

ENGINEERING INVENTIONS.

A furnace front for boilers has been patented by Mr. James C. Shuler, of St. Joseph, Mich. The invention consists of a hollow furnace front supporting the front end of the boiler, and connected with its interior by pipes or other suitable means, to prevent waste of heat and serve as a feed water heater.

A car coupling has been patented by Mr. William H. Tibbitts, of Crab Orchard, Neb. One end of the coupling link is made thicker than the other, in step shape, with a lateral as well as vertical opening, and in the rear of the main coupling devices are other coupling devices which may be brought into play on a fracture or other mutilation of the main coupling devices.

A method of blasting earth has been patented by Mr. Henry H. Bourne, of Manhattan, Kansas. This invention covers an improvement on a former patented invention of the same inventor, the hole being first bored and a small cartridge exploded therein, when a tube is inserted with a waterproof pouch, which can be filled with a larger amount of explosive in the pocket before formed to make the blasting more effective.

AGRICULTURAL INVENTIONS.

A planter has been patented by Mr. Theodore W. Hill, of Smithland, La. Combined with the seed drum or receptacle is a curved cut-off connected to a shaft upon the carrying frame, to prevent the accumulation of the seed at the depositing chutes, with other novel features, the device being especially adapted for depositing in the ground cottonseed, corn and peas.

A transplant for tobacco and other plants has been patented by Mr. Daniel Clow, of Janesville, Wis. It consists of a wheel with radial pockets to receive the plants, with clamp devices to hold them while moving down to the ground, and other novel features, whereby the plant is placed, earth packed around it, and a quantity of water delivered upon it, in a single operation.

A hay cocking machine has been patented by Messrs. Thomas and Henry Hale and Sylvanus D. Harvey, of Wales, N. Y. It is a simple and comparatively inexpensive machine, to be operated by a single attendant driving the horses, for quickly gathering and cocking hay or other fodder and discharging it on the ground in compact piles for protection against storms.

A combined plow, harrow, and cultivator has been patented by Mr. Franklin P. Sanborn, of Standish, Me. The invention covers novel features of construction and the combination of parts, whereby with one machine, and the attachments forming parts of it, the soil may be broken and harrowed, and also cultivated, at various stages of growth of a large variety of crops, with thoroughness and economy of time and labor.

MISCELLANEOUS INVENTIONS.

A textile eyelet for corsets has been patented by Mr. Edward K. Warren, of Three Oaks, Mich. The eyelets are made of tape, doubled or bent to form eyes for the passage of the lacing cord or string through them, with novel means for supporting and securing the eyelets to the garment, making a firm and substantial eyelet.

A barrel stand has been patented by Mr. Stewart R. Mace, of Moulton, Iowa. This invention provides a swinging or hanging support for barrels, with means for retaining barrels or kegs in position, and for elevating and handling them, whereby liquids may be drawn from them with dispatch and convenience.

A horseshoe has been patented by Mr. Samuel B. Jerome, of New York City. It has several calks struck out of the web of the shoe within the area of its width, forming corresponding pockets in the upper surface of the shoe to receive ointment for medicating the hoof, and also making a shoe which is light and cheap.

A paper ruler has been patented by Mr. George M. Rees, of Brooklyn, N. Y. It consists of two ruling bars running parallel and secured together at their ends, to facilitate the ruling of the bottom edges of pages of a book without turning the book upside down, and prevent blotting of ink on the page when ruling.

A motor for pumps has been patented by Mr. William W. Ward, of Eaton, Ohio. This invention covers a simple description of clockwork gearing whereby a pump rod is operated by the falling of a weight by gravity, thus unwinding the rope on a drum to which is attached a prime motor gear wheel, the machine being quite inexpensive to make or set up.

A salve has been patented by Mr. Philip L. J. Schaefer, of Kansas City, Mo. It is composed of ingredients which undergo a chemical process in compounding to evaporate injurious properties and make a salve which will not heal a sore until all poisonous matter has been discharged, and also efficacious as a plaster, and in all forms of inflammation, burns, etc.

