

geometrical definitions, even those which have been accepted by generations of geometers, are often weak, if not absolutely incorrect.

TREATISE ON PATENT ESTATE. By Thos. B. Hall. Cleveland: Ingham, Clarke & Co. 1888. Pp. 240. Price \$3.

Although many manuals of patent law have lately been issued, yet in the little work before us a somewhat different treatment is accorded the subject than that which is usually given in manuals.

TURNING LATHES. Edited by James Lukin, B.A. London: E. & F. N. Spon. 1888. Pp. vi, 160. Price \$1.

This book is an illustrated treatise on lathe work, designed for use in technical schools. The minuteness and practical nature of the directions given, however, make it of value to amateur turners.

The Cosmopolitan Magazine of New York City in its May issue introduced a decided novelty in the way of illustration, consisting of four pages of beautifully colored pictures in embellishment of Moncure D. Conway's rather recondite article on "The Pedigree of the Devil."

Ferns and Wild Flowers of the Rocky Mountain Region, pressed and well mounted for preservation, are now being furnished by Mr. P. J. Atkinson, of Colorado Springs, Col. They are bound in books varying in size from 3 1/4 by 4 1/4 inches to the standard botanical size of 11 1/2 by 16 1/2 inches.

Any of the above books may be purchased through this office. Send for new catalogue just published. Address MUNN & Co., 361 Broadway, New York.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information, and not for publication. References to former articles or answers should give date of paper and page or number of question.

(1) F. J. R. writes: I am making an induction coil 3 x 1 1/4 inches, and would like to know what sizes of wire I should use, also whether a bundle of iron wires is very much better than a solid iron core?

(2) O. K. writes: I have constructed a simple electric motor, as described in SCIENTIFIC AMERICAN, March 17, 1888, and connected it with an Edison light circuit, and it melts the brushes.

(3) J. C. H.—Surface tension or the attraction of cohesion is the principal reason why mercury does not distribute itself all along the tubes when thermometers are laid horizontally.

(4) W. McD. writes: 1. In reference to the construction of the simple electric motor, could not insulated wire be substituted for the shellac-covered wire

used in armature? A. Cotton-covered magnet wire is recommended in the article referred to. The shellac insures a more perfect insulation, and at the same time serves to cement the different layers of wire together. 2. What portions of the field magnet correspond to the north and south poles? A. The poles are above and below the center of the armature. 3. Is it possible to make a dynamo to run the motor? If so, would its construction differ in any way from the construction of the motor? If so, what would be the changes? A. A motor can be operated by a current from the dynamo. The dynamo could be made upon the same plan as the motor by using a cast iron field magnet and winding the armature with finer wire, say No. 20. 4. Could the efficiency of the motor be increased by using finer wire? A. It depends upon the quality of the current used for running the motor. For a current of high voltage you should use finer wire. 5. Would not the dynamo be a much cheaper source of the electricity than the batteries, provided you have the power to run it (the dynamo)? A. The dynamo is a cheaper source of electricity than batteries. 6. Is it necessary to charge the field magnet of a dynamo when first constructed, or is there enough residual electricity in the iron to start the current? A. Ordinarily, there is enough magnetism resident in the cores of the field magnet to start the current, but it sometimes happens that it is necessary to supply the magnetism from an outside current. 7. I wish to have my pupils construct an electric motor of say 1/2 horse power, also a dynamo to run it. We have the appliances of an ordinary machine shop to aid us. Have you ever published, or intend to publish soon, the details of construction of such a motor and dynamo? If not, where can I find such a description? A. In SUPPLEMENT, No. 600, you will find a description of a small dynamo which would also serve as a motor. 8. Have you ever published anything regarding the construction of an electric lamp (arc)? A. You will find in the back numbers of the SUPPLEMENT, descriptions of many forms of arc lamps. See our SUPPLEMENT catalogue and SUPPLEMENT, No. 652. We can also supply Arc and Globe Lamps, by Maier, \$3.

(5) C. A. L. asks how to make and put up a mechanical telephone good for a distance of a quarter of a mile. A. For an acoustic telephone use small twisted wire cable picture cord. Stretch it between two disks of thin tin or steel in thickness about No. 34 wire gauge. Disks to be 3 inches diameter, fastened with screws between two pieces of hard wood, so made as to pinch the disks all around. The wire to be fastened to the center of the disks by a loop through a soldered eye. The wire may rest in slings of rubber or leather attached to poles about 150 feet apart. The wire should not turn sharp corners. The disks should be set square with the wire at convenient positions to maintain a strong tension upon the wire, as well as convenient for conversation.

