

board is automatically released to prevent the escape of the load.

GRIP BLOCK.—George S. Fouts, Aberdeen, Washington. This device is designed to operate as well on a rod or chain as on a cable, and also for drawing bridge rods, etc., together, or for hauling. It has a recess with converging walls, in which fit keys having racks, there being roller bearings between the keys and the walls, and pinions, each meshing with one of the racks of the keys and connected to turn together.

SHOE POLISHER.—Herman Parsons, Savannah, Ga. This device consists of a ball-shaped handle having square-sided loops formed on its ends to facilitate retaining a strap under tension. The device is designed to facilitate the polishing of russet, patent leather and enamel shoes.

WATER HEATER AND RANGE.—Isaac N. Hall, Mediapolis, Iowa. This improvement consists of an upper water-distributing chamber, pendant feed pipes bent to form a fuel-holding pot, their ends extending inward to form a grate portion, while a centrally disposed water-heating chamber connects the ends of the grate portions of the pipes. The construction is such that a large quantity of water can be heated and forced up through the pipes with but a small outlay of fuel.

DAMPER FOR STOVES.—Ernest C. Cole, Council Bluffs, Iowa. This invention has especial reference to "air tight" stoves, where the draught openings are to be closed as tightly as possible, and the damper consists of two concentric pipes arranged to form an annular tapering space between them, and having coincident air holes in combination with an adjustable tube section closed at one end and adapted to pass between the concentric pipes to cut off communication between their coincident holes.

DESIGN FOR A CARPET.—Walter B. Brown, Newark, N. J. The body and border of this carpet are decorated with connected leaf scrolls, reversely curved, rosettes and leaf figures.

NOTE.—Copies of any of the above patents will be furnished by Munn & Co., for 25 cents each. Please send name of the patentee, title of invention, and date of this paper.

SCIENTIFIC AMERICAN BUILDING EDITION. AUGUST, 1894.—(No. 106.)

TABLE OF CONTENTS.

- 1. An elegant plate in colors showing a residence at Plainfield, N. J., recently erected for George H. Babcock, Esq. Perspective views and floor plans. A picturesque design. Mr. E. L. Hyde, architect, New York City.
2. A residence at Edgewater, Ill., recently erected for Mrs. Eva L. Prescott. Perspective elevations and plate in colors, together with floor plans. An excellent design. M. J. L. Silsbee, architect, Chicago, Ill.
3. A residence recently completed for J. P. Charendon, Esq., at Hackensack, N. J. Two perspective elevations and floor plans. Mr. J. E. Turhune, architect, Hackensack, N. J. An attractive design.
4. A dwelling at Erie, Pa., erected for William J. Sell, Esq., at a cost of \$4,500 complete. Two perspective elevations and floor plans. Mr. C. F. Dean, architect, Erie, Pa.
5. A beautiful residence recently erected at Belle Haven, Conn. Three perspective elevations, one interior view, together with floor and ground plans. Mr. C. P. H. Gilbert, architect, New York City. A model design.
6. The beautiful residence of E. Einstein, Esq., at Pompton, N. J. Perspective elevation and floor plans. Cost complete about \$20,000. Architect, Mr. Manly N. Cutter, New York City.
7. A conveniently and economically arranged suburban cottage recently erected for George W. Payne, Esq., at Carthage, Ill. An attractive and picturesque design. Perspective elevation and floor plans. Cost \$3,000 complete. Architects, Messrs. G. W. Payne & Son, Carthage, Ill.
8. Perspective elevation and floor plans of a well arranged dwelling, recently erected for A. N. O'Hara, Esq., at Carthage, Ill. A pleasing design. Cost complete, \$5,500. Architects, Messrs. G. W. Payne & Son, Carthage, Ill.
9. A stable at Belle Haven, Conn. Perspective view and ground plan. A unique design. Mr. C. P. H. Gilbert, architect, New York City.
10. The Club House of the Knickerbocker Field Club, recently erected at Flatbush, L. I., N. Y. Engravings and floor plans. Messrs. Parsett Bros., architects, Brooklyn, N. Y. A neat design in the Colonial style.
11. An elegant residence of A. B. Bigelow, Esq., at Cranford, N. J. Perspective elevation and floor plans. Estimated cost, \$6,000. Mr. Manly N. Cutter, architect, New York City.
12. Miscellaneous Contents: The Hayes metallic lathing, illustrated.—Nonsuch Palace.—The Joseph Dixon Crucible Co.—The slate business.—New and old styles of eaves troughs, illustrated.—The Weathered hot water heaters.—Design for mantel and fireplace, illustrated.—The "P. & B." sheathing and insulating papers.—An improved vice, illustrated.—What becomes of all the lumber.—Globe ventilator, illustrated.—An improved sashiron, illustrated.
The Scientific American Architects and Builders Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Forty large quarto pages, equal to about two hundred ordinary book pages; forming, practically, a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates in colors and with fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.
The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural Publication in the world. Sold by all newsdealers. MUNN & CO., PUBLISHERS, 361 Broadway, New York.

