHT AS, WELL DIE ON THAT AS ANY-THING ELSE.

When one has suffered on month after month, consulted all the best " Medicine Men" within reach, tried all the remedies suggested by sympathizing friends, still suffers on, becoming weaker and more wretched, it is litthe wonder that such an one becomes despondent and cries out, "I might as well die on one thing as well as another, and, therefore, will try anything, even the Compound Oxygen."

Mr. Alonzo Clark, chief salesman in the large business house of Davis, Collamore & Co., of New York, was so greatly reduced by long continued lung trouble, proceeding from malaria, that the doctors gave him up They said, "If you have any business affairs to arrange, you had better arrange them soon, for you cannot live long." He had all the symptoms of advanced consump tion. By this time he thought the doctors had done all they could do for him, which they verily had, at the rate often dollars a visit. Somebody dropped a hint in his ear about Compound Oxygen, and he thought he might as well die on that as anything else. But on taking it for a little while, he found he was not going to die. To make a long story short, Mr. Clark is again at his post in the store on Broadway, and attending to business with his old-time regularity. He is, as might be expected from his experience, a very firm believer in Compound

This Compound Oxygen has a history embodied in a very interesting two hundred page treatise, which is sent by mail on application to Drs. Starkey & Palen, 1529 Arch Street, Philadelphia, Pa.

Business and Personal.

The charge for Insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

All Books, App., etc. cheap. School of Electricity, N.Y. Mechanical draughtsman wants position.—Is expert on both Patent Office and working drawings. Address box 64, Old Chatham, N. Y.

Wanted-Address of reliable parties willing to manufacture on royalty a simple and useful domestic novelty of wire; or buy patent. Address S. Whinery. Somerset

The Langley Co., of 5 and 7 R.R. Place, Newark, N. J., are transferring their business to the South, where they will require special machinery only, and will sell at a liberal discount

One 30" Gould & Eberhardt drill press, improved. One 14" Prentice lathe, 6' bed.

One 16" Bogert lathe, 6" bed. One 16" " 8"

One 16" Gould & Eberhardt 10% bed, power cross These tools are new, having had but three months

light work. Apply to J. M. Langley, 5 and 7 R.R. Place Steam jacket feed water boiler and purifier. New cata-

logue free. Wm. Baragwanath & Son, 40 W. Division St. Chicago. Stationary and boat engines, boilers. Bestand cheap-

est. 1 to 10 H. P. Washburn Engine Co., Medina, Ohio. For the latest improved diamond prospecting drills address the M. C. Bullock Mfg. Co., 138 Jackson St. Chicago, Ill.

The Railroad Gazette, handsomely illustrated, published weekly, at 73 Broadway, New York. Specimen copies free. Send for catalogue of railroad books.

The Knowles Steam Pump Works, 113 Federal St., Boston, and 93 Liberty St., New York, have just is-sued a new catalogue, in which are many new and improved forms of Pumping Machinery of the single and duplex, steam and power type. This catalogue will be mailed free of charge on application.

Link Belting and Wheels. Link Belt M. Co., Chicago Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J

Nickel Plating.-Sole manufacturers cast nickel an odes, pure nickel salts, polishing compositions, etc. \$100 "Lattle Wonder." A perfect Electro Plating Machine. Sole manufacturers of the new Dip Lacquer Kristaline Complete outfitfor plating, etc. Hanson, Van Winkle & Co., Newark, N. J., and 92 and 94 Liberty St., New York.

Catarrh Cured.

A clergyman, after years of suffering from that loath-some disease, catarrh, and vainly trying every known remedy, at last found a prescription which completely cured and saved him from death. Any sufferer from this dreadful disease sending a self-addressed stamped envelope to Prof. J. A. Lawrence, 212 East 9th St., New York, will receive the recipe free of charge.

Woodworking machinery, planers, surfacers, matchers, beaders, etc. Rollstone Machine Co., Fitchburg. Mass.

