

ENGINEERING INVENTIONS.

A feed water regulator has been patented by Mr. Frederick E. Smith, of South Boston, Mass. This invention covers a novel construction and arrangement of parts, designed to provide a single apparatus of simple and inexpensive construction, which will act automatically to maintain the water in the boiler at a given height.

A wheel fastening device for car axles has been patented by Mr. Andrew J. Spicer, of Portland, Oregon. This invention provides a means of attaching car wheels to their axles in such manner that the two wheels carried by an axle will be able to revolve independently, and if necessary in opposite directions, thus avoiding undue wear and tear upon the tread of the wheel when the vehicle is passing about a curve.

AGRICULTURAL INVENTION.

A corn crib rat trap has been patented by Mr. William R. Parker, of Muddy Creek Forks, Pa. This invention covers a novel construction and combination of parts in a trap especially designed for use in connection with corn cribs, the trap being also adapted for use in the house or barn.

MISCELLANEOUS INVENTIONS.

A holdback has been patented by Mr. William Corcoran, of Copenhagen, N. Y. This invention provides a means of detachably securing the hold-back strap in connection with the shafts, whereby, should the traces become loose on the whiffletree, the shafts will not become entangled with the harness.

A corn husker has been patented by Mr. Herbert S. Blair, of Bucyrus, Ohio. This invention relates to hand huskers or husking pins, in which the implement is held on the hand by a strap, and consists in combining with the husking pin or tool a flexible loop-like strap of novel construction.

A thill coupling has been patented by Mr. William M. Spicer, of Wellsville, N. Y. Combined with a pin having a stud projecting from one side, is a spring attached to the axle and having an eye for receiving the stud of the pin, making a coupling which will remain in place in the thill irons without rattling.

A suspender buckle has been patented by Mr. Charles F. Walters, of Prospect, N. Y. It consists of a single piece of wire bent upon itself, forming front and back members, making a buckle easily adjusted up and down on the web of the suspender, while connecting very firmly and securely the straps to the web.

A fountain pen has been patented by Fred A. Robinson and Amy I. Smith, of New York City. This invention relates to that class of fountain pens which employ a nib pen, and consists principally in such construction of the pen that it is adapted to have a longitudinal movement which is utilized for feeding the ink to the pen.

A spring hinge has been patented by Mr. Henry F. Keil, of New York City. This invention relates to a spring butt, and provides a construction whereby the tension of the spring may be regulated by the manipulation of one tip, the spring being completely concealed and the device having the outward appearance of an ordinary butt.

A composition for sidewalks has been patented by Mr. Louis N. Beauchemin, of Hancock, Mich. It is made of coal tar, black pitch, resin, slab tar, pulverized limestone, copper moulding stamp sand, and other ingredients, mixed in specified proportions to a mortar-like mass, and laid on a proper foundation with the aid of a heated roller.

A game counter has been patented by Mr. Ferdinand King, of New York City. It consists of a disk upon which hands are pivoted to move independently of each other in the segment of a circle, making a simple device, capable of being carried upon the person, upon which the tally of points made in any game by two or more persons may be kept separately.

A gate latch has been patented by Mr. George W. Charleville, of McKinney, Texas. A ring or rings are loosely suspended in a case, with a lever or levers for operating the rings, while the case has side plates formed to constitute guides for the rings and prevent them from sidewise rocking or play, making a latch especially designed for use on gates, barns, and the like.

A wire joint has been patented by Mr. William A. Reddick, of Niles, Mich. It is formed by cutting away one side of the end of the wire, bending the reduced portion around another section, with the flat face of the cut part next to the wire grasped, and connecting the parts by tinning, such joint being especially serviceable in making skeleton frames for various purposes.

A hydraulic lift has been patented by Mr. Thomas P. Ford, of London, England. This invention relates to the valve gear for controlling the admission of water to the main cylinder, and its circulation from one end of the cylinder to the other, enabling plug or slide valves to be used, while preventing leakage from grit interfering with the proper seating of the valves.

A sea-quieting apparatus has been patented by Mr. Jens F. O. Larsen, of Copenhagen, Denmark. It is a compressible oil distributor made of a flexible pervious bag open at both ends, with rigid apertured covers and devices for closing the openings, an oil absorbent material filling the bag, out of which the oil is forced by the compression of the bag by the force of the waves.

An automatic temperature regulator has been patented by Mr. James W. Brook, of Lynchburg, Va. It is designed to automatically stop the flow of water, or open or close a window or ventilator, the device covering a novel construction and combination of parts in an apparatus having a longitudinally contractible and expansible rod, according to the variations of the temperature.

