Business and Personal.

The charge for Insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue

20" combination wheel and lever drill. The best dril on the market for the money. Send for catalogue and prices. W. P. Davis, Rochester, N. Y.

Acme engine, 1 to 5 H. P. See adv. next issue.

"U. S." metal polish. Indianapolis. Samples free. Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J 6 Spindle Turret Drill Presses. A.D. Quint, Hartford, Ct. Best baling presses. Ryther Mfg. Co., Watertown, N.Y.

Universal and Plain Milling Machines. Pedrick & Aver. Philadelphia. Pa.

Tool users desirous of baving tools that wear well order them made of Jessop's steel.

To Rent-Machine Shop with power and use of tools. Apply Wm. Schott, 431 Broadway, Brooklyn.

Tools for sheet metal goods, presses, lathes, dies, etc Empire Machine and Tool Co., New Brunswick, N. J. Steam Hammers, Improved Hydraulic Jacks, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York. Stow flexible shaft. Invented and manufactured by Stow Mfg. Co., Binghamton, N. Y. See adv., page 254.

Screw machines, milling machines, and drill presse The Garvin Mach. Co., Laight and Canal Sts., New York Centrifugal Pumps for paper and pulp mills. Irrigating and sand pumping plants. Irvin Van Wie, Syracuse, N. Y. For Sale-One-half part of Worn's champion slate pensharpener patent, No. 472,420. Address M. E. Worn, 3736 Gtm. Rd., Nicetown, Philadelphia, Pa.

To Let-A suite of desirable offices, adjacent to the Scientific American offices, to let at moderate terms. Apply to Muna & Co., 361 Broadway, New York.

Fine castings in brass, bronze, composition (gun metal), German silver. Unequaled facilities Jas. McKenna & Bro., 424 and 426 East 23d St., New York.

For the original Bogardus Universal Eccentric Mill, Foot and Power Presses, Drills, Shears, etc., address J.S. & G. F. Simpson, 26 to 36 Rodney St., Brooklyn, N. Y. The best book for electricians and beginners in elec "Experimental Science," by Geo. M. Hopkins

By mail. \$4: Munn & Co., publishers, 361 Broadway, N. Y. Competent persons who desire agencies for a new popular book, of ready sale, with handsome profit, may apply to Munn & Co., Scientific American office, 361 Broadway, New York.

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information and not for publication.

References to former articles or answers should give date of paper and page or number of question.

Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeaver to reply to all either by letter or in this department, each must take his turn.

or in this department, each must take his turn.

Special Written Information on matters of
personal rather than general interest cannot be
expected without remuneration.

Scientific American Supplements referred
to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of

Minerals sent for examination should be distinctly marked or labeled.

(4578) R. B. C. says: What can I use to the best advantage in a tank in which gold workers wash their hands, to catch the gold? A. Cover the bottom of your tank with mercury and allow the overflow water to pass over into a shallow tray filled with mercury. Or use a plate of amalgamated copper from which the amalgam may be removed from time to time and replaced by fresh mercury. The gold is extracted from the mercury by filtration and retorting.

(4579) J. Q. J.-A good preparation for the leather to which you refer is sweet almond oil.

(4580) A. E. S. asks for a no-gold toning

501	ion .	
A.	Sodium hypozulphite 4 oz.	
	Lead nitrate	
	Alum	
	Soda phosphate	
	Water10 oz.	

Dissolve the hypo, in water, add the lead and soda and when they are dissolved, the alum. Let the solution stand for twenty-four hours, and then decant or filter. The prints should be placed in the solution without previous washing, and removed as soon as the desired color is obtained.

NEW BOOKS AND PUBLICATIONS.

DESCRIPTION OF THE STAR CAMERA AT THE SYDNEY OBSERVATORY. AT THE SYDNEY OBSERVATORY.
Sydney: Published by authority of the Honorable the Minister for Public Instruction. 1892. Pp. 15.

A detailed series of plates with description of the photographic telescope at the Sydney, New South Wales, Observatory is the matter of the present book. A very handsome photogravure of the instrument as mounted serves as frontispiece. It is noted in the introduction that the mounting was made in the colony, and it seems to be an excellent tribute to the mechanical abilities of the New South Wales engineers

A TREATISE ON HYGIENE AND PUBLIC HEALTH. Edited by Thomas Stevenson, M.D., F.R.C.P. Lond., and Shirley F. Murphy. Vol. I. Phila-delphia: P. Blakiston, Son & Co. 1892. Pp. xii, 1013. Price \$7.50.

