'O how much mor doth beauty beauteous seem By that fair ornament which truth doth give." The gold, filled, and coin-silver

cases of the new Quick-Winding WATERBURY

watch seem even more "beauteous" because of its truthful timekeeping. The owner may be twice proud: to show it and to rely upon it. There is a truthful elegance in the exquisite little chatelaine that captivates the eye. No cheap Swiss watch made on the foreign labor system can compare with this perfected product of American machinery and brains.

All jewelers sell: in many dif-ferent styles: Ladles' gentle-men's and boys' watches. There could be no more acceptable gift. \$4 to \$15.

The American Bell Telephone Company 125 MILK 8T., BOSTON, MASS.

This Company owns the Letters Patent No. 186,787, granted to Alexander Graham Bell, January 30, 1877, the scope of which has been defined by the Supreme Court of the United States in the following terms:

"The patent itself is for the mechanical structure of an electric telephone to be used to produce the electrical action on which the first patent rests. The third claim is for the use in such instruments of a diaphragm, made of a plate of iron or steel, or other material capable of inductive action; the fifth, of a permanent magnet constructed as described, with a coil upon the end or ends nearest the the sixth of a sounding box a scribed; the seventh, of a speaking or hearing tube as described for conveying the sounds: and the eighth, of a permanent magnet and plate combined. The claim is not for these several things in and of themselves, but for an electric telephone in the construction of which these things or any of them are used."

This Company also owns Letters Patent No. 463,569, granted to Emile Berliner, November 17, 1891, for a Combined Telegraph and Telephone; and controls Letters Patent No. 474,231, granted to Thomas A. Edison, May 3, 1892, for a Speaking Telegraph, which cover fundamental inventions and embrace alforms of microphone transmitters and of carbon telephones.
