

ENGINEERING INVENTIONS.

A feed water regulator has been patented by Mr. Frederick E. Smith, of South Boston, Mass. This invention covers a novel construction and arrangement of parts, designed to provide a single apparatus of simple and inexpensive construction, which will act automatically to maintain the water in the boiler at a given height.

A wheel fastening device for car axles has been patented by Mr. Andrew J. Spicer, of Portland, Oregon. This invention provides a means of attaching car wheels to their axles in such manner that the two wheels carried by an axle will be able to revolve independently, and if necessary in opposite directions, thus avoiding undue wear and tear upon the tread of the wheel when the vehicle is passing about a curve.

AGRICULTURAL INVENTION.

A corn crib rat trap has been patented by Mr. William R. Parker, of Muddy Creek Forks, Pa. This invention covers a novel construction and combination of parts in a trap especially designed for use in connection with corn cribs, the trap being also adapted for use in the house or barn.

MISCELLANEOUS INVENTIONS.

A holdback has been patented by Mr. William Corcoran, of Copenhagen, N. Y. This invention provides a means of detachably securing the hold-back strap in connection with the shafts, whereby, should the traces become loose on the whiffletree, the shafts will not become entangled with the harness.

A corn husker has been patented by Mr. Herbert S. Blair, of Bucyrus, Ohio. This invention relates to hand huskers or husking pins, in which the implement is held on the hand by a strap, and consists in combining with the husking pin or tool a flexible loop-like strap of novel construction.

A thill coupling has been patented by Mr. William M. Spicer, of Wellsville, N. Y. Combined with a pin having a stud projecting from one side, is a spring attached to the axle and having an eye for receiving the stud of the pin, making a coupling which will remain in place in the thill irons without rattling.

A suspender buckle has been patented by Mr. Charles F. Walters, of Prospect, N. Y. It consists of a single piece of wire bent upon itself, forming front and back members, making a buckle easily adjusted up and down on the web of the suspender, while connecting very firmly and securely the straps to the web.

A fountain pen has been patented by Fred A. Robinson and Amy I. Smith, of New York City. This invention relates to that class of fountain pens which employ a nib pen, and consists principally in such construction of the pen that it is adapted to have a longitudinal movement which is utilized for feeding the ink to the pen.

A spring hinge has been patented by Mr. Henry F. Keil, of New York City. This invention relates to a spring butt, and provides a construction whereby the tension of the spring may be regulated by the manipulation of one tip, the spring being completely concealed and the device having the outward appearance of an ordinary butt.

A composition for sidewalks has been patented by Mr. Louis N. Beauchemin, of Hancock, Mich. It is made of coal tar, black pitch, resin, slab tar, pulverized limestone, copper moulding stamp sand, and other ingredients, mixed in specified proportions to a mortar-like mass, and laid on a proper foundation with the aid of a heated roller.

A game counter has been patented by Mr. Ferdinand King, of New York City. It consists of a disk upon which hands are pivoted to move independently of each other in the segment of a circle, making a simple device, capable of being carried upon the person, upon which the tally of points made in any game by two or more persons may be kept separately.

A gate latch has been patented by Mr. George W. Charleville, of McKinney, Texas. A ring or rings are loosely suspended in a case, with a lever or levers for operating the rings, while the case has side plates formed to constitute guides for the rings and prevent them from sidewise rocking or play, making a latch especially designed for use on gates, barns, and the like.

A wire joint has been patented by Mr. William A. Reddick, of Niles, Mich. It is formed by cutting away one side of the end of the wire, bending the reduced portion around another section, with the flat face of the cut part next to the wire grasped, and connecting the parts by tinning, such joint being especially serviceable in making skeleton frames for various purposes.

A hydraulic lift has been patented by Mr. Thomas P. Ford, of London, England. This invention relates to the valve gear for controlling the admission of water to the main cylinder, and its circulation from one end of the cylinder to the other, enabling plug or slide valves to be used, while preventing leakage from grit interfering with the proper seating of the valves.

