

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue.

Complete Machine Shop outfits furnished. Send for prices and list of new and second hand Machinery. W. P. Davis, Rochester, N. Y.

"U. S." metal polish. Indianapolis. Samples free. Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J. 6 Spindle Turret Drill Presses. A. D. Quint, Hartford, Ct. Best baling presses. Ryther Mfg. Co., Watertown, N. Y. G. D. Hiscox, 361 Broadway, N. Y., Consulting Engineer. Portable and Stationary Cylinder Boring machines. Pedrick & Ayer, Philadelphia, Pa.

For Sale—Gas engine launches, nearly new. S. N. Stewart, Rock Island, Ill.

Tools for sheet metal goods, presses, lathes, dies, etc. Empire Machine and Tool Co., New Brunswick, N. J.

Prof. Rogers used Jessop's steel for meter standard. See *American Machinist*, October 13, page 1, column 3.

The Improved Hydraulic Jacks, Punches, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York.

Stow flexible shaft. Invented and manufactured by Stow Mfg. Co., Binghamton, N. Y. See adv., page 254.

Screw machines, milling machines, and drill presses. The Garvin Mach. Co., Laight & Canal Sts., New York.

Centrifugal Pumps. Capacity, 100 to 40,000 gals. per minute. All sizes in stock. Irvin Van Wie, Syracuse, N. Y.

Portable engines and boilers. B. W. Payne & Sons, Elmira, N. Y., and 41 Dey Street, New York.

Guild & Garrison, Brooklyn, N. Y., manufacture steam pumps, vacuum pumps, vacuum apparatus, air pumps, acid blowers, filter press pumps, etc.

For stone quarry engines. J. S. Mundy, Newark, N. J. Split Pulleys at Low prices, and of same strength and appearance as Whole Pulleys. Yocom & Son's Shafting Works, Drinker St., Philadelphia, Pa.

Perforated Metals of all kinds and for all purposes, general or special. Address, stating requirements, The Harrington & King Perforating Co., Chicago.

To Let—A suite of desirable offices, adjacent to the Scientific American offices, to let at moderate terms. Apply to Munn & Co., 361 Broadway, New York.

Pine castings in brass, bronze, composition (gun metal), German silver. Unequaled facilities. Jas. J. McKenna & Bro., 424 and 426 East 23d St., New York.

The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, \$4; Munn & Co., publishers, 361 Broadway, N. Y.

Canning machinery outfits complete, oil burners for soldering, air pumps, can wipers, can testers, labeling machines. Presses and dies. Burt Mfg. Co., Rochester, N. Y.

Competent persons who desire agencies for a new popular book, of ready sale, with handsome profit, may apply to Munn & Co., Scientific American office, 361 Broadway, New York.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information and not for publication.

References to former articles or answers should give date of paper and page or number of question.

Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn.

Special Written Information on matters of personal rather than general interest cannot be expected without remuneration.

Scientific American Supplements referred to may be had at the office. Price 10 cents each.

Books referred to promptly supplied on receipt of price.

Minerals sent for examination should be distinctly marked or labeled.

(4569) Mechanic asks: What is the most approved motor or engine that is run by compressed air? A. Any motor or engine that is suitable for team is equally good for compressed air. The economy of expansion applies to both air and steam.

(4570) L. J. W. asks how to construct a simple metal thermostat or regulator for a home-made incubator. A. It is not a simple matter to make a thermostat. However, you can make a thermostatic bar that might answer your purpose by pressing or riveting together steel and brass strips, each about 1-16 inch thick, 1/8 inch wide and 15 inches long. For other forms of thermostat consult "Experimental Science" and SUPPLEMENT, Nos. 420, 848.

(4571) A. B. asks: What is the proper place for a blower—under the grates of boiler or in the smoke stack? A. When the smoke stack has ample capacity but is weak in draught from low height, a blower connected under the grate is the most economical and satisfactory. A steam jet in the stack is much used, but is wasteful of steam for the work it does, as applied in the ordinary way with an open jet. The Korting multiple nozzle jet blower is a most economical and efficient device in either place, as most convenient.

