

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

A NEW AND VALUABLE BOOK.

12,000 Receipts. 680 Pages. Price \$5.

This splendid work contains a careful compilation of the most useful Receipts and Replies given in the Notes and Queries of correspondents as published in the Scientific American during the past fifty years; together with many valuable and important additions.
Over Twelve Thousand selected receipts are here collected; nearly every branch of the useful arts being represented. It is by far the most comprehensive volume of the kind ever placed before the public.
The work may be regarded as the product of the studies and practical experience of the ablest chemists and workers in all parts of the world; the information given being of the highest value, arranged and condensed in concise form convenient for ready use.
Almost every inquiry that can be thought of, relating to formulae used in the various manufacturing industries, will here be found answered.
Instructions for working many different processes in the arts are given.
It is impossible within the limits of a prospectus to give more than an outline of a few features of so extensive a work.
Under the head of Paper we have nearly 250 receipts, embracing how to make papier mache; how to make paper water proof and fire proof; how to make sandpaper, emery paper, tracing paper, transfer paper, carbon paper, parchment paper, colored papers, razor strop paper, paper for doing up cutlery, silverware; how to make luminous paper, photograph papers, etc.
Under the head of Inks we have nearly 450 receipts, including the finest and best writing inks, of all colors, drawing inks, luminous inks, invisible inks, gold, silver and bronze inks, white inks; directions for removal of inks; restoration of faded inks, etc.
Under the head of Alloys over 700 receipts are given, covering a vast amount of valuable information.
Of Cements we have some 600 receipts, which include almost every known adhesive preparation, and the modes of use.
How to make Rubber Stamps forms the subject of a most valuable practical article, in which the complete process is described in such clear and explicit terms that any intelligent person may readily learn the art.
For Lacquers there are 120 receipts; Electro-Metallurgy, 125 receipts; Bronzing, 127 receipts; Photography and Microscopy are represented by 600 receipts.
Under the head of Etching there are 55 receipts, embracing practical directions for the production of engravings and printing plates of drawings.
Paints, Pigments and Varnishes furnish over 800 receipts, and include everything worth knowing on those subjects.
Under the head of Cleansing over 500 recipes are given, the scope being very broad, embracing the removal of spots and stains from all sorts of objects and materials, bleaching of fabrics, cleaning furniture, clothing, glass, leather, metals, and the restoration and preservation of all kinds of objects and materials.
In Cosmetics and Perfumery some
