#### MINING.

An Elementary Treatise on the Getting of Minerals. By Arnold Lupton, M.I.C.E., F.G.S., etc., Mining Engineer, Certificated Colliery Manager, Surveyor, etc. Professor of Coal Mining at the Victoria University, Yorkshire College, Leeds, etc. With 596 Diagrams and Illustrations. Crown 8vo, \$3.00.

and Hustratons. Crown soy, \$5.00.

"The author has done his work well, and made a good book. It bears the evidence of Laving been written by an active, experienced engineer, instead of a theorist. It smacks of practical work rather than the closet. Its chapter on geology is common sense, and one of the best things of the kind we have seen. One great feature of it is its profuse illustrations, principally of mining machinery. It contains 900, many of them being parts of machines, and appliances which the author has found to be valuable. The chapter on pumps alone is worth the cost of the book."—Mining Industry, Denver, Col.

#### MINING ROYALTIES.

Their Practical Operation and Effect. By Charles Ashworth James. Crown 8vo, \$1.75.

"To one who wants to study the origin of mining customs and mining laws, just as one interested in the common law likes to study its origin and development, the work is interesting and valuable."—Mining Industry, Denver, Col.

## MARINE BOILER MANAGEMENT AND CONSTRUCTION.

Being a Treatise on Boiler Troubles and Repairs, Corrosions, Fuels, and Heat, with the Properties of Iron and Steel, on Boiler Mechanics, Workshop Practices, and Boiler Design. By C. E. Stromeyer, Graduate of the Royal Technical College at Aix-la-Chapelle, Member of the Institute of Naval Architects, etc. 8vo, \$5.00.

"The book is many-sided. It presents several novel features, and will prove valuable to many classes of readers. Seagoing engineers and students of engineering, superintendent engineers and steamship owners, boiler designers and boiler makers, will all find matters of interest to them, while those engaged in special research on any point directly or indirectly connected with boilers-or with the use of mild steel for structural purposes—will find, in addition to the direct information contained in the book, copious and systematic references to scientific papers and other publications dealing with each of the many special points of which the book treats."—The Engineer.

#### TIDAL RIVERS.

Their Hydraulics, Improvement, and Navigation. By W. H. Wheeler, M. Inst. C.E., author of "The Drainage of Fens and Low Lands by Gravitation and Steam Power." With Illustrations. Medium 8vo, \$5.00.

#### OUR HOUSEHOLD INSECTS.

An Account of the Insect Pests Found in Dwelling-houses. By Edward A. Butler, B.A., B.Sc. Lond. With 7 Plates and 113 Illustrations in the Text. Crown 8vo, \$2.00.

CONTENTS.-Wood-boring Beetles, Club-horn Beetles, Cellar Beetles and Meal Worms, Longhorns and Preyhunters, Ants and Wasps, Social Wasps and Horntails, Clothes Moths and other Tineas, Meal and Tabby Moths, the Common Cockroach, Crickets and Earwigs, House Flies and Bluebottles, House Flies and Bluebottles, continued. Gnats, Midges and Mosquitoes. The Common Flea, The Bed-bug, The Book-louse and Silverfish Insect, Human Pediculi.

"An excellent book, which any housewife may read with profit, and every entomologist will find convenient forreference... The language is not technical, the text is written in an easy, yet not too familiar style... The illustrations are excellent, and the publishers have done everything to present Mr. Butler's text in a form suitable for any library."—Evening Post, N. Y.

## Longmans, Green, & Co.

Publishers, 15 East 16th St., New York.

Does not disintegrate. The Butt joint can be rolled, hammered, or drawn. Full particulars on application.
ALSITE ALUMINUM CO., 106 Liberty St., New York.