(6) J. C. writes: I am making an induction coil on the general principles of one described in SUPPLEMENT, No. 569. Primary coil is finished, and works very well, but I would like to have a little information. Primary coil has on it four coils of No. 24 wire. Paper tube for secondary coil measures 1 1/2 inches outside. Must I use No. 36 wire, or will No. 32, or even heavier, wire answer the purpose? How many layers will be required, keeping in view the fact that I do not want to get it more than 3 inches in diameter, if possible, and what will be approximate weight of wire? A. There is an advantage in using fine wire in the secondary coil, as the entire body wire will be nearer the metallic core. We think you have made a mistake in making your core and primary coil of such large diameter. You should have from 15 to 20 layers of the secondary wire.

(7) Ph. L. S. asks: How is soluble Prussian blue prepared? A. Add a solution of ferrous sulphate to a solution of potassium ferrocyanide, and expose the precipitate to the air till it becomes blue, and wash it till all the soluble salts are washed away. By continuing the washing, the blue itself dissolves, forming a deep blue solution that may be evaporated without decomposition. 2. How is ink prepared that writes blue and then turns black? A. See the formulas given in SCIENTIFIC AMERICAN SUPPLEMENT, No. 157. 3. How long will quicklime take to dissolve bones, and is the dry or slaked lime the most active? A. Place the bones in a large kettle filled with ashes, and about one peck of lime to a barrel of bones. Cover with water and boil. In twenty-four hours all the bones, with the exception perhaps of the hard shin bones, will become so much softened as to be easily pulverized by hand.

(8) W. M. M. asks the best kind of paint to use on a tin roof, something that will stop leaks as well as preserve the tin. A. Use Prince's metallic paint, or any ground oxide of iron, mixed with linseed oil.

(9) C. R. M. asks a good cement for leather belting. A. Take of common glue and isinglass equal parts, soaked for ten hours in just enough water to cover them. Bring gradually to a boiling heat and add pure tannin until the whole becomes rosy or appears like the white of eggs. Buff off the surfaces to be joined, apply this cement warm, and clamp firmly.

(10) T. S. A. desires (1) a good recipe for lemon sugar, one that will not taste too much of the sugar, and be insipid. A. Citric acid 1 ounce, white sugar 2 pounds, essence of lemon 1/2 ounce; powder and keep dry for use. One dessertspoonful will make a glass of lemonade. 2. A recipe for old fashioned ginger pop beer. A. See the recipes given in SCIENTIFIC AMERICAN SUPPLEMENT, No. 270, under the title of "Effervescent Beverages."

(11) G. A. D. writes: In the West a great deal of grain is bound with twine made from manila. Has there ever been any effort made to manufacture binder twine from flax, and what success has it had? Is flax twine any more apt to be "cut" by insects than manila twine? How should twine be treated to prevent insects from gnawing off the bands? A. Binder twine was made from flax in the early days of the reaper. The manila twine is the cheapest. Flax is not affected by insects, to our knowledge. Saturating the twine with salt brine will keep insects from cutting it.

(12) C. E. L. asks: What will drive out large black ants from a pantry? A. Red pepper, sulphur, kerosene, carbolic acid, and similar substances are efficacious in driving ants away.

(13) O. R. R. writes: 1. There is a notion prevalent in this vicinity that, in order to have good well water, the well must be open so as to expose the water to the air, and also that some way of raising the water which agitates it is to be preferred. How much truth is there in the above? A. Agitation and exposure to the air is valuable as a means of destroying organic matter in water. 2. What is the reason that dynamite will explode by percussion, but not by fire? Would a very hot iron cause it to explode? A. It is often impossible to assign a reason for chemical facts. A sudden heat applied to the whole mass might cause an explosion, while the local application would fail.

(14) F. G. asks how to drill by hand a one-half or three-fourths inch hole through a plate of glass one-fourth of an inch thick, for a Wimshurst electrical influence machine. The glass disks are eighteen inches in diameter, and each is to carry sixteen sectors. A. Clamp over the glass disk a board having in it a thirteen-sixteenths inch round hole, the hole to be arranged exactly over the center of the disk. On a brass or copper tube six or eight inches long, and 1/2 inch in diameter, secure a spool about 2 inches in diameter, and in the top of the tube insert a hard wood handle having a shoulder which will bear upon the top of the tube. Provide a long bow with strong catgut cord, and operate the tube like a bow drill. Keep the hole in the board supplied with coarse emery and water.

