

ink specialion and unusual forms and kinds of ink, such as safety ink, sympathetic ink, stamp inks, etc., while the important subject of printing ink is fully treated.

THE HARDWOOD FINISHER. With rules and directions for finishing in natural colors and in antique, mahogany, cherry, birch, walnut, oak, ash, redwood, sycamore, pine, and all other domestic woods.

This excellent work, with its very practical aspect, seems to cover a field that has been perhaps somewhat neglected. It is exceedingly practical, and with numerous formulæ for all kinds of stains and wood dyes, as well as finishes, is one that is to be found of value to many operatives.

LE CHAUFFAGE ET LES APPLICATIONS DE LA CHALEUR DANS L'INDUSTRIE ET L'ECONOMIE DOMESTIQUE. Par Julien Lefevre, Professeur Suppleant a l'Ecole de Medecine de Nantes, Professeur a l'Ecole des Sciences. Avec 188 figures intercalees dans le texte.

The French aspect of this book is evident in the title, and the very large ground which it undertakes to cover is largely devoted to domestic heating, although other heating finds a place in it, and its numerous illustrations and excellent arrangement of pictures indicate good judgment on the part of the editor and publishers.

Any of the above books may be purchased through this office. Send for new book catalogue just published. MUNN & Co., 361 Broadway, New York.

SCIENTIFIC AMERICAN BUILDING EDITION. DECEMBER NUMBER.—(No. 86.)

TABLE OF CONTENTS.

- 1. Elegant plate in colors, showing a very attractive dwelling at Warberth Park, Pa., erected at a cost of \$4,150 complete. Floor plans and two perspective elevations. John Robinson, architect, Germantown, Pa.

The Scientific American Architects and Builders Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in colors and with fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.

The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural publication in the world. Sold by all newdealers.

MUNN & CO., PUBLISHERS, 361 Broadway, New York.

Business and Personal.

The charge for Insertion under this head is One Dollar a line for each insertion, about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue

Acme engine, 1 to 5 H. P. See adv. next issue. "U. S." metal polish. Indianapolis. Samples free. Presses & Dies. Ferracuta Mach. Co., Bridgeton, N. J. Shingle machinery. Trevor Mfg. Co., Lockport, N. Y. Patent Open-Side Planing and Shaping Machines. Pedrick & Ayer, Philadelphia, Pa.

Wm. Jessop & Sons, the celebrated steel makers, observe the centennial of their firm next year. Steam Hammers, Improved Hydraulic Jacks, and Tube Expanders. R. Dudgeon, 24 Columbia St., New York. Stow flexible shaft. Invented and manufactured by Stow Mfg. Co., Binghamton, N. Y. See adv., page 254.

\$200 buys outright a patent on a novel kitchen device. Address C. A. B., P. O. box No. 495, Wakefield, Mass. Screw machines, milling machines, and drill presses. The Garvin Mach. Co., Light and Canal Sts., New York.

Centrifugal Pumps for paper and pulp mills. Irrigating and sand pumping plants. Irvin Van Wie, Syracuse, N. Y. Portable engines and boilers. Yacht engines and boilers. B. W. Payne & Sons, Elmira, N. Y., and 41 Dey Street, New York.

Wanted—A firm to undertake sale of well-selling brass patent article. Large prospects. Address A. Z., box 773, New York.

To Let—A suite of desirable offices, adjacent to the Scientific American offices, to let at moderate terms. Apply to Munn & Co., 361 Broadway, New York.

Fine Castings in Brass, Bronze, Composition (Gun Metal), German Silver. Unequaled facilities. Jas. J. McKenna & Bro., 424 and 426 East 23d St., New York.

For the original Bogardus Universal Eccentric Mill, Foot and Power Presses, Drills, Shears, etc., address J. S. & G. F. Simpson, 26 to 36 Rodney St., Brooklyn, N. Y.

The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, \$4; Munn & Co. publishers, 361 Broadway, N. Y.

Canning machinery outfits complete, oil burners for soldering, air pumps, can wipers, can testers, labeling machines. Presses and dies. Burt Mfg. Co., Rochester, N. Y.

Competent persons who desire agencies for a new popular book, of ready sale, with handsome profit, may apply to Munn & Co., Scientific American office, 361 Broadway, New York.