A jug handle has been patented by Messrs. Charles H. Wooldridge and James M. Hendron, of Shipman, Ill. It consists of a wire frame to attach to pottery jugs and similar articles, the wire surrounding the body of the vessel in such manner as to give support to a ball or handle, and permit of readily carrying the jug in a vertical position.

A shoe upper blank has been patented by Mr. John L. Skinner, of Waxahachie, Texas. It is for making an entire upper of a "plow" shoe or similar style of a single piece, having the fly folded over the instep and secured upon the side of the shoe by means of a tongue and buckle, the pattern requiring but little stitching.

A soldering iron heater has been patented by Mr. William Mellor, of New York City. It is an improved furnace, easily adaptable for melting solder

or for heating soldering irons, being free from danger and simple and convenient, the invention covering various novel details in the construction, combination, and arrangement of parts.

A furnace for hothouses, etc., has been patented by Mr. William A. White, of Staatsburg, N. Y. It has a fireplace of sufficient capacity to heat a series of separate compartments for separately or collectively conveying the heat as required to different elevations, the compartments having independent draught flues, but so they can be used with the same fire.

An inking apparatus for printing machines has been patented by Mr. James J. Hughes, of New York City. By this invention one or more reciprocating transfer rollers are employed, to transfer continuously the oversupply of ink from the first set of distributing form rollers to the second or third set, whereby each set of rollers is made to give off an equal and uniform supply of ink to the form.

A seine hauling apparatus has been patented by Mr. William H. Gordon, of Brambleton, Va. The seine is connected at one end with a shore anchor, a cable being also connected with the seine, and there being an offshore guide for supporting or guiding the cable, whereby the seine may be both cast and hauled from the shore, and its management in stormy weather is facilitated.

A pedal zither has been patented by Mr. Ferdinand Wigand, of Brooklyn, N. Y. It has an additional key board with four or more frets for the pedal strings, with buttons covered with felt, one button above each pedal string near each fret, and attached to a rod connected with the pedals, whereby a performer is enabled to produce harmonious sounds in chords of all characters.

A reel holder for fishing rods has been patented by Mr. Joseph Brower, of Lexington, Ky. It consists in a novel seat for the reel, in connection with certain sliding bands for securing and liberating the reel when required, being more particularly designed for use on Japanese or bamboo rods, in which there are knots or protuberances that restrict the sliding of a circular reel-holding thimble over them.

SCIENTIFIC AMERICAN BUILDING EDITION.

OCTOBER NUMBER.

TABLE OF CONTENTS.