(15) G. E. T. asks: Can you give general proportions for increasing the capacity of the dynamo machine described in SUPPLEMENT to 24 or 32 1/2 candle power lamps? Does it make any material difference whether the rings of the armature are cast or wrought? How should the machine be mounted? A. If you increase the dimensions one-half (linear), the dynamo will run from 24 to 30 lights. The rings of the armatures should be of wrought iron. The machine should be mounted upon a frame so as to be adjustable, for the purpose of tightening the belt. The belt should be seamless.

(16) G. W. G. asks: What will destroy roaches or drive them away? A. Use fresh borax and Persian insect powder continuously until the pests are exterminated. Or use a phosphoric paste, of which there are several kinds to be had at drug stores. It should be mixed with a little molasses, and put on bits of cardboard or paper, distributed around infested places. The practice should be kept up some time after the pests have apparently disappeared, on account of young ones coming out, say for three or four weeks.

(17) W. C. T. asks if common putty, such as used to put in window glasses, could be used to make the porous cup of a galvanic battery. If not, what is a good way to make one? A. Putty is useless. Make it of clay or use a flower pot with the hole in its bottom corked up.

(18) N. P. K. asks how to polish black marble. A. The process embraces five stages, beginning with the use of coarse materials and finishing with dry rags. A full description of it is given in Spon's "Workshop Receipts," first series, in an article entitled "Marble Working." We can supply the book for \$2.

(19) C. S. asks: What will stick celluloid to paper, wood, glass, etc.? A. Try the following: Gum shellac 1 ounce, camphor 1 ounce, alcohol 4 ounces. Dissolve and filter.

(20) C. S. W. asks a recipe for making compressed yeast, also called German yeast. A. It is obtained by straining the common yeast in breweries and distilleries, until a moist mass is obtained, which is then placed in hair bags, and the rest of the water pressed out until the mass is nearly dry.

(21) J. H. N. asks how to make a varnish of bleached shellac to be used in the place of the common shellac dissolved in alcohol. A. Break the gum in small pieces, and macerate in a stoppered bottle with ether; after swelling up sufficiently the excess of ether is poured off, and it will readily dissolve in alcohol.

(22) R. C. asks (1) the proper name to apply to a person who makes insects a study. A. Entomologist. 2. A recipe for an effective insect powder. A. See "Two Valuable Insecticides," contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 218. Powdered sulphur is likewise efficacious in many instances.

(23) A. H. T. asks: 1. What chemical action takes place when milk sours, and why? A. The milk sugar which it contains decomposes into lactic acid. This process is known as lactic fermentation. See the article on fermentation in any cyclopedia. 2. How to prevent milk from souring. A. Milk is best preserved by the addition of a few grains of bicarbonate of soda or potash, and placing in a tightly corked bottle.

(24) N. A. E. asks how to make rose perfume or rose water. A. Dissolve attar of roses, 6 drachms avoirdupois, in strongest alcohol hot, 1 imperial pint; throw the solution into a 12 gallon carboy, and add 10 gallons pure distilled water at 180°-185° Fah. At once cork the carboy, at first loosely, and agitate the whole briskly, although at first cautiously, till quite cold. See also "Rose Oil or Otto of Roses" in SCIENTIFIC AMERICAN SUPPLEMENT, No. 275. We can also supply you with the Manufacture of Perfumes, by Snively. Price \$3.

(25) L. L. U. asks: How much coal will it take to melt 3,000 pounds of light scrap iron in a cupola 20 inches diameter? A. From 700 to 1,000 pounds anthracite.

(26) A. F. M. desires a receipt for taking the rust off drawing instruments without injuring them. A. Mix 10 parts of tin putty, 8 of prepared buck's horn, and 25 of spirits of wine, to a paste. Cleanse the articles with this, and finally rub with soft blotting paper.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

June 12, 1888,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Table listing various inventions and their patent numbers, including items like 'Adding and writing machine, A. C. Ludlum', 'Adjustable joint, G. C. Sweet', 'Air compressor, W. T. Forster', etc.

