A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print, sued since 1863, will be furnished from this office 1865 or cents. In ordering please state the name and numer of the patent desired, and remit to Munn & Co., 361 roadway, New York.

Canadian Parents may now be obtained by the inventors for any of the inventions named in the foregoing list, provided they are simple, at a cost of \$40 each. If complicated the cost will be a little more. For full instructions address Munn & Co., 361 Broadway, New York. Other foreign patents may also be obtained.

Advertisements.

Inside Page, each insertion - - - 75 cents a line. Back Page, each insertion - - - \$1.00 n line.

The above are charges per agate line—about eight words per line. This notice shows the width of the line, and is set in agate type. Engravings may head advertisements at the same rate per agate line, by measurement, as the letter press. Advertisements must be received at publication office as early as Thursday morning to appear in next issue.

USE ADAMANT WALL PLASTER

It is Hard, Dense, and Adhesive. Does not check or crack. It is impervious to wind, water, and disease kerms. It dries in a few hours. It can be applied in acy kind of weather. It is in keneral use. Licenses granted for the maxing, using, and selling.

Address ADAMANT MFG. CO.
309 E. Genesee St., Syracuse, N. Y.

Patent Foot Power Machinery

Wood or Metal workers without steam power. can successfully compete with the large shops, by using our New LABOK SAVING Machinery, latest and most improved for practical shop use, also for Industrial Schools, Home Training, etc. Catalogue free. Seneca Falls Mfg. Co. 695 Water Street, Seneca Falls, N. Y.

STEREOTYPING; THE PLASTER AND Paper Processes.—Composition and preparation of the mould, the best alloys of metal and proper degree of heat, trimming and mending the plate, etc. A minute description of both processes, with numerous illustrations. A paper of great interest to every printer. By Thomas Bolas, F.C.S., F.I.C. SCIENTIFIC AMERICAN SUPPLEMENTS, 773 and 774. 10 cents each.

INVENTORS! We are prepared to buy outright or manufacture on royalty, inventions possessed of utility or novelty. Correspondence invited. Our selestion colors rery state and territory in the Union. The Tuscarora Advertising Co., Coshocton, O.

To Manufacturers Having Large Facilities.

The Trustees of the Linotype Co. want to contract for the manufacture of from 500 to 1,000 Linotype Machines (type-setting and type-casting machines). Only persons with large plants and first-class mechanical force could undertake such a work. Some special machinery would be necessary. As a preliminary to negotiations, the Committee would like to have the addresses of persons or corporations capable of undertaking the work, when full details could be furnished.

The Linotype machine was illustrated and described in Scientific American of March 9, 1889.

same principle, of the BEST MATERIAL and WORKMANSHIP, and always with a labor saving law as with time and labor saving law as with the saving labor

The value of the SCIENTIFIC AMERICAN as an advertising medium cannot be overestimated. Its circulation is many times wreater than that of any similar journal new published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. This he has when he advertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN, when selecting a list of publications in when you decide it is for your interest to advertise. This is frequently done, for the reason that the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.

For rates see top of first column of this page, or address MUNN & CO.. Publishers,

CK & ORE BREAKER
