

ENGINEERING INVENTIONS.

A boiler flue has been patented by Mr. David Purves, of Ferro Dene, Green Lane, North Dulwich, Surrey County, England. The plate is formed with thickened bands on one side and channels on the opposite side, the thickened bands being rolled into stiffened ribs, making a boiler flue with a band or rib formed integrally therewith.

A car coupling has been patented by Mr. Jonathan H. Davis, of Natchez, Miss. The drawhead has a central chamber, with latches pivoted each side the link opening, having engaging curved arms, in connection with a spring-actuated pawl, and other novel features, making a coupler with which cars can be readily coupled upon a curve or with an opposing coupler of unequal height.

A car frame has been patented by Mr. Peter Matthews, of Escanaba, Mich. This invention relates to locomotive tender frames, and provides a construction designed to effectively resist longitudinal transverse strains of both tension and concussion, while the timbers will be strongly jointed without having to mortise or cut away the main longitudinal timbers of the frame.

A submarine excavator has been patented by Messrs. John and Peter Wagner, of Atchison, Kansas. The buckets are made to be used inside of a cylinder, and to be hung in such manner that they may be reversed upon their hinges to present either a plane edge or a toothed edge to penetrate the material to be excavated, the invention also providing a simple construction and combination of parts for opening and closing the buckets.

AGRICULTURAL INVENTIONS.

A corn planter and check rower has been patented by Messrs. John W. McMahan and Edwin S. Whittmore, of Huntingdale, Mo. This invention covers a novel construction and arrangement of various parts and details designed to afford a machine that will be simple and durable and very effective in operation.

A grain separator has been patented by Mr. William C. Buchanan, of Belleville, Ill. The construction is such that the rake or picker fingers are advanced at different rates of speed through paths of different length, so that the straw and grain acted upon are more fully torn apart, the invention being an improvement on a former patented invention of the same inventor and another.

MISCELLANEOUS INVENTIONS.

A top prop has been patented by Mr. William R. Moore, of Unionville, Pa. This invention provides an improved means for securing the bow iron to the seat iron or top prop stud, to provide an anti-rattler for carriages and top buggies.

A pocket hand brush has been patented by Mr. Charles B. Schroeder, of Brooklyn, N. Y. It consists of a hollow case provided with a silk hat pad or pads, and two brushes of different styles sliding in opposite ends of the case, making a compact and portable combined clothes and hat brush.

A fly screen has been patented by Mr. Julius Neifing, of Crown Point, Ind. It is for a window or other opening of a room, and is of such construction that the screen serves to exclude flies from entering an apartment, while also providing for the exit of any that may be in the room.

A dumping wagon has been patented by Mr. Thomas Hill, of Jersey City, N. J. This invention relates to carts or wagons for common road use, having shafts to adapt them to horse or cattle draught, and the bodies supported by side pivots or journals for tilting them, the invention covering various novel features of construction and combinations of parts.

A sewerage system for buildings has been patented by Mr. Charles H. Shepherd, of New York City. This invention relates to devices for securing the ventilation of the sewerage receiver, and to electro-magnetic appliances for releasing the discharge valve of the sewer pipe, covering various novel features of construction and arrangement of parts.

A composition for mineral wool has been patented by Mr. Richard D. A. Parrott, of Greenwood Iron Works, N. Y. It consists of one-third feldspar and two-thirds lime, combined by fusion and discharged in a small stream from a furnace, when it is subjected to a jet of steam or compressed air to blow it out into a fibrous mass.

A binder has been patented by Mr. Nehemiah Hawkins, of Brooklyn, N. Y. Combined with a pair of apertured covers and a binding cord is a flexible, transversely slotted back and retaining strips formed with projections through which the binding cord passes, with other novel features, making a ready binder for manuscripts, newspapers, sheet music, etc.

A machine for ironing linen fabrics or other materials has been patented by Mr. Henri C. Chasles, of Paris, France. Combined with a chamber which has perforations in its polished ironing side, this side working in sliding contact with the fabric to be ironed, is a vacuum-producing device connected with the chamber, whereby vapor is removed and the fabric left completely dry.