Coloring matter obtained by the action of tetrao-
diamido benzole on phenols, new, R. G. Wil-
liams..... 384,342
Coloring matter, production of blue, E. Ullrich..... 384,480
Comb. See Electric comb.
Copy holder for compositors, H. F. Maas..... 384,374
Corn shock binder and compressor, H. B. Puffen-
berger..... 384,279
Corset, G. A. Close..... 384,307
Cotton chopper, S. Freeman..... 384,516
Countershaft, Bugbee & Danner..... 384,560
Coupling. See Car coupling. Thill coupling.
Tube coupling.
Crutch, J. F. Pluche..... 384,470
Cultivator, E. R. Conklin..... 384,347
Cultivator, hand, E. C. Elliott..... 384,351
Cultivator, hoe, J. W. Mulvey..... 384,267
Cuspidor, J. L. O'Connor..... 384,587
Cutter. See Dado cutter.
Cutterhead and means for adjusting the cutters
of the same, W. R. Allen..... 384,491
Dado cutter, W. R. Fox..... 384,248
Dental flasks, heater for, R. M. Chase..... 384,509
Display frame, J. F. Reichenbach..... 384,334
Ditching machine, U. Blickensderfer..... 384,419
Door fastener, R. C. Elliott..... 384,567
Door hanger, rail, and rail bracket, combined, W.
Cronk..... 384,236
Double gauge, L. O. Barrett..... 384,413
Dress form, W. H. Knapp..... 384,531
Dress form, J. W. Littlefield..... 384,372
Drill. See Grain drill.
Dyestuffs, manufacture of, M. Herzberg..... 384,315, 384,316
Dyeing apparatus, R. Perzina..... 384,389
Electric circuit closing device, Grovesteen &
Jahn..... 384,570
Electric circuit controller, O. F. Greim..... 384,440
Electric comb, C. Busch..... 384,561
Electric locomotion, system of, H. A. Seymour..... 384,594
Electric traction, apparatus for, E. Julien..... 384,580
Elevated way, N. Newman..... 384,267
Elevator. See Grain binder elevator. Hydraulic
elevator.
Elevator safety device, C. Klinik et al..... 384,319
Engine. See Expansion engine. Steam engine.
Engraving or etching upon, block for, W. C. Nor-
man..... 384,586
Expansion engine, triple, H. F. Gaskill..... 384,250
Eye bars, die for making, J. F. Kingsley..... 384,450
Eyeglasses, A. Schultze..... 384,475
Fare register, H. R. Coffey..... 384,425
Farm gate, W. H. Ragsdale..... 384,280
Feed regulator, E. A. Hoover..... 384,443
Feed trough, W. H. Garrett..... 384,357
Feed water heater, W. Oliphant..... 384,538
Feed water heating and filtering apparatus, W.
Oliphant..... 384,540
Feed water regulator, Cook & Thoens..... 384,510
Fence, A. B. Culp..... 384,564
Fence, J. S. Orr..... 384,270
Fence machine, S. Conrath..... 384,235
Firearm, breech-loading, H. M. Pope..... 384,277
Fire escape, W. McMullin..... 384,376
Fire escape, W. T. Smith..... 384,292
Fire extinguishers, alarm valve for automatic,
Dewson & Taylor..... 384,514
Fishing reel, H. H. Cordes..... 384,309
Floor, fireproof, W. H. Brown..... 384,421
Flue stopper, Weitzel & Lee..... 384,341
Fork. See Hay and fodder fork.
Frame. See Brick kiln frame. Display frame.
Pocketbook, bag, and purse frame.
Fruit stoning machine, B. A. Lillie..... 384,371
