### NEW BOOKS AND PUBLICATIONS.

ONE THOUSAND POINTERS FOR MACHIN-ISTS AND ENGINEERS. By Charles McShane. Chicago: Griffin & Winters. Pages 342. Price \$1.50.

This book is by a practical machinist, and relates es pecially to work on locomotives. It is designed to be an efficient guide and teacher for the apprentice, and a ready reference book for the machinist, as it gives a digest of the points gained by a modern progressive machinist in a great variety of work during many years.

SEWERAGE AND SEWAGE DISPOSAL. Henry Robinson, C.E. New York: Spon & Chamberlain. Pp. 192. Price \$3.50.

The author of this book is a well known English engineer who treats the subject from a thoroughly scientific standpoint. The work has chapters on House Drainage. River Pollution, Irrigation, Ensilage, Precipitation, Sewage Sludge, and Filtration. The book has elaborate calculations of flow in sewers, and of discharges and velocities in oval and circular sewers.

THE HOUSE WARMING MANUAL. Compiled by Sidney P. Johnston. Chi-cago: The American Artisan Press. Pp. 270. Price \$3.50.

This is a compilation of prize essays on the best method of heating a special house, the plans of which are given, by hot water. steam, and warm air. The different essays give dimensions of pipes and the location of the various parts of the apparatus, with detailed estimates of cost. One of the valuable points of the book is the discussion of the subject of ventilation.

BUILDING CONSTRUCTION AND SUPER-INTENDENCE. By F. E. Kidder, architect. Part I. Mason's Work. Pp. 409. 8vo. 250 illustrations. Price \$4.

This is a carefully prepared, handsomely printed book, intended as a guide in selecting materials for architectural masonry and giving the most approved methods of doing the various kinds of work, the latter being largely the result of the author's observation and experience It has numerous valuable tables and an excellent chapter on specifications. A second volume in preparation by the same publisher will treat of wood construction and finishing.

RUHMKORFF INDUCTION COILS. S. Norrie, New York: Spon & Chamberlain. Pp. 133. Price, paper 50

This is a handy little book designed to help the ex perimenter who desires to follow out some of the inter esting phenomena which have recently assumed such importance in the electrical world. The construction and operation of the Ruhmkorff and Tesla coils are described, with chapters on contact breakers, condensers, spectrum analysis, currents in vacuo, primary and secondary bat teries, etc., while the discussion of abstruse electrical theories is generally avoided.

MORRISON'S PRACTICAL ENGINEER AND MECHANIC'S GUIDE. By William A. Morrison. Boston: Published by the author. Pp. 144. Price \$1.

This is an especially useful little handbook for mechanics who have come up to fill positions as engineers, without having been especially educated therefor. The author has filled important positions as an engineer, and the information given in the book is largely from the ac cumulations of his many years of practical experience.

MECHANICAL DRAWING: A COURSE FOR EVENING SCHOOLS AND SELF INSTRUCTION. By Louis Rouillion. Boston: The Prang Educational Company. Pp. 86 and 29 sheets of drawings. Price \$1.25.

This is a most excellent and comprehensive work by the accomplished and highly successful professor of this specialty at the Pratt Institute, Brooklyn. The sheets and instructions cover the evening school work of two school terms of twenty-four weeks each, two or three evenings a week. The author has placed a good deal of valuable matter within small compass, and the style is so simple and direct that the youngest beginner will find no difficulty, with such help, in prosecuting the study of me chanical drawing.

MYTHS OF THE NEW WORLD. By Daniel G. Brinton, Philadelphia McKay, Pp. 360, Price \$2. Philadelphia: David

The author of this work, a professor of American archæology and linguistics in the University of Pennsylvania, has written a series of books on the language and literature and the state of knowledge among the natives of America before the Europeans came here, and is acknowledged to be one of the leading authorities in this field. The present book is "a study of an obscure the inte ellectual history of our by the light obtained through such investigations, and is thus intended more for the thoughtful general reader than

THE WHITE PINE: A STUDY. By Gifford Pinchot and Henry S. Graves. New York: The Century Company. Pp. 102. Price \$1.

This excellently gotten up monogram on the most important lumbering tree in North America is primarily designed to hasten the general introduction of light methods of forest management. Mr. Pinchot has especial qualifications for speaking to some purpose on the subject, as he has been a consulting forester at Mr. Vanderbilt's Biltmore Forest, in North Carolina 'The naturalist will be pleased with the accuracy of detail and the commercial expert will be pleased with the valuable data given touching merchantable timber, etc.

A handsome catalogue has been issued by Pott's Shorthand College, of Williamsport, Pa., of which John G. Henderson is principal and proprietor. It has some fine half tone illustrations, and sets forth in plain and simple form some of the most important things to be considered and sought after by those taking up stenography as a means of livelihood.

#### Business and Personal.

The charge for Insertion under this head is One Dollar a tine for each insertion; about eight words to a line. Adverements must be received at publication office as early as Thursday morning to appear in the following week's issue

Marine Iron Works. Chicago. Catalogue free,

"C. S." metal polisb. Indianapolis. Samples free.