A sea-quieting apparatus has been patented by Mr. Jens F. O. Larsen, of Copenhagen, Denmark. It is a compressible oil distributor made of a flexible pervious bag open at both ends, with rigid apertured covers and devices for closing the openings, an oil absorbent material filling the bag, out of which the oil is forced by the compression of the bag by the force of the waves.

An automatic temperature regulator has been patented by Mr. James W. Brook, of Lynchburg, Va. It is designed to automatically stop the flow of water, or open or close a window or ventilator, the device covering a novel construction and combination of parts in an apparatus having a longitudinally contractible and expansible rod, according to the variations of the temperature.

A screw driver has been patented by Messrs. George E. Gay and John H. Parsons, of Augusta, Me. It is an improved form of round-bladed screw drivers, in which the blade is secured in the handle by having its upper end driven into the wood, the upper end of the blade being so formed that by simply forcing it into the handle the screw driver is completed, without any other device to connect the blade and handle.

A wagon pole attachment has been patented by Mr. George F. Colby, of Shelby, Iowa. It is for preventing the neck yoke from coming off the pole, and consists of a longitudinally slotted and apertured tube provided with downwardly projecting lugs at each end, a spring being secured to the tube and provided with a pin engaging the aperture, the attachment being easily put on and taken off, and adapted to fit different sized poles.

A gear power for presses has been patented by Mr. Peter D. Roquemore, of De Berry, Texas. This invention covers improvements in mechanism for operating baling presses, the driving gear comprising shafts geared together at one end, with loose pinions at or near the other ends, and an intermediate fixed pinion upon a third power transmitting shaft, admitting of running either right or left, packing the bale up or down, and running at any rate of speed.

An electric regulator forms the subject of two patents issued to Messrs. Joseph A. Vansant and Frank S. Anderson, of Easton, Md. The construction is such that the normal circuit may be broken at will and the current caused to diverge and pass through a powdered material whose low conductivity is increased or diminished by compressing it more or less, thereby increasing or diminishing the strength of the current, the powdered substance employed being preferably mineral wool and carbon, one or more cells or receptacles containing the powder, and the invention providing means for compressing the powder as required.

SCIENTIFIC AMERICAN BUILDING EDITION. AUGUST NUMBER.—(No. 34.)

TABLE OF CONTENTS.

- 1. Elegant plate in colors of a dwelling at Gren Edge, N. J., with floor plans, sheet of details, etc. Cost, eight thousand five hundred dollars.
2. Plate in colors of a fire engine house of moderate cost. Details and floor plans.
3. Perspective view and floor plans of a residence at Black Rock, Conn. Cost, six thousand dollars.
4. Sketch of an uptown block of attractive residences, New York City.
5. Floor plans and perspective elevation of two Queen Anne cottages, lately completed at Bath Beach, Long Island. Cost, four thousand dollars each.
6. Design and floor plans for a two thousand dollar house lately built at Bridgeport, Conn.
7. Perspective and floor plans of an attractive residence lately built at Bridgeport, Conn. Cost, two thousand eight hundred dollars.
8. A six hundred dollar cottage built lately at Bridgeport, Conn. Perspective and floor plans.
9. Plans and perspective view of a seaside cottage lately erected at Bath Beach, Long Island. Cost, three thousand five hundred dollars.
10. Engraving and floor plans of a neat little double house lately erected at Bridgeport, Conn., costing one thousand eight hundred dollars.
11. A country residence in France. Perspective and plans.
12. Engraving of the palatial stables of Mr. D. Edgar Crouse, Syracuse, N. Y.
13. Plans and perspective for a carriage house, barn, etc. Cost, two thousand two hundred dollars.
14. Elevation and floor plans for a double house costing complete four thousand two hundred dollars.
15. New Congregational Church at Beckenham, Kent, England.
16. Page of designs of New England residences.