(4572) J. P. G. asks what size wire to use in winding the fields and armature of the dynamo described in SUPPLEMENT No. 161, and with what size wire would you make the connections? A. For the leads on your dynamo use No. 16 wire. The proper sizes of wire for the winding are given in the article referred to. They are respectively No. 16 and No. 18, Am. W. G.

(4573) A. B. C. asks: 1. Has the strength of a flash of lightning (in volts) ever been calculated? If so, what is it? A. The E. M. F. of a bolt of light-

ning has been estimated to be 3,500,000 volts and the current to be about 14,000,000 amperes. 2. How can I color glass for a ruby light for photographic purposes? A. Coat your glass with red lacquer. It would be well to put red lacquer upon one side and orange lacquer on the opposite side. 3. In making a dynamo should the wire of the armature be insulated from the core? A. Yes. 4. Would the field magnet be better if made of cast iron or steel? A. The core of a field magnet should be made of the softest wrought iron. 5. How can I find the resistance of an incandescent lamp? A. By any of the methods of measuring resistances. You can use a rheostat, battery and galvanometer and measure it by means of the methods of substitution, or you can measure it by using a Wheatstone bridge. 6. How is the loop of bamboo in incandescent lamp carbonized? A. By inclosing it in a form buried in powdered carbon and subjected to a red heat for an hour or so. 7. Is there any good way to renew the carbon in incandescent lamps? If so, how? A. We know of no simple way to accomplish this. The following is extracted from "L'Année Electrique": "To mend a ruptured filament. Open the bulb at the top, break off the pieces of the old filament, put in some liquid hydrocarbon (naphtha), insert new filament, start voltaic arc between one of its ends and one of the terminals. This solders it with a deposit of carbon. Repeat for other end and terminal. Empty out hydrocarbon, exhaust, and seal lamp.

(4574) E. P. asks how the paste of litharge and red lead are mixed for a storage battery. A. The litharge and red lead are mixed with dilute sulphuric acid; acid 1 part, water 9 parts.

(4575) B. W. S. says: Is it not true that an air fan or blower will handle more air if the blades of the fans are thin than if they are thick, and if so, why? A. It makes little or no difference with thick or thin blades when the blower is working against pressure, as with forge fires, but makes considerable difference when used for ventilations only with no pressure. In this case there should be as little obstruction as possible in the air way. Such a fan should have the greatest area possible with the least air friction surface for economy or efficiency.

(4576) C. F. W. asks how to make "serpent's eggs." A. The black liquor which results as a useless product when coal oil is purified with sulphuric acid is to be treated with fuming nitric acid. The dark colored resinous matter which swims on the surface is then collected, washed and dried, when it forms a yellowish brown mass having about the consistency of sulphur which has been melted and poured into water. When this mass is ignited it undergoes such a wonderful increase in bulk that a cylinder 1 inch long will give a snake about 4 feet in length.

(4577) Admirer says: We are contemplating putting in water works for our city. We wish to know if we put a reservoir at the source of our water supply, which is 12 miles from the town and 1,500 feet fall, will the pressure be too great and will the resistance of common cast pipe sufficient to hold the water without bursting, and what size pipe would be necessary for a town of 2,000 people? A. The questions you ask are too important to be answered in a casual way. Your need the advice of a competent engineer, with a knowledge of the grades, to properly lay out the work. The pressure will be too great for cast iron pipe and for the plumbing. Wrought iron pipe is strong enough with a differential pressure valve, but a reservoir at a proper height near the town is preferable, with a free flow from the source. You will probably need an 8 inch pipe for the upper section and 6 inch wrought iron pipe the balance of the distance.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., OFFICE SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