The scope of this most exhaustive work, of which in this large volume but one half is presented us, covers an immense ground. It is quite impossible to review lished. Munn & Co., 361 Broadway, New York,

it adequately. Among the subjects treated are air, meteorology, water, food, clothing, the dwelling, the disposal of refuse, and other allied topics. Each one is given in a monograph, and to each monograph, in the contents, and in the text of the work itself, the author's name is given. A double-column index of 21 pages gives an example for authors and publishers of scientific books to follow.

ASKANA; OR, ALASKA IN DESCRIPTIVE AND LEGENDARY POEMS. By Professor Bushrod W. James, A.M., M.D. Philadelphia: Porter & Coates. 1892. Pp. 368.

Professor James, in this work, has, to a certain extent, abandoned science for poetry, and gives us a number of the legends of Alaska in the phrase of Hiawatha. It is stated that the author has taken the liberty of avoiding the tautology for which Hiawatha is remarkable. This statement is followed by the remark that "whether this slight innovation will be acceptable as an improvement or not, remains with its readers to decide." The work, we believe, is good enough to prove of wide interest, as it is elegantly printed and illustrated, though whether, even by avoiding tautology, it will be accepted as an improvement on Longfellow is doubtful.

INDUCTION COILS. A practical manual for amateur coil makers. By G. E. Bonney. With more than 100 illustrations. New York: Macmillan & Co. London: Whittaker & Co. 1892. Pp. 231. Price \$1.

This excellent work, in adequately treating this subject, in describing batteries of the type adapted for induction coils, in its physical notes and by its hints on repairs in general mainipulation, will be welcomed by many amateurs and even professionals. One chapter is devoted to some famous coils, among others the great Spottiswood, which, with reasonably small battery, gave a 42 inch spark without difficulty.

A TEXT BOOK OF EXPERIMENTAL EN-GINEERING. By Rolla C. Carpenter, M.S., C.E., M.M.E. New York: John Wiley & Sons. 1892. Pp. xx, 709. Price \$6.

This work is so thorough, carried out in such detail, and so thoroughly illustrated that any review of it which will give an idea of its scope and merits is out of the question here. Cornell University is one of the great American centers of mechanical engineering, and Professor Carpenter, the associate professor there of experimental engineering, has produced a book which seems to be an exponent of the work of the great American university. Numerous illustrations, many carried to a great detail, are introduced, illustrating the testing machines and other apparatus employed for carrying out the work described in the volume.

DESIGN AND PROSPECTUS FOR THE NA-TIONAL GALLERY OF HISTORY AND ART. By Franklin W. Smith. Offices of the Propaganda for the National Gallery, 1419 F Street, Washington, D. C. 4to. Pp. 112; 144 Il. Paper. 50 cents.

The general scope of this new movement has been indicated on page 228 of the issue of the SCIENTIFIC AMERICAN for October 8. Though this work bears the modest title of prospectus and is published at a merely nominal figure, still it is really a work of art. This book gives illustrations of the new design, views from the Pompeian house and from all the chief galleries and museums of Europe. The views of the hotel Casa Monica and the Villa Zorayda in St. Augustine are very interesting, showing how concrete may for building purposes. This is of special interest, as the great design calls for concrete construction. Many illustrations are given of the proposed constructions for the courts of the great edifice. The book cannot fail to be of interest to all lovers of art and architecture, as well to friends of the new plan.

Poor's Directory of Railway Offi-CIALS AND MANUAL OF AMERICAN STREET RAILWAYS. New York: H. V. & H. W. Poor.

The latest edition of this most valuable reference book is just out, and comprises over 600 closely packed pages, the constant additions being made to the work rendering each successive issue more comprehensive than its predecessor. An entirely new feature of this edition is a "directory of directors." which fills a hundred pages, the directors thus catalogued including those managing banks, insurance companies, and general manufacturing and industrial enterprises, as well as railways. The statements of street railroads in the United States and Canada are now made very full, and a complete list is given of all railroads projected or now under construction in the country. The ir formation thus afforded is of importance to inventors as well as to all manufacturers or dealers in railway materials. A list is also given of, railways and tramways of Mexico, Central and South America, with their officers, mileage, etc., while the enumeration of "private" railroads makes quite a list, including lumber, logging, mining roads, etc.

Dairying for Profit; or, The Poor Man's Cow. By Mrs. E. M. Jones. New York: Orange Judd Co. Pp. 66. 30 cents.