Miscellaneous contents: Vegetable glue.—Fourth of July fires.—The slag water closet.—Rust in water pipes.—Laying out the joints of an elliptical vault, illustrated.—The tulip and other trees.—Architectural school houses.—Hanging baskets.—To estimate the power of a stream.—Manufacturing progress in the South.—How to grow quinces.—Mixed wheats.—New ceiling for the Assembly chamber of the New York State Capitol.—Transplanting large pines.—Galveston artesian wells.—Poisonous wall paper and carpets.—The testing of Portland cement.—The humming bird.—Manila hemp in plaster.—A perfect hen house.—Examination questions for plumbers.—Road improvements.—The "Patten" metallic shingles and siding plates, illustrated.—The pool of Bethesda.—Carl Pfeiffer.—Creosote wood preserving stains.—House heating by hot water circulation, illustrated.—Ohio's largest poplar.—Mortar.—Irrigating wheels.—Liquid fish glue.

The Scientific American Architects and Builders Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in colors and with fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.

The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural publication in the world. Sold by all newsdealers.

MUNN & CO., PUBLISHERS, 361 Broadway, New York.

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

Specially adapted for machine shops—Talcott's combination patent belt hooks. Providence, R. I. Steam Launches.—New catalogue (free) by Chas. P. Willard & Co., 236 Randolph St., Chicago.

Iron Planer, Lathe, Drill, and other machine tools of modern design. New Haven Mfg. Co., New Haven, Conn.

Pratt & Leitchworth, Buffalo, N. Y., solicit correspondence relative to manufacturing specialties requiring malleable gray iron, brass, or steel castings.

Wanted.—Hardware specialties to manufacture, or will buy good patents. Address, with particulars, Excelsior, box 773, New York.

For the latest improved diamond prospecting drills, address the M. C. Bullock Mfg. Co., Chicago, Ill.

The best Coffee roasters, coolers, stoners, separators, polishers, scourers, glossing apparatus, milling and peaberry machines; also rice and macaroni machinery, are built by The Hungerford Co., 69 Cortlandt Street, New York.

Safety water columns. Cheaper than explosions or burned boilers. For illustrated price list, Reliance Gauge Co., Cleveland, O.

Nickel Plating.—Manufacturers of pure nickel anodes, pure nickel salts, polishing compositions, etc. \$100 "Little Wonder." A perfect Electro Plating Machine. Agents of the new Dip Lacquer Kristaline. Complete outfit for plating, etc. Hanson, Van Winkle & Co., Newark, N. J., and 92 and 94 Liberty St., New York.

Perforated metals of all kinds for all purposes. The Robert Aitchison Perforated Metal Co., Chicago, Ill.

The Railroad Gazette, handsomely illustrated, published weekly, at 73 Broadway, New York. Specimen copies free. Send for catalogue of railroad books.

The Knowles Steam Pump Works, 113 Federal St., Boston, and 88 Liberty St., New York, have just issued a new catalogue, in which are many new and improved forms of Pumping Machinery of the single and duplex, steam and power type. This catalogue will be mailed free of charge on application.

Link Belting and Wheels. Link Belt M. Co., Chicago.

Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J.

The Holly Manufacturing Co., of Lockport, N. Y., will send their pamphlet, describing water works machinery, and containing reports of tests, on application.

Lockwood's Dictionary of Terms used in the practice of Mechanical Engineering, embracing those current in the drawing office, pattern shop, foundry, fitting, turning, smith's and boiler shop, etc., comprising over 6,000 definitions. Edited by a foreman patternmaker. 1888. Price, \$3.00. For sale by Munn & Co., 361 Broadway, New York.

Supplement Catalogue.—Persons in pursuit of information of any special engineering, mechanical, or scientific subject, can have catalogue of contents of the SCIENTIFIC AMERICAN SUPPLEMENT sent to them free. The SUPPLEMENT contains lengthy articles embracing the whole range of engineering, mechanics, and physical science. Address Munn & Co., Publishers, New York.