Fur satchel and muff, combined, A. Brahadi..... 384,503
Furnace grate, L. M. Woodcock..... 384,410
Furnaces, hydrocarbon burner for, A. Heberer..... 384,524
Furniture, upholstered, F. G. Johnson..... 384,259
Gauge. See Double gauge.
Game, W. C. Dunn..... 384,340
Gang board, automatic registering, H. B. Kirk..... 384,370
Gas bracket, J. Wright..... 384,302
Gas pressure regulator, C. L. Rowland..... 384,284
Gate. See Farm gate.
Gate, G. H. Aylworth..... 384,552
Gem setting, W. G. Smith..... 384,389
Generator. See Steam generator.
Glass, machine for grinding, smoothing, and pol-
ishing, F. Scheffold..... 384,394
Glass, ornamenting, M. Fink..... 384,569
Glove fastener, G. H. Coursen..... 384,428, 384,429
Governor, Westinghouse & Rites..... 384,485
Governor, steam engine, C. Schmid..... 384,286
Grain binder elevator, L. Mathews..... 384,458
Grain binder knotted, Farmer & Linder..... 384,245
Grain drill, D. B. Bearden..... 384,499
Grain pipe, flexible, T. W. Emery..... 384,352
Grate, L. M. Woodcock..... 384,400
Guns, breech mechanism for, T. Nordenfelt..... 384,537
Hair crimper, C. H. Bissell..... 384,418
Hand bag, J. Mehl, Jr..... 384,377
Handle. See Saw handle.
Hanger. See Door hanger.
Harness hook or snap, W. S. F. Dillon..... 384,512
Harness horse, T. Willsea..... 384,301
Harness mountings, manufacture of, R. S. Grum-
mon..... 384,571
Harrow, A. D. Manson..... 384,457
Harvesters, pitman box for, A. W. Braman..... 384,504
Hay and fodder fork, Z. S. & M. C. Randleman..... 384,281
Heat developer and radiator, W. M. Jackson..... 384,365
Heater. See Feed water heater. Liquid heater.
Steam heater.
Heel nailing machine, E. B. Allen..... 384,343
Holder. See Bag holder. Blacking box holder.
Chalk line holder. Copy holder. Pillow sham
holder. Twine holder.
Honey frames, machine for making, J. Ware..... 384,549
Hook. See Harness hook.
Hydraulic elevator, W. T. Fox..... 384,436
Ice shaver, K. K. Way..... 384,299
Implement, combination, W. S. Ross..... 384,592
Indicator. See Station indicator.
Inhaler, H. Palmer..... 384,589
Ironing machine, T. S. Wiles..... 384,487
Jack. See Lifting jack.
Joint. See Adjustable joint. Railway rail joint.
Universal joint.
Key. See Telegraph key. Tuning key.
Lamp socket, incandescent, Spink & Gauntzes..... 384,478
Lantern, J. Charleson..... 384,234
Lantern, tubular, J. B. Stetson..... 384,546
Last, shoemaker's, G. W. Keller..... 384,448
Lathe for wooden handles, N. R. Flint..... 384,555
Lead and base bullion from slag, apparatus for
separating, W. B. Devereux..... 384,349
Leather trimming machine, G. Schmidt..... 384,287
Letterbox, J. E. Smith..... 384,596
Lifting jack, W. N. Best..... 384,417
Lightning rod, metallic crest tile, C. B. Nelson..... 384,394
Liquid heater, J. C. McNamee..... 384,265
Liquid purification, W. Oliphant..... 384,539
Liquids, apparatus for spraying, F. F. Bourdill..... 384,366
Lock. See Nut lock. Permutation lock. Seal lock.