Business and Personal.

The charge for Insertion under this head is One Dollar a line for each insertion: about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue.

"U. S." metal polish. Indianapolis. Samples free. For mud dredging engines. J. S. Mundy, Newark, N. J. Heading machinery. Trevor Mfg. Co., Lockport, N. Y. Microbe Killer Water Filter, McConnell Filter Co., Buffalo, N. Y.

Distance Reading Thermometers.—See illus. advertisement, page 32. Ward & Doron, Rochester, N. Y.

Screw machines, milling machines, and drill presses. The Garvin Mach. Co., Lairht and Canal Sts., New York. Centrifugal Pumps. Capacity, 100 to 40,000 gals. per minute. All sizes in stock. Irvin Van Wie, Syracuse, N. Y.

Patent for Sale—Wire implement, useful in all fruit and agricultural sections. M. S. Moremen, Switzerland, Florida.

Guild & Garrison, Brooklyn, N. Y., manufacture steam pumps, vacuum pumps, vacuum apparatus, air pumps, acid blowers, filter press pumps, etc.

The "Olin" Gas and Gasoline Engines, from 1 to 10 horse power, for all power purposes. The Olin Gas Engine Co., 222 Chicago Street, Buffalo, N. Y.

For Sale—Patent No. 523,212—Cleaning Attachment for Grain Mills. Entire patent or State rights for sale. See page 76. Address E. J. Kemper, Hermann, Mo.

The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, \$4; Munn & Co., publishers, 361 Broadway, N. Y.

For the original Bogardus Universal Eccentric Mill, Foot and Power Presses, Drills, Shears, etc., address J. S. & G. F. Simpson, 26 to 36 Rodney St., Brooklyn, N. Y.

Competent persons who desire agencies for a new popular book of ready sale, with handsome profit, may apply to Munn & Co., Scientific American office, 361 Broadway, New York.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Mineral sent for examination should be distinctly marked or labeled.

(6169) F. M. S. writes: Will you please give me the best method of putting fire brick lining in an arch? I have a 48 inch tubular boiler 14 feet long, and find it hard to keep the lining in, especially in the front. Is it best to put salt in the fire clay? I also have a 10x15 slide valve engine. It is set about 250 feet from boiler. The valves as it is set at present has no lead. The eccentric stands at 90 inches. Would I save any steam or lose any power by advancing the eccentric enough to give a little lead? A. For lining a boiler furnace use the best fire brick that can be procured, free from warp and with a sharp mould. Lay the brick as stretchers as close as possible, and breaking joints. Use pulverized fire brick, which can be purchased from the fire brick makers, or the old brick can be pulverized in a mortar or iron pot as fine as ordinary mortar sand. Sift, to remove all lumps, mix to a mortar with 1/4 good fire clay and water. Use no salt or other flux, press and rub the bricks as close as possible; the least thickness of mortar joint makes the most durable lining. If there are any old headers running into the outer wall, they should be used, if in good order, or others inserted at 2 to 3 feet above the grate. The closing in at one or two courses below the lugs should be done by uncovering the top of the wall each side of the lugs, so as to make a good bearing weight on the lining wall at the top. This is much better than to wedge in the upper course.

