HOW HOT

is the water you are feeding to your boilers? You never tested it? Well! Well!! Suppose you take a thermometer and try it, and while you are about it, test the heat of your exhaust, too. Your feed water ought to be as hot as the exhaust, or within a degree or two thereof. If you don't get that heat, you are losing just that much.

THE "Steam Jacket" FEED WATER Boiler and Purifier

is guaranteed to deliver the water within one degree of the heat of the exhaust steam, which, in the ordinary steam plant, ranges from 212° to 216° Fahr. By feeding your boilers with water at 212° or above, you SAVE FUEL, AVOID CONTRACTION AND EXPANSION, SAVE BOILER REPAIRS, INCREASE THE STEAMING CAPACITY OF YOUR BOILERS. Our patterns range from 10 to 3,000 H. P. Our heaters are in use throughout the whole country. Address
