THE CARE OF STEAM BOILERS.

Having received many inquiries concerning the best method to protect the Interior of Steam Boilers against the evil effects of pitting and other forms of corrosion, and also as to the best remedy for the removal and prevention of boiler incrustation, we consider it proper to quote reports of our acknowledged authorities on the use of steam, by whom thorough investigations have been made.

Among the many different remedies advertised, we find but one manufacturer whose products are recommended in our different scientific works, of acknowledged authority, Mr. George W. Lord, Manufacturing Chemist, Philadelphia, Pa. Author Le Van, of the Franklin Institute of Philadelphia, in a work entitled, The Steam Engine and The Indicator, says, "The Boiler Compounds manufactured by George W. Lord, of Philadelphia, have a high reputation, not only as a preventive of boiler incrustation, but also for neutralizing acids and corrosive matter."

Author Edwards, says, in The American Engineer, "Lord's Boiler Compound is the most widely known and extensively used. I have used Lord's Compound on land and at sea, during many years' service, with the most satisfactory results."

Author John S. Forum, says, in a work entitled, Practical Points, that "Mr. Lord's extensive trade is no doubt due to his scientific knowledge and skill in furnishing a preparation suited to the requirements of each individual steam user."

In the Engineer's Handy Book, by Roper, we find under the head of Scale in Steam Boilers, the following: "Lord's Boiler Compound appears to be the only chemical preparation in use that will prevent the formation of scale, or remove it after it has been formed, in any steam boiler."

Booth, Garrett & Co., Chemists, of Philadelphia, who stand at the head of their profession, make the statement over their signature, that "Lord's Compounds are free from any substance that could prove injurious to the steam boiler."

We could make quotations similar to the above from many other scientific works, if time and space would permit. Probably the best proof of merit of the chemical preparations manufactured by George W. Lord is in the fact that many other parties, who have recently entered into this line of trade, have offered to steam users their different articles as "Lord's Boiler Compound," or in using the word "Lord" in some way to mislead the manufacturer.

The genuine chemical preparations known under the head of "Lord's Boiler Compound" are manufactured only by the inventor, Mr. George W. Lord, Analytical and Manufacturing Chemist, Philadelphia, Pa.