October 11, 1892,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Advertising board, P. E. Green..... 484,194
Advertising device, P. Hermann..... 484,314
Air brake coupling, J. E. Marble..... 484,034
Alarm. See Burglar alarm. Burglar and fire alarm. Fire alarm..... 484,064
Auger handle, G. E. Rogers..... 484,050
Automatic sprinkler, J. Kane..... 484,321
Axle box, car, E. L. Sharpneck..... 484,054
Axle lubricator, H. V. Conway..... 484,083
Bag holder, A. Young..... 484,279
Banana case, J. T. Cornforth..... 484,355
Banjo, D. T. Moore..... 484,222
Bank, E. M. Goldsmith..... 484,310
Barrel heater, Weigel and Waechter..... 484,073
Basic lined furnace, J. H. Darby..... 484,181
Battery. See Galvanic battery. Storage battery..... 484,285
Battery compound, W. Wright..... 484,285
Bean picker, H. A. Bacon..... 484,050
Bee smoker, G. W. Brodbeck..... 484,172
Beer apparatus, J. H. Kersenbrock..... 484,025
Beer bottling apparatus, J. H. Kersenbrock..... 484,024
Bench. See Wash bench.
Beverages, charging portable fountains with carbonated, J. F. Wittemann..... 484,078
Binder for leaves, G. H. Winslow..... 484,275
Binding device for periodicals, newspapers, etc., O. F. Westrup..... 484,208
Bit. See Bridge bit.
Blacking machine, coin-operated boot or shoe, N. B. Knight..... 484,324
Blast furnace, M. W. Lies..... 484,020
Block. See Chain block.
Board. See Advertising board. Game board..... 484,350
Boiler furnace, steam, M. E. Herbert..... 484,349
Bookbinding, D. Waide..... 484,292
Book or music leaf holder, A. O. Brown..... 484,292
Bottle stopper, protective, J. Lihrowicz..... 484,330

