

dustry. Vol. III contains the table of contents of the two preceding volumes, so that the literature on such subjects as carbonium and monazite can readily be traced. A splendid index contains about 12,000 separate titles.

AN ELEMENTARY TEXT BOOK ON STEAM ENGINES AND BOILERS FOR THE USE OF STUDENTS IN SCHOOLS AND COLLEGES. By J. H. Kinealy. New York: Spon & Chamberlain, 1895. Pp. 236, 8vo, 103 illustrations. Price \$2.

The author is Professor of Mechanical Engineering in Washington University, St. Louis, Mo. He states that the book was written more especially for students in the universities and colleges. The student is first given an idea of thermo-dynamics, then of the action of steam in the cylinder of the engine, of the motion of the steam valve, of the differences between the various types of engines and boilers, of the generation of heat by combustion, and of the conversion of water into steam. In the derivation of some of the formulæ in thermo-dynamics the calculus is used, but the use of all mathematics higher than algebra and geometry has been avoided as much as possible. The subject is presented in a clear and concise manner.

MONOGRAPH ON FLUID EXTRACTS, SOLID EXTRACTS, AND OLEORESINS. By Joseph Harrop, Ph.G. Columbus, Ohio: Harrop & Company, 1895. Pp. 230, 16mo, interleaved. Price \$2.

By the author of the well known "Monograph on Flavoring Extracts." The druggist of to-day is fitted by reason of the good education which is now required by registered pharmacists, and handy appliances, to manufacture many of the preparations which once were the sole product of large establishments. The work treats of the articles used in the manufacture of medicinal extracts, the processes of manufacture and preservation. There are formulas for fluid extracts, solid extracts and oleoresins. The work should find a place in the working library of all pharmacists who make their own fluid extracts.

CINEMATICA DELLA BIELLA PIANO. Studio differenziale di cinematica del piano con applicazioni alla costruzione razionale delle guide del movimento circolare e rettilineo. Per L'ing. Lorenzo Allievi. Naples: Francesco Giannini & Figli, 1895. 8vo. 2 vols. Pp. 151, 29 plates.

Any of the above books may be purchased through this office. Send for new book catalogue just published. MUNN & CO., 361 Broadway, New York.

SCIENTIFIC AMERICAN BUILDING EDITION. SEPTEMBER, 1895.—(No. 119.)

TABLE OF CONTENTS.

- 1. An elegant plate in colors of a residence at Edgewater, Chicago, Ill. Three perspective elevations and floor plans. Mr. J. L. Silbee, architect. A pleasing design, with many good features.
2. A residence in the Colonial style, recently erected in Tennis Court, Flatbush, L. I., at a cost of \$7,500 complete. Perspective elevation and floor plans, also an interior view. Messrs. Stevenson & Greene, architects, New York City. An attractive design.
3. A dwelling at Bronwood Park, N. Y., recently erected at a cost of \$8,000 complete. Two perspective elevations and floor plans. Mr. J. M. Lawrence, architect, Mt. Vernon, N. Y.
4. A residence at Mt. Vernon, N. Y., recently erected at a cost of \$8,000 complete. Perspective elevation and floor plans. Mr. Walter F. Stickles, architect, Mt. Vernon, N. Y. An attractive design in the Colonial style.
5. A cottage at Bergen Point, N. J., recently erected at a cost of \$4,200. Mr. Wesley J. Havell, architect, New York City. Perspective elevation and floor plans. A neat design, showing some original and pleasing features.
6. A dwelling at Bedford Park, New York City. Two perspective elevations and floor plans. Mr. Edgar K. Bourne, architect, New York City. An attractive design in the English Gothic style.
7. A two-family dwelling recently erected at New Haven, Conn. Two perspective elevations and floor plans. Cost complete, \$5,080. Architects, Messrs. Stillson & Brown, New Haven, Conn.
8. St. Ann's Episcopal Church, Kennebunkport, Me. Perspective view and ground plans, also an interior view. Mr. H. P. Clark, architect, Boston.
9. A residence at Williamsport, Pa., recently erected for J. F. Fredericks. Architect, David K. Dean. Perspective elevation and floor plans. An attractive design.
10. A Colonial house at Far Rockaway, N. Y. Architects, Messrs. Child & De Koll. Perspective elevation and floor plans. A model design.
11. Miscellaneous contents: The Hayes metallic lathing, illustrated.—Neolith as a paint and decorative medium for relief work, illustrated.—Gas radiators, fire grates, etc., illustrated.—Improved heaters, illustrated.—Improved sash lock, illustrated.—American homes and the cabinet or parlor organ, illustrated.—The Laurie steel lath, illustrated.—The Austin & Eddy sash hanging attachment, illustrated.

