for you I should be pleased to have you explain it. When I look at this view through a stereoscope, objects which should be in the foreground appear to be in the background and vice versa, and several persons to whom I have shown the picture see it in the same way. This peculiarity is particularly noticeable in the case of the trees in the background, which show above the canopy and appear through the stereoscope to be nearer the observer than the canopy is, and in the back of the canopy itself, which appears to be between the observer and the people who are sitting in front of it. By examining the picture through a stereoscope you will undoubtedly notice these things, and I should be glad to have you throw some light on the subject. A. The appearance is due to the fact that the print was not cut in two and the prints transposed, as must always be done in mounting stereoscopic photographs. See SCIENTIFIC AMERICAN, November 5, 1892.

(6399) Subscriber asks: Can I run two incandescent lamps (16 candle power) with a battery, or a number of batteries, and if so, whose make of batteries and how many of them? If it is practical to light two lamps with electricity from batteries, how would the cost compare with two Hitchcock lamps run the same number of hours, with kerosene oil at 45c. per gallon? A. Electric lighting on a small scale cannot be made to compete with kerosene. Electric lighting by means of primary batteries is both expensive and troublesome. Where it is done by secondary batteries charged by primary batteries it is somewhat less troublesome, but still expensive. See correspondence column this week for general arrangement of primary and secondary batteries. It will require 9 or 10 cells of secondary battery to run one 16 candle power lamp, but the same battery would run 8 or 10 lamps for a shorter time.

TO INVENTORS.

An experience of nearly fifty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequaled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

January 29, 1895,

AND EACH BEARING THAT DATE.

[See notice at end of list about copies of these patents.]

Advertising device, G. S. Ackley 533,335
Air brake, S. L. French 533,296
Air forcing apparatus, H. Strater 533,097
Alarm. See Gauge alarm.
Ampere meter, recording, W. H. Bristol 533,269
Amusement apparatus, G. W. MacKenzie 533,393
Animal trap, H. R. Belden 533,111
Apron supporter or suspender, J. H. Wolf 533,333
Astronomical observations at sea, instrument for taking, W. H. Beehler 533,340
Axle, separable wagon, H. Hadden 533,416
Bag. See Mail bag.
Baling machine, B. F. Hutches, Jr 533,065
Baling press, C. H. Field 533,353
Barrel elevator, M. Loftin 533,364
Barrel handling device, G. H. Spencer 533,202
Bat, baseball, A. Burrows 533,272
Battery. See Primary battery.
Bearing, differential roller, J. S. H. Holmes 533,357
Beer, etc., apparatus for treating, M. Warren 533,105
Bicycle canopy, A. B. Penton 533,371
Bicycle crank, Burton & Bradley 533,345
Bicycle handle bar, W. Carr 533,047
Bicycle saddle, H. S. Josselyn 533,300
Bicycles or tricycles, interchangeable coil spring motor and brake for, G. K. Rice 533,085
Blind slat, window, G. E. Blaine 533,045
Blower, rotary, T. W. Green ..... 533,291 to 533,293
Board. See Drawing board.
Boiler. See Sectional boiler. Water tube boiler.
Boiler, J. Player 533,080
Boiler, W. F. West 533,258
Boiler alarm gauge, A. F. Mallick 533,365
Boiler moon braces, making, S. A. Pratt 533,140
Bolt mechanism, safe, W. H. Hollar 533,293
Bolt work, bearing for safe, W. H. Hollar 533,299
Bonding collar, M. M. Jacobs 533,221
Boneblack, revivifying, M. Weinrich 533,106