The best book for electricians and beginners in elec tricity is "Experimental Science," by Geo. M. Hopkins By mail. \$4, Munn & Co., publishers, 361 Broadway, N. Y

Stay with your job, and with your wages pay installments for a profitable olive orchard. Booklet free. Wbiting's Olive Colony, Byrne Building, Los Angeles,

Cripple Creek.-Its History to date, Illustrated. Just out, with correct map and costly full page views natural as life. This great book will be sent free prepaid with our big 56 col. family paper 3 months on trial for 25c. (stamps or silver); club of 5, \$1. Latest mining news. Mention the Scientific American and address, Illustrated Weekly, Denver, Colo.

Send for new and complete catalogue of Scientific and other Rooks for sale by Munn & Co.. 361 Broadway, New York. Free on application.

#### HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters or po attention will be paid thereto. This is for our Names and Address must accompany all letters or no attention will be paid thereto. This is for our information and not for publication.

References to former articles or answers should give date of paper and page or number of question in quirires not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn.

Buyers wishing to purchase any article not advertised in our columns will be furmished with addresses of houses manufacturing or carrying the same.

Special Written Information on matters of personal rather than general interest cannot be expected without remuneration.

Scientific American Supplements referred

Scientific American Supplements referred to may be had at the office. Price 10 cents each.

Books referred to promptly supplied on receipt of

price.

Minerals sent for examination should be distinctly marked or labeled.

(6964) M. O. a ks a process for making tooth soap like Wright's myrrh tooth soap, and the ingredients that enter into its manufacture. A. Vegetable Tonic tooth wash:

Soap bark ground	2 lb.
Water	1 gal.
Add honey	4 oz.

Simmer in warm water several hours; let it stand overnight; strain through muslin. To the fluid product add an equal amount of alcohol in which has been dissolved:

Gum myrrh...... 1 oz. Oil teaberry..... Color with red sanders, digest one week and filter.

(6965) C. E. P. says: Can you give me a receipt for a blondine solution that will bleach the hair white, and also one that will color it red? A. Gaseous chlorine and hydrogen peroxide are effectual agents in bleaching hair. The hair should be thoroughly cleaned, with a warm solution of soda, then washed with water. While moist it is put into a jar and chlorine gas introduced, until the air in the jar looks greenish. Allow it to stand for twenty-four hours, and if necessary repeat. We have no directions for coloring the hair red.

(6966) A. B. says: Can you give me formula of a compound fluid, which will plate all metals by rubbing it on with a soft rag. A. 1. Silver nitrate, 2 parts; salt, 2 parts; cream of tartar, 14 parts. Pulverize and mix. 2. For thin plating dissolve in 10 or 12 drops of water and add silver nitrate, 2 parts; potassium cyan ide, 6 parts. Rub on the object.

(6967) W. L. M. writes: We have one telephone wire placed on telegraph poles four feet from telegraph wires, but our telephones repeat all message passing. What causes it, as there is no connection except wood? A. It is caused by induction, and may need through metallic circuit to overcome the trouble.

(6968) G. A. F. says: I have mention in Steele's "Fourteen Weeks in Chemistry" of fusible metal, an alloy composed of bismuth, lead, and tin. Can you give me the proportions of the respective metals? A. 1. D'Arcets: Bismuth, 8; lead, 5; tm, 3 parts. This melts below 212° Fah. 2. Walker's Bismuth, 8; tin, 4; lead, 5 parts; antimony, 1 part. The metals should be repeatedly melted and poured into drops until they can be well mixed, previous to fusing them together. 3. Onion's: Lead, 3; tin, 2; bismuth, 5 parts. Melts at 197º Fah. 4. If to the latter after removing it from the fire, one part of warm quicksilver be added, it will remain liquid at 170° Fah., and become a firm solid only at 140° Fah. 5 Another: Bismuth, 2; lead, 5; tin, 3 parts. Melts in boiling water. Nos. 1, 2, 3, and 5 are used to make toy spoons to surprise children by their melting in hot liquors. A little mercury (as in 4) may be added to lower their melting points. Nos. 1 and 2 are specially adapted for making electrotype moulds. French cliche moulds are made with the alloy No. 2. These alloys are also used to form pencils for writing, also as 

No. 4 is also used for anatomical injections. Higher temperatures, for metal baths in laboratories, may be obtained by the following mixtures: 1 part tin and 2 Electric rack signal, C. P. Wilkinson.... parts lead melt at 441.5° Fah.; 1 part tin and 1 part lead melt at 371.7° Fah.; 2 parts tin and 1 part lead melt a 340° Fah.; 63 parts tin and 37 parts lead melt at 3447

#### TO INVENTORS.

An experience of nearly fifty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequaled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

A printed conv of the specification and drawing of any patent in the foregoing list, or any patent in print issued since 1863, will be furnished from this office for 10 cents. In ordering please state the name and number of the patent desired, and remit to Munn & Co., 361 Broadway, New York. Special rates will be given where a large number of copies are desired at one time.