Wanted—Engineers and pilots. Twenty licensed engineers and pilots to run small passenger steamers for the summer months of 1893, in connection with the World's Fair. Sober, steady men are invited to write us for further information. Chas. P. Willard & Co., Clybourn and Southport Aves., Chicago, Ill.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and though we endeavor to reply to all either by letter or in this department, each must take his turn. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(4604) O. C. asks: 1. What speed can be had with a 16 foot boat, 4 feet beam, using an engine 2 1/2 inches bore, 3 inches stroke at about 60 pounds steam pressure? A. You should be able to run the boat 6 miles per hour. 2. What should be the diameter, pitch, and speed of the propeller to give best results? A. Propeller wheel should be 18 inches diameter, 36 inches pitch and make 250 turns per minute. 3. Should the propeller have two or three blades? A. A three-blade wheel is preferred. 4. What size boiler would be required and would the pipe boiler described in the SCIENTIFIC AMERICAN SUPPLEMENT be suitable? A. A vertical tubular boiler having 20 square feet of actual heating surface with shell 22 inches diameter by 36 inches in height, 33 tubes 1 1/2 inch, will give all the steam required. The No. 3 pipe boiler described in SCIENTIFIC AMERICAN SUPPLEMENT, No. 702, with 8 inches addition to the length, will make a safe boiler in which you carry 100 pounds steam pressure if desired, and large enough for the above speed.

(4605) R. T. McK. writes: Will you please answer me through your columns why it is that you can pump up a higher air pressure than your steam pressure by the gauge on a double acting air pump, the steam and air cylinders being of the same diameter, and the pistons operating on the same piston rod? A. The difference between the initial pressure in the steam cylinder and final pressure in the air-compressing cylinder is due to the difference in the mean pressure for the expansion of steam and the mean pressure for the compression of air. This is at once apparent to the eye when examining the indicator cards of equal sized steam and air compressing cylinders. The mean engine pressure for 70 pounds at 3/4 cut-off is theoretically 52 pounds per square inch. The mean adiabatic pressure of the air cylinder for delivery of air at 100 pounds pressure is 50 pounds, while the mean isothermal pressure is but 30 pounds. The absorption of the heat of compression by water injection or jacket cooling brings the extremes to a mean, which, if 3/4 is absorbed, will make the mean pressure of the air cylinder about 43 pounds per square inch, with 9 pounds as the margin for compressor friction.

(4606) R. M. asks: 1. Is smoke a wet (watery) or dry vapor? A. Smoke is more or less mixed with the vapor of water, part of which is derived from the moisture in the fuel and another portion from the oxidation of the hydrogen forming part of the fuel. 2. What weight would a ball 100 pounds indicate on a balance if dropped from a height of 100 feet? A. The weight multiplied by the fall is equal to 10,000 foot pounds. If the balance arrests the fall of the ball in 6 inches after contact, the average impact force is 20,000 pounds. See SCIENTIFIC AMERICAN SUPPLEMENT, No. 862, on impact or the force of percussion.

(4607) G. C. W. asks how to bleach the hair of an animal. A. Gaseous chlorine and hydrogen peroxide are effectual agents in bleaching hair. The hair should be thoroughly cleaned, with a warm solution of soda, then washed with water. While moist it is put into a jar and chlorine gas introduced, until the air in the jar looks greenish. Allow it to stand for twenty-four hours, and if necessary repeat.

(4608) T. H. says: 1. It is proposed to deliver water in an inch pipe one mile distant over an elevation 120 feet high, the point of delivery is 25 feet lower than the starting point. It is asserted that it would require 75 per cent more force power to deliver at the summit and let it go down by gravity than to continue the pipe the whole distance. Can you throw light on it? A. It will require 52 pounds pressure and the additional pressure due to friction to deliver the water at the summit of the siphon. The down leg can only relieve the pump pressure to the amount of a vacuum, or 14 1/2 pounds, which may be offset by the friction in the down leg of the siphon. The difference in length of the two legs of the siphon may make a trifling difference only, whether delivery is through the whole length or discharged at the top. 2. Suppose that a shell made of strong steel 1 1/4 feet in diameter, with a cavity in the center large enough to hold 2 ounces of powder (1 1/4 inches), with a vent of a size to admit the smallest possible wire that would conduct electric fluid, had electricity applied, would the powder ignite? Would there be an explosion, or what would there be? A. The powder would explode and create a pressure of probably 40,000 pounds per square inch, which would fizzle out through the vent and burn out the wire.

TO INVENTORS.