Box. See Stamp and match box.
Box fastener, C. C. Martin..... 484,373
Box machine, Murry & Stutsman..... 484,041
Bracket drill brace.
Brake. See Wagon brake.
Brick in kilns, setting, F. Alsip..... 484,170
Brick machine, G. Isaacs..... 484,319
Bridge gate, C. Stocker, Jr..... 484,122
Bridge, portable, J. T. Cassidy..... 484,086
Bridle and bit, H. Brown..... 484,342
Brush, E. I. Miller..... 484,107
Buckle, G. E. Adams..... 484,279
Buckle, suspender, R. M. Wilson..... 484,274
Buggy spring equalizer, C. Glatly..... 484,309
Buildings, construction of, B. Russell..... 484,244
Burglar alarm, portable, D. D. Nolley..... 484,232
Burglar and fire alarm, combined electric, D. D. Nolley..... 484,233
Burner. See Vapor burner.
Burner cutter, J. A. Kaiser..... 484,023
Button, cuff, L. F. Brooks..... 484,105
Buttons, attaching, J. Madison..... 484,121
Cabinet. See Stein.
Cabinet for displaying sample goods, A. T. Selden..... 484,166
Cable crossings, automatic release for, F. W. Smith..... 484,346
Cable reel, F. A. C. Perrine..... 484,045
Cameras, finder attachment for, W. B. Cogswell..... 484,179
Cane and stool, combined, R. T. More..... 484,334
Cannon, telescopic sight for, V. Berberich..... 484,285
Car coupling, C. A. Tower..... 484,125
Car, dumping, M. W. Lies..... 484,169
Car, tail lamp, J. S. Emerson..... 484,119
Car seat, G. H. Mathieson..... 484,215
Cars, apparatus for indicating the positions of railway, Hunter & Lucock..... 484,205
Cars or similar vehicles, system of and apparatus for heating railway, J. A. Shinn..... 484,343
Carbon filaments, manufacture of, T. A. Edison..... 484,184
Carving machine, Laver & Taylor..... 484,102
Case. See Banana case. Packing case..... 484,248
Cash carrier apparatus, J. Schiemer..... 484,378
Cash register and indicator, T. Carney..... 484,296
Cash register, indicator, and recorder, T. Carney..... 484,297
Caster wheel, A. B. Diss..... 484,305
Casting metal around internal cores, mould for, F. G. Stone..... 484,124
Chain block, J. R. Morgan..... 484,304
Chair. See Folding chair. Pneumatic chair..... 484,038
Channelling machine, H. H. Arnold..... 484,130
Channelling machine, J. B. Hadaway..... 484,368
Chart and blackboard, combined, J. B. & M. C. Powell..... 484,338
Christmas tree light, H. W. Diek..... 484,304
Cigar, H. C. Sergeant..... 484,124
Cigar bunch machine, C. C. Miller..... 484,219
Cinder conductor, H. C. Sargent..... 484,164
Clamp. See Joiner's clamp.
Cleaner. See Well or cistern cleaner.
Clip. See Hame clip.
Clock, alarm, W. E. Porter..... 484,236
Closet. See Dry closet.
Clothes drainer, A. H. Ristedt..... 484,340
Clothes line prop and clothes hanger, combined, C. A. Potts..... 484,182
Clutch, J. P. Fitzgerald..... 484,308
Clutch, W. H. Blair..... 484,224
Cock gauge, J. F. Holdan..... 484,316
Collar, cuff, and garment rack, H. Caspar..... 484,085
Colter, plow, G. C. Westervelt..... 484,127
Column, architectural, J. M. Larimer..... 484,026
Converters, lining for Bessemer, C. W. Bildt..... 484,286
Cotton, J. T. Smith..... 484,076
Corners, covers, and like parts for books, boxes, etc., of celluloid or kindred material, making, A. C. Hafely..... 484,006
Cotton chopper and planter, combined, F. H. Cotton..... 484,337
Coupling. See Air brake coupling. Car coupling. Steam coupling. Thrill coupling..... 484,099
Crate, F. B. Sites..... 484,246
Cuff holder, L. S. Sampson..... 484,246
Cultivator and pulverizer, C. C. Reynolds..... 484,239
Curtain rod, combined socket and bracket for, C. W. Lawrence..... 484,028
Cutter. See Butter cutter.
Cutter head, rosette turning, R. B. Moore..... 484,221
Cycle saddle, J. B. Brooks..... 484,280
Decorticating grain, J. Sloan..... 484,235
Desk, H. L. Sawyer..... 484,240
Desk, sectional, W. A. Eaton..... 484,357
Door closer, H. Bunker..... 484,089
Door hanger, C. D. Lawrence..... 484,157