- 1. Elegant Plate in Colors of a Residence of moderate cost, with floor plans, specifications, sheet of details, etc.
2. Plate in colors of a Country Store and Flat, with specifications, floor plans, sheet of details, etc.
3. Design of a one-story Southern Residence, with floor plan. Cost, Five Thousand Dollars.
4. Perspective and floor plans for Dwelling for a narrow lot. Cost, Thirty-five Hundred Dollars.
5. Illustration of a two-story and attic Dwelling erected at Arlington, N. Y., with floor plans. Cost Two Thousand Eight Hundred Dollars.
6. Drawing in perspective, with floor plans, of a Double House of moderate cost. A pleasing design.
7. A Twelve Hundred and Fifty Dollar two-story attic House. Perspective and floor plans.
8. Perspective drawing, with a floor plan, of a House at Flushing, N. Y. A comfortable and substantial dwelling, costing about Eight Thousand Dollars.
9. View of the new United States Court House and Post Office at San Antonio, Texas.
10. Handsome design of a new Dry Goods Store erected at Winona, Minn.
11. Illustrations of small sea-side Cottages at Lion-Sur-Mer, Department of C. vados, France.
12. Page engraving showing Main Entrance Gate, Chateau at Bougival. M. Pasquier, Architect.
13. Views of a Church at La Capelle, France. M. Charles Garnier, Architect.
14. New Church at Stratton, in Hampshire, England.
15. Design of a Sideboard in Walnut.
16. New Exhibition Building of glass and iron, at Madrid. Half page engraving.
17. Villa St. George's, at Saint Lo. Half page engraving.
18. A City Residence in Mannheim. Werle & Hartmann, Architects.
19. Miscellaneous Contents: Cost of Brick and Brickwork.—United States M. Chut s for Interiors of Buildings, illustrated.—An Improved Saw Filing Machine, illustrated.—Improved Device for Working Window Shutters, illustrated.—Drawing and Engineering Instruments.—Tests of Portland Cement.—Painting Brick and Stone Buildings.—Foasted Glass.—Action of Frost on Cements.—Oil of Bay for Flies.—Decorative Novelties.—Colored Mortar for Brickwork.—How to Clean and Polish Top Leather Screens.—Blinds.—To Transfer Prints to Wood.—Rules for Gas Fitting.—Bichloride of Mercury as a Disinfectant.—Chinese Brick-making.—The Long Leaf Pine.—New Galvanizing Process.—Earthquake Foundations.—Care in respect to Fire.—Healthy Habitations and Defective House Construction.—The Effect of Sea Water on Concrete.—Vassar College Sewerage.—Preservation of Stone.—Improved Surface Planing Machine, illustrated.—The "Auburn" Boiler for Steam Heating and the Woodcock Patent Shaking Grate, with illustrations.—Ebonizing.—Designing Architecture.

The Scientific American Architects and Builders Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in colors and with fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.

The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural publication in the world. Sold by all newsdealers.

MUNN & CO., PUBLISHERS, 361 Broadway, New York.

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

All Books, App., etc. cheap. School of Electricity, N.Y. Twenty per cent saving and a large increase of steam supply. United States Rocking Grate Bar Company, Chicago.

Talcott's belt hooks. Best made. Providence, R. I. Perforated metals of all kinds for all purposes. The Robert Aitchison Perforated Metal Co., Chicago, Ill.

\$6,000 foundry for sale. Stock at cost. H. H. Conklin, corner of Date and North Main Streets, Los Angeles, Cal.

No. 11 planer and matcher. All kinds of woodworking machinery. C. B. Rogers & Co., Norwich, Conn.

For the latest improved diamond prospecting drills, address the M. C. Bullock Mfg. Co., 138 Jackson St., Chicago, Ill.

The Railroad Gazette, handsomely illustrated, published weekly, at 73 Broadway, New York. Specimen copies free. Send for catalogue of railroad books.

The Knowles Steam Pump Works, 113 Federal St., Boston, and 93 Liberty St., New York, have just issued a new catalogue, in which are many new and improved forms of Pumping Machinery of the single and duplex, steam and power type. This catalogue will be mailed free of charge on application.

Link Belting and Wheels. Link Belt M. Co., Chicago.

Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J. Nickel Plating.—Sole manufacturers cast nickel anodes, pure nickel salts, polishing compositions, etc. \$100 "Little Wonder." A perfect Electro Plating Machine. Sole manufacturers of the new Dip Lacquer Kristaline. Complete outfit for plating, etc. Hanson, Van Winkle & Co., Newark, N. J., and 93 and 94 Liberty St., New York.

Iron Planer, Lathe, Drill, and other machine tools of modern design. New Haven Mfg. Co., New Haven, Conn.

Supplement Catalogue.—Persons in pursuit of information of any special engineering, mechanical, or scientific subject, can have catalogue of contents of the SCIENTIFIC AMERICAN SUPPLEMENT sent to them free. The SUPPLEMENT contains lengthy articles embracing the whole range of engineering, mechanics, and physical science. Address Munn & Co., Publishers, New York.

Curtis Pressure Regulator and Steam Trap. See p. 157.