A car bell has been patented by Mr. William H. Hudson, of New York City. This invention covers a novel combination and arrangement of parts, whereby the car bell may be rung by pressing upon a foot piece in the platform, the ringing being stopped when the pressure is removed, and the invention is an improvement on a former patented invention of the same inventor.

A circular sawing machine has been patented by Mr. David Arkin, of Manistee, Mich. This invention relates to the construction and arrangement of the carriage of a shingle-jointing machine, and also to the arrangement of a novel system of safety attachments or guards to protect the sawyer, the invention covering certain novel constructions and combinations of parts.

A tube expander has been patented by Messrs. Jacob Nebergall and Charles E. Schofield, of Waller, Ohio. Combined with a slotted tapering plug are two oppositely arranged jaws having projections for forming a bead in the tube inside of the tube sheet, and for turning the flange on the end of the tube outside of the tube sheet, with a cam lever for simultaneously operating the two jaws.

A combination tool has been patented by Mr. William H. Mitchell, of Horse Cave, Ky. It is an implement combining in itself a monkey wrench and pipe cutter and tongs, designed to be adapted for use upon varying sizes of pipe and fittings, and which may be changed from tongs to cutter or cutter to tongs, while not being any more bulky than either of the single implements it takes the place of.

A folding paper box has been patented by Mr. Joseph T. Crow, of Jersey City, N. J. The box body consists of an inner part creased and folded to form the bottom, side, and ends, with a rib about the bottom, and a frame constituting the outer walls and paste flap, the invention being more especially applicable in making shallow paper boxes, of which the blanks may be stored in small space.

A hair curler has been patented by Mr. John T. Stansbury, of Elkhart, Ind. A heating iron or core is combined with an outer curling shell which has means for taking hold of the hair, and is adapted to revolve, a spring being so arranged that the curling shell may be wound up and held under tension, and when the spring is liberated the shell will revolve and automatically curl the hair.

A washing machine has been patented by Messrs. John P. Caldwell and Joseph C. Wolfe, of Gainesville, Ga. This invention provides for rapidly operating a pounder in a suitable tub containing the washing fluid and clothes, and at the same time causing a rapid circulation of air through the contents of the tub, while the driving power may also be utilized to operate the dasher of a churn or do other similar work.

A pistol or mace holder has been patented by Mr. James P. Wintz, of Charleston, West Va. This invention covers an attachment to a belt consisting of a support and clip, one end of the latter being spring-actuated, and curved to fit a police club, pistol, or other article, the arrangement being such that the object secured can be removed laterally as well as in the ordinary manner, or it can be pushed back at the handle end and thus freed from its support.

SCIENTIFIC AMERICAN BUILDING EDITION.

NOVEMBER NUMBER.

TABLE OF CONTENTS.

- 1. Elegant Plate in Colors of Three Frame City Dwellings, costing Two Thousand Five Hundred Dollars each, with floor plans, sheet of details, etc.
- 2. Plate in Colors of a Frame Dwelling, situated at Belleville, N. J., costing Two Thousand Five Hundred Dollars, with full specifications, floor plans, sheet of details, etc.
- 3. Page Engraving of Holbrook Hall, New York City, an Eight Story Apartment House, lately condemned for dry rot.
- 4. Plans for a School House costing between Eight and Nine Thousand Dollars.
- 5. Half page Engraving of a Residence at Battenhall Park, Worcester, England.
- 6. Perspective view, with floor plans, of a Dwelling costing Four Thousand Five Hundred Dollars.
- 7. Drawing of a Reception Pavil on, Geneva.
- 8. Illustration of the New Railroad Men's House, New York. A Club House costing One Hundred Thousand Dollars.
- 9. Design of an Attractive Residence at Minneapolis, Minn.
- 10. A Church of moderate cost, with first story plan. Intended for 450 seats.
- 11. Engraving of a Two Story and Attic House erected at Montclair, N. J., with floor plans. Cost, Thirty-seven Hundred Dollars.
- 12. A Thirty-five Hundred Dollar Dwelling. Perspective and floor plans.
- 13. Page Engraving of the New Monument and Tomb of M. Thiers, Cemetery of Pere la Chaise, Paris.
- 14. Design for an Entrance. Half page engraving.
- 15. Perspective and floor plans of a House costing Three Thousand Eight Hundred Dollars.
- 16. Design for a City Front. W. H. Powell, Architect, London.
- 17. Floor plans and perspective of a House for a narrow lot. Cost, Four Thousand Dollars.
- 18. Perspective and floor plans of a Four Thousand Five Hundred Dollar Residence.
- 19. Miscellaneous Contents: Putting Water Heating Pipes in Cook Stoves, illustrated.—Cedar Shingles.—The Trade Unions.—Some Data on Steam Heating.—Plastering.—The Rumbling Sound in Closed Carriages, how prevented.—Pipes and Joints.—Jack Frost in Water Pipes.—The Effect of Freezing on Cement.—The Wood of Thuja Gigantea.—A Dutch Interior.—Spontaneous Combustion.—Cement Apparatus.—How to Repair Stone Steps.—Insulated Covers for Steam, Water, and Gas Pipes, illustrated.—The New Era Radiator, illustrated.—Shingle Stains.—Effects of Snow on Marble.—"Alert" Hand Force Pump, illustrated.

