 Our new and Revised Catalogue of Practical and Scientific Books, 86 pages, 8vo, and our other Catalogues and Circulars, the whole covering every branch of Science applied to the Arts, sent free and free of postage to any one in any part of the world who will furnish his address.

Entirely Rewritten and Greatly Enlarged.
Professor Nicholson's Manual of Palaeontology
 For the Use of Students. With a General Introduction on the Principles of Palaeontology. Third edition, by HENRY ALLEYNE NICHOLSON, M.D., D.Sc., F.G.S., etc., Regius Professor of Natural History in the University of Aberdeen; and RICHARD LYDEKKER, B.A., F.G.S., etc. Two vols. 8vo. With 149 illustrations. 68s. The first of these two palaeontological works is Nicholson and Lydekker's 'Manual of Palaeontology,' in which, for the first time, I believe, in the English language, a fairly comprehensive account of the animal kingdom, as represented in past times, has been afforded to students. Address by W. T. Blanford, Esq., LL.D., F.R.S., President of the Geological Society of London. "The work furnishes the student with an excellent summary of the leading principles of palaeontological science—by far the most complete which has ever been published in the English language."—*Geological Magazine* (London). "The book is the best text-book on the subject in the language. . . . Nothing better than the introduction to the study of the science has come under our notice."—*Medical Press* (London). "It has been well and conscientiously done. . . . A manual which no geologist who wishes to know what has been done of late in the palaeontological field can afford to do without."—*Journal of Education* (London). WILLIAM BLACKWOOD & SONS, Edinburgh & London.

ARCHITECTURAL BOOKS.
 Useful, Beautiful, and Cheap.

To any person about to erect a dwelling house or stable, either in the country or city, or any builder wishing to examine the latest and best plans for a church, school house, club house, or any other public building of high or low cost, should procure a complete set of the ARCHITECTS' AND BUILDERS' EDITION OF THE SCIENTIFIC AMERICAN.
 The information these volumes contain renders the work almost indispensable to the architect and builder, and to persons about to build for themselves they will find the work suggestive and most useful. They contain colored plates of the elevation, plan, and detail drawings of almost every class of building, with specification and approximate cost.
 Nine bound volumes are now ready and may be obtained, by mail, direct from the publishers or from any newsdealer. Price, \$2.00 a volume. Stitched in paper covers. Subscription price, per annum, \$2.50. Address and remit to