Planing and Matching Machines. All kinds Wood Working Machinery. C. B. Rogers & Co., Norwich, Conn.

The Improved Hydraulic Jacks, Punches, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York.

Hoisting Engines, Friction Clutch Pulleys, Cut-off Couplings. The D. Frisbie Co., 112 Liberty St., N. Y.

Tight and Slack Barrel Machinery a specialty. John Greenwood & Co., Rochester, N. Y. See illus. adv., p. 28.

Rotary veneer basket and fruit package machinery. I. E. Merritt Co., Lockport, N. Y.

Patent swing cut-off saw, with patent shield for saw. Rollstone Machine Co., Fitchburg, Mass.

Iron, Steel, and Copper Drop Forgings of every description. Billings & Spencer Co., Hartford, Conn.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

August 7, 1888,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

- Alarm, J. F. Stuckert 387,265
Amalgamator, A. H. Eysaman 387,347
Anti-siphoning trap, F. H. Paradise 387,252
Asbestos faced felt, J. L. Reed 387,368
Asphaltum compound and making the same, Higbie & Dougherty 387,367

- Atomizer, A. D. Schlesinger 387,370
Auger, H. W. Richards 387,418
Axles, wheel fastening device for car, A. J. Spicer 387,459
Back band hook, A. J. Dennis 387,583
Bag machine, D. Appel 387,573
Baling press, Blank & Schwarzburg 387,486
Baling press, F. Frey 387,508
Baling press, Hoop & Isaac 387,516
Ballot box, R. G. Wood 387,572
Barrel hoop, G. W. Parrish 387,586
Bearing, roller, R. W. Hent 387,356
Bed lounge, F. B. Hemingway 387,513
Bedclothes holder, H. W. Stetson 387,376
Bee hive, I. C. Doyal 387,217
Bending tool, D. Dingleidine 387,428
Bitumen compound and making the same, Higbie & Dougherty 387,358
Blinds, etc., cord holder for Venetian, J. R. Earnshaw 387,499
Board. See Wash board.
Boiler. See Steam boiler. Wash boiler.
Boiler feeder, steam, G. A. Colby 387,553
Boilers, steam generating attachment for, G. W. Tilton 387,271
Book clip, J. W. Nolan 387,364
Book rack, S. J. Talbot 387,267
Boots or shoes, sock or insole for, T. Barker 387,325
Bottle stopper, Heaton & Akers 387,232
Bottle stopper, T. Terrell 387,379
Bottles, jars, etc., machine for grinding the mouths of glass, J. K. Cummings 387,555
Box. See Ballot box. Letter box.
Box fastener, W. & J. Rush 387,260
Brace. See Eaves trough brace.
Brake. See Car brake.
Brick, pallet for drying, C. T. Fitch 387,406
Broiler, W. Vogel 387,609
Brush and roller, combined, paperhanger's W. H. Jack 387,562
Buckle, suspender, C. F. Walters 387,465
Buckles, spring hook for suspender, C. Voorhis 387,229
Buggy boot, J. A. Mansfield 387,429
Burner. See Oil burner.
Bustle, J. E. Hogsett 387,515
Can. See Oil can.
Cans, restoring old metal, J. W. Geddes 387,587
Cane, combination, D. Crowley 387,213
Cane shredding machine, J. Parker 387,438
Car brake, C. B. Fithian 387,219
Car brake, M. B. Mills 387,434
Car brake, J. West 387,474
Car coupling, N. Barr 387,485
Car coupling, J. M. Clark 387,395
Car coupling, R. H. Dowling 387,584
Car coupling, F. Halbrook 387,352
Car coupling, O. P. Hix 387,416
Car coupling, H. Sommerfeld 387,323
Car, electrically driven, J. Weiss 387,610
Car lock, freight, E. C. Smith 387,371