The Scientific American Architects and Builders Edition is issued monthly, \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in color and with fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects. The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural publication in the world. Sold by all newsdealers.

MUNN & CO., PUBLISHERS,
361 Broadway, New York.

Special.

THE HEROISM OF WOMEN.

The number is legion who are chronic invalids, and are extremely puzzled to tell what ails them. They are miserable, extremely miserable. Especially may this be said of a very large class of females. They have a heavy, weighty feeling, as if being dragged to the earth; a misery in their back; an all-gone feeling. Scarcely able to put one foot before another, and yet seeing the work must be done, they go on, a tread-mill life from early morn till late at night, keeping about from the mere force of will. Arising in the morning but little refreshed by the few hours of broken sleep; no one but themselves knowing that incessant aches and pains had robbed them of that much needed rest.

The following is a brief statement taken from one of many letters received of similar import:

"CULPEPER, Va., May 31, 1886.

"DRS. STARKEY & PALEN: I wrote you my symptoms one year ago last February, when I was taking the Compound Oxygen, then given me by a friend, but I was so very weak and nervous at that time I doubt if it was sufficiently legible.

"My doctor treated me for catarrhal consumption, and gave me all kinds of medicines for suppression, but they only seemed to increase my pain. At last he concluded there was some organic derangement, and gave me surgical treatment, which instead of relieving me, increased my agony, producing inflammation that reached the brain, making me utterly sleepless and delirious for months.

"One day a friend came to see me who had a part of a Home Treatment of Compound Oxygen at her house, and persuaded me to try it. She sent it to me, and I commenced using it, but I must say with very little faith. After using it about a week my nose bled very profusely, and I felt great relief from the brain pressure that had kept me crazed for months. I began to sleep. My mind came back to me, though my doctor had said if I ever got better, or lived, I would never recover my mind. He seemed surprised that I had. He recommended surgical treatment, but I had suffered so much by that from him I would not trust it again. This was about a year ago, and I was an invalid until a month or so since, when I commenced to drag around a little, becoming so tired I could not rest. But since using Compound Oxygen I can rest and walk about, and the cold I had when the Compound Oxygen arrived soon disappeared. I am stronger and better than for years. Have resumed my old Sunday-school class, and played on the organ last Sunday."

There are very many people interested in the treatment which has done so much for this lady in Virginia. If you wish fuller information, send to Drs. Starkey & Palen, 1529 Arch Street, Philadelphia, Pa., for their treatise, which is sent free.

Business and Personal.

The charge for Insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

For Sale—A \$50.00 lathe, with extra attachments, for \$30.00. B. Mitchell, 301 1/2 Second St., Jersey City, N. J.

Twenty per cent saving and a large increase of steam supply. U. S. Rocking Grate Bar Co., Chicago.

A good agency wanted, mechanical or process. Muller & Sieghortner, 319 Broadway, room 10, New York.