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list, provided they are simple, at a cost of \$40 each If complicated the cost will be a little more. For full instructions address Munn & Co., 361 Broad way, New York. Other foreign patents may also be obtained.

#### Mdvertisements.

ORDINARY RATES Inside Page, each insertion - - 75 cents a line Back Page, each insertion - - - - \$1.00 a line IFF For some classes of Advertisements, Special and Higher rates are required.

The above are cnarces per agaze line—about eight words per line. This notice shows the width of the line, and is set in agate type. This ravings may bead advertisements at the same rate per agase line. The measurement, as the letter press. Advertisements must be received at Publication Office as early as Thursday morning to appear in the londowing week's issue.

## Saunime MORRICAGN

EFF ESTABLISHED 1845. The Most Popular Scientific Paper in the World Only \$3.00 a Year, Including Postage. Weekly--52 Numbers a Year.

This widely circulated and splendidly illustrated paper is published weekly. Every number contains sixteen pages of useful information and a large number of original engravings of new inventions and discoveries, representing Engineering Works, Steam Machinery, New Inventions, Novelties in Mechanics, Manufactures, Chemistry, Flectricity. Telegraphy, Photography, Architecture, Agriculture, H rti ulture, Natural History, etc. Complete list of Patents each week.

Terms of Subscription. - One copy of the Scien-

TIFIC AMERICAN will be sent for one year -52 numbers— postage prepaid, to any subscriber in the United States, Canada, or Mexico, on receipt of Three Dollars by he publishers; six months, \$1.50; three months, \$1.00. (linbs. - Special rates for several names, and to Post-

masters. Write for particulars.

The safest way to remit is by Postal Order, Draft, or Express Money Order. Money carefully placed inside of envelopes, securely sealed, and correctly addressed, seldom goes astray, but is at the sender's risk. Address all letters and make all orders, drafts, etc., payable to

M UNN & CO., 361 Broadway, New York.

## Scientitic American Supplement

This is a separate and distinct publication from THE SCIENTIFIC AMERICAN, but is uniform therewith in size, every number containing sixteen large pages full of engravings, many of which are taken from foreign papers and accompanied with translated descriptions. THE SCIENTIFIC AMERICAN SUPPLEMENT is published weekly, and includes a very wide range of contents. It presents the most recent papers by eminent writers in all the principal departments of Science and the Useful Arts, embracing Biology, Geology, Mineralogy, Natural History, Geography Archæology, Astronomy, Chemistry, Electricity, Light, Heat, Mechanical Engineering, Steam and Railway Engineering, Mining, Ship Building, Marine Engineering, Photography, Technology, Manufacturing Industries, Sanitary Engineering, Agriculture, Horticulture, Domestic Economy, Riography, Medicine, etc. A vast amount of fresh and valuable information obtainable in no other publication.

The most important Engineering Works, Mechanisms, and Manufactures at home and abroad are illustrated and described in the SUPPLEMENT.

Price for the SUPPLEMENT. for the United States, Cauada, and Mexico, \$5.00 a year; or one copy of the SCIENTIFIC AMERICAN and one copy of the SUPPLE-MENT, both mailed for one year to one address for \$7.00. Single copies, 10 cents. Address and remit by postal order, express money order, or check,

MUNN & CO., 361 Broadway, New York.

# Building Edition.

THE SCIENTIFIC AMERICAN BUILDING EDITION IS issued monthly. \$2.50 a year. Single copies, 25 cents. Thirty-two large quarto pages forming a large and splendid Magazine of Architecture, richly adorned with elegant plates and other fine engravings; illustrating the most interesting examples of modern Architectural Construction and allied subjects.

A special feature is the presentation in each number of a variety of the latest and best plans for private residences, city and country, including those of very moderate costas well as the more expensive. Drawings in perspective and in color are given, together with Floor Plans. Descriptions, Locations, Estimated Cost, etc.

The elegance and cheapness of this magnificent work have won for it the Largest Circulation of any Architectural publication in the world. Sold by all newsdealers. \$2.50 a year. Remit to

MUNN & CO., 361 Broadway, New York.

# Export Edition

of the SCIENTIFIC AMERICAN, with which is incorporated "La America Cientifica e Industrial." or Spanish edition of the SCIENTIFIC AMERICAN is published monthly, and is uniform in size and typography with the SCIENTIFIC AMERICAN. Every number con tains about 50 pages, profusely illustrated. It is the finest scientific, industrial export paper published. It circulates throughout Cuba, the West Indies, Mexico, Central and South America, Spain and Spanish possessions -wherever the Spanish language is spoken. The Sci-ENTIFIC AMERICAN EXPORT EDITION has a large guaranteed circulation in all commercial places throughout the world. \$3.00 a year, postpaid, to any part of the world. Single copies, 25 cents.

Manufacturers and others who desire to secure foreign trade may have large and hands mely displayed announcements published in this edition at a very moderate cost. Rates upon application.

MUNN & CO.. Publishers.