Draught equalizer, T. Keller..... 484,371
Dress, M. A. Staab..... 484,257
Rail house, H. H. Wilderman..... 484,270
Drinking trough, G. S. Singer..... 484,057
Dry closet, W. D. Dickson..... 484,397
Dumbbell, C. W. Ayton..... 484,322
Dust collector, J. J. Gerard..... 484,090
Dyeing, E. Zillesen..... 484,080
Elevator, W. E. Fuller..... 484,164
Electric switch, M. R. Utey..... 484,380
Electrical depositing meter, T. A. Edison..... 484,183
Electrical distribution, system of, H. W. Leonard..... 484,208
Engine. See Gas engine. Steam engine..... 484,372
Elevator safety device, Mundt & Hooper..... 484,109
Elevators, means for transmitting power to grain, D. A. Robinson..... 484,048
Feed bag holder, J. H. E. Zeip..... 484,278
Feed box regulator, A. A. Morris..... 484,039
Feed regulator, M. A. Blair..... 484,240
Feed trough and rack, combined, J. W. Moore..... 484,037
Feeding mechanism, L. C. Crowell..... 484,141
Fence, J. T. Lucas..... 484,158
Fence, L. S. Safford..... 484,245
Fifth wheel, S. H. Sexton..... 484,376
Finger, H. L. Sawyer..... 484,240
Fire alarm, electric, H. Cortland..... 484,140
Fire dog and grate, combined, G. T. Glascock..... 484,091
Fire escape, A. V. Gottemann..... 484,093
Fire escape, Murphy & Rankin..... 484,042
Fire escape, P. B. Sullivan..... 484,042
Fly paper, stick, O. C. Rieck..... 11,276
Folding chair, H. A. Rieck..... 484,240
Folding chair, D. A. Sinsabaugh..... 484,058
Folding mechanism, L. C. Crowell..... 484,142
Frame. See Leather frame.
Fruit pitter, G. C. Howell..... 484,154
Fume arrester, Iles & Sheedy..... 484,016
Furnace for metallurgical furnaces, device for catching and saving, M. W. Lies..... 484,017
Furnace. See Basic lined furnace. Blast furnace. Boiler furnace.
Furnace for metallurgical operations, J. N. Lauth..... 484,329
Furnace, J. P. Todd..... 484,323
Furnace top, blast, M. W. Lies..... 484,018
Gauge. See Sugar alarm gauge.
Galvanic battery, J. W. Hoffman..... 484,096
Game apparatus, H. J. Saxton..... 484,115
Game board, parlor bowling, P. H. Colell..... 484,067
Garment fastener, F. E. Bennett..... 484,085
Garment, suspensory, C. C. Taylor..... 484,066
Gas engine, J. Wehrschmidt..... 484,168
Gate. See Bridge gate.
Gate, W. T. Harris..... 484,198
Glassware, device for manufacturing hollow, T. B. Atterbury..... 484,131
Glue applying apparatus, J. Sr. & L. Luker..... 484,031
Glue heater, J. Luger, Sr..... 484,032
Gun, multicharge, J. R. Haskell..... 484,007
Gun, multicharge or accelerating, J. R. Haskell..... 484,009
Guns, apparatus for working disappearing, Noble & of Murray..... 484,374
Hame clip, J. Scott..... 484,053
Hame fastener, E. Beaubien..... 484,283
Hame fastener, R. Lambert..... 484,327
Hanger. See Door hanger. Eaves trough hanger..... 484,230
Handle. See Auger handle.
Harrow, V. E. Randall..... 484,047
Heater. See Barrel heater. Glue heater.
Heating and ventilating apparatus, A. Willgeroth..... 484,272
Heating boiler, steam or hot water, G. C. Blackmore..... 484,083
Hem folder and presser, F. Henry..... 484,364
Hides or skins, machine for treating, W. Evans..... 484,146
Hinge, blind, A. J. Avery..... 484,351
Hinge, lock, C. E. Gillespie..... 484,361
Hinge, spring, H. E. Patte..... 484,210
Hoisting device and support, H. Seilheim..... 484,252
Hoisting machine, O. Flohr..... 484,358
Holder. See Bag holder. Cuffholder. Lead or crayon holder. Spoon holder. Watch holder..... 484,126
Hoop binding and lapping machine, A. F. Ward..... 484,282
Horse shield, C. H. Baldwin..... 484,216
Horse taming apparatus, R. Mazza..... 484,216
Horseshoe nail blanks, die for swaging, W. W. Miner..... 484,220
Hose band, G. Ferguson..... 484,130
Hose clamps, device for applying, Z. L. Chadbourne..... 484,298
Hydrant, J. A. Gregg..... 484,197
Incubator, L. Kuhnner..... 484,325
Index, M. S. Ford..... 484,151
Injector, automatic restarting, W. Penberthy..... 484,044