Drawings for machinery and factories, including buildings. J. H. Muller, Mech. and Civ. Engineer, 319 Broadway, room 10, New York.

Telegraph Instruments cheap. W. E. Lewis, Corry, Pa.

Wanted—New invention or novelty for the English market by a first-class London house, having a large connection among shippers, warehousemen, drapers, etc. Address "Everclean," 100 Wood St., London, England.

Lacquers—Japan, Brilliantine, Brassoline, Opaline, and other lacquers and special varnishes. *Brilliant, hard, durable.* Send for catalogue. The Fred'k Cram Chemical Co., Short Hills, N. J. N. Y. agent, Horace Van Sands, 733 Broadway.

Lathe for cutting irregular forms a specialty. See ad. p. 285.

For the best and cheapest 4 Horse Engine, address Peter Walrath, Chittenango, N. Y.

Perforated metals of all kinds for all purposes. The Robert Atchison Perforated Metal Co., Chicago, Ill.

For the latest improved diamond prospecting drills, address the M. C. Bullock Mfg. Co., 138 Jackson St., Chicago, Ill.

The *Railroad Gazette*, handsomely illustrated, published weekly, at 73 Broadway, New York. Specimen copies free. Send for catalogue of Railroad books.

The Knowles Steam Pump Works, 113 Federal St., Boston, and 93 Liberty St., New York, have just issued a new catalogue, in which are many new and improved forms of Pumping Machinery of the single and duplex, steam and power type. This catalogue will be mailed free of charge on application.

Link Belting and Wheels. Link Belt M. Co., Chicago.

Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J.

Nickel Plating—Sole manufacturers cast nickel anodes, pure nickel salts, polishing compositions, etc. \$100 "Little Wonder." A perfect Electro Plating Machine. Sole manufacturers of the new Dip Lacquer Kristaline. Complete outfit for plating, etc. Hanson, Van Winkle & Co., Newark, N. J., and 92 and 94 Liberty St., New York.

Iron Planer, Lathe, Drill, and other machine tools of modern design. New Haven Mfg. Co., New Haven, Conn.

Supplement Catalogue—Persons in pursuit of information of any special engineering, mechanical, or scientific subject, can have catalogue of contents of the SCIENTIFIC AMERICAN SUPPLEMENT sent to them free. The SUPPLEMENT contains lengthy articles embracing the whole range of engineering, mechanics, and physical science. Address Munn & Co., Publishers, New York.

The Holly Manufacturing Co., of Lockport, N. Y., will send their pamphlet, describing water works machinery, and containing reports of tests, on application. Curtis Pressure Regulator and Steam Trap. See p. 301.

Power, 113 Liberty St., N. Y. \$1 per yr. Samples free. Gardner & Miller's Patent Belt Clamps, 8 sizes. Billings & Spencer Co., Hartford, Conn.

The Improved Hydraulic Jacks, Punches, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York.

Planing and Matching Machines. All kinds Wood Working Machinery. C. B. Rogers & Co., Norwich, Conn. For best leather belting and lace leather, including Hercules, see Page Belting Co.'s adv. p. 318.

We are sole manufacturers of the **Fibrous Asbestos Removable Pipe and Boiler Coverings.** We make pure asbestos goods of all kinds. The Chalmers-Spence Co., 419 and 421 East 8th Street, New York.

Cushman's Chucks can be found in stock in all large cities. Send for catalogue. Cushman Chuck Co., Hartford, Conn.

Hoisting Engines. D. Frisbie & Co., New York city.

Tight and Slack Barrel Machinery a specialty. John Greenwood & Co., Rochester, N. Y. See illus. adv. p. 28.

Graphite Lubricating Co., Jersey City, N. J. Graphite bushings and bearings, requiring no grease or oil.

Quints' patent automatic steam engine governor. Correspondence solicited from manufacturers of throttle governor engines. Leonard & McCoy, 118 Liberty Street, New York.

Catarrh Cured.

