"Find out the cause of this effect; Or rather, say, the cause of this defect; For this effect defective comes by cause." —Hamlet, Act II.

The "effect defective" in all typewriter machines is Alignment and Impression, and the cause of the one is the inevitable wear at the point where the typebars are hinged, and that of the other the impossibility of the operator striking the keys with the varying force necessary to produce uniform impression.

The No. 2 Hammond

is perfect in all these respects. All the characters are CAST on a shuttle and the impression is independent of the operator's touch.