Lock, J. Hartness..... 384,441
Locket, J. Cohn..... 384,426
Loom picker staff check, B. F. Carter..... 384,508
Magnet, polarized electro, E. J. Mallett..... 384,521
Malt mashing machine, T. Evans..... 384,568
Map case, A. H. Hall..... 384,283
Mechanical movement, A. W. Johnson..... 384,258
Medicine, cough remedy, G. A. Patton..... 384,446
Metallic surface, ornamented, F. Rhind..... 384,282
Mill. See Roller mill. Sawmill.
Mould. See Butter mould.
Mould, R. Sleeth..... 384,595
Mortising machine, Bugbee & Danner..... 384,559
Muffler, steam, T. E. Hill..... 384,364
Multiple switch board circuit, C. E. Scribner..... 384,477
Nail machine, Buschick & Rautert..... 384,422
Nails, machine for making wire, H. Essex..... 384,515
Nut lock, Merriss & Muncey..... 384,378
Oil burner, C. H. Phelps..... 384,275
Overshoe, A. B. Walters..... 384,483
Package carrier, J. W. Bridwell..... 384,568
Packing for steam cylinder pistons, metallic, J.
Patten..... 384,272
Paddlewheel, feathering, R. J. Jones..... 384,367
Pan. See Scale pan.
Pantaloons or garment stretcher, W. W. Atkin-
son..... 384,492
Paper making machines, section box for, J. D. &
W. F. Pickles..... 384,276
Passenger register, T. F. Hanly..... 384,572
Pencil, L. B. Myers..... 384,383
Pencils and the like, rubber tip attachment for, F.
E. Cross..... 384,583
Perforating and eyeletting machine, G. B. Webb..... 384,597
Permutation lock, W. F. Peters..... 384,468
Photographic plates, apparatus for heating, cool-
ing, ventilating, and drying, W. Bell..... 384,416
Piano, upright, S. R. Harcourt..... 384,254
Piano, upright, W. H. Dutton..... 384,241 to 384,244
Pillow sham holder, J. W. Dorst..... 384,239
Pipe. See Grain pipe. Tobacco pipe.
Pipe, transportation case for coiled lead, H. J.
Miller..... 384,327
Planing machine, L. P. Hoyt..... 384,445
Planter, corn, E. K. Hayes..... 384,363
Planter, cotton seed, S. E. Hake..... 384,314
Planter, potato, J. W. Estes..... 384,353
Plover, A. C. Rosencranz..... 384,283
Plow, potato, S. Disbrow..... 384,310
Pocketbook, A. C. Jocelyn..... 384,527
Pocketbook, bag, or purse frame, E. Oldenbusch..... 384,336
Pole changer, automatic, E. J. Mallett..... 384,323, 384,326
Power, device for transmitting, C. T. A. H. Wied-
ling..... 384,598
Press. See Baling press.
Printing machine, J. H. Earl..... 384,432
Projectile, J. R. Hawley..... 384,574
Propeller wheel, J. E. T. Bartlett..... 384,493
Pulley, H. W. Beldsmeier..... 384,501
Pump, deep well, P. A. Myers..... 384,585
Punch, M. D. Knowlton..... 384,532
Quilting machine, C. F. Landphere..... 384,364
Rack. See Card rack. Ticket rack.
Railway, cable, E. W. Wilson..... 384,550
Railway crossing alarm signal, G. D. & C. Rath-
mann..... 384,390
Railway, electric, G. H. Condit..... 384,582
Railway, electric, R. M. Hunter..... 384,576
Railway, pneumatic, T. W. Pitts..... 384,333
Railway rail joint, M. T. Frame..... 384,249
Railway rails, safety flange for, C. M. Erwin..... 384,435
Railway spike, C. Baines..... 384,229
Reel. See Bolting reel. Fishing reel.
Reel and transportation case, combined, H. J.
Millar..... 384,328, 384,329
Register. See Cash register. Check register.
Fare register. Passenger register.
Regulator. See Feed regulator. Feed water regu-
lator. Gas pressure regulator.
Rennet, producing dried extract of, F. Graeff..... 384,358
Rivet, A. Kirks..... 384,318
Rod. See Lightning rod.
Roller mill, Westrup & Lantaff..... 384,408
Rolling apparatus, W. L. Price..... 384,591
Rolling mills, appliance for, D. B. Oliver..... 384,332
Rolling mills, rolls for iron, A. W. H. Collard..... 384,308
Rope transmission, tension device for, J. E. Hall..... 384,360
Roundabout, W. Sassaek..... 384,393
Rubber dam adjuster and clamp, J. W. Ivory..... 384,578
Rubber dam clamp and napkin holder, combined,
J. W. Ivory..... 384,577
Ruby pin setter, P. Ramser..... 384,544
Ruling machine, Barnard & Knapp..... 384,497
Safes and vaults, operating mechanism for doors
of, A. Kirks..... 384,262
Sampling apparatus, automatic, A. Bradford..... 384,428
Sash balance, W. C. Merckel..... 384,459
Sash fastener, G. H. Aylworth..... 384,553
Sash fastener, E. W. Luce..... 384,535
Saw handle, J. Beaulieu..... 384,500
Sawmill, band, V. Gillis..... 384,252