A clergyman, after years of suffering from that loathsome disease, catarrh, and vainly trying every known remedy, at last found a prescription which completely cured and saved him from death. Any sufferer from this dreadful disease sending a self-addressed stamped envelope to Prof. J. A. Lawrence, 212 East 9th St., New York, will receive the recipe free of charge.

Graphite Bushings—Put them on all loose pulleys. Wardwell's patent saw benches. All sizes in stock. Rollstone Machine Co., Fitchburg, Mass.

Talcott's belt hooks. Best made. Providence, R. I. Send for new and complete catalogue of Scientific Books for sale by Munn & Co., 361 Broadway, N. Y. Free on application.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

November 1, 1887,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Advertising circular M. B. Church	372,301
Animal trap, A. Becker	372,292
Attrition mill, Sturtevant & Davis	372,436
Awning, folding vehicle, A. D. Beedle	372,448
Awning, portable, S. M. McReynolds	372,551
Axle, wagon, J. L. Thompson	372,581
Bag holder, J. S. Hageman	372,411
Bale tie, I. A. Kilmer	372,375
Bale tie, M. D. Kilmer	372,376
Bale tie, G. Leder	372,420
Baling press, M. C. Nixon	372,636
Barrel stand and truck, E. Craig	372,604
Basins, etc., float trap for wash, J. W. Grows	372,312
Bath tub or sink, F. A. Wells	372,347
Battery. See Secondary battery.	
Bed bottoms, locking device for, O. S. Foster	372,369
Beds for invalids, attachment for, H. C. Bailey	372,288
Bell, door, T. M. Bales	372,593
Belt, driving, Bockmuhl & Karthaus	372,297
Belt, electric, J. Williams	372,617
Belt fastener, J. B. Norton	372,427
Belt shifting device, A. M. Dolph	372,523
Belting, G. Meacom	372,632
Billiard table leveler, H. Rice	372,586
Binder, N. Hawkins	372,467
Block or chunk pin, G. V. Brecht	372,585
Board. See Ironing board.	
Boiler. See Multitubular boiler. Steam boiler.	
Tubular expansion boiler. Wash boiler.	
Boiler flue, D. Purves	372,487
Boiler furnace, F. Ludwig	372,422
Boilers, safety vent for steam, W. C. Baker	372,289
Bolts and nuts, machine for threading, F. M. Kennedy	372,541
Book rest, W. Small	372,486
Boot or shoe heel, I. Summerfield	372,435
Boots, shoes, etc., fastening for, T. P. Ryan	372,333
Bottle and label protector, A. Grisli	372,462
Boxes, machine for pressing, R. H. Hoyt	372,537
Brace. See Shoulder brace.	
Brake block attachment, W. T. Milliken	372,584
Brush, pocket hand, C. B. Schroeder	372,492
Brushes, manufacture of, J. A. Read	372,385
Bucket, portable sanitary dinner, A. Simon	372,337
Buckle, bale tie, Leder & Forbes	372,421
Buckle guard, W. H. Chapman	372,603
Buildings, construction of, W. Dryden	372,461
Burning and utilizing wet and offensive substances, A. Engle	372,304
Bustle, F. B. Melville	372,617
Button die, W. Hornich	372,622
Button lathes, grip for, W. F. Young	372,443
Cabinet, blank, J. H. Paul	372,383
Cable device for bridges, traction, F. L. W.	
Church	372,402
Calk stock, manufacture of shoe, E. S. Brainard	372,336
Can. See Oil can.	
Canopy frame holder, C. T. Segar	372,570
Car coupling, H. L. Arnold	372,283
Car coupling, A. S. Bailey	372,286
Car coupling, J. H. Davis	372,459
Car coupling, S. P. Gaver	372,371
Car coupling, T. Farmer et al.	372,610
Car coupling, L. K. Fuller	372,462
Car coupling, W. C. Long	372,645
Car coupling, Sime & Moore	372,380
Car coupling, D. Y. Wilson	372,350
Car frame, P. Matthews	372,548
Car heater, J. H. Mac El'Rey	372,478
Car, railway, Green & Murison	372,615
Car roof, C. B. Hutchins	372,316
Car seat, J. S. Bushnell	372,597
Car seat lock, C. Parham	372,490