The Scientific American Building Edition is issued monthly. \$2.50 a year. Single copies, 25 cents. Thirty-two large quarto pages, forming a large and splendid MAGAZINE OF ARCHITECTURE, richly adorned with elegant plates and fine engravings, illustrating the most interesting examples of Modern Architectural Construction and allied subjects.

The Fullness, Richness, Cheapness, and Convenience of this work have won for it the LARGEST CIRCULATION of any Architectural Publication in the world. Sold by all newsdealers. MUNN & CO., PUBLISHERS, 361 Broadway, New York.

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion: about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue.

For Sale—Patent No. 525,951, Sept. 11, 1894. Unloading device. Address W. T. Planiken, Tebuacana, Texas.

For pumping engines. J. S. Munday, Newark, N. J. "U. S." metal polish. Indianapolis. Samples free.

Presses & Dies. Ferracute Mach. Co., Bridgeton, N. J. Heading machinery. Trevor Mfg. Co., Lockport, N. Y.

Screw machines, milling machines, and drill presses. The Garvin Mach. Co., Laught and Canal Sts., New York.

Emerson, Smith & Co., Ltd., Beaver Falls, Pa., will send Sawyer's Hand Book on Circulars and Band Saws free to any address.

The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, \$4; Munn & Co., publishers, 361 Broadway, N. Y.

For the original Bogardus Universal Eccentric Mill, Foot and Power Presses, Drills, Shears, etc., address J. S. & G. F. Simpson, 26 to 36 Rodney St., Brooklyn, N. Y.

Expert machinist wanted by a manufacturer of cutlery and hardware specialties. Must be capable of making necessary repairs and inventing labor-saving improvements. None without highest references as to character and ability need apply. Address Manufacturer, box 773, New York.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters, or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(6613) S. D. writes: On perusing your paper of March 9, 1895, page 150, I read a paragraph headed: "Wire Fence Telephones in Australia," and thought you would be interested to learn that about seven months ago I utilized the top wire of the existing fences for telephonic use and it works to satisfaction. The line is about two miles in length, the wire being with staples as usual, no insulation is needed. At the splices we scrape off the rust and make a continuous connection.

(6614) J. L. says: What is meant by the aromatic group in chemistry? A. A class of hydrocarbons, chiefly characterized by containing a group of six carbon atoms in which, out of the twenty-four units of atomicity, eighteen are supposed to be saturated by union of carbon with carbon, leaving only six open to external saturation.

(6615) J. M. B. asks: How can the globes on incandescent lamps be colored red, blue, green, and opal? I want a coloring that will not wash off, and that will not flake off by the heat. A. 1. Prepare the glass by thoroughly washing in soap and water and drying. Then dip in bath, made by beating up the whites of two eggs in 1/4 pounds of pint of water and filtering, and hang up to dry. Dissolve the aniline color in photographer's common collodion. 2. Red or blue aniline will form clear solutions, while the green solution will require filtering. 3. Yellow aniline forms a handsome color, but the surface of the glass presents a frosted appearance after the application. 4. Violet and purple colors may be obtained by combining red and blue in different quantities. When the solution is ready, dip the prepared glass bulbs therein, hang up to dry, and finally pass a current through the bulb for half an hour, that the heat thus generated may harden the coating of the collodion, or place in a current of air. 5. The preparation can easily be removed with alcohol or sulphuric ether, but is not affected by water. Experience has shown that the best results are obtained by not using too much aniline. Make the color light rather than deep, and apply two or three coats.

(6616) W. S. says: A cannon ball is fired from a cannon in a horizontal position, another cannon ball is dropped from the mouth of same cannon at the moment of firing. Which will strike the earth first? A. The effect of gravity on a falling body is the same whether moving with high velocity horizontally or dropping vertically, but as a cannon ball fired horizontally at the cannon points in a tangent to the earth's surface, the dropping ball will reach the earth first by a very small fraction of time.

TO INVENTORS.

An experience of nearly fifty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted

September 3, 1895,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Table listing inventions with patent numbers and names of inventors. Includes items like Advertising device, Bicycle attachment, Brake, Carriage, and various mechanical devices.

Table listing inventions with patent numbers and names of inventors. Includes items like Folding table, Forging press, Furnace, Game counter, Gas engine, and various electrical and mechanical devices.