Mrs. Jones proves her right to speak with authority on the subject discussed in this little book by the fact that she began, eighteen years ago, with two cows and a small village field, selling a few pounds of butter, of such excellence that she now has a market for and produces annually seven thousand pounds. All the details of professional dairy work are described, the difficulties likely to meet the beginner are explained, and one is also told how to choose a good cow and keep and feed her to the best advantage.

Any of the above books may be purchased through this office. Send for new book catalogue just pub-

TO INVENTORS.

An experience of forty years, and the preparation of nore than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequaled facilities for procuring patents everywhere. synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office Scientific American, 361 Broadway, New York.

Great Advertising Medium

The Architects and Builders Edition of the Scientific American, (Established 1885.)

This superb architectural work has by far the largest circulation of any periodical of its class. It goes directly into the hands of those who have the ordering of the reat bulk of Building Materials and Appliances, namely the Architects, Builders, Constructing and Sanitary Engineers, Contractors, and House Owners.

The Building Edition of the SCIENTIFIC AMERICAN is unquestionably the very best advertising medium for manufacturers and dealers in Building Materials, Car-penters' Tools, Woodworking Machinery. Heating, Ventilating, Plumbing and Sanitary Appliances, Roofing Architectural Wood and Metal Work, Builders' Hardware, Doors, Sash, Blinds, Paints, and in fact all goods maintenance of Buildings or works of any kind.

The rates for advertising are moderate. For terms address MUNN & Co. Publishers, 361 Broadway, N. Y.

OIL-LIME-ELECTRIC MACIC STEREOPTICONS J. B. COLT & CO. (189 La Salle Street, Chicago, Ill.

NOW READY!

A NEW AND VALUABLE BOOK.

12,000 Receipts. 680 Pages. Price \$5.

12,000 Receipts. 680 Pages. Price \$5.
This splendid work contains a careful compilation of the most useful Receipts and Replies given in the Notes and Queries of correspondents as published in the Scientific American during the past fifty years: together with many valuable and important additions.

Over Twelve Thousand selected receipts are here collected: nearly every branch of the useful arts being represented. It is by far the most comprehensive volume of the kind ever placed bfore the public.

The work may be regarded as the product of the studies and practical experience of the ablest chemists and workers in all parts of the world; the information given being of the highest value, arranged and condensed in concise form convenient for ready use.

formation given being of the highest value, arranged and condensed in concise form convenient for ready use.

Almost every inquiry that can be thought of, relating to formulæ used in the various manufacturing industries, will here be found answered. Instructions for working many different processes in the arts are given.

It is impossible within the limits of a prospectus to give more than an outline of a few features of so extensive a work.

Under the head of Paper we have nearly 250 receipts, embracing how to make papier maché; how to make paperwater proof and fire proof; how to make sandpaper, emery paper, tracing paper, tracing paper, tracing paper, transfer paper, carbon paper, parchment paper, colored papers, razor strop paper, paper for doing up cutlery, silverware; how to make luminous paper, photograph papers, etc.

Under the head of Inks we have nearly 450 receipts, including the finest and best writing inks of all colors, drawing; inks, luminous inks, invisible inks, gold, silver and bronze inks, white inks; directions for removal of inks; restoration of faded inks, etc.

Under the head of Allovs over 700 receipts are given, covering a vast amount of valuable information.

Of Cements we have some 600 receipts, which include almost every known adhesive preparation, and the modes of use.

How to make Rubber Stamps forms the subject of a most valuable practical article, in which the complete process is described in such clear and explicit terms that any intelligent person may readily learn the art.

For Lacquers there are 120 receipts: Electro-Metallurgar 125 receipts; Pho

learn the art. For Lacquers there are 120 receipts; Electro-Metallurgy, 125 receipts; Bronzing, 127 receipts; Photography and Microscopy are represented by 600

tography and Microscopy are represented by 600 receipts.

Under the head of Etching there are 55 receipts, embracing practical directions for the production of engravings and printing plates of drawings.

Paints, Pigments and Varnishes furnish over 800 receipts, and include everything worth knowing on those subjects.

Under the head of Cleansing over 500 receipts are given, the scope being very broad, embracing the removal of spots and stains from all sorts of objects and materials, bleaching of fabrics, cleaning furniture, clothing, glass, leather, metals, and the restoration and preservation of all kinds of objects and materials.

In Cosmetics and Perfumery some 500 receipts are given.

are given.

Soaps nave nearly 300 receipts.

Those who are engaged in any branch of industry probably will find in this book much that is of practical value in their respective callings.

Those who are in search of independent business or employment, relating to the home manufacture of sample articles, will find in it hundreds of most excellent suggestions.

Send for descriptive circular.