Wine, champagne, Veuve Pommery Fils & Co.....
15,605 to 15,607

A Printed copy of the specification and drawing of
any patent in the foregoing list will be furnished from
this office for 25 cents. In ordering please state the name
and number of the patent desired, and remit to Munn &
Co., 361 Broadway, New York.

Canadian Patents may now be obtained by the
inventors for any of the inventions named in the fore-
going list, provided they are simple, at a cost of \$40
each. If complicated, the cost will be a little more. For
full instructions address Munn & Co., 361 Broadway,
New York. Other foreign patents may also be obtained.

Advertisements.

Inside Page, each insertion - - - 75 cents a line.
Back Page, each insertion - - - \$1.00 a line.
The above are charges per agate line—about eight
words per line. This notice shows the width of the line,
and is set in agate type. Engravings may head adver-
tisements at the same rate per agate line, by measure-
ment, as the letter press. Advertisements must be
received at publication office as early as Thursday morn-
ing to appear in next issue.

SEBASTIAN, MAY & CO'S
Improved Screw Cutting
Foot & LATHES
Power \$60

Drill Presses, Chucks, Drills,
Dogs, and machinists' and ama-
teurs' outfits. Lathes on trial
Catalogues mailed on application
165 W. 2d St., Cincinnati, O.

**GOING INTO THE POULTRY BUSI-
NESS.**—A paper by P. H. Jacobs, reviewing the commer-
cial aspects of poultry raising, and giving many useful
hints upon the subject. Contained in SCIENTIFIC
AMERICAN SUPPLEMENT, No. 596. Price 10 cents. To
be had at this office and from all newsdealers.

ARTESIAN
Wells, Oil and Gas Wells, drilled by
contract to any depth, from 60
to 3000 feet. We also manufacture
and furnish everything required
to drill and complete same. Port-
able Horse Power and Mounted
Steam Drilling Machines for 100 to
600 ft. Send 6 cents for illustrated
catalogue.
Pierce Well Excavator Co.
New York.

ON RED AND PURPLE CHLORIDE,
bromide and iodide of silver.—On Heliochromy, and on
the latent photographic image. By M. Carey Lea.
A series of papers showing (1) that chlorine, bromine
and iodine are capable of forming silver compounds ex-
hibiting beautiful colorations and possessing great
stability; (2) that of these substances, the red chloride
shows a tendency to a reproduction of colors; and (3)
that these substances constitute the actual material of
invisible photographic images, and that such material
may now be obtained by the laboratory without the aid
of light. Contained in SCIENTIFIC AMERICAN SUPPLE-
MENTS Nos. 615, 616, 617, 618. Price ten cents
each, or 40 cents for the series. To be had at this office
and from all newsdealers.

Improved Stone Channelling Machines,
ROCK DRILLS,
Gadders, Quarry Bars, Plug
and Feather Drills, and
general Quarrying Machinery.
Send for full descriptive catalogue.
Ingersoll Rock Drill Co.,
10 PARK PLACE, New York.

**STORAGE BATTERIES FOR ELECTRIC
LOCOMOTION.**—A paper by A. Reckenzaun, offering a
few facts and figures relating to the present state of the
subject of the application of storage batteries to loco-
motive purposes. Contained in SCIENTIFIC AMERICAN
SUPPLEMENT, No. 625. Price 10 cents. To be had at
this office and from all newsdealers.

ROCK DRILLS
AIR COMPRESSORS &
GENERAL MACHINERY FOR
MINING, TUNNELING,
QUARRY & RAILROAD WORK
RAND DRILL CO 23 PARK PLACE NEW YORK

PROPULSION OF STREET CARS.—
A paper by A. W. Wright, in which an endeavor is made
to solve the problem as to the amount of power required
to start a street car and keep it in motion under average
conditions. Contained in SCIENTIFIC AMERICAN SUP-
PLEMENT, No. 533. Price 10 cents. To be had at this
office and from all newsdealers.

INVENTORS and others desiring new articles manufac-
tured and introduced, address P. O. Box 86, Cleveland, O.