An experience of forty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted November 29, 1892, AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

- Advertising novelty or display card, J. Robinson 486,399
Agricultural implement, A. Caldwell 486,849
Alarm bell, J. H. Johnson 487,176
Album, A. Bartholme 487,176
Alloys, electro-depositing, S. O. Cowper-Coles 487,176
Animal catcher, A. Otto 486,839
Automatic brake, McKee & Hatchett 486,886
Axle, car, D. Sr. & D. Roberge, Jr. 486,838
Axle box, car, S. Robertson 487,231
Axle lubricator, H. M. Goodman 487,181
Axle, vehicle jointed, E. F. Steele 487,059
Baling press, A. Wickey 486,997
Battery. See Galvanic body battery.
Bearings, making cases for anti-friction, F. Moss 487,194
Bed, folding, J. Gandy 486,967
Belt, electric, J. H. Johnson 487,185
Belt fastener, E. L. Matteson 487,021
Bench dog, C. A. Wayland 487,106
Bevel, W. G. Avery 487,010
Bicycle, S. H. Kimball 486,353
Bicycle brake, W. T. Lewis 487,010
Bicycle saddle support, E. M. Staples 487,081
Binder, C. H. Stoelting 486,989
Bit brace, A. Knudsen 487,123
Book, F. R. Stevens 487,134
Boiler, See Steam boiler. Lamp burner.
Boiler furnace, W. R. Parks 486,955
Boiler furnace and smoke consumer, J. Connelly 486,854
Boiler furnace, locomotive or marine, F. Barclay 486,924
Boiler furnace, steam, F. Barclay 486,923
Bolster plate, D. B. Oliver 486,890
Book, blank, H. H. & F. H. Hoffmann 487,014
Boiler, making pearl, W. E. Taft 487,191
Boring apparatus, O. Lentz 486,877
Bottles, etc., liquid-ejecting device for, F. S. Cooley 487,088
Box. See Confectionery or other box. File box.
Box corner, J. Austin 486,844
Box fastener, C. D. Sufkins 487,082
Boxes, apparatus for making metal, F. J. King 487,186
Brace. See Bit brace.
Brake. See Automatic brake. Bicycle brake. Car brake.
Brick driver, N. Harper 486,931
Brick kiln, Conley & Wolfe 487,174
Brick kiln, L. H. Reppel 487,158
Brick kiln, continuous, C. F. Kaul 486,972
Brick machine, Ross & Keller 487,161
Bridge gate, W. A. G. Anderson 486,483
Broiler or toaster, R. Martin 487,043
Buckle, A. M. Ziegler 487,044
Buckle, suspender, A. M. Ziegler 487,044
Burglar alarm, J. H. Pruitt 486,833
Burglar alarm, H. W. Reynolds 487,128
Burglar alarm cabinet, A. Stromberg 486,968
Burner. See Gas burner. Lamp burner.
Butter extractor, centrifugal, O. Ohlsson 487,056
Buttercup cutter, N. A. Walker 486,917
Button, A. Hall 486,871
Button attaching machine, C. Radcliffe 486,896
Button book, F. F. Krueger 487,054
Buttons, making pearl, W. E. Taft 487,191
Buttons, etc., tool for making pearl, W. E. Taft 487,238
Camera, R. A. Ripley 487,159
Cannon pionion, J. B. Johnson 486,933
Car brake, Neumann & Phanz 487,151
Car coupling, W. H. Borchers 486,949
Car coupling, W. A. Flock 486,956
Car coupling, J. G. Gattano 487,191
Car coupling, W. H. Hooper 487,030
Car coupling, D. B. Kelsey 487,148
Car coupling, J. H. Snyder 486,905
Car door, ventilated, J. L. Stagg et al. 487,168

