"Wise men

change their minds sometimes."

They accept new light; they realize that there is an improved, perfected, quick-winding Waterbury watch; in coin-silver and gold, filled, cases. An entirely different affair from the one laughed at of old; winding in five seconds; surpassing in style and quality anything deemed possible at the price; elegant enough for any lady to carry, and satisfying the accurate business man. Far superior to any cheap Swiss watch; with closer and more uniform adjustment.

Your jeweler keeps this watch in many different styles, a boy's watch included; all stem-winders. \$4 to \$15.

The American Bell Telephone Company 125 MILK ST., BOSTON, MASS.

This Company owns the Letters Patent No. 186,787, granted to Alexander Graham Bell, January 30, 1877, the scope of which has been defined by the Supreme Court of the United States in the following terms:

"The patent itself is for the mechanical structure of an electric telephone to be used to produce the electrical action on which the first patent rests. The third claim is for the use in such instruments of a diaphragm, made of a plate of iron or steel, or other material capable of inductive action; the fifth, of a permanent magnet constructed as described, with a coil upon the end or ends nearest the plate; the sixth, of a sounding box as described; the seventh, of a speaking or hearing tube as described for conveying the sounds; and the eighth, of a permanent magnet and plate combined. The claim is not for these several things in and of themselves, but for an electric telephone in the construction of which these things or any of them are used."

This Company also owns Letters Patent No. 463,569, granted to Emile Berliner, November 17, 1891, for a Combined Telegraph and Telephone; and controls Letters Patent No. 474,231, granted to Thomas A. Edison, May 3, 1892, for a Speaking Telegraph, which cover fundamental inventions and embrace all forms of microphone transmitters and of carbon telephones.
