WATER MOTORS. The most efficient and economical means of obtaining from one eighth to fifteen horse power an eighth to fifteen horse power and upward. A motor which does the greatest amount ofwork with the use of the smallest stream of water, specially adapted for running cheaply and efficiently, Printing Presses, Elevators, Church Organs, Coffee Mills, Sewing Machines, Lathes, Dental Contrivances, and in fact, any piece of Mechanism.

Singlammon Hydraulic Street, Hinghamton, N. Y.

The value of the SCIENTIFIC AMERICAN as an adversing medium cannot be overestimated. Its circulation is many times greater than that of any similar journal now published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. This he has when he advertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN, when selecting a list of publications in warea you decide it is for your interest to advertise. This is frequently done, for the reason tast the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.

For rates see top of first column of this page, or address
