361 BROADWAY, NEW YORK. What the Press says of "Experimental Science."

What the Press says of "Experimental Science."

"Mr. Hopkins has rendered a valuable service to experimental physics." —Eraning Prost.

"The book is one of very practical character, and no one of a scientific turn of mind could fail to find in its pages a fund of valuable information." —Electric Age.

"The electrical chapters of the book are notably good, and the practical instruction given for building simple electrical machinery may be safely carried out by those —not a few—who like to make their own apparatus."—Electrical World.

"The author has avoided repeating the hackneyed illustrations which have been passed from one book to another so long, and, instead, offers a set of experiments which are largely of a novel character and very striking."—Engineering and Mining Journal.

"We commend it most heartily to all teachers."—Normal Exponent.

"It is a treat to read a book of this kind, that sets forth the principles of physics so fully, and without the use of mathematics."—The Locamotine.

"All teachers of science are aware that real knowledge is acquired best by the student making experiments for himself, and any one who points out how those experiments may be easily made is doing excellent work."—English Redamic and Verley of Science.

"The work bears the stamp of a writer who writes nothing but with certainty of action and result, and or a teacher who imparts scientific information in an attractive and fascinating manner."—Anvertican Englineer." It should be found in every library.—English Mechanic.

"The book would be a most Indicious boliday gift."—

"It should be found in every library."—Engine mechanic.
"The book would be a most Judicious boliday gift."—Engineering and Mining Journal.
"The portion of the book devoted to dynamic electricity covers over one hundred pages, and is extremely interesting and valuable."—Brooklyn Standard Union.
"Directions are given for demonstrating most of the laws of physics, with every-day tools and common appliances."—American Photographer.
"Many of the experiments are new to print, while some of the old, familiar ones appear in modified form and with simplified apparatus."—Public Opinion.