(6170) G. M. B. says: Two dynamos with the same size pulleys are run by two belts from the same engine pulley, one belt being run over the other; do the two dynamos run at exactly the same speed? If not, which runs faster? A. The dynamo with the outside belt runs the faster by the difference in the circumference of the pulley and the circumference of the enlargement of the pulley due to the thickness of the inner belt.

(6171) W. J. C., Queensland, writes: I have a 100 feet head of water which I wish to utilize to drive a 10 head stamper battery, requiring say 45 actual horse power. The water to be conveyed through pipes a distance of one thousand yards. What size Pelton wheel and pipes would be suitable? The smallness of pipes being greatest consideration. Would I lose power by reducing size of pipes near discharge end? What size pipes and wheel would develop 25 actual horse power under same circumstances? A. For 45 horse power, a wheel 6 feet diameter of the Pelton or other good gurdy type should be used; 398 cubic feet of water will be required per minute giving a wheel velocity of 125 revolutions per minute. With 3,000 feet of 24 inch pipe the water velocity will be 22 feet per second, with a loss of head by friction of five feet, making the working head 95 feet. Pipe may be tapered for a short distance from the nozzles to advantage. The nozzles should be two, each of 2 3/4 inch diameter. For 25 horse power, same head and distance, a 4 foot wheel, using 176 cubic feet of water per minute, will be required. Will run at 180

revolutions per minute. The pipe should be 16 inches in diameter, giving a velocity of 22 feet per second, with a friction loss of head of 5 1/2 feet, making the working head 94 1/2 feet. For this wheel and power one nozzle of 2 3/4 inches diameter or two nozzles of 1 3/4 inches diameter will be required. Smaller pipe than above stated will largely reduce the working head and power.

(6172) Denver Club asks: Will you please state in your columns what the chances are of throwing a given two numbers with two dice, for instance a 5-4? A. The chances of throwing two specified numbers with dice are a multiple of the total numbers, or 6x6=36, one chance in 36.

(6173) J. B. J. says: Cannot phosphorescent light and sunlight be stored or absorbed by some material that will give it out again, and cannot this fact be made of practical use? Did not your paper publish some facts of the kind? If so, in what issue? A. Barium sulphide, calcium chloride, calcium sulphide, strontium sulphide, and phosphoreted oil are all phosphorescent substances. Luminous paint is of some practical value; it is described in SUPPLEMENT, No. 497. Our "Scientific American Cyclopaedia of Receipts, Notes and Queries" contains information on this subject.

(6174) J. E. S. asks if white plaster images, statuettes, or busts can be made washable without destroying or affecting the absolute whiteness of same, and if so, how? A. Heat and dip in melted paraffine, polish with a woolen cloth.

(6175) D. H. B. asks: What preparation will remove japan from finished work after it is baked and leave the metal clean and in good condition to be again coated with japan? A. Try using a saturated solution of caustic potash in water.

TO INVENTORS.

An experience of forty-four years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the recent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted July 24, 1894, AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