Iron, Steel, and Copper Drop Forgings of every description. Billings & Spencer Co., Hartford, Conn.

Universal & Independent Jaw Chucks for brass work, both box & round body. Cushman Chuck Co., Hartford, Ct. Steam Hammers, Improved Hydraulic Jacks, and Tube Expanders. R. Dodgeon, 24 Columbia St., New York.

60,000 Emerson's 1887 Book of superior saws, with Supplement, sent free to all Sawyers and Lumbermen. Address Emerson, Smith & Co., Limited, Beaver Falls, Pa., U. S. A.

Hoisting Engines, Friction Clutch Pulleys, Cut-off Couplings. D. Fribste & Co., 112 Liberty St., New York.

"How to Keep Boilers Clean." Send your address for free 88 page book. Jas. C. Hotchkiss, 120 Liberty St., N. Y.

Durrell's imp. nut tapper. Taps 1/4 to 2 in. New imp. bolt cutter. Howard Bros., Iron Works, Fredonia, N. Y. The Holly Manufacturing Co., of Lockport, N. Y., will send their pamphlet, describing water works machinery, and containing reports of tests, on application.

Pays well on Small Investment.—Stereopticons, Magic Lanterns, and Views illustrating every subject for public exhibitions. Lanterns for colleges, Sunday schools, and home amusements. 152 page illustrated catalogue free. McAllister, Manufacturing Optician, 49 Nassau St., N. Y.

For best leather belting and lace leather, including Hercules, see Page Belting Co.'s adv., p. 268.

Rollstone variety lathe—bores, beads, and turns at the same time. Rollstone Machine Co., Fitchburg, Mass.

Split Pulleys at low prices, and of same strength and appearance as Whole Pulleys. Yocom & Son's Shafting Works, Drinker St., Philadelphia, Pa.

Send for new and complete catalogue of Scientific Books for sale by Munn & Co., 361 Broadway, N. Y. Free on application.

Elixir vitæ from the mines as nature left it. Sure cure for Bright's disease, liver, kidney, piles, and dyspepsia. Apply to Geo. Sanders, Exeter, Ontario.

Notes & Queries

HINTS TO CORRESPONDENTS. Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information, and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all, either by letter or in this department, each must take his turn. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(1) J. H. M. asks for some standard work or works treating of the methods of artificially coloring metals, bronzes, etc., and of alloying metals to give different colors. A Galvanoplastic Manipulations, by W. H. Wahl, is an excellent illustrated book, of 650 pages, which we send for \$7.50.

(2) S. W. asks how to make a gold varnish that will be bright after it is used and will stay so without getting tarnished. A gold varnish to be used for iron is made as follows: Boil in an earthenware pot 90 parts or more of linseed oil, 60 parts of tartar, 60 parts of hard boiled yolk of egg, 15 parts of aloes, 1/4 part of saffron, and one-tenth part of turmeric,

and apply the fluid to the iron. Or else cover the gold leaf with a colorless lacquer, such as may be made by taking 1 gallon of methylic alcohol, 10 ounces of seed lac bruised, and 3/4 ounce of red sanders; dissolve and strain.

(3) R. B. O. asks: 1. What is good to clean a saddle made of the best light-colored hogskin so it will look like new or nearly so, without injury to the skin? A. It is not possible to restore the leather unless the discoloration is of a character that can be removed by carefully rubbing with bread crumbs or some similar treatment. 2. How may brass (such as the wheels in the works of a watch) be tempered? A. Only by mechanical compression, which is impracticable without distorting its shape.

(4) C. McC.—A round pipe has less friction in proportion to its area. The air current in a tube is rolling from the center toward the surface, caused by the friction of the tube. The air moves fastest at the center.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

October 11 1887

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Table listing inventions and their patent numbers. Includes entries such as 'Adding machine, D. E. Felt...', 'Agricultural implements, lever handle for, W. E. Wagner...', 'Amalgamator, J. A. Sperry...', etc.