A screw driver has been patented by Messrs. George E. Gay and John H. Parsons, of Augusta, Me. It is an improved form of round-bladed screw drivers, in which the blade is secured in the handle by having its upper end driven into the wood, the upper end of the blade being so formed that by simply forcing it into the handle the screw driver is completed, without any other device to connect the blade and handle.

A wagon pole attachment has been patented by Mr. George F. Colby, of Shelby, Iowa. It is for preventing the neck yoke from coming off the pole, and consists of a longitudinally slotted and apertured tube provided with downwardly projecting lugs at each end, a spring being secured to the tube and provided with a pin engaging the aperture, the attachment being easily put on and taken off, and adapted to fit different sized poles.

A gear power for presses has been patented by Mr. Peter D. Roquemore, of De Berry, Texas. This invention covers improvements in mechanism for operating baling presses, the driving gear comprising shafts geared together at one end, with loose pinions at or near the other ends, and an intermediate fixed pinion upon a third power transmitting shaft, admitting of running either right or left, packing the bale up or down, and running at any rate of speed.

An electric regulator forms the subject of two patents issued to Messrs. Joseph A. Vansant and Frank S. Anderson, of Easton, Md. The construction is such that the normal circuit may be broken at will and the current caused to diverge and pass through a powdered material whose low conductivity is increased or diminished by compressing it more or less, thereby increasing or diminishing the strength of the current, the powdered substance employed being preferably mineral wool and carbon, one or more cells or receptacles containing the powder, and the invention providing means for compressing the powder as required.

SCIENTIFIC AMERICAN BUILDING EDITION. AUGUST NUMBER.—(No. 34.)

TABLE OF CONTENTS.

- 1. Elegant plate in colors of a dwelling at Gren Edge, N. J., with floor plans, sheet of details, etc. Cost, eight thousand five hundred dollars.
2. Plate in colors of a fire engine house of moderate cost. Details and floor plans.
3. Perspective view and floor plans of a residence at Black Rock, Conn. Cost, six thousand dollars.
4. Sketch of an uptown block of attractive residences, New York City.
5. Floor plans and perspective elevation of two Queen Anne cottages, lately completed at Bath Beach, Long Island. Cost, four thousand dollars each.
6. Design and floor plans for a two thousand dollar house lately built at Bridgeport, Conn.
7. Perspective and floor plans of an attractive residence lately built at Bridgeport, Conn. Cost, two thousand eight hundred dollars.
8. A six hundred dollar cottage built lately at Bridgeport, Conn. Perspective and floor plans.
9. Plans and perspective view of a seaside cottage lately erected at Bath Beach, Long Island. Cost, three thousand five hundred dollars.
10. Engraving and floor plans of a neat little double house lately erected at Bridgeport, Conn., costing one thousand eight hundred dollars.
11. A country residence in France. Perspective and plans.
12. Engraving of the palatial stables of Mr. D. Edgar Crouse, Syracuse, N. Y.
13. Plans and perspective for a carriage house, barn, etc. Cost, two thousand two hundred dollars.
14. Elevation and floor plans for a double house costing complete four thousand two hundred dollars.
15. New Congregational Church at Beckenham, Kent, England.
16. Page of designs of New England residences.

Miscellaneous contents: Vegetable glue.—Fourth of July fires.—The slag water closet.—Rust in water pipes.—Laying out the joints of an elliptical vault, illustrated.—The tulip and other trees.—Architectural school houses.—Hanging baskets.—To estimate the power of a stream.—Manufacturing progress in the South.—How to grow quinces.—Mixed wheats.—New ceiling for the Assembly chamber of the New York State Capitol.—Transplanting large pines.—Galveston artesian wells.—Poisonous wall paper and carpets.—The testing of Portland cement.—The humming bird.—Manila hemp in plaster.—A perfect hen house.—Examination questions for plumbers.—Road improvements.—The "Patten" metallic shingles and siding plates, illustrated.—The pool of Bethesda.—Carl Pfeiffer.—Creosote wood preserving stains.—House heating by hot water circulation, illustrated.—Ohio's largest poplar.—Mortar.—Irrigating wheels.—Liquid fish glue.

The Scientific American Architects and Builders Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in colors and with fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.

The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural publication in the world. Sold by all newsdealers.

MUNN & CO., PUBLISHERS, 361 Broadway, New York.

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

Specially adapted for machine shops—Talcott's combination patent belt hooks. Providence, R. I.

Steam Launches.—New catalogue (free) by Chas. P. Willard & Co., 236 Randolph St., Chicago.

Iron Planer, Lathe, Drill, and other machine tools of modern design. New Haven Mfg. Co., New Haven, Conn.