- Acid, sodium sulphate, magnesium sulphate, etc., obtaining, carbolic, E. W. Enequist, 523,651
Addressing envelopes and wrappers, machine for, C. A. Belknap, 523,451
Amalgamating machine water jet, A. W. Robinson, 523,410
Amalgamating machines, amalgam trough and water supply pipe for, A. W. Robinson, 523,411
Amalgamating machines, tailings discharge apparatus for, A. W. Robinson, 523,409
Amalgamator, Hayward & Robinson, 523,400
Amalgamator screen bearing, A. W. Robinson, 523,408
Awning worker, J. A. Gillin, 523,518
Axle spindle, vehicle, W. M. Barnes, 523,506
Barrel heater, J. B. & W. H. Stanhope, 523,532
Bars, rails, etc., machine for straightening, H. Wick, Jr., 523,497
Basin, bath, etc., wash, F. Adee, 523,421
Battery. See Galvanic battery.
Bed, couch, W. S. Bowie, 523,618
Bed, couch, W. S. Bowie, 523,618
Bed, crib, M. E. Converse, 523,514
Bed, sofa, Phillips & Feldman, 523,372
Beer carbonating apparatus, C. Barus, 523,450
Bicycle, M. L. Wilcox, 523,562
Bicycle saddle, R. T. Torkelson, 523,386
Bicycle seat, A. L. Girard, 523,511
Bicycle speed indicator, J. B. Staley, 523,655
Billiard or pool register, Goetze & Knopp, 523,468
Bit. See Bridle bit.
Block. See Stretching block.
Blower, C. Rumley, 523,548
Board. See Ironing board.
Boiler, C. Schenck, 523,480
Boiler flue cutter, E. Pember, 523,370
Boot or shoe attachment, J. H. Johnson, 523,578
Boot tree, H. L. Lee, 523,535
Bottle stopper, O. G. Ahlstrom, 523,419
Bottle stopper, L. Kalling, 523,474
Bottles or other glass articles, apparatus for the filling of, J. B. Staley, 523,607
Bottling machine, H. Wuelfing, 523,392
Box. See Match box.
Box fastener, L. Leber, 523,434
Brake. See Vehicle brake.
Brake mechanism, J. T. McDonald, Jr., 523,362
Bridle bit, E. B. Withey, 523,612
Buckle, P. Dalton, 523,465
Buckle, D. L. Smith, 523,550
Buffing machines, abrasive cover for, A. W. Rogers, 523,594
Buildings, construction of, J. M. Cornell, 523,425
Burner. See Vapor burner.
Butter moulding and cutting device, L. L. Mivelaz, 523,584
Butter, producing sterilized, G. Muller, 523,587
Cableway, T. S. Miller, 523,364
Camera. See Panoramic camera.
Can feeding machine, H. R. Stickney, 523,554
Cash register, H. A. & W. C. Miles, 523,453
Cash register, H. A. & W. C. Miles, 523,453
Cash register, H. A. & W. C. Miles, 523,453
Car brake system, N. Lombard, 523,436
Car coupling, L. T. Backus, 523,514
Car coupling, H. L. Dunlap, 523,426
Car coupling, J. T. Lamm, 523,427
Car fender, C. R. Hall, 523,427
Car fender, F. S. Hegg, 523,526
Car fender, E. J. Smith, 523,551
Car guard, street, C. A. Barrett, 523,507
Car heating apparatus, J. F. McElroy, 523,588
Car, railway, H. W. Libbey, 523,435
Car replacer, R. E. Alexander, 523,563
Car transom, T. C. Salvator, 523,378
Carbonating column, J. R. & H. Watson, 523,340
Carding machines, rub motion mechanism for, condenser, E. Kay, 523,640
Carpet beating machine, J. L. Leach, 523,533
Carpet sweeper, G. H. Gere, 523,339
Cash recorder and indicator, E. H. Muller, 523,549
Cash register, H. A. & W. C. Miles, 523,453
Cash register, H. A. & W. C. Miles, 523,453
Cash register, H. A. & W. C. Miles, 523,453
Cement, manufacture of, B. K. Rigby, 523,445
Chain bar sawing machine, O. Klatte, 523,433
Chain link, drive, C. E. Hart, 523,346
Chain shackle or coupling, R. J. Rae, 523,441
Chains, rolls for the manufacture of, O. Klatte, 523,432
Checkrein, A. W. Cox, 523,464
Christmas tree holder, E. Fruecker, 523,376
Chuck, C. M. Conrason, 523,328
Cigar boxes, match box and cigar cutter attachment for, C. Myhre, 523,481
Cigar bunching machine, J. De la Mar, 523,516
Clasp. See Garment clasp. Trousers clasp.
Clasp, C. Myhre, 523,481
Cloth folding machine, J. E. Widdle, 523,499
Clothes pounder, J. J. Sheehy, 523,601
Coke oven, T. & J. Cummings, 523,527
Coke oven, A. D. Shrewsbury, 523,502
Collar and bames, combined, F. D. Pelletier, 523,406
Combustible material, E. Jordan, 523,440
Cooking utensil, S. M. Hoagland, 523,624
Cooking vessel, J. F. Pack, 523,543
Copying, damping apparatus for press, W. S. Mendenhall, 523,642
Coupling. See Car coupling. Pipe coupling, Thill coupling.
Crane, hydraulic, W. L. Scaife, 523,445
Crate, folding, W. H. H. Mulford, 523,366

