A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print, ssued since 1863, will be furnished from this office for 5 cents. In ordering please state the name and number of the patent desired, and remit to Munn & Co., 361 Broadway. New York.

Canadian Patents may now be obtained by the inventors for any of the inventions named in the foregoing list, provided they are simple, at a cost of \$40 each. If complicated the cost will be a little more. For full instructions address Munn & Co., 381 Broadway, New York. Other foreign patents may also be obtained.

Modertisements.

Inside Page, each insertion - - - 75 cents a line. Back Page, each insertion - - - \$1.00 a line.

The above are charges per agate line—about eight words per line. This notice shows the width of the line, and is set in agate type. Engravings may head advertisements at the same rate per agate line, by measurement, as the letter press. Advertisements must be received at publication office as early as Thursday morning to annear in part, issue.

Essiest Running and Most Silent.
All type cleaned in 10 seconds without soiling the hands.
The Smith Premier Typewriter Co., Syracuse, N. Y., U. S. A.
Send for Catalogue.

The value of the SCIENTIFIC AMERICAN as an advertising medium cannot be overestimated. Its circulation is many times greater than that of any similar journal now published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newepaper. He wants circulation. This he has when he advertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN. When selecting a list of publications in watch you decide it is for your interest to advertise. This is frequently done, for the reason that the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.

For rates see top of first column of this page, or address MUNN & CO., Publishers,

361 Broadway, New York.

🚤 Barnes' New Sensitive Drill Has These Great Advantages:

The speed of the drill spindle can be Incremsed or Diminished Instantly, or the motion reversed, without stopping the machine or shifting belts. More or less driving power can be applied to the drill spindle. as the size of the drill or the nature of the work may demand.