Pratt & Leitchworth, Buffalo, N. Y., solicit correspondence relative to manufacturing specialties requiring malleable gray iron, brass, or steel castings.

Wanted.—Hardware specialties to manufacture, or will buy good patents. Address, with particulars, Excelsior, box 773, New York.

For the latest improved diamond prospecting drills, address the M. C. Bullock Mfg. Co., Chicago, Ill.

The best Coffee roasters, coolers, stoners, separators, polishers, scourers, glossing apparatus, milling and peaberry machines; also rice and macaroni machinery, are built by The Hungerford Co., 69 Cortlandt Street, New York.

Safety water columns. Cheaper than explosions or burned boilers. For illustrated price list, Reliance Gauge Co., Cleveland, O.

Nickel Plating.—Manufacturers of pure nickel anodes, pure nickel salts, polishing compositions, etc. \$100 "Little Wonder." A perfect Electro Plating Machine. Agents of the new Dip Lacquer Kristaline. Complete outfit for plating, etc. Hanson, Van Winkle & Co., Newark, N. J., and 92 and 94 Liberty St., New York.

Perforated metals of all kinds for all purposes. The Robert Aitchison Perforated Metal Co., Chicago, Ill.

The Railroad Gazette, handsomely illustrated, published weekly, at 73 Broadway, New York. Specimen copies free. Send for catalogue of railroad books.

The Knowles Steam Pump Works, 113 Federal St., Boston, and 88 Liberty St., New York, have just issued a new catalogue, in which are many new and improved forms of Pumping Machinery of the single and duplex, steam and power type. This catalogue will be mailed free of charge on application.

Link Belting and Wheels. Link Belt M. Co., Chicago.

Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J.

The Holly Manufacturing Co., of Lockport, N. Y., will send their pamphlet, describing water works machinery, and containing reports of tests, on application.

Lockwood's Dictionary of Terms used in the practice of Mechanical Engineering, embracing those current in the drawing office, pattern shop, foundry, fitting, turning, smith's and boiler shop, etc., comprising over 6,000 definitions. Edited by a foreman patternmaker. 1888. Price, \$3.00. For sale by Munn & Co., 361 Broadway, New York.

Supplement Catalogue.—Persons in pursuit of information of any special engineering, mechanical, or scientific subject, can have catalogue of contents of the SCIENTIFIC AMERICAN SUPPLEMENT sent to them free. The SUPPLEMENT contains lengthy articles embracing the whole range of engineering, mechanics, and physical science. Address Munn & Co., Publishers, New York.

Planing and Matching Machines. All kinds Wood Working Machinery. C. B. Rogers & Co., Norwich, Conn.

The Improved Hydraulic Jacks, Punches, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York.

Hoisting Engines, Friction Clutch Pulleys, Cut-off Couplings. The D. Frisbie Co., 112 Liberty St., N. Y.

Tight and Slack Barrel Machinery a specialty. John Greenwood & Co., Rochester, N. Y. See illus. adv., p. 28.

Rotary veneer basket and fruit package machinery. I. E. Merritt Co., Lockport, N. Y.

Patent swing cut-off saw, with patent shield for saw. Rollstone Machine Co., Fitchburg, Mass.

Iron, Steel, and Copper Drop Forgings of every description. Billings & Spencer Co., Hartford, Conn.

Send for new and complete catalogue of Scientific and other books for sale by Munn & Co., 361 Broadway, New York. Free on application.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted August 7, 1888, AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Table listing various inventions and their patent numbers, including Atomizer, Auger, Axles, Spicer, Back band hook, Bag machine, Baling press, Ballot box, Barrel hoop, Bearing, Bed lounge, Bedclothes holder, Bee hive, Bending tool, Bitumen compound, Blinds, Board, Boiler, Boiler feeder, Boilers, Book clip, Book rack, Boots, Bottle stopper, Bottles, Box, Box fastener, Brace, Brake, Brick, Brush, Buckle, Buggy boot, Burner, Bustle, Can, Cane, Car brake, Car coupling, Car lock, Car seat, Car stock, Car wheel, Car window, Cars, Cash register, Cement, Chair, Check hook, Chopper, Cleaner, Clip, Clepsydra, Clock, Clocks, Closets, Cloth, Clothes drier, Clothes rack, Cultivator, Curtain ring, Dampers, Dentist's, Detonating ball, Digger, Door check, Door structure, Doubletree, Dress form, Drier, Drilling tools, Dry closet, Dumping platform, Dust collector, Dyeing, Eaves trough, Egg beater, Electric current regulator, etc.