Car, logging, M. Wilbur 387,477
Car seats, reversible back for, J. P. Doyle 387,404
Car, stock, J. Montgomery 387,246
Car wheel, W. H. Brown 387,209
Car window, W. H. Dawson 387,403
Cars, apparatus for heating, T. H. Bottomley 387,206
Cars, extension step for railway, J. Solatinow 387,374
Cars, heater for railway, Frisbie & McAuley 387,538
Cars, mail bag receiving and delivery apparatus for railway, E. Keenan 387,420
Carrier. See Railway signal carrier.
Cart, road, C. A. Miller 387,311, 387,312
Cartridge, A. W. Cochran 387,493
Cartridge loader, E. G. Dorchester 387,556
Cartridge loader, H. Gardner 387,223
Cartridge, pneumatic, N. W. Pratt 387,256
Case. See Needle case. Watch case.
Cash register, H. A. Miles 387,438
Cement, manufacturing hydraulic, C. K. Gostling 387,588
Chair. See Railway chair.
Chair, E. S. French 387,586
Check hook, F. D. Clark 387,577
Check rower, A. J. Thompson 387,270
Chopper. See Cotton chopper.
Cleaner. See Gun cleaner.
Clip. See Book clip.
Clepsydra, J. Cardona 387,274
Clock synchronizer, electric, A. G. Wiseman 387,276
Clocks and watches, making arbors for, W. N. Weeden 387,549
Clocks and watches, making pinions for, W. N. Weeden 387,472
Clocks and watches, means for making pinions for, W. N. Weeden 387,470
Clocks, watches, etc., arbor for, W. N. Weeden 387,469
Clocks, watches, etc., pinion for, W. N. Weeden 387,471
Closet. See Dry closet.
Cloth, finishing, D. Gessner 387,294, 387,295
Cloth pressing machine, D. Gessner, 387,287 to 387,291, 387,293, 387,296, 387,297
Clothes drier, G. Conover 387,340
Clothes drier, D. A. Dickson 387,345
Clothes drier, M. Gindorff 387,225
Clutch mechanism, W. B. Turner 387,272
Coat protector, J. H. Brooke 387,575
Combination lock, C. Henderson 387,300
Compression coupling, J. W. Ramsey 387,538
Condenser, jet, L. Schutte 387,261
Condenser, surface, F. J. Weiss 387,473
Connecting rod, A. Poulson 387,444
Conveyer, G. W. McCaslin 387,241
Cooker, steam feed, Martin & Reinholdt 387,525
Corn husker, H. S. Blair 387,391
Corset, G. A. Close 387,578
Cotton chopper, C. H. Simmons 387,262
Coupling. See Car coupling. Compression coupling. Hose coupling. Pipe coupling. Thill coupling.
Crate, egg, W. R. Greiner 387,227, 387,228
Cues and other articles, holder for, G. W. Graf 387,510
Cultivator, S. L. Allen 387,332, 387,333
Cultivator, cotton, T. Griffin 387,569
Curtain ring, W. L. Braddock 387,392
Dampers, locking device for stove pipe, V. Doane, Jr. 387,215
Dentist's polishing disk, L. E. Custer 387,581
Detonating ball, S. Armstrong 387,574
Digger. See Potato digger.
Door check, F. W. Tobey 387,328
Door structure, storm, T. Van Kannel 387,571
Doubletree, spring, J. S. Harkins 387,288
Dress form, W. H. Knapp 387,563
Drier. See Clothes drier.
Drier, W. McPherson 387,248
Drilling tools, securing the fastenings of, J. H. Whaling 387,475
Dry closet, I. D. Smead 387,263
Dumping platform, A. Baker 387,334
Dust collector, B. F. Ortmann 387,437
Dyeing and bleaching apparatus, H. Richmond 387,530
Eaves trough brace, L. J. Sawyer 387,601
Egg beater, J. J. Diell 387,214
Electric current regulator, Vansant & Anderson 387,464