- Car motors, device for transmitting motion for electric street, W. E. Harrington 487,069
Car, railway construction, C. C. Brown 487,045
Car roofing, box, W. S. Morris 487,193
Car seat, J. Lemman 487,034
Car street, F. B. Brown et al. 487,128
Carbon, electric light, J. Clegg 487,048
Carpet sweeper, W. J. Drew 487,212
Carriage, child's, Heller & Hirsch 487,050
Cartridge, J. A. C. De Louché 487,125
Cartridge, gun, V. Gmainsky 487,028
Case. See Packing machine sack case.
Cash carrier, N. & N. E. Dillenbeck 487,048
Cash register, C. Carr 486,980
Cash register and indicator, C. Carr 486,979
Cash registering and indicating machine, E. N. Foote 487,215
Ceiling, fireproof, Hayes 486,892
Centrifugal extractor, E. Johnson 486,876
Chain, drive, A. Worner 486,920
Chasing mill, H. C. Higginson 487,146
Cigar machine hopper, M. A. Winget 486,919
Cigar mould, M. A. Winget 487,108
Cigar or cigarettes, ignition cap for, M. R. Swiss 486,954
Clothespin, J. McCook 487,061
Clutch, rope, P. T. Sundberg 486,961
Coal jig, C. O. Stroh 486,907
Cog wheel, F. Saxon 487,129
Coin and delivering tickets, device for receiving, J. Williams 487,139
Color printing on textile fabrics, A. Hox 486,873
Combination lock, E. Vanwart 487,138
Condenser head, C. S. Onderdonk 487,036
Confectionery or other box, H. Buehl 487,085
Corn popper, A. B. Olson (r) 487,200
Coupling. See Car coupling. Pipe coupling.
Crate, egg, W. T. Fisher 487,144
Cultivator, garden, A. J. Bruner 487,113
Cultivator trip device, J. G. Hall 487,218
Cuspidor, C. R. Price 486,892
Cutter. See Buttercup cutter.
Cutter head, E. S. Judkins 487,015
Cutter head knife, S. J. Shimer 486,901
Cutting head, W. B. Huther 486,874
Cylinder engine, multiple, E. B. Benham 487,084
Dampier, C. A. Couch 486,855
Display rack, J. H. Best 486,910
Door spring, C. Koon 486,875
Drapery or garment hook, safety, J. Berkey 487,171
Dress pad, S. E. Stanley 487,164
Drilling apparatus, J. T. Cowley 486,866
Egg beater, U. D. Seitzer 487,024
Elastic cord and making the same, A. M. Ziegler 487,042
Electric circuit safety device, C. Cutter 487,002
Electric current indicator, C. P. L. Noxon 487,083
Electric light holder, adjustable, L. S. Pfouts 487,022
Electric lighting apparatus, automatic, L. G. Woolley 487,109
Electric switch, J. Nade 487,122
Electrics with, W. J. Schmitt 486,957
Electrical apparatus, coil for, H. C. Buck 486,926
Electrical transformer, E. Thomson 486,916
Electrical transmitting apparatus, Neal & Eaton 486,888
Electricity, development and distribution of, J. S. Stone 487,102
Electrode, C. W. Hazeltine 487,200
Elevator. See Hay elevator.
Elevator, J. H. Tardy 487,104
Elevator doors, means for operating, R. W. Hare 486,963
Engine. See Cylinder engine. Rotary engine. Steam engine.
Engine reversing gear, J. O. Des Chapelles 487,115
Engines, bogie frame for locomotive, G. Lentz 487,187
Eraser, ink, J. E. Maybew 486,976
Eugenol benzyl-ether and preparing the same, F. Ach 487,167
Explosive powder, J. V. Skoglund 487,080
Extractor. See Butter extractor. Centrifugal extractor.
Fare receiver and register, portable, J. E. Allison 487,168
Faucet and bushing, M. A. Anthony 487,206
Feed mechanism, self-adjusting, G. Ehrhardt 487,112
Feed regulator, J. S. Campbell 486,951
Feed trough, T. Doolan 487,003
Fence, W. Arthur 487,208
Fence, C. C. Trout 487,083
Fence machine, wire, J. Harper 487,194
Fence post, iron, metallic, O. M. Knox 487,153
File box, W. I. Ohmer 487,150
File box, Ohmer & Wayne 487,006
File, check, F. Tremblay 486,993
File cover fastener, court, A. E. Walkup 486,962
File, paper, W. I. Ohmer 487,230
File, paper or music, W. Jeschke 486,875
Filter, water, J. Davis 486,950
Fire alarm signal apparatus, auxiliary, C. E. Scribner 487,095
Fire escape, J. B. Stott 487,135
Fire escape, portable tower platform, J. Vogt et al. 487,039
Fire kindler, S. Eisinger 486,966
Flour bolt, W. D. Gray 487,004
Fuel feeder, fluid, E. T. Williams 486,996
Fumigator, R. Campbell 487,173
Furnace. See Boiler furnace.
Furnace, W. Tuttlebine 487,103
Furnace, H. K. Tallmage 486,900
