THE STURTEVANT MILL.
Crusher and Pulverizer Combined.
89 MASON BUILDING, BOSTON, MASS.
December 23, 1887.

GENTLEMEN:—The Sturtevant Mill purchased of you about three years ago has been in almost constant daily operation at Elizabethport, N. J., grinding phosphate rock, and is apparently in as good condition now as when first erected.
We are very much pleased with the work done, and in fact do not know the cost for grinding with this mill, is very largely reduced from our old process of crushers and stones, and it exceeds in capacity and economy anything we know of, and we have tried several kinds of mill's besides your stone. Yours truly,
BOWKER FERTILIZER CO., W. H. BOWKER, Pres.

TO BUSINESS MEN.
The value of the SCIENTIFIC AMERICAN as an advertising medium cannot be overestimated. Its circulation is many times greater than that of any similar journal now published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. This he has when he advertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN, when selecting a list of publications in which you decide it is for your interest to advertise. This is frequently done, for the reason that the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.