- Crib, folding, F. J. Ebert, 523,337
Cultivator tooth, A. V. Ryder, 523,587
Cutter. See Boiler flue cutter.
Deaf mute instruction, apparatus for, G. A. Leach, 523,536
Desk and form, school, A. Marsch, 523,538
Dish cleaner, E. A. Couch, 523,426
Door check, E. E. Punzelt, 523,548
Door controlling device, J. J. Kinsey, 523,431
Doubling webs of fabric longitudinally, mechanism for, E. & E. H. Mather, 523,363
Down draught kiln, combination, F. W. Dennis, 523,330
Dry air closet, G. R. Scates, 523,379
Dust collector, A. Heine, 523,552
Dyeing, Waldstein & Peter, 523,592
Dynamometer on car trucks, mounting, W. Biddle, 523,453
Educator, question and answer, W. R. Fearn, 523,338
Ejecting apparatus, A. Klinger, 523,561
Electric motor controlling mechanism, C. H. Richardson, 523,444
Electric motors, starting and controlling device, for, J. W. Moore, 523,586
Electrical converter, R. H. Hassler, 523,572
Electricity counter, F. A. Hildner, 523,539
Elevator gate and door, C. B. Jones, 523,439
Embryotome, C. Himrod, 523,348
Emery wheel attachment, W. E. McGennis, 523,367
Engine. See Oil engine. Steam engine.
Engine indicator, steam, H. A. Spiller, 523,417
Engines, electrical igniting device for gas, A. J. Painter, 523,369
Engine, gas heater for internal combustion, W. S. Elliott, Jr., 523,628
Exhibitor, coin-controlled surface, V. P. De Knight, 523,569
Fan attachment for swings, etc., C. M. Sherer, 523,416
Fare register and recorder, Sergeant & Hirt, 523,446
Feedwater heater, H. Blake, 523,316
Feedwater heater and cinder consumer, C. F. Hirt, 523,350
Feedwater heater and purifier, E. G. T. Colles, 523,325
Feeder for animals, time, J. A. Michael, 523,405
Felt cutting machine, wagon, J. P. Walter, 523,540
Fence, W. H. Hanson, 523,571
Fence stretcher, wire, Corns & Jenks, 523,329
Fence, wire, Hershey & Buck, 523,347
Fences, machine for weaving cross wires in wire, F. W. Shellaburger, 523,415
Fender. See Car fender.
Filter discharging device, G. H. Moore, 523,585
Filter, purifier, and grease trap, feedwater, W. Reeves, 523,486
Fire plug casings, tool for cutting recesses on the inside of, H. Thomson, 523,493
Flood gate, automatic, Milligan & Tomlinson, 523,606
Floor board set, G. A. Stewart, 523,647
Floorth, machine for the manufacture of, Isaac, F. Walton, 523,610
Flour mill air bolt, J. S. Dodge, 523,355
Fruit cleaning machine, T. H. Bell, 523,394
Furnace. See Ore roasting furnace. Roasting furnace, E. Jolicard, 523,579
Furnace, for burning refuse matter, T. P. Mahon, 523,478
Fuel, composition of matter for artificial, E. Nienstaedt, 523,368
Gauge. See Water gauge.
Gauge and finger guard, combined, A. T. Snell, 523,380
Garment clasp, G. Bradshaw, 523,458
Gas meter, W. Hinman, 523,349
Gas meter, coin freed, J. Hawkyard, 523,637
Gas, method of and means for charging and combining fermented or unfermented liquids with carbonic acid, Adam & Rehuss, 523,501
Gate. See Elevator gate. Flood gate.
Generator. See Steam generator.
Glove, boxing, B. Burdette, 523,568
Glove or garment fastening, E. Ridgway, Jr., 523,547
Grip slot closer, F. W. Gremmels, 523,636
Gun, breakdown, F. A. Hollenbeck, 523,527
