All business intrusted to them is done with special care and promptness, on very reasonable terms.

A pamphlet sent free of charge, on application, containing full information about Patents and how to proquer them; directions conceming Labels, Copyrights, Designs, Patents, Appeals, Roissues, Infringements, Assignments, Rejected Cases, Hints on the Sale of Patents, etc.

We also send, free of charge, a Synopsis of Foreign Patent Laws, showing the cost and method of securing patents in all the principal countries of the world.

MUNN & Co., Solicitors of Patents, 361 Broadway, New York.
BRANCH OFFICES.—No. 622 and 624 F Street, Pactic Building, near 7th Street, Washington, D. C.

JENKINS BROS. VALVES.

THE ENDORSEMENT OF FIRST-CLASS ENGINEERS AND MECHANICS THROUGHOUT THE COUNTRY has fully demonstrated these valves to possess the following advantages over all other valves now in use:

1. A perfectly tight valve under any and all pressures of steam, oils, or gases.

2. Sand or grit of any kind will not injure the seat.

3. You do not have to take them off to repair them.

4. They can be repaired by any mechanic in a rew minutes.

5. The elasticity of the Disc allows it to adapt itself to an imperfect surface.

In Valves having ground or metal seats, should sand or grit get upon the seat, it is impossible to make them tight, except by regrinding, which is expensive if done by hand, and if done by machine soon wearsout the valve, and in most cases they have to be disconnected from the pipes, often costing more than a new relye. The junking Discs used in these valves are manufactured under our 1850 patent, and will standamy pressure of steam, oils, or action.

BUILT BY GUILD & GARRISON, Brooklyn, N. Y.

To Business Men.

The value of the SCIENTIFIC AMERICAN as an advertising medium cannot be overestimated. Its circulation is many times greater than that of any similar jeurnal now published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. This he has when he advertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN. When selecting a list of publications in waten you decide it is for your interest to advertise. This is frequently done, for the reason that the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.