Graphite Bushings.-Put them on all loose pulleys. Send for new and complete extalogue of Scientific Books for sale by Munn & Co., 361 Broadway, N. Y. Free

"So full, in fact, is the treatment of nearly every subject discussed, that, as the book now is, it is the most complete American treatise on civil engineering which has yet appeared. The amount of labor which must have been bestowed upon it is almost appalling. tables are more complete than in any other book that we know of, and the author, in the preface, says that 'most of them have been entirely recalculated expressly for this book.' Altogether the book is the most complete of its kind that has yet been published either in this country or in Europe. It is very fully illustrated, not with copies of superannuated cuts which have done set vice in old works, or are advertisements for manufac-

We quote as above from a review by the Rathroad Gazette of one of the earlier editions of Trautwine's "Civil Engineer's Pocket Book." Reviewing the 9th edition, or twenty-second thousand, the first of the new editions" (1885), the same journal said:

turers, but with engravings all new and purchased ex-

pressly for this work.

"The additions and substitutions are so numerous and so well chosen that there is hardly an important topic of the volume which has not been affected by them and improved."

Stili further improvements appeared in the edition of 1886, and in those of the present year.

HINTS TO CORRESPONDENTS.

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information, and not for publication.

References to former articles or answers should give date of paper and page or number of question.

Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all, either by letter or in this department, each must take his turn.

Special Written Information on matters of personal rather than general interest cannot be expected without remneration.

Scientific American Supplements referred to may be had at the office. Price 10 cents each.

Books referred to promptly supplied on receipt of price.

price.

Minerala sent for examination should be distinctly marked or labeled.

(1) G. H. asks (1) if hydrogen gas is better than coal and water gas for balloons. A. Hydrogen gas is far superior in lifting power to coal gas, and still more to water gas. It leaks out from a balloon, however, much faster than either. 2. What is the cheapest way to manufacture it, and how to obtain it pure? A. The general way of making it is to dissolve zinc or iron scraps in sulphuric acid and collect the gas evolved. It may also be made by passing steam over red hot iron turnings contained in a tube. 3. How much in weight will a cubic foot of hydrogen gas lift? A. 1,000 cubic feet of hydrogen will lift about 44 pounds.

(2) J. W. K. writes: I have an electromagnet that will attract a weight of two pounds suspended at a distance of 1/2 inch from the poles of magnet. Now, what I would like to know ig, what the loss would be in attractive power if the poles of the magnet and armature were nickel plated? A. The loss would be very slight.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequaled facilities for procuring patents everywhere: A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office Scientific American, \$61 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

September 20, 1887. AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]
Accordion, J. F. Stratton
Adjustable table, S. Zenger 370,227
Aluminum, extracting, O. M. Thowless 370,220
Ambulance, H. H. Judson
Animal trap, H. G. Stone 370,101
Axle box, car, J. R. Baker
Axle box, H. Rogers
Axle skein, H. W. Nott 370,080
Baling press, A. Wickey
Baling presses, hale weighing attachment for, A.
Wickey 370,171
Banjo, W. R. Wood
Bath tub, W. D. Stewart 370,688
Battery. See Secondary battery.
Bed lounge, A. Stark 370,095
Bed, sofa, S. Karpen et al 370,065
Beds, crib attachment for, W. C. Walter \$70,112
Bell collar, J. J. Marshburn 370,271
Bell cord coupling, E. Brombacher 370,239
Bell, door, C. L. Livingston
Belt, driving, F. B. Brock
Belt shifter, G. W. Miller 370,153
Bin. See Flour bin.
Binnacle, ship's, F. W. Cross
Boiler, J. A. Cauldwell 370,241
Boiler cleaner, D. N. Baxter
Boiler cleaner, F. W. Hornish
Book holder and cover, Cline & Cornstadt 370,244
Boot, fabric, M. V. Beiger
Boot jack, J. H. Kennedy
Boots or shoes, shank burnisher for, J. J. Fitz-
gibbon
Bottle ja cket, H. Lightwardt, Jr 270,269
Bottle stepper, M. S. Cahill
Bottle stopper, H. C. Walter
Box. See Axle box. Fare box. Fire alarm box.
