Jeweled movement; A warranted time-keeper. A gem to be proud of.

PATENTS!

MESSRS. MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN, continue to examine improvements, and to act as Solicitors of Patents for Inventors.
In this line of business they have had forty-five years' experience, and now have unequalled facilities for the preparation of Patent Drawings, Specifications, and the prosecution of Applications for Patents in the United States, Canada and Foreign Countries.

The DENSMORE,
"The world's greatest Typewriter," now contains all the contemplated improvements, and should be examined before purchasing any other. Highest standard. Invented, owned and controlled by me, having had fifteen years' experience on type bar machines. It is built with a special view of simplicity, strength, durability, high speed, easy action, permanent alignment, and is most convenient. Two interchangeable carriages for manifold and letter writing. Steel throughout. Standard key-board, with shift key for capitals. A board of experts appointed by the Government to examine and receive bids on the best machine unanimously reported that the "Densmore" contained more points of excellence than any other, and that it was the best machine of all. We will appoint a reliable dealer in unoccupied territory as soon as possible, and in the meantime will ship machines on approval to parties having a good commercial rating.