Injector, steam, J. N. Derby..... 484,302
Inkstand, fountain, E. C. Mayloy..... 484,105
Insulator, F. M. Locke..... 484,309
Insulator, F. M. Locke..... 484,309
Jar covers, tool for turning fruit, J. Van Altena..... 484,070
Jeweler's turn's bead roll, F. Mossberg..... 484,108
Joiner's clamp, F. Martin..... 484,104
Joint. See Rail joint.
Joist lifter, W. Halstead..... 484,365
Journal bearing, W. Curran..... 484,143
Kettle, confectioner's, W. Brierley..... 484,134
Kiln, continuous, W. Radford..... 484,237
Lamp, J. Kirby, Jr..... 484,323
Lamp, central draught, N. Roitman..... 484,242
Lamp, electric, J. A. Hayes..... 484,139
Lamp extinguisher, M. Goetz..... 484,362
Lamp socket, incandescent electric, C. J. Klein..... 484,207
Lamps, manufacturing central draught, Young & Neville..... 484,277
Lathe tool holder, W. C. Homan..... 484,517
Lawn sprinkler, G. Carlsson..... 484,234
Lawn sprinkler, C. Wilgus..... 484,074
Lead or crayon holder, C. W. Roman..... 484,133
Leather dressing or finishing machine, L. E. Leary..... 484,029
Leather frame, L. F. Caulfield..... 484,157
Lifter. See Joist lifter.
Lifting device, hydrocarbon, Cody & Lawton..... 484,354
Lights, apparatus for regulating the intensity of incandescent, J. F. McElroy..... 484,110
Log loader and turner, W. E. Hill..... 484,013
Loom let-off mechanism, I. Fontaine..... 484,022
Loom shedding mechanism, F. Lacey..... 484,326
Loom temples, C. H. Fates..... 484,364
Lubricator. See Axle lubricator.
Lubricator, J. Greer..... 484,195
Machine motor, E. S. Reed..... 484,288
Match lighter, automatic, R. Senner..... 484,253
Match lighter, G. Gregson..... 484,511
Metal plates, bars, etc., means for shaping, N. B. Trist..... 484,264
Metal shears, E. T. Horner..... 484,370
Metals from copper alloys, recovering, M. W. Lies..... 484,021
Melting pot, L. S. Pease..... 484,161
Mortise machine attachment, J. B. Nichols..... 484,225
Motor. See Machine motor. Water motor.
Music, apparatus for writing, A. Tessaro..... 484,262
Nickel from ores, extracting, T. Macfarlane..... 484,043
Nut cracker, O. H. Robertson..... 484,049
Nut lock, Huber & Ervin..... 484,281
Nut lock, foca, centerist, J. S. Sherman..... 484,095
Ordinance, J. R. H. Skell..... 484,012
Ores, reduction of complex, W. C. Wetherill..... 484,289
Packing case, J. Chase..... 484,391
Packing, piston, F. N. Ethridge..... 484,185
Paper bag machine, F. L. Baker..... 484,281
Paper folding machine, J. Carner..... 484,256
Paper sitting and winding machine, A. P. Brown..... 484,173
Paper stock grinding machine, M. H. Simonet..... 484,066
Pattern for draughting garments, J. H. Choquette..... 484,138
Pearl, etc., implement for cutting, F. Wilkie..... 484,071
Pencil sharpener, F. Walker..... 484,175
Photographer's background holder, W. I. Scandlin..... 484,165
Photographic printing frame, F. O. Bynoe..... 484,175
Pick, Mitchell & Birkinshaw..... 484,333
Planter. See Bean picker.
Plants and adapted therefor, pressing and drying, R. H. Day..... 484,301
Plow, U. A. Cleveland..... 484,178
Plow, W. W. Davis..... 484,994
Plow, G. C. Westervelt..... 484,129
Plow, combined riding and walking gang, A. M. Plow..... 484,000
Plow, hillside, C. P. McWane..... 484,043
Plow, slide hill, G. C. Westervelt..... 484,128
Pneumatic chair, A. P. Watson..... 484,072
Pocketbooks, etc., frame for, E. Oldenbusch..... 484,111
Pole, tubular metallic, D. Dordard..... 484,144
Pot. See Melting pot.
Power transmitter, A. S. Tragethon..... 484,066
Privy, P. Mueller..... 484,040
Projectile, J. R. Haskell..... 484,008
Propeller, screw, C. B. Wattles..... 484,382
Pulley, wood split, D. A. Sprinkle..... 484,167
Pump, E. H. Weatherhead..... 484,383
Pump and water elevator, force, M. L. G. Wheeler..... 484,169
Pump, steam, G. J. Roberts..... 484,241
Punching and shearing machine, combined metal..... 484,369
Purse, S. C. Langfield..... 484,101
Quarry frame bar, H. C. Sergeant..... 484,117
Rack. See Collar, cuff, and garment rack.
Rail joint, W. Curtis..... 484,393
Rail joint, M. C. Niles..... 484,228
Rail joint, M. C. Niles..... 484,229
Rail, track, Hill & Meiring..... 484,315
Railway, W. Latimer..... 484,027
Railway crossing, M. G. Knight..... 484,100
Railway gate, C. A. Snider..... 484,266
Railway signal, E. Urban..... 484,068
Railway switch, electrical operator, Storck & Webster..... 484,123