Gun carriage, disappearing, W. B. Gordon, 523,570
Hanger. See Shade hanger.
Hanger, W. B. Brewster, Jr., 523,558
Harrow, G. Burkart, 523,622
Harrow, disk, Bauer & Feyerisen, 523,508
Heater. See Barrel heater. Feedwater heater.
Heater, R. H. Laird, 523,477
Heating forced draught, T. M. Rymer-Jones, 523,598
Hydrant, street, H. Thomson, 523,492
Illusory apparatus, E. Lake, 523,357
Indicator. See Bicycle speed indicator. Engine indicator. Note indicator.
Ironing board, Kinley & Shuey, 523,355
Joint. See Pipe joint.
Journal box for dredging or likemachinery, A. W. Robinson, 523,407
Kettle, J. J. Brewster, 523,582
Kiln. See Down draught kiln.
Kiln for burning pottery, clay, etc., R. Hellmann, 523,469
Kite, E. E. Thayer, 523,490
Lace fastener, E. A. Pumey, 523,377
Lamp, electric incandescent, F. M. Cazin, 523,461
Lamp holder, adjustable incandescent, S. E. Nutting, 523,482
Lamp, incandescent electric, F. M. F. Cazin, 523,460
Lamp, multiple filament, A. L. Clough, 523,395
Lamps, working arc, W. S. Horry, 523,401
Lantern, dark, W. Groom, 523,521
Lasting machine, W. W. Bostitt, 523,442
Lathe, turret, C. M. Conradson, 523,327
Launch, naphtha, C. Gould, 523,635
Lifting machine, D. Nelson, 523,440
Lock. See Rudder lock. Sash lock.
Loom warp slackening mechanism, G. F. Hutchins, 523,574
Lumber hanging apparatus for drying kilns, H. G. Wadley, 523,609
Mail marking machine, F. N. Ettridge, 523,467
Match box and ash retriever, combined, T. Schafer, 523,599
Meat mixing machine, J. H. Schaefer, 523,646
Metal bending machine, J. B. & J. J. Schneider, 523,413
Mer. See Gas meter.
Mill. See Windmill.
Millstone, M. Ams, 523,320
Minnow bucket, L. W. & W. H. Hemp, 523,470
Mould plates, process of and bath for hardening, L. B. Brown, 523,620
Moulding machine, W. W. Bostitt, 523,442
Mosaic, vitreous, L. D. Tourneil, 523,387
Music turner, sheet, B. F. Wallace, 523,420
Nail machine feeder, E. J. Smith, 523,693
Needle, ribbon, F. Kohlmann, 523,476
Note indicator, P. Carroll, 523,545
Nut lock, E. Kendall, 523,531
Nut lock, Schwab & Schaefer, 523,549
Nut lock, J. Tibbines, 523,685
Oil engine, H. Campbell, 523,511
Ordnance, device for inserting or removing tubes in, M. Gledhill, 523,633
Ordnance, pressure gauge for use on heavy, A. C. Mady, 523,404
Ore roasting furnace, H. C. Rudge, 523,487
Organ, E. E. Brock, 523,322
Organ, reed, A. J. Reynolds, 523,649
Panoramic camera, F. Dumke, 523,336
Pants guard, J. H. Collister, 523,463
Pasting machine, H. B. Beckney, 523,531
Pattern, trouser, for, Nickamp, 523,406
Peach screen, J. E. Wilson, 523,326
Pen, fountain, J. Janka, 523,352
Pencil holder, R. W. Irwin, Jr., 523,428
Perambulator, electrically propelled, E. E. Keller, 523,354
Photography, coin-operated mechanism, G. E. Tewksbury, 523,556
Photography by artificial light, B. M. Cinedinst, Jr., 523,323
Pipe coupling, flexible, J. A. Lynch, 523,583
Pipe joint, steam or water, J. A. Barbydt, 523,615
Pipe wrench, C. Fischer, 523,356
Planter, C. P. Hobart, 523,325
Planter, corn, J. Selby, 523,414
Planters, anchor for checkrow, J. Valentien, 523,398
Plug, fusible, C. G. Ludlow, 523,437
Plus, etc., means for preventing creasing of folded, A. Hox, 523,528