Gum, a new	277	Light, electric, fashionable	100	Paint mill, new	102	Railway, trans-Caspian	406	Steel, blow holes in	65	Ventilation of sick bed	359
Gum arabic substitute	82	Lighting, pervasiveness	217	Panama Canal, locks of	168	Railway switch, Baldwin's	322	Steel, experience with	57	Ventilator, Cashill's	370
Gum, dynamite	152, 278, 361	Lighting, protection from	312	Panama Canal, ship railway	80	Railway, San Salvador	257	Steel, manganese in	219	Ventilator, Werner's	196
Gum, gutta, butting of	1	Lighting, remarkable escape	338	Paper bottles	197	Railway ship, Venetian	224	Steel manufacture	226	Ventilator, window	372
Gum, Maxim trial	375	Lime for sorghum juice	358	Paper for cleaning lenses	356	Railway signals	179	Steel, polishing	119	Ventrioulism	99
Gum, new and powerful	337	Lime, whitening	354	Paper pulp, cotton stalk	388	Railway, wreck, remarkable	28	Steel rails, Bessemer	81	Venus, satellite of	104
Gum, steel, casting	48	Liparine	248	Paper transfer	73	Railways, American, progress	17	Steering gear, locking	370	Vest protector	230
Guns, built-up failure	211	Literature, condensed	368	Paper, wood fiber for	336	Railways, and ships, our	8	Steering gear, Snelling's	328	Vesuvius, engines of	313
Guns, fifteen mile	340	Liver, torpid, remedy for	72	Parasites on live stock	260	Railways, e. electric	102	Stereographs, photo-microscopic	20	Vesuvius, gun boat	287
Guns, heavy, abroad	114	Lizard, horned	169	Paris as a seaport	7	Rain water cut off	273	Stewart, the fasting man	37	Vibration, experiment on	164
Guns, internal strain of	280	Lock and alarm	227	Paris, water, value of	306	Rat plague in China	227	Stomach, importance of	153	Volapuk	68
Guns, new for U. S. Navy	330	Lock, nut, new	320	Patent, for steam	19	Rats, stopper for	280	Stones in seals' stomachs	121	Voting, novel	261
Guns of the Benbow	118	Lock, nut, Vaughan's	356	Patent, barbed wire	16	Rattlesnake, H. M. S.	383	Store and stable, design for	371	W	
Guns, 36 pounder	35	Locks of Panama Canal	166	Patent, Bell telephone	192	Ratchet and lever mechanism	42	Store block	102	Wages, American and foreign	118
Gunboats, U. S. launch	287	Locomotive, lost	244	Patent bill, Indiana	32	Ratchet and lever mechanism	42	Storm, snow, the great	309	Wages and living forty years ago	40
H		Locomotive, road, postal	338	Patent law for Switzerland	238	Rat plague in China	227	Stoves, car	176	Wages and living forty years ago	40
Halation, preventing	385	Locomotive wheels, polygonal	21	Patent law, amendment of	112	Rats, stopper for	280	Stoves, small, power	314	Wagon, farm and road	19
Halls, costly, N. York	232	Locomotive run with nat. gas	88	Patent medicines	212	Rats, stopper for	280	Stoves, steam, portable	176	Wagon railroad	182
Hammer, steam, Kaiser and	391	Loom, power, invention of	64	Patent office staff, increase	242	Rats, stopper for	280	Stoves, steam, portable	176	Waite, Chief Justice	193
Harbor, New York, improvements	257	Looms, tension device for	229	Patent protection, Edison on	117	Rat plague in China	227	Stoves, steam, portable	176	Walls, dryness of	213
Hassard, John R. G.	257	Lumber, ratt, destruction of	16	Patent rights and dental profession	401	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hauling machine, endless rope	325	M		Patent symposium	401	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Haupt, Lewis	211	Machines, sewing, managing	403	Patent, for steam	19	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hay stacker, Heinlein's	211	Madder	71	Patent, sugar, Swenson's	53	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hay unloader and stacker	164	Magic, Indian	377	Patent, the glycerine	216	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hayden, F. V.	9	Magnesium	197	Patent, tricks, old and new	272	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Headache, sick	247	Magnesium flash lamps	199	Patents as investments	201	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Health Board, and stables	272	Magnesium lamp	329	Patents by joint inventors	2	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Health, public	272	Magnesium powder, burning	49	Patents, electric, relating to	96	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Heater, car, Wiedle's	281	Magnesium powder, light	321	Patents, report on	89	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Heating arrangements, Utopian	131	Magnet, great, King's	15	Patina for brass and bronze	67	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Heating cars by steam	83	Magnet, iron, King's	15	Perry, Commodore M. C.	24	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Heating in compressed air	183	Magnesium igniting	129	Petroleum engine, new	377	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hellipin, Miesbach	306	Maintel, sheet metal	35	Petroleum, origin of	42, 153	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Heliograph sheets	400	Maple sugar, patent	3	Petroleum, solid	397	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Heliograph, the	400	Mars, opposition of	234	Photographic plates	390	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hero of the throttle	292	Mars, satellites of	238	Photographs, exhibition of	321	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hinge, Beer's	340	Mastodon, the	389	Photographs, faded	337	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hinges, door, creaking	179	Masts, hollow	113	Photographs, indoors	161	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hoisting engines	341	Mastel, sheet metal	35	Photography, as a detective	35	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Hoisting machinery	244	Meat, preservation by sugar	48	Photography, beetle	406	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Holy Man, securing Co.	261	Mechanical progress	117	Photography, lunar	10	Rat plague in China	227	Stoves, steam, portable	176	Walls, washable, in cottages	50
Homes, own your	361	Mechanics, trained	344	Photography of the invisible	121	Rat plague in China
